MASS EFFECT ANDROMEDA

Secondary Ops
Overview

We've dedicated this huge section of the guide to helping you not only find all the side quests but understand how and when they're unlocked, where they're located, and how to complete them.

Many quests require previous quests to be completed before they unlock. This is especially the case with Ryder's side quests and any Allies and Relationships quests. Check the prerequisites to unlock each quest to understand how and when it's unlocked. If one side quest unlocks another, you can see this in the last paragraph of the side quest text.

There are three categories of what we call side quests. These are **Allies and Relationships**, **Additional Tasks**, and **Heleus Assignments**. In addition, each Heleus Assignment has its own quest chain. When you complete a quest, its category is displayed in the Completed Missions folder of the Journal, which lists all completed missions together, regardless of type (Journal > Missions > Completed). We've done another step to identify the mission type of a completed quest, which should be in your search for what comes next.

We've alphabetically arranged the Secondary Ops. Use this table to find the quest you need help with.

CLIENTS

QUEST	QUEST TYPE	LOCATION
A Dying Planet	Heleus Assignments: Havarl	Havarl
A Lost Sister	Heleus Assignments: Havarl	Havarl
A Packaged Deal	Heleus Assignments: Kadara	Kadara
A People Divided	Heleus Assignments: Kadara	Kadara
Ark APEX	Heleus Assignments: Kadara	Kadara
Architect on Elsadam	Heleus Assignments: Elsadam	Elsadam
Aspirations	Heleus Assignments: Elsadam	Elsadam
Behind Enemy Lines	Heleus Assignments: Kadara	Kadara
Bridge Sabotage	Heleus Assignments: Voeld	Voeld
Brought to Light	Heleus Assignments: Voeld	Voeld
Conflict in the Colony	Heleus Assignments: Elsadam	Elsadam
Contagion	Heleus Assignments: Nexus	Nexus

Mass Effect: Andromeda - Level Design Postmortem

Written by: Mike Hoffman, Level Designer
Edited by: Jonathan Cooper, Level Design Director
With special contributions from: Jeff Spock, Level Designer
Overview: This is the story about how I got my job at BioWare.

My Journey from Level Designer Hopeful to Level Designer

Getting Started: Learning the Basics

I've been playing video games since I was a kid. I've been playing video games since I was a kid. I've been playing video games since I was a kid.

MASS EFFECT ANDROMEDA

Secondary Ops
A Lost Sister

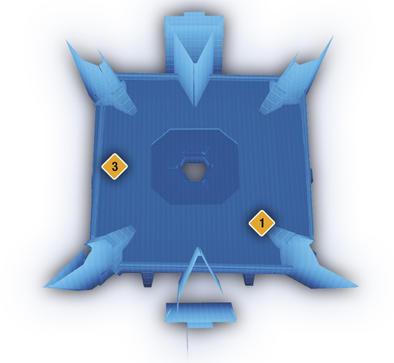
Mission Type: Heleus Assignment: Havarl

Prerequisite: Complete "Helping Havarl's Scientists"

Start Location: Havarl: Mithrava Sanctuary

Unlocking: When you reach the top of Mithrava Tower during "A Dying Planet," speak to Sage Amurd.

SPEAK TO SAGE AMURD



HAVARL: MITHRAVA

Speak to Sage Amurd **(1)** on the top of Mithrava Tower (the sanctuary), reached during "A Dying Planet." His sister, Amara, left Mithrava years ago. He longs to see Amara again, but she likely moved away from Daar Pelaav when it was overtaken by the jungle. However, records of her whereabouts might still exist.

LOCATE RECORDS IN OLD PELAAV

OLD PELAAV

When you're in Old Pelaav during "A Dying Planet," enter the south building **(2)** and try to access the angaran database inside. You discover there's no power. Exit the building and use your scanner to find the conduit underground behind the same building to lead you to a generator. Activate the generator to return power to the console. Now access the database inside.

A holographic image of Amurd's sister appears to the left of the database, and you learn she's been moved across the planet. You must return to Amurd to give him the update on his sister. Fast travel to the top of Mithrava using the forward station there **(3)**.

RETURN TO SAGE AMURD

Return to Mithrava and tell Amurd **(1)** that his sister was moved across Havarl. Hand him the data drive. He thanks you; with this information, he can see his sister again.

Sage Amurd: This is my home. If I leave it now to fulfill my duties. What if I never get to come home again?
I cannot decide for you.
fear shouldn't stop you.

MASS EFFECT ANDROMEDA

Secondary Ops

A Packaged Deal

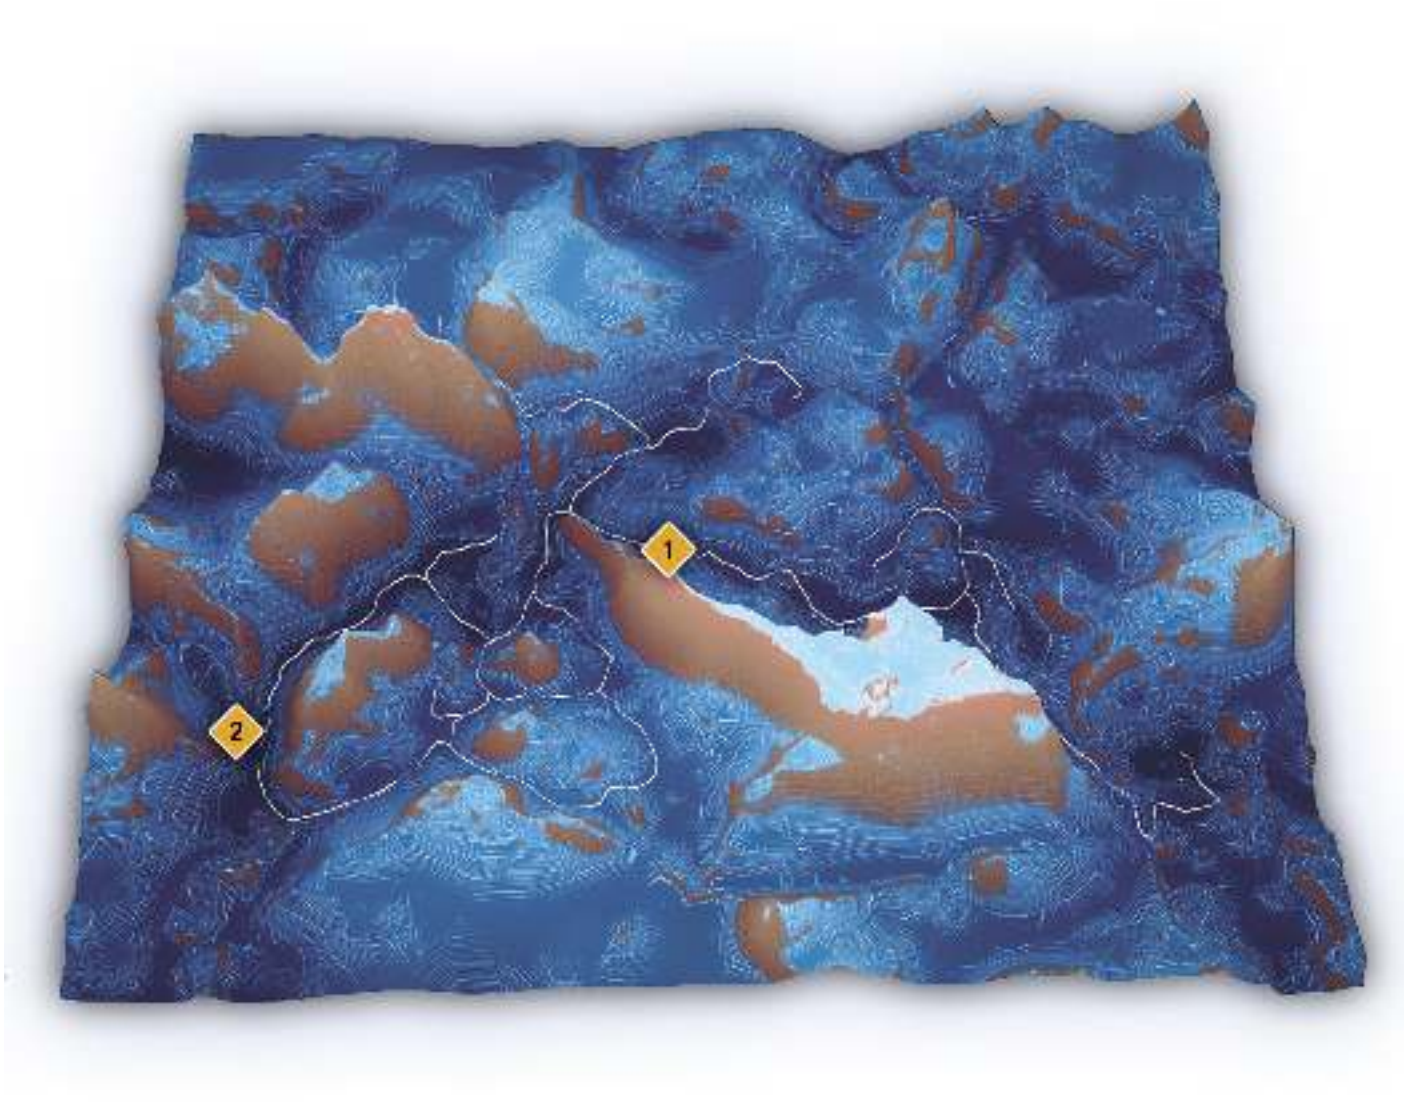
Mission Type: Heleus Assignment: Kadara

Prerequisite: Must have interrogated Vehn Terev in “Hunting the Archon”

Start Location: Kadara: Windfarm

Unlocking: Speak to Thrasia.

TALK TO THASIA



KADARA: WINDFARM

Talk to the turian merchant named Thrasia **(1)** on the first floor of the left building in the windfarm. She sells you the navpoint for a weapons cache stolen from the Nexus. Also talk to Aislin out on the cliff side. She gives you the “Gone with the Wind” quest.

TRAVEL TO THE NAVPOINT

Take the Nomad southwest past Sulfur Springs to this remote location **(2)**. You find a dropship delivering a load of Raiders near acid pools when you arrive.

DEFEAT THE EXILES

Defeat the exile Raiders. There’s not but a handful. Make quick work of them.

EXAMINE THE WEAPONS CACHE

WEST KADARA

Follow the navpoint to the inside of a large shipping crate. Examine the cache prompt inside. You note that it’s full; you’d thought the whole thing was a scam. While you’re there, raid the many containers inside the shipping crates for a load of good stuff. Search thoroughly; there’s a lot stuffed in one crate.

CONFRONT THRASIA

WINDFARM

Head back to talk to Thrasia **(1)** at the windfarm. You tell her the cache was a setup. She acts pretty nonchalant about the entire situation and tells you she sold the navpoint to multiple people. This completes the mission. Use her as a merchant to get some cool Nomad upgrades. You also earn a small amount of AVP and Kadara Viability +2%.

Secondary Ops

A People Divided

Mission Type: Helios Assignment: Kadara

Prerequisite: Complete "Murder in Kadara Port"

Start Location: Kadara Slums Bar

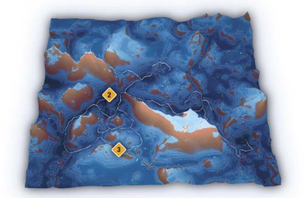
Unlocking: Speak to Reyes to end "Murder in Kadara Port."

SPEAK TO REYES

KADARA SLUMS BAR

A string of violent murders plagues Kadara Port. Reyes Vidal **(1)** believes the Roekaar are the culprits. At the end of "Murder in Kadara Port," he recruited you to investigate the murders and prove his theory correct.

GO TO THE CRIME SCENE



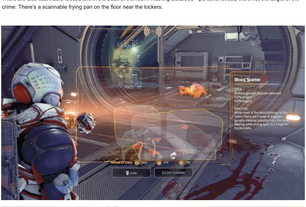
KADARA: SULFUR SPRINGS

While in *Sulfur Springs*, enter this building **(2)** on a plateau east of the west Remnant monolith and overlooking the future site of the Initiative outpost. This area also pings with the location of the transponder Vehn Terev claimed he buried (a "Hunting the Archon" Priority Ops mission). When you push open the front doors, you contact Reyes via comms and let him know you're at the crime scene. He tells you the victim is a krogan male by the name of Zear.

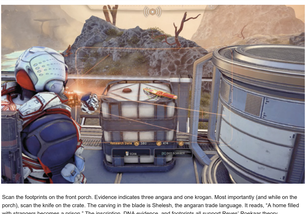
SCAN ALL CLUES AT THE CRIME SCENE

Bring up your scanner and start going over the room with a fine-tooth comb. You find blood splatter on the floor just as you enter, and you see bloody footprints leading away from a dead krogan in the next room. Scan the krogan to discover angaran blood and stands to match Reyes' Roekaar theory. You tell Reyes you count at least three attackers, and it looks like an ambush.

There are also scannable footlockers in the back of the room. Nothing disturbed—personal effects were not the target of the crime. There's a scannable frying pan on the floor near the lockers.



Blood Spatter
Blood splatter from attack victim.
Scan to add to Codex.
+100 Research
Blood stains of the victim's blood on the floor, where they were made by attackers quickly slicing at passing victims to kill them. Looks like a group of at least three attackers.



Scan the footprints on the front porch. Evidence indicates three angara and one krogan. Most importantly (and while on the porch), scan the knife on the crate. The carving in the blade is Shelesh, the angaran trade language. It reads, "A home filled with strangers becomes a prison." The inscription, DNA evidence, and footprints all support Reyes' Roekaar theory.

MEET REYES AT THE ROEKAAR HIDEOUT

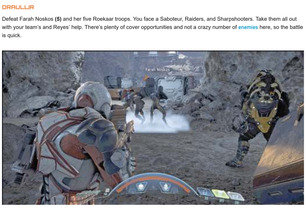
Reyes' own investigation resulted in the murderers' location, and he wants to meet you. When you reach his navpoint **(3)**, you discover a very small outpost next to the mountainside, not far from the Draulir Forward Station. Enter the outpost.

Reyes is nowhere to be seen inside. In seconds Roekaar recruits burst into the room with weapons drawn and demanding you to be quiet, as "Farah" will deal with you. The Roekaar lead you into Draulir **(4)** at gunpoint to a meeting with Farah Noskos, an angaran woman holding the knife used in the murders. She admits that the victims were invaders and sympathizers. Just then, Reyes makes a grand entrance with explosives, and the battle with the Roekaar begins.

DEFEAT THE ROEKAAR

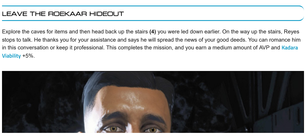
DRAULIR

Defeat Farah Noskos **(5)** and her five Roekaar troops. You face a Saboteur, Raiders, and Sharpshooters. Take them all out with your team's and Reyes' help. There's plenty of cover opportunities and not a crazy number of enemies here, so the battle is quick.



LEAVE THE ROEKAAR HIDEOUT

Explore the caves for items and then head back up the stairs **(4)** you were led down earlier. On the way up the stairs, Reyes stops to talk. He thanks you for your assistance and says he will spread the news of your good deeds. You can romance him in this conversation or keep it professional. This completes the mission, and you earn a medium amount of AVP and Kadara Viability +5%.



MASS EFFECT ANDROMEDA

Secondary Ops

Aid APEX

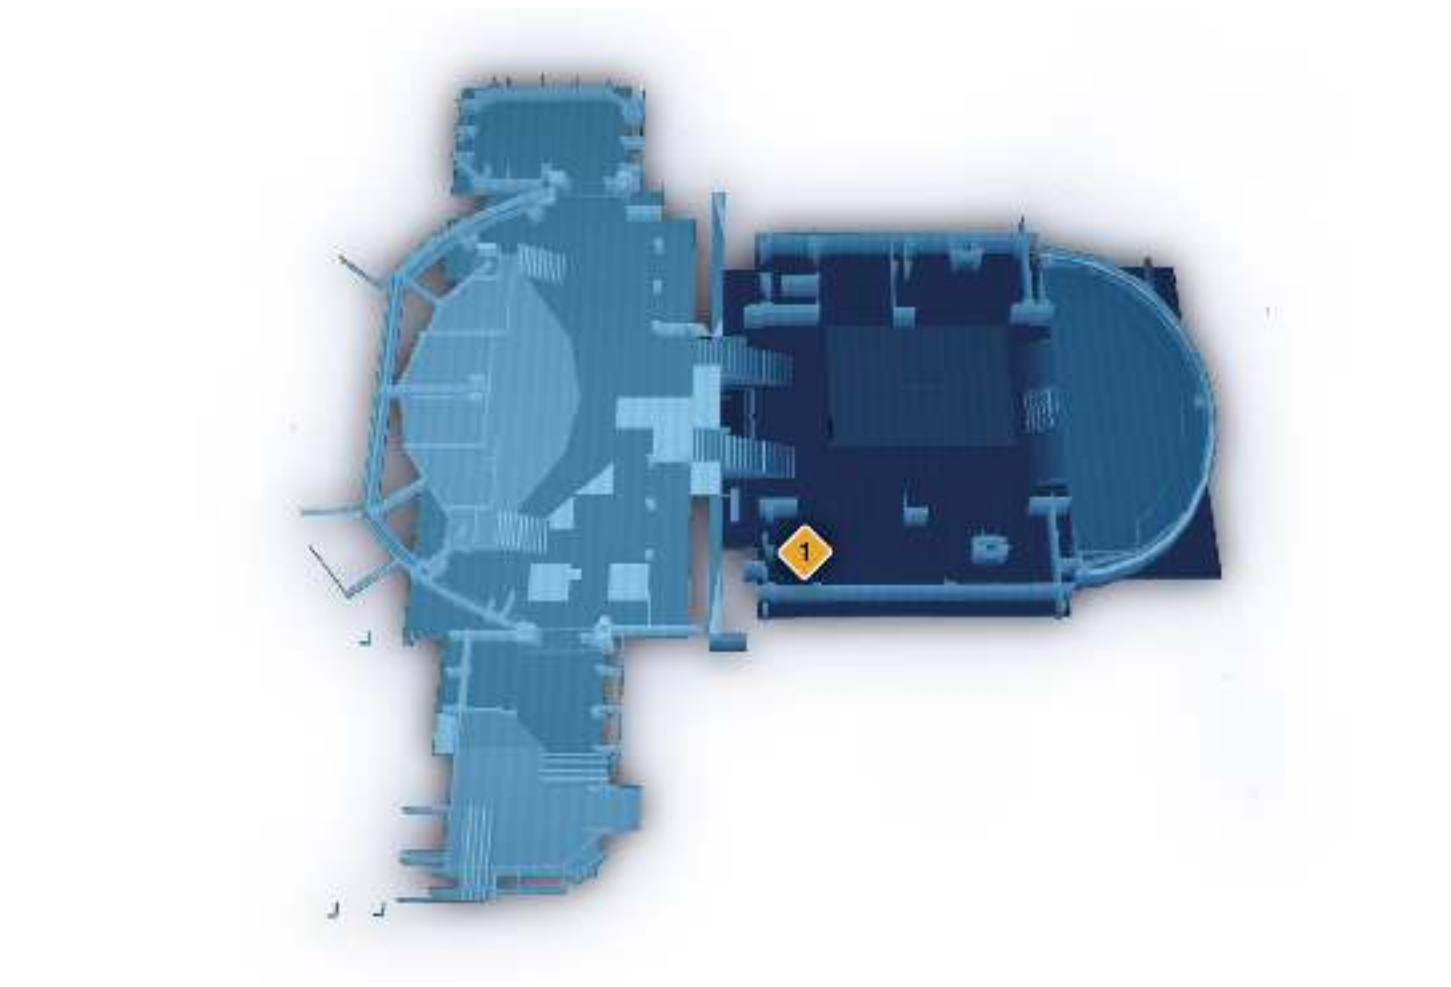
Mission Type: Heleus Assignment: Nexus

Prerequisite: Nexus Phase 2, Prodromos settled, strike team used

Start Location: Nexus Operations: Militia Office

Unlocking: Speak to Lieutenant Sajax or interact with the Strike Team Missions interface.

SPEAK WITH LIEUTENANT SAJAX OR ASSIST AT THE APEX TERMINAL



NEXUS OPERATIONS: MILITIA OFFICE

Interact with the Strike Team Missions interface or speak to Lieutenant Sajax after Phase 2 of the Nexus. They're both located in the militia office **(1)** in operations. Sajax needs assistance getting APEX up and running effectively. APEX **strike teams** are used to protect the settlements you put in place.

Lieutenant Sajax: We don't have a good sense of what we're up against and could benefit from your exper ence
Gotta get dirty
Starts with education

GATHER INTEL ON 20 ENEMIES

Scan as you explore; you get into a habit of it soon enough. This quest is a reward for all the enemy scans you do regardless. Scan 20 different kinds of **enemies** to aid APEX. Go get scanning! Check our **Enemies** section for a list of all scannable **enemies**.

MASS EFFECT ANDROMEDA

Secondary Ops

Architect on Elaaden

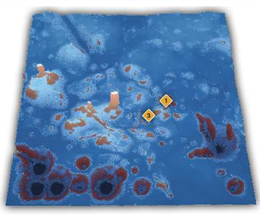
Mission Type: Heleus Assignment: Elaaden

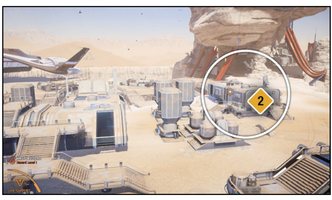
Prerequisite: Settle Elaaden—place an outpost on Elaaden

Start Location: Elaaden Outpost

Unlocking: Give Morda the drive core during "Search for the Stolen Remnant Drive Core" and then create an outpost on Elaaden.

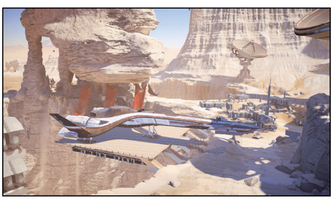
CREATE AN OUTPOST





ELARDEN: NEW TUCHANKA

A report has come in from New Tuchanka about a giant Remnant construct that has appeared and is working a path toward the outpost. Create an outpost on Elaaden. See "Search for the Stolen Remnant Drive Core" and "Settling Elaaden" for information on settling Elaaden and the ability to put an outpost there.



SPEAK TO THE OUTPOST LEADER

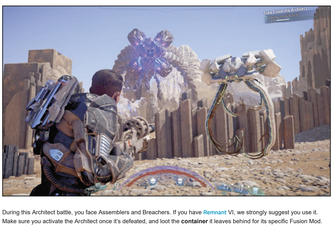
After placing an outpost on Elaaden, and after the auto-conversation with Addison, exit the command center and follow the *navpoint* into the next building **(2)** to the south. Talk to Kariste Archika, the asari leader of the outpost. In your conversation with her, ask her about the outpost status. She talks about the Architect on Elaaden. Tell her you'll take care of it.

DEFEAT THE ARCHITECT

The Architect's location is marked with a navpoint **(2)** near the next forward station to the west in Languish. When you reach the battlefield, you find the Architect flying above. Chase him down until he lands. For tips on defeating an Architect (the process is the same with all of them), see our Architect tips in the Enemies section of this guide.

What does change from one Architect battle to the next is terrain strategy and the different Remnant enemies you face between the stages of the Architect attacks.

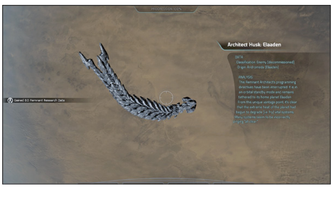
Here on Elaaden, all the Remnant pillars scattered across the battlefield provide plenty of cover opportunities. You have a forward station extremely close to the battle zone, which is useful if you use up all the easily accessible ammo and health crates.



During this Architect battle, you face Assemblers and Breachers. If you have Remnant VI, we strongly suggest you use it. Make sure you activate the Architect once it's defeated, and loot the **container** it leaves behind for its specific Fusion Mod.

SPEAK TO THE OUTPOST LEADER

Head back to your outpost and speak to Kariste **(2)** to deliver the news that the Architect has been pacified. She thanks you and puts the final nail in this quest's coffin. Remember, the next time you're in orbit around Elaaden, to scan the Architect from the Tempest and earn the 60 Remnant Research Data from it.



Secondary Ops

Aspirations

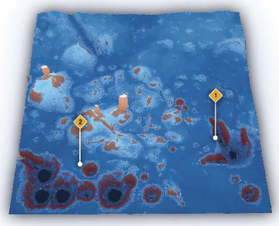
Mission Type: Heleus Assignment: Elaaden

Prerequisite: Access to Elaaden; must have interrogated Vehn Terev in Hunting the Archon

Start Location: Elaaden

Unlocking: Approach the outpost

SPEAK TO DIRK BARRETT



ELAADEN: SEA OF ATARAXIA

Approach this small outpost (**1**) to the northeast of the Paradise, which is settled next to the same canyon (or very large pit). Open the front door to find Dirk Barrett and two other Outlaw Raiders inside and ready to fight.

After Barrett says he's glad you haven't shot him in the face, a conversation prompt triggers that gives you the choice to do just that, or allow him to talk. We suggest you allow him to talk. He tells you he needs your help. The Raiders need a bigger base, and there's one about 20 clicks away that another gang has taken. He wants your help clearing it out. Afterward you can grill him about his operation and what else the Raiders might want later.

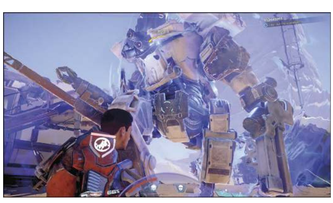
HEAD TO THE OUTPOST

PARADISE SANDS

Barrett harbors aspirations of turning Elaaden into something more than the lawless wasteland it is now. To do that, he needs a well-fortified hideout and has his sights set on a rival gang's outpost. You can find this outpost (**2**) in Paradise Sands. It's a desolate area that stands out like a sore thumb. Look for the three large floating machines hovering around a fort.

CLEAR OUT THE SCAVENGERS

You can easily enter the outpost through the large ungated front entrance. Your biggest threat is the dominant Hydra in the middle of the compound. Take this mech on first before dealing with the other Outlaws, which include Saboteurs, Raiders, Sharpshooters, and Pariahs.

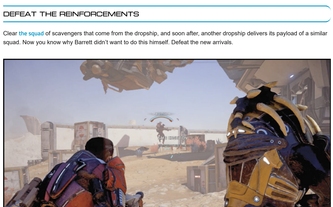


SECURE THE OUTPOST FOR BARRETT

After clearing the outpost (once), a dropship arrives to deliver another wave of scavengers to continue the battle for the outpost. The squad consists of a few Raiders and a Sharpshooter.

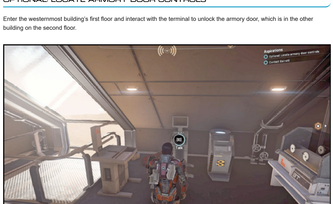
DEFEAT THE REINFORCEMENTS

Clear the squad of scavengers that come from the dropship, and soon after, another dropship delivers its payload of a similar squad. Now you know why Barrett didn't want to do this himself. Defeat the new arrivals.



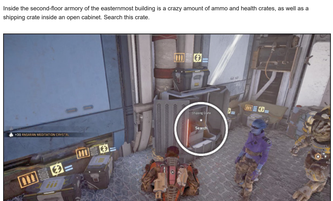
OPTIONAL: LOCATE ARMORY DOOR CONTROLS

Enter the westernmost building's first floor and interact with the terminal to unlock the armory door, which is in the other building on the second floor.



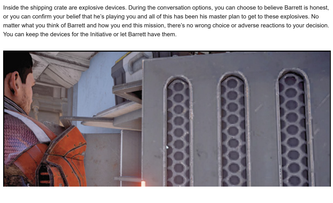
OPTIONAL: INVESTIGATE THE ARMORY

Inside the second-floor armory of the easternmost building is a crazy amount of ammo and health crates, as well as a shipping crate inside an open cabinet. Search this crate.



DISARM EXPLOSIVE DEVICES

Inside the shipping crate are explosive devices. During the conversation options, you can choose to believe Barrett is honest, or you can confirm your belief that he's playing you and all of this has been his master plan to get to these explosives. No matter what you think of Barrett and how you end this mission, there's no wrong choice or adverse reactions to your decision. You can keep the devices for the Initiative or let Barrett have them.



MASS EFFECT ANDROMEDA

Secondary Ops

Behind Enemy Lines

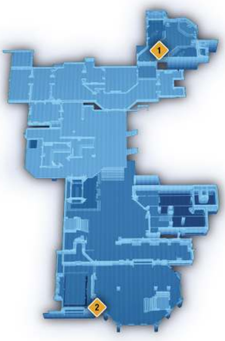
Mission Type: Heleus Assignment: Kadara

Prerequisite: Must have interrogated Vehn Terev in "Hunting the Archon"

Start Location: Karada Outcast Headquarters

Unlocking: Talk to Kaetus.

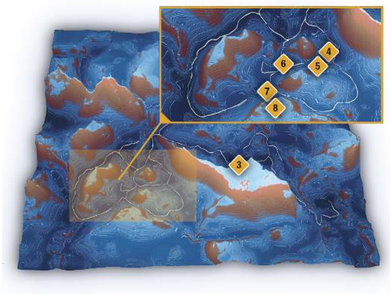
TALK TO KAETUS



KADARA OUTCAST HEADQUARTERS

Upon their arrival, Sloane Kelly and the Outcasts pushed back the kett from Kadara Port, but there are rumors that a band of stragglers is still causing trouble in the badlands. Kaetus **(1)**, Sloane's second, has asked you to investigate. Travel to the transit console **(2)** and head to the slums.

LOOK FOR SIGNS OF KETT ON KADARA



KADARA

Leap over the warden's gate and head to the forward station **(3)** to call the Nomad. Drive the Nomad to Sulfur Springs and find the shuttle wreckage **(4)**.

SPEAK TO THE SURVIVOR

Talk to the injured angaran trader lying next to the burning shuttle wreckage. He's too injured to be moved, and he confesses that the kett took his party by surprise, killed everyone, and he lasted the longest. He says that after the attack, the kett made for the hills.

SCAN FOR KETT TRACKS

Scan the crashed shuttle for Research Data, then drive the Nomad south to the nearby road. Stop at the navpoint on the road **(5)**, jump out, and scan the footprints leading away from the dead body there. The next set of tracks **(6)** to scan is west on the same road. Find the tracks just beyond the Draullir cave entrance and before the fork in the road.

TRACK THE KETT TO THEIR HIDEOUT

Follow the navpoint southwest down the road to the entrance of a large cave **(7)**. Head inside and find a metal doorway. Sloane Kelly greets you as you enter the base. She tells you she's not about to let you fight her battles. The kett burst in and disrupt the impromptu meeting.

DEFEAT THE KETT

DRAULLIR

Battle the kett on the catwalks and those advancing toward you from deeper in the cave system. You face a handful of Chosen, an Anointed, and a Destined. Once the enemy is defeated, the quest ends. You earn a medium amount of AVP and +5% Kadara Viability. Raid the caves' containers and scan the large kett device **(8)** in the farthest nook in the back of the caves.

MASS EFFECT ANDROMEDA

Secondary Ops

Bridge Sabotage

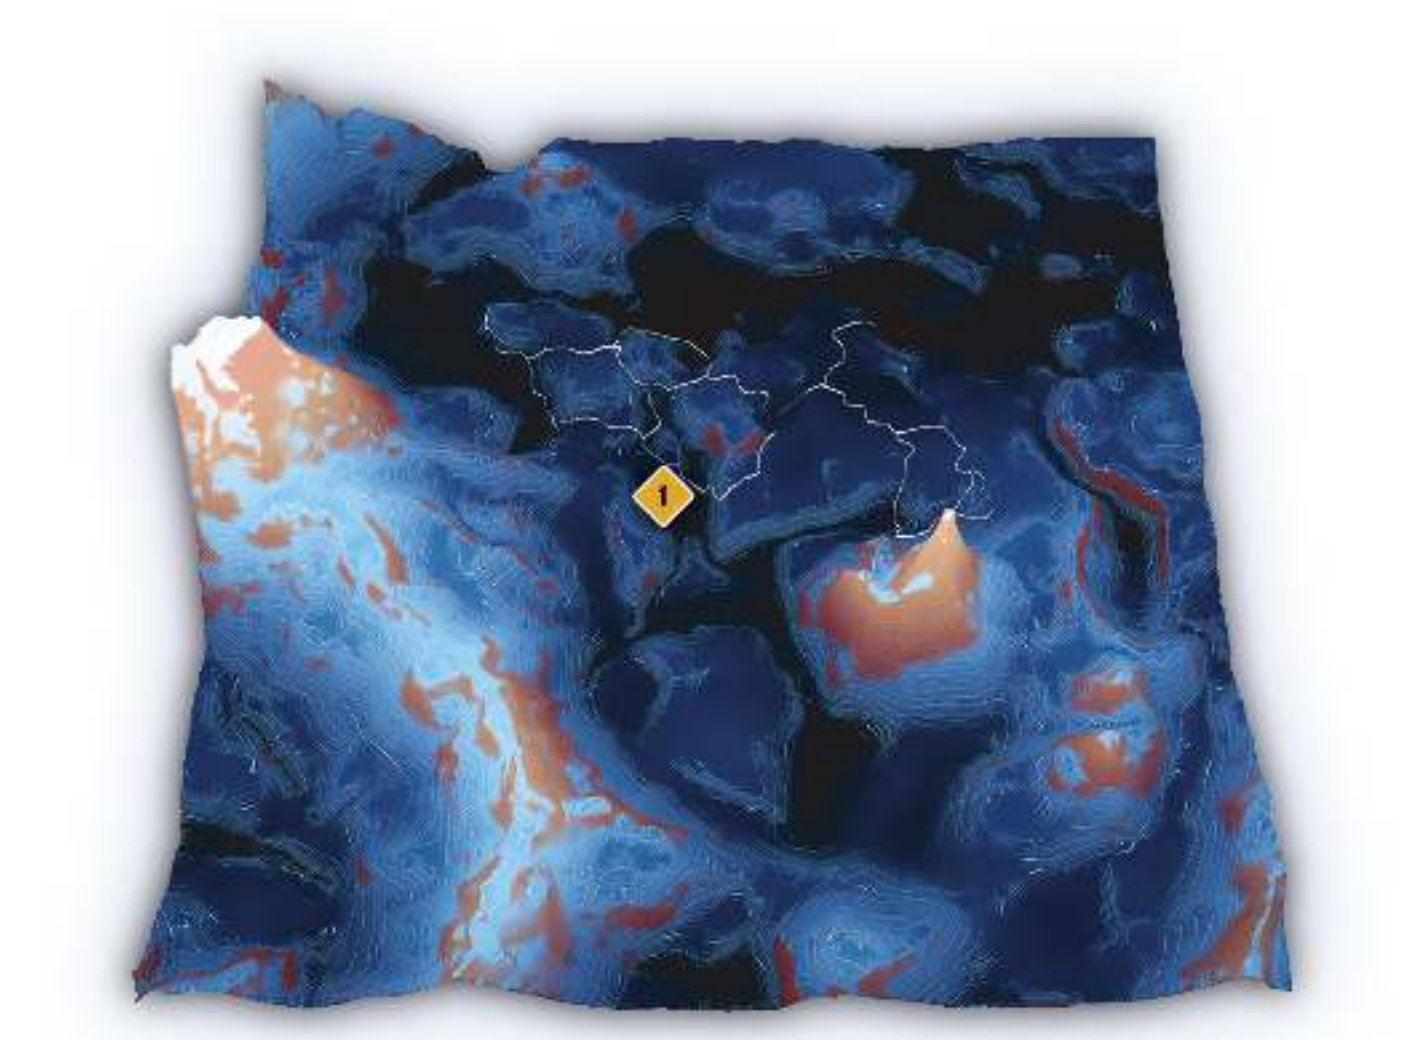
Mission Type: Heleus Assignment: Voeld

Prerequisite: Mission 2, complete “Return to the Tempest” after Aya during “A Trail of Hope”

Start Location: Voeld, southwest of Techiix

Unlocking: Approach the sabotaged bridge on a road southwest of Techiix.

FIND THE BOMBS



VOELD: BRIDGE SOUTH OF TECHIIX

While driving over this bridge **(1)** on the road south of Techiix, you discover kett scattering this way and that. Jump out of the Nomad and gun them down.

Four navpoints appear on the bridge. These are not exact locations but general search areas marked. When you approach a navpoint, follow your radar indicator to home in on the nearby detonator.

DISARMING KETT EXPLOSIVE DEVICES

If you approach the bridge from the northwest entrance, the first explosive device **(2)** is on the bridge support beam over the right side of the bridge. Scan it and then disarm it.

Get back to the top of the bridge and drive almost halfway across to find the next explosive device **(3)** on the edge of the road on the right side. Scan it and disarm it. Drive just a little farther to find the next one **(4)** on the left side of the road.

Lastly, drive to the east end of the bridge and turn left around the side of it to find the last device **(5)** stuck to the northeast support beams (next to some iridium). Scan and disarm it to complete the mission and collect 190 XP.

MASS EFFECT ANDROMEDA

Secondary Ops

Brought to Light

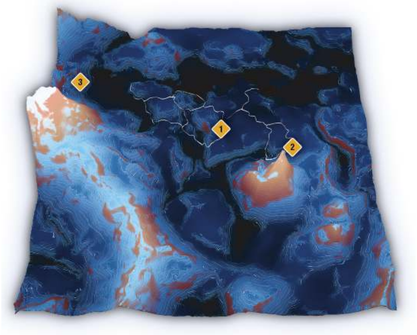
Mission Type: Heleus Assignment: Voeld

Prerequisite: Mission 2, must have traveled to Aya first

Start Location: Voeld: Techiix

Unlocking: Speak to Rjoek.

SPEAK TO RJOEK



VOELD: TECHIIX

Find Rjoek **(1)** behind one of the angaran cruisers near the mouth of the leftmost cave entrance at Techiix. Rjoek, an angaran historian, sent his colleagues to recover a priceless artifact from the Reoesk ruins, but they haven't returned. He's asked for help getting them out of kett territory.

TRAVEL TO THE REOESK RUINS

REOESK RUINS

The Reoesk ruins **(2)** are dangerously close to the kett base in the mountain, which is probably why they're in ruins. Find this one bustling daar tucked away in the side of a snowy hill. Travel on top of the hill to discover an alternate way inside—the top of the daar is revealed through a large opening in the snowy landscape.

DEFEAT THE KETT

When you reach the heart of the ruins, you find yourself walking into a battle between kett and some Resistance fighters. Help the angara defeat the kett. Keep your eye on the radar, because enemies rain down on you from above via a couple of dropship deployments.

SPEAK TO ASTRA

After defeating the kett, follow the navpoint to the gal in charge. Astra tells you that Rjoek is a smuggler from Kadara and he just wants to sell the ancient Voeld map to the highest bidder. Astra says Rjoek is misguided. Her advice: Take it easy on him and bring the map to the Resistance.

OPTIONAL: CONFRONT RJOEK

This part of the mission is optional. If you hold a grudge against Rjoek for lying to you, head back to Techiix **(1)** and have a word with him. If you have Jaal with you (which you should), ask him how he would deal with the situation while talking to Rjoek. Jaal suggests that he report back to the Resistance, that he still has some usefulness in him.

GIVE THE MAP TO INTELLIGENCE OFFICER KAAS

Use the forward station to return to the Resistance base **(3)**. Find Kaas in the main operations area, standing near the consoles and the large holo-map of Voeld. You can talk to him about much, but most importantly, tell him you found the map to complete the mission.

MASS EFFECT ANDROMEDA

Secondary Ops

Conflict in the Colony

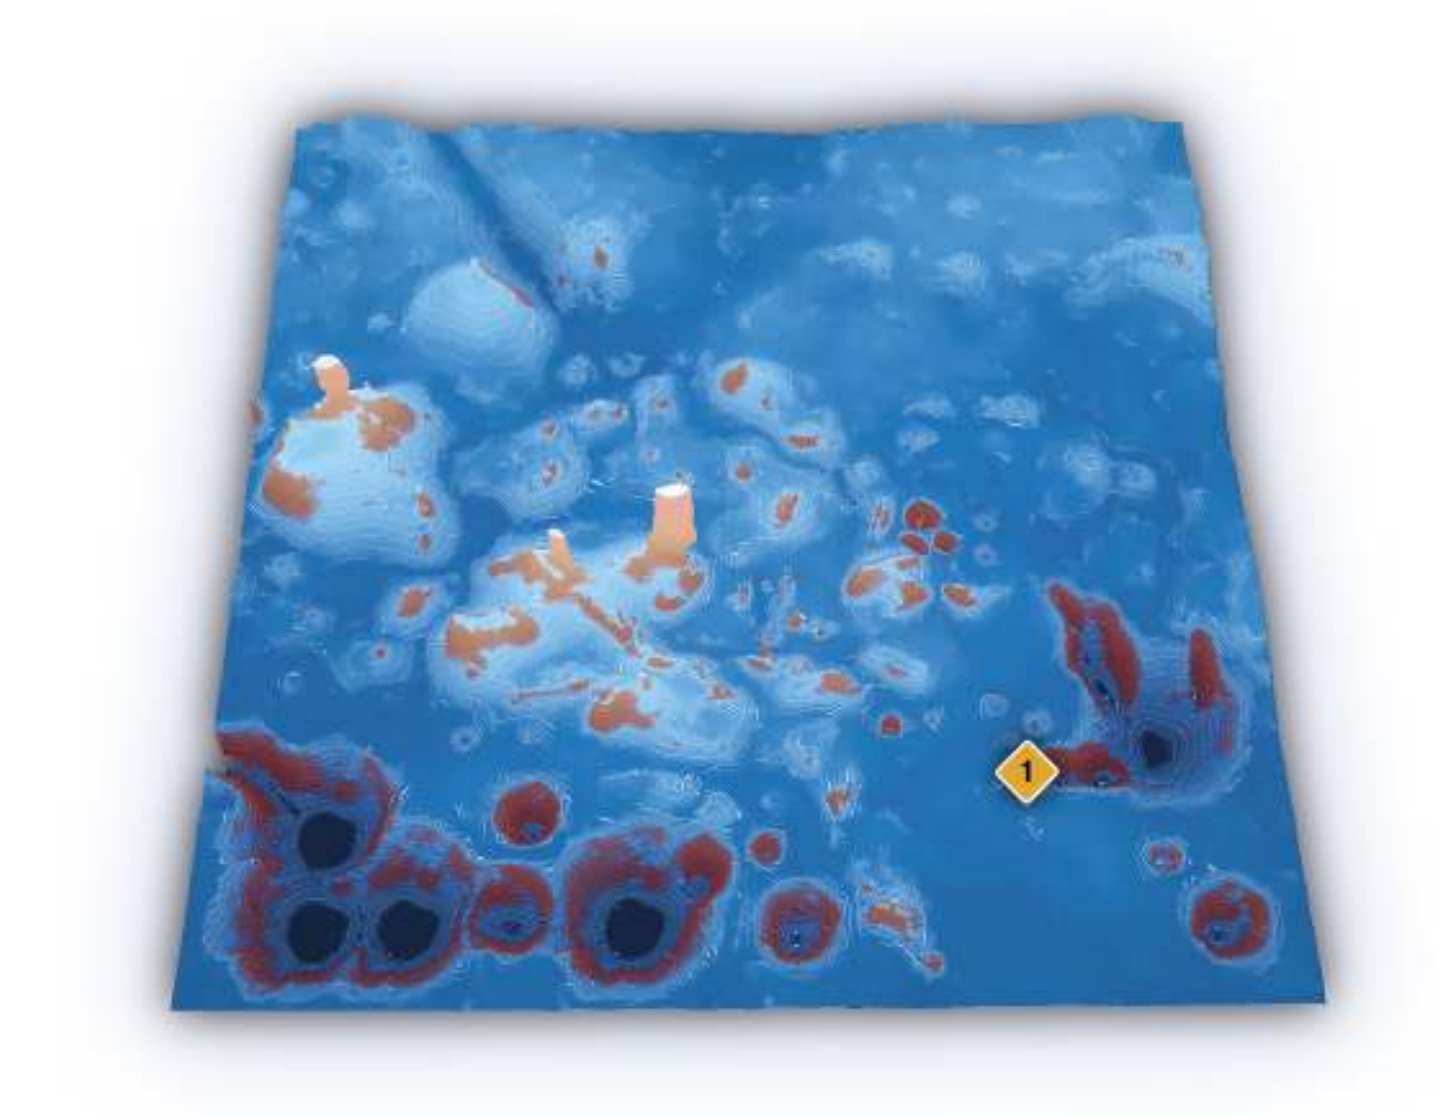
Mission Type: Heleus Assignment: Elaaden

Prerequisite: Access to Elaaden; must have interrogated Vehn Terev in “Hunting the Archon”

Start Location: Elaaden: The Paradise

Unlocking: Enter the Paradise on Elaaden.

VISIT THE PARADISE



ELAADEN: THE PARADISE

A krogan contact named Jorgal Strux has asked to meet secretly at the Paradise on Elaaden. Fulfill this first objective by entering the Paradise (in Paradise Sands, Elaaden).

LOCATE A KROGAN NAMED JORGAL STRUX

Follow the navpoint out the side door of the Paradise, up the catwalks, and to the left to find a shuttle landing pad. There’s a group of krogan standing on the far edge of the dock. This is the group you’re looking for.

SPEAK TO STRUX

Talk to Strux. When pressed about the issue of trouble at the colony, Strux confesses that the leader, Morda, has become a tyrant and she’s planning an attack against the Nexus. You can tell him Drack trusts Morda and that you trust Drack. He suggests you go to the krogan colony to see for yourself what she’s planning, then suggests you talk to Ravanor Brenk. After the conversation, this quest completes, but it unlocks “Parlay with the Krogan,” in which you must visit the colony at New Tuchanka.

Secondary Skill
Cryptography

Mission Type: Optional Objective/Hack

Prerequisite: Normal Difficulty **Notes** approx

Main Location: Ryncol, Kuwunda Outpost

Underlying: You will unlock the Cipher Door which you reach the docking bay.

PRIVY ACCESS: PRESS CAPTION: GLASS

You get an email from Kahl, asking you to come speak to the **Cipher** system lacking "locking the Archon".

SWEEP WITH CLEARER ON THE CRYOTUBE 2

SPEAK WITH KAHL'S INTERROGATION CRYOLIDS IN THE DOCKING AREA

SPEAK WITH AN INTERROGATION CRYOLIDS IN THE DOCKING AREA

SCALE CONTAINER DOOR

Take the door to the Space entrance. Head to the contained corner and talk to the investigator (with nothing) talk, ordinary scientist. A giant terminal monitor is mounted next to the Shielded system. Roll Master. The

MASS EFFECT ANDROMEDA

Secondary Ops

Cora Harper: A Foundation

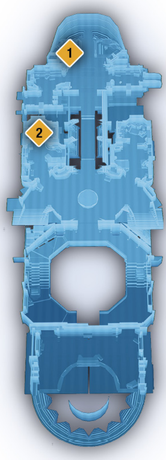
Mission Type: Allies and Relationships

Prerequisite: Have Cora's loyalty from completing "At Duty's Edge"

Start Location: Tempest

Unlocking: Read email from Cora.

READ EMAIL FROM CORA



TEMPEST

Read the email **(1)** that comes after you've won Cora's loyalty and are in very good standing with her, relationship-wise. The email is titled "Inspiration," and she asks to chat next time you're both on the ship. Now's a good time.

SPEAK TO CORA ON THE TEMPEST

Talk to Cora in the bio lab **(2)**. If you're not romantically involved with her, she asks you to accompany her to a site on Eos. If you're in a heavier relationship, see the Secondary Op "Duty Calls."

GO TO EOS WITH CORA

EOS: GOLDEN WASTES

Land on Prodromos **(3)**, then use a forward station **(4)** to get to Site 1.Enter the Nomad and drive north to Site 2 and a little beyond. Head to the small peninsula **(5)** on the west side of the pond.

Clear the critters around the camp and then meet Cora **(5)**. You take her out to the edge of the pond and show her the garden you started for her. She says training is her foundation. You spread seeds together, and the mission ends.

Secondary Ops

Cora Harper: Asari Ark

Mission Type: Additional Task

Prerequisites: Visit Aya or (optional) download asari data during "Cora Harper: Asari Ark" on Eos

Start Location: Eos: Shwartsp

Unlocking: Talk to Cora on the Tempest after visiting Aya or (optional) downloading the data from the crashed asari escape pod on Eos in "Cora Harper: Asari Ark."

WATCH FOR SURVIVORS OF THE ASARI ARK

PREREQUISITE CONDITIONS

To unlock Cora's Loyalty Mission, you must have completed the vault on Eos and traveled to Aya (Orean system) at least once. Talk to Cora aboard the Tempest.

READ EMAIL FROM CORA

When you return to the Tempest from the Aya hub (and meet all the prerequisites for unlocking this mission), check your email and read the one from Cora labeled, "Asari refugees!" She ends the email requesting to speak with you.

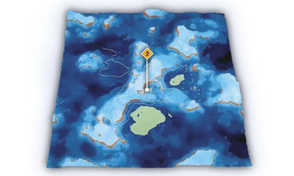
Asari refugees!
To: Ryder
From: Cora
Ryder,
There's a report of asari refugees in the Tiaxa nebula. It might mean
asari that are, say, well-to-do when you're rich.
Cora

SPEAK WITH CORA ON THE TEMPEST

TEMPEST: CORA'S ROOM

When you first talk to Cora **(1)** in her room on the Tempest—after returning from Eos, having discovered the asari escape pod—she tells you there was news that asari refugees showed up at Prodromos. Hydaria oversees this group. Tell Cora, "We should speak to her." Cora wants to tag along when you go.

TAKE CORA TO SPEAK WITH HYDARIA ON EOS

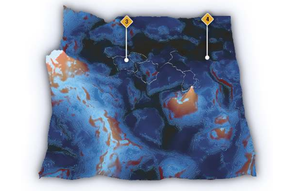


EOS: PRODROMOS

If you forget to take Cora with you the next time you go to Prodromos, use the forward station to choose her from the loadout menu. With that done, enter the second building **(2)** behind the parked Tempest to speak to Hydaria. Cora tells her she's looking for asari ark survivors. Hydaria says they were attacked by elite kett hunters. Apparently Sarissa gave the evacuation order, and if you find the ship that escaped, the crew can tell you where to find the ark. Trace the transponder to find the escaped ship, the Periphona.

TRACK THE PERIPHONA'S SIGNAL FROM VOELD

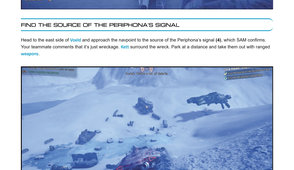
VOELD



Travel to Voeld, and along your travels in the Nomad, set the mission selection and follow the navpoint to the top of a mountain **(1)**.

FIND THE PERIPHONA

When you drive close to the navpoint **(1)** on a snow-covered mountaintop, SAM says the ice or mineral deposits may be reflecting a false positive and that the real signal must be close. There's no sign of the Periphona here. Move on.



FIND THE SOURCE OF THE PERIPHONA'S SIGNAL

Head to the east side of Voeld and approach the navpoint to the source of the Periphona's signal **(4)**, which SAM confirms. Your teammate comments that it's just wreckage. Kett surround the wreck. Park at a distance and take them out with ranged weapons.

FIND THE PERIPHONA'S TRANSPONDER

When the kett threat has been eliminated, investigate the wreckage and begin scanning the various debris scattered about. After you scan a few debris items, the navpoint centers on the transponder. Scan the transponder and interact with it. The find confirms that the wreckage is from the Periphona. The audio states that if the ark finds this recording, then "they failed and the data copy is lost." SAM lends assistance to find the ark using the transponder. You earn 29 AVP for this discovery.

MISSION ON HOLD—BUT REALLY, IT JUST ENDED

At this point in the mission, you must wait for Cora to decipher the transponder data. This doesn't happen until you advance the Priority Ops mission "Hunting the Archon" to the point of interrogating the prisoner at Kadara Port (Outcast Headquarters). "Cora Harper: Asari Ark" ends here and continues as "Cora Harper: An Duty's Edge."

MASS EFFECT ANDROMEDA

Secondary Ops

Cora Harper: Duty Calls

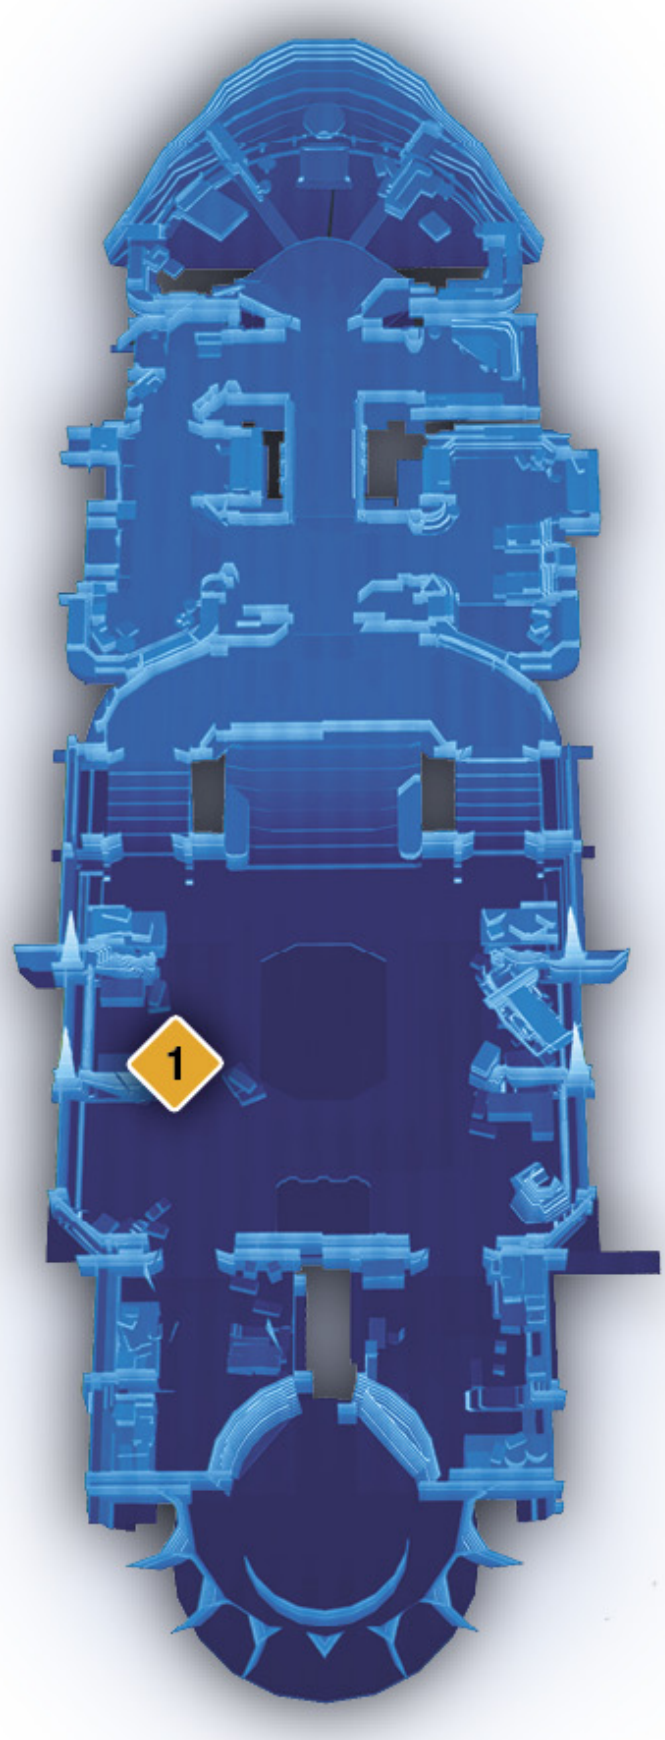
Mission Type: Allies and Relationships

Prerequisite: Complete Cora's Loyalty Mission, "At Duty's Edge"

Start Location: Tempest

Unlocking: Read email from Cora.

READ EMAIL FROM CORA



TEMPEST

Read the email that comes after you've won Cora's loyalty and are in *very* good standing with her, relationship-wise. The email is titled "Come See Me?" She asks to chat next time you're both on the ship. She says it's urgent.

CORA LIKES GUYS

You can only reach this quest if you're playing as Scott Ryder; Cora will not enter into a serious relationship with Sara Ryder.

SPEAK TO CORA ON THE TEMPEST

Find Cora in the cargo bay and speak with her. She says there's a lighting malfunction in your quarters that needs addressing immediately. Answer, "Let's go right now." The conversation moves into your quarters, and you can take the relationship to the next level by selecting an emotional answer from the conversation options that follow.

MASS EFFECT ANDROMEDA

Secondary Ops
Counting Bodies

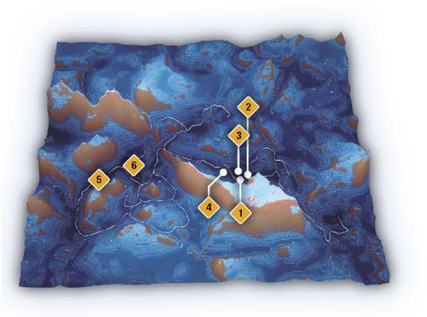
Mission Type: Heleus Assignment: Kadara

Prerequisite: Must have interrogated Vehn Terev in "Hunting the Archon"

Start Location: Kadara

Unlocking: Talk to Saneris and Drexel

SPEAK TO SANERIS AND DREXEL



KADARA

This is likely the first mission you stumble across as you begin to explore Kadara (once you leave the port and the slums). Pick up this quest by talking to Saneris **(1)** and Drexel on the platform facing the acid pool directly across from the warden's station and first forward station.

Saneris and Drexel ask you to scan murder victims in the badlands. One wants justice; the other wants profit. Search for bodies in the cesspools, scan them, and decide who gets the information.

SCAN FIVE CORPSES

BODIES NEAR THE SLUMS

There are three bodies in the acid pools around Saneris and Drexel, and one body **(2)** on the far east side of the pools. Use the overhanging boulder to get close enough to scan without stepping in the acid (which can kill you and your squadmates).

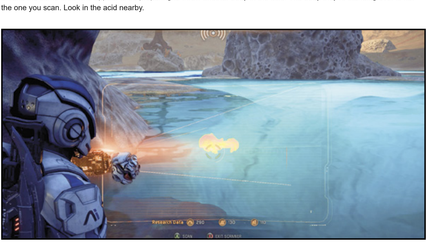
The second body in the main pool is close to a **cultivation plant** you should scan while here. Jump from island to island, avoiding the acid, to get a scan of this decaying body **(3)**.

The last body is in the small pool of acid to the west. You can easily scan it from the pool's edge.

SULFUR SPRINGS BODIES

Find this body **(5)** in an acid pool by the side of the road in Sulfur Springs.

There's a body **(6)** in the pool of acid near the site of the future Initiative outpost. You can catch a couple of suspicious aliens around the same area who appear to be preparing to throw another body in the acid. The body they're standing over is not the one you scan. Look in the acid nearby.



RETURN TO SANERIS AND DREXEL WITH THE SCAN DATA

With all the bodies scanned, use the forward station in front of the slums to fast travel back to Saneris and Drexel **(1)**. You have two choices—either give the scan data to Saneris to see justice done, or give it to Drexel for a reward. If you choose the reward, you get an Angran Firaan III melee weapon. If you see justice done, you earn a small amount of AVP and Kadara Viability +2%.

MASS EFFECT ANDROMEDA

Secondary Ops
Crisis Response

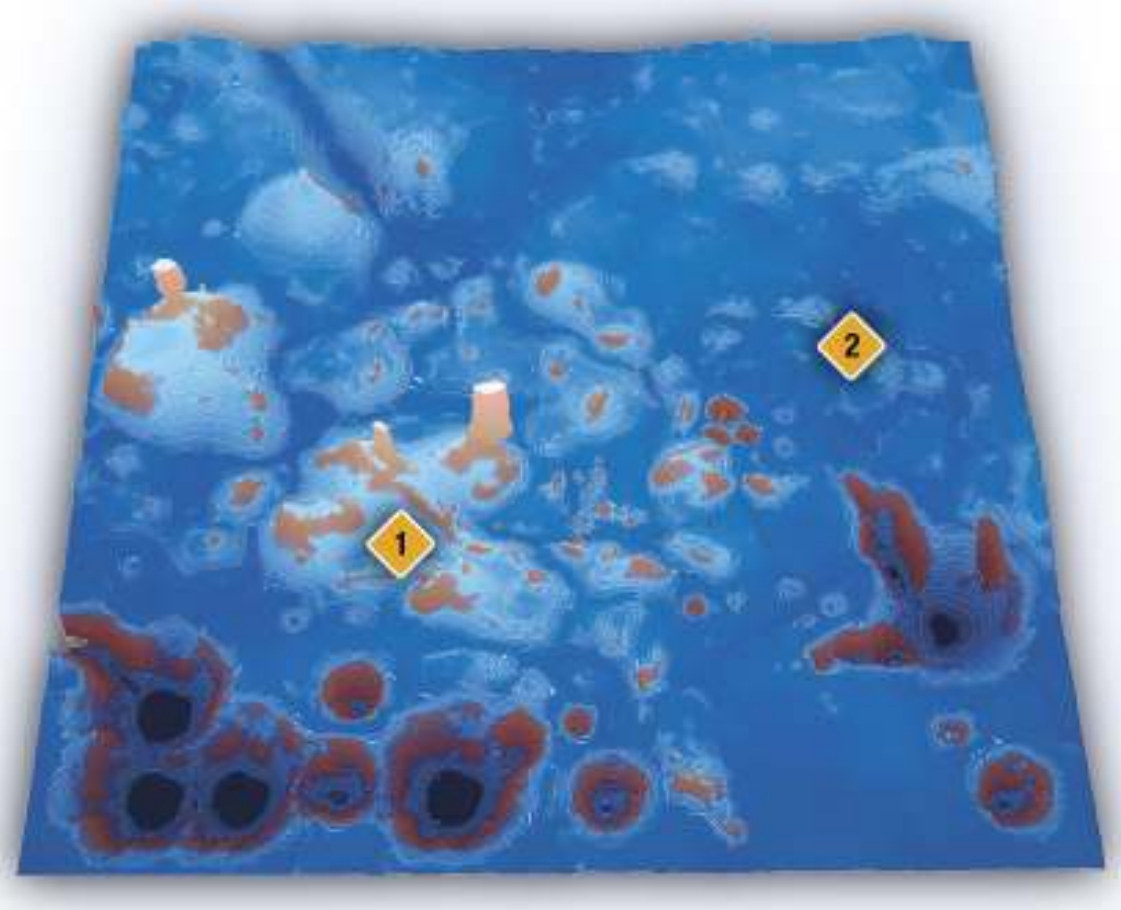
Mission Type: Heleus Assignment: Elaaden

Prerequisite: Land on Elaaden

Start Location: Research building at the flophouse ("Misery")

Unlocking: Acquire the datapad in the research building that gives you coordinates to a crash site.

FIND THE DATAPAD



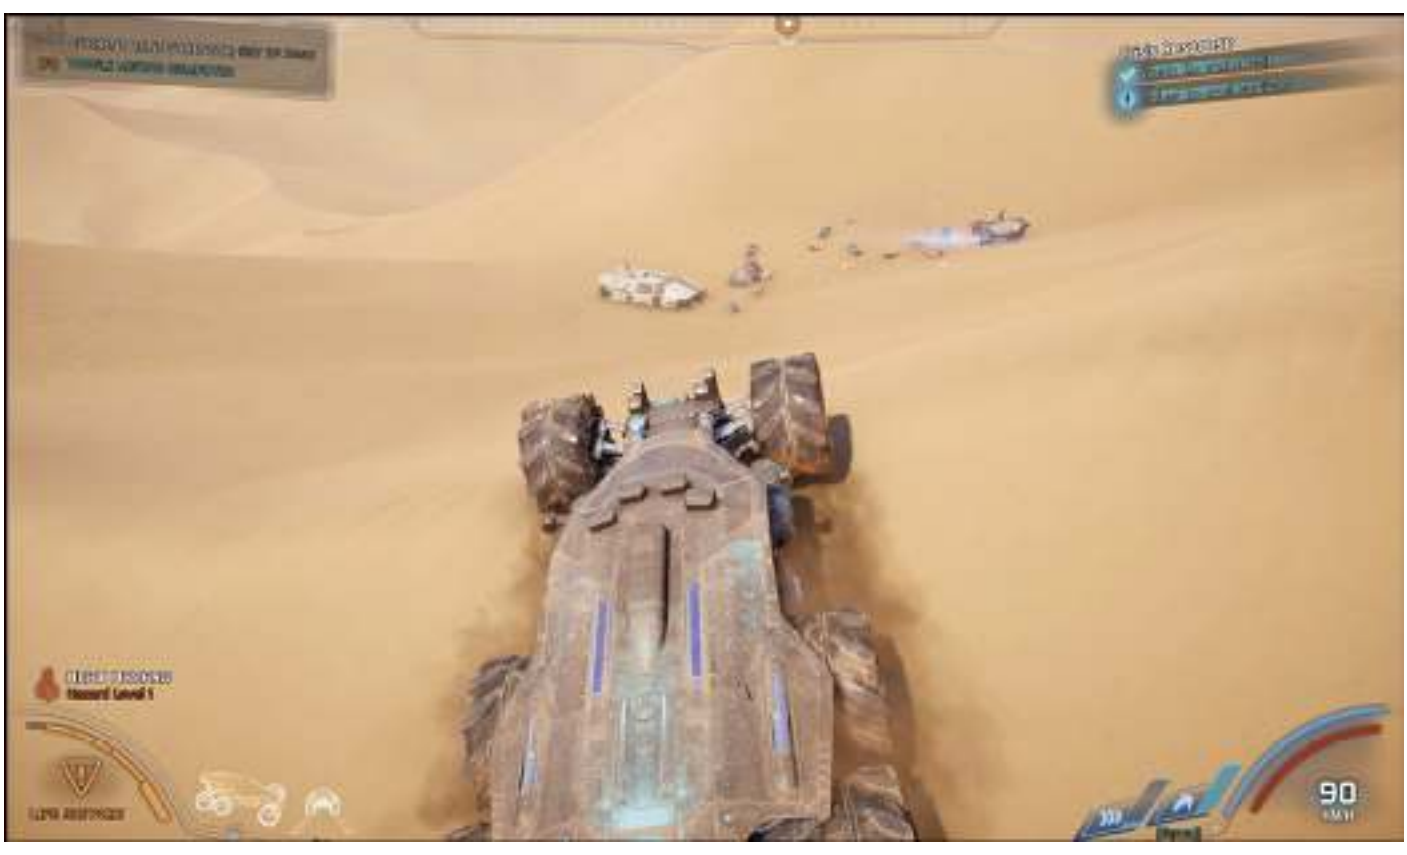
SCAVENGER FLOPHOUSE ("MISERY")

While in the scavenger flophouse for the mission "The Flophouse" or "Search for the Stolen Remnant Drive Core," enter this research building's second floor **(1)** and take the **raid plans datapad** from the table. A recent transmission between two scavengers discusses a ship crash. There might be survivors. A navpoint in the northeast is plotted.

LOCATE THE CRASHED SHIP

SEA OF ATARAXIA

While on the east side of Elaaden, follow the navpoint in the Sea of Ataraxia to the scene of the crashed ship **(2)**.



DEFEND THE CRASH SURVIVORS

Jump into the middle of the battle that's already underway. Defend the crash survivors by eliminating the scavenger Sharpshooter and Raiders. When the original group is defeated, a dropship arrives and delivers a squad of Raiders. Bury them in the same grave.

TALK TO THE SURVIVORS

When the battle is over, find and speak to the pilot. Have SAM call down for a rescue ship, for which the pilot thanks you. This completes the mission. You earn a small amount of AVP and add +2% Elaaden Viability.

MASS EFFECT ANDROMEDA

Secondary Ops
Cross-Cultural Alliances

Mission Type: Heleus Assignment: Havarl

Prerequisite: Mission 3, complete "A Dying Planet"

Start Location: Tempest

Unlocking: After completing "A Dying Planet," read the "Havarl: Science Team Deployment" email.

READ BENEDICT GEFFEN'S EMAIL

TEMPEST

By activating Havarl's lost monolith and resetting the vault, you prevented the plant's destruction. Angaran scientists at the Pelaav Research Station expressed an interest in working with Initiative teams. Director Addison dispatched several researchers to the planet and has asked you to check in on the situation there. The next time you're on Havarl, science team members Dr. Hawkins Macintyre, Zerra Kassian, Farley Berra, and Cody Holdren have set up a lab on the top floor of the angaran headquarters building in Pelaav.

Havarl: Science Team Deployment
Still a home, even if not ours
Writings of Sarissa Therle
Havarl: Science Team Deployment
From: Benedict Geffen
Pathfinder Team:
The Nexus has approved the request for a multi-disciplinary team to be posted on Havarl (a.k.a. Habitat 3) to assist with the angaran efforts there.
Primary Team Members:
Dr. Hawkins Macintyre (Xenoanthropology, Team Lead)
Zerra Kassian (Botany, Environmental Engineer)
Farley Berra (Entomology)
Cody Holdren (Quartermaster)
Both angara and Nexus teams have expressed interesting in having the Pathfinder visit Havarl again to observe cross-cultural efforts.

CONTACT DIRECTOR ADDISON FROM HAVARL

HAVARL: PELAAV RESEARCH STATION

Head to the top floor (through the exterior) of the angaran headquarters building **(1)** and activate the holo-communicator inside the research room to contact Addison.

During your conversation with Addison, you learn the Initiative will not be placing a settlement on Havarl, but will only deploy people to assist the angara with their plans for Havarl. Addison asks you to address the people regarding the victory at Havarl. You can choose either of two flavors: "You have to see this place" or "First contact continues here." This quick mission earns you more AVP and increases Havarl's Viability.

MASS EFFECT ANDROMEDA

Secondary Op:
Defeating the Kett

Mission Type: Heleus Assignment: Eos

Prerequisite: Land on Eos

Start Location: Defeat the kett at Site 1 during Priority Op mission "A Better Beginning"

Unlocking: Defeat the kett at Site 1 or come within range of the kett base.

INVESTIGATE THE KETT PRESENCE

KETT BRIDE

You discover the kett presence during the kett attack at Site 1 (1) when you first land on Eos and attempt to acquire the Nomad. The next step is to find the base (2) at coords (3). Prepare for a battle when you discover their encumbrance outpost, which sits on a cliff edge below the main kett base. This is a serious battle for beginners. Consider leveling up before clearing the kett from the base.

FIND A WAY INSIDE THE KETT POWER FACILITY

Begin at the front door (1) and use the cobles on the front "team" to protect yourself from the kett and then turrets guarding the entrance. Snipe the turrets first and then begin clearing the kett from the front doors.

UNLOCK THE SHIELD GATE

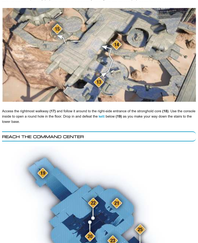
When most of the kett are dead, run up to the left of the locked door and hack the locked console. This gives you a hacking zone around the console and two minutes to hold your ground while you wait for the shield to go down. Defeat the dropship deployments of kett, including Anointed, Chosen, and Destroyer. Use the crates for cover and the many ammo crates around to keep you shooting. Once the hack timer is complete, the shield goes down and you can enter the facility.

OPTIONAL: ACCESS THE KETT SHIELD ARRAY

Completing the optional objective stops the dropships from continually delivering kett. First, defeat the kett through the entryway (4). Then use the console on the lower-level platform ahead of you (5). This sets the shield generators to overload.

OPTIONAL: SET THE SHIELD GENERATORS TO OVERLOAD

Note the two platforms (6 and 7). These are two generators you must sabotage. Tackle them in either order. A dropship displays enemies at each location. Continue to battle the kett.



OVERLOAD THE KETT SHIELD ARRAY

After sabotaging both generators, head to the top platform near the entrance and deactivate the console (8) facing the unexplored side of the kett base. This deactivates kett reinforcements.

ACCESS THE STRONGHOLD CORE

Press forward across the slanted platform (9) and defeat the Destroyer and Anointed. Jump down to a lower platform (10) and then enter the main facility (11).

INVESTIGATE THE KETT PRESENCE

To finish the initial objective, head into the base (11), battling the Anointed, Destroyer, Chosen, and Wraiths. Follow the navpoint to the top floor, jumping from the lower floor to one of the openings on the balconies above where you enter the base. Deactivate the crosses (12) near the window. Doing so triggers a lockdown via remote security measures.

OVERRIDE THREE SECURITY TERMINALS

The most hostile all three security consoles to override the lockdown. The one that started the mess counts as the first terminal (12). Stay on the second floor for now. Turn around, run out across the left platform, and jump down to the lower platform on the left to find the next console (13). Resist entering the open building to the left of the console; instead jump down to the lower pathway (14) and follow it to the balcony holding the last console (15). Deactivate the lockdown.

Access the sightmost walkway (15) and follow it around to the right-side entrance of the atmospheric core (16). Use the console inside to open a round hole in the floor. Drop in and defeat the kett below (16) as you make your way down the stairs to the lower base.

REACH THE COMMAND CENTER

On the lower levels (16), defeat the Chosen, Anointed, and even more Chosen along the route to the command center (20).

ELIMINATE THE KETT INVICTOR

Once in the command center, you're tasked with eliminating the Invictor. You can usually find him on the top floor around the left side (21). Shoot his orbital crate first, then take him out.

CLEAR OUT REMAINING DEFENDERS

Clear this large room of all remaining kett. Use the radar. Look for red and hunt them down; sometimes they cling to corner positions.

UNLOCK ACCESS TO THE ZENITH OBSERVATION ROOM

When the kett are all cleared, use the console (22) in the middle of the tower floor to open the next door (23). Pass through the short hallway and open the door on the left (24). Use the elevator controls (25) to ascend to the zenith observation room.

ACCESS THE ZENITH OBSERVATION ROOM

DEFEAT THE KETT POWER FACILITY

Step off the elevator (25) into the zenith observation room. Raid all the containers and scan the kett core encryption tech. Lastly, approach the console near the window and use it to knock the base offline. That completes the quest. You earn a very large amount of AEP, and the Heleus gains a +10% increase.

Secondary Ops
Dismantled

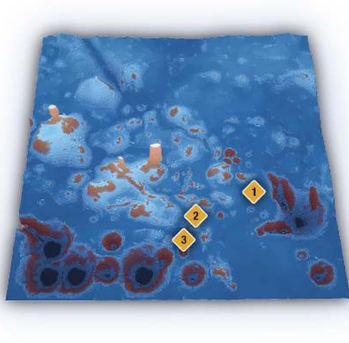
Mission Type: Heleus Assignment: Elaaden

Prerequisite: Must have interrogated Vehn Terev in "Hunting the Archon"

Start Location: Elaaden

Unlocking: Starts when you approach one of three Remnant sites.

INVESTIGATE THE REMNANT SITE



ELAADEN

SAM has identified sites where scavengers could find Remnant cores, and has modified your omni-tool to disable the cores and prevent them from reacting and becoming dangerously unstable.

INVESTIGATE THE THREE REMNANT SITES

The Remnant sites involved in these quests are easily recognizable. They're teeming with scavengers, wildlife, and Remnant. There are massive amounts of pillars and Scourge pockets. First things first, destroy all the scavengers and Remnant. After you complete the first site, the next two sites are given navpoints on the map.

MAKE THE REMNANT CORE INERT

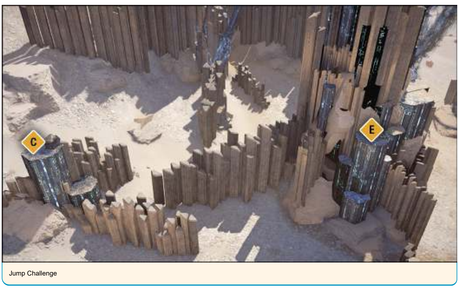
Climb and jump across the dark Remnant pillars (the ones that look like they're wearing computer circuit board camouflage). Find the pillars that lead to a Remnant core, and then deactivate it. The hacking time is lengthy, so make sure you've cleared enemies that could harm you while you're hacking. More Remnant spawn after you deactivate the first core. Two of the sites feature two cores each; one site has three cores.

SITE 1: NORTH OF THE PARADISE

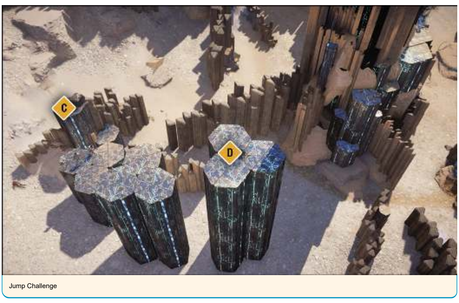
This site has two Remnant cores, both of which are fairly easy to reach. One core **(A)** is practically on the ground. Numerous pillar steps allow you to reach the higher core . You face Remnant Observers and Raiders at this site, and likely a Fiend as well.

SITE 2: PARADISE SANDS

At this site you confront Adhi, Remnant Observers, scavenger Pariahs, and Anarchists. This site contains three Remnant cores, one of which is hidden. Jump up and deactivate the first core . Doing so raises pillars next to it and allows you to reach a core that comes up with them. Jump from the second core over to the pillars leading to the third core.



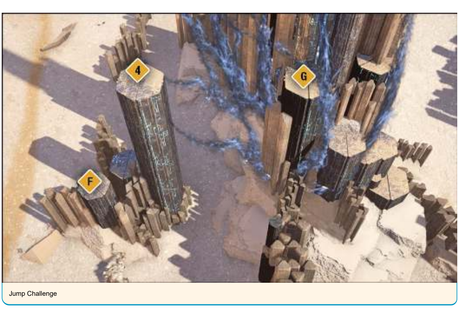
Jump Challenge



Jump Challenge

SITE 3: PARADISE SANDS

Here you encounter Adhi, a Taurg, and a Fiend; dropships delivering scavengers; and Narisse, accompanied by Sharpshooters and Raiders. One of the two Remnant cores **(F)** at this site is low, a couple of pillar jumps from the ground. The other **(G)** is more of a challenge and requires multiple pillar jumps, one of which sends you through the Scourge. After deactivating this core, run and jump to a pillar **(4)** to reach a loot **container**.



Jump Challenge

MASS EFFECT ANDROMEDA

Secondary Ops

Dissension in the Ranks

Mission Type: Allies and Relationships

Prerequisite: Complete "Know Your Enemy"

Start Location: Tempest

Unlocking: Read email "Message from New Tuchanka: Troubling Add Activity"

CHECK YOUR EMAIL

TEMPEST

After completing "Know Your Enemy" and getting paid Mission 4, read the email from the Nakmor Clan: "Message from New Tuchanka: Troubling Add Activity." Not all loot follows the Archon without question. Someone is disseminating propaganda and speaking out against Ayo. It's important to investigate the source of the propaganda.

Message from New Tuchanka: Troubling Add Activity
Nakmor Clan
Ayo
Archon's Audit
Investigate
Ayo's Followers
Archon's Audit
Message from New Tuchanka: Troubling Add Activity
To: Ryder, Sara
From: Nakmor Clan
Subject:
Archon's Audit recently documented 20 troubling "add-ons" found in the Nakmor Clan's shipments of Ayo. Of those 20 add-ons, 15 were found to be illegal. Of those 15, 4 were found to be illegal and dangerous.
Full lists of documented add-ons found in Ayo shipments are attached.
Archon's Audit would like to remind the Clan, the leaders of Ayo, and the Ayo users that it is illegal to knowingly engage in the manufacture of illegal add-ons.
The Nakmor Clan, Archon Security

INVESTIGATE THE CRASHED KETT SHIPS ON ELADEEN

ELADEEN

Disembark the Tempest (**1**) at the initiation outpost. Use the southernmost forward station (**2**) to get close to your destination (**3**) in Gehenna Valley. Upon approach, you find two Kett sitting and at a crash site.

DEFEAT THE KETT

You face a few Chosen and a Destroyer at the crash site. Sweep them up.

SEARCH THE SITE

After all the kett are gone, look for the loot **datapad** on the ground near a piece of wreckage. SAM says the device has a very good lock on it and wants you to bring it back to the Tempest for further analysis. You earn a little bit of AVP and Exalted Viability XON for completing the Disdain portion of this quest.

SPEAK WITH SUVI ON THE TEMPEST

ELADEEN

MYSUVI

Talk to Suvi on the bridge of the Tempest. She can't understand why the kett are fighting their own. She tells you that the datapad you found at the wreck is secured with a biometric lock that can only be activated with a specific genetic code. She says Lexi has worked something out with the kit-scans you did on Voeld.

CONFER WITH LEXI

MEDBAY

Head down to the lower level, enter the medbay, and speak to Lexi (**1**). SAM levels aid in cracking the biometric lock on the datapad. Lexi says it's locked on to a transmission. Choose to turn it off, or tell her, "That could be dangerous." Either way, it doesn't affect the outcome. Lexi tells you that she's been researching more data about dissention in the ranks and wanting to take down their own Archon. A waypoint is traced from the transmission.

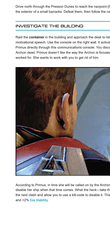
LOCATE THE SOURCE OF THE SIGNAL ON EOS

EOS

Head to the bridge and land on Eos, at Prodromos (**2**). Check your map. The navpoint for the signal isn't far, a little ways north inside a cave. Grab the Nomad and go.

TRACK DOWN THE SOURCE OF THE SIGNAL

Follow the navpoint in the cave to the upper ledges. Scan the **Mobile Relay Kit**. Analysis indicates it's a kett relay meaning the true source of anti-Archon propaganda. It's also broadcasting a series of beeps and tones in Morse code that translates to "Disciple don't crash here." Likely unintentional.



Mobile Relay Kit
Analysis indicates it's a kett relay meaning the true source of anti-Archon propaganda. It's also broadcasting a series of beeps and tones in Morse code that translates to "Disciple don't crash here." Likely unintentional.

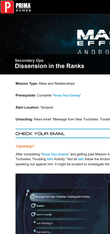
TRACK THE SIGNAL TO THE SECOND RELAY

Follow the navpoint north near the Prevsen Dunes Forward Station to find a kett camp (**3**) on a plateau north of the kett base. Defeat the Chosen here and then scan the **Mobile Relay Disc**.

Mobile Relay Disc
Analysis indicates it's a kett relay meaning the true source of anti-Archon propaganda. It's also broadcasting a series of beeps and tones in Morse code that translates to "Disciple don't crash here." Likely unintentional.

TRACK THE SIGNAL TO THE THIRD RELAY

Get back in the Nomad and drive southwest to the next navpoint (**4**) in the Prevsen Dunes. There you find Andromeda and Heleus Initiative Relay Disc. Scan it and then head to the far side of the Nova Field. Shut down the kett generator to bring the Nova field down. Scan the **Mobile Relay Ear**.



Mobile Relay Ear
Analysis indicates it's a kett relay meaning the true source of anti-Archon propaganda. It's also broadcasting a series of beeps and tones in Morse code that translates to "Disciple don't crash here." Likely unintentional.

TRACK THE SIGNAL TO THE FOURTH RELAY

Drive north through the Prevsen Dunes to reach the navpoint (**5**) in Shankock Tends. A few Chosen and an Anointed guard the exterior of a small hab-box. Defeat them, then follow the navpoint into the barracks.

INVESTIGATE THE BUILDING

Raid the **container** in the building and approach the desk to listen to an **audio log** of the mysterious speaker giving a motivational speech. Use the console on the right wall. It activates a holographic image of Primus. You are now talking to Primus directly through the communications console. You discover you have something in common: you both want the Archon dead. Primus tells you to head to the Nexus. Get focused on the singular, she feels it endangers everything they've worked for. She wants to work with you to get rid of him.

According to Primus, in time she will be called on by the Archon to destroy you. She offers to provide you the means to disable her ship when that time comes. What the heck, I take the deal. Primus promises to lower her ship's defenses during the next raid and allow you to use a kill-code to disable it. This completes the quest, and you earn a small amount of AVP and +2% Exi Viability.

MASS EFFECT ANDROMEDA

Secondary Ops
Doesn't Add Up

Mission Type: Heleus Assignment: Eos

Prerequisite: Establish a settlement on Eos, complete "Naming the Dead"

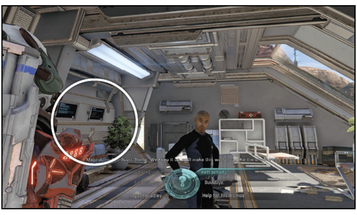
Start Location: Eos: Prodromos

Unlocking: After settling Prodromos on Eos and finishing "Naming the Dead," speak with Majordomo Bell-Scott.

SPEAK WITH MAJORDOMO BELL-SCOTT

PRODROMOS, EOS

Find the majordomo **(1)** in Prodromos on the first floor of the farthest building from the parked Tempest. During your conversation with Bell-Scott, pry for information regarding kett activity and helping Prodromos. He divulges that the numbers for the living and the accounted dead do not add up. There should be more dead. He wants you to check the personnel consoles at four muster sites.



SCAN THE FOUR EMERGENCY MUSTER SITES

SITE 1: PROMISE

Check out the locations of the four muster sites using our map and the following four shots.

Scan the shuttle burn marks near each muster site. The closest muster site **(2)** is on the mountaintop southwest from Site 1: Promise, near a memory trigger for "Ryder Family Secrets."

Scan the muster site **(3)** on the hilltop northeast from Site 1: Promise.

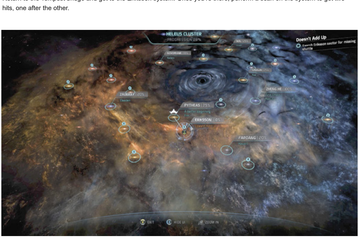
Scan the muster site **(4)** on the hilltop west from Site 2: Resilience.

Scan the muster site **(5)** on the shore of the lake south of Site 2: Resilience.

SEARCH THE ERIKSSON SECTOR FOR THE MISSING SHUTTLE

TEMPEST

Return to the Tempest bridge and get to the Eriksson system. Once you're there, perform a scan on the system to get two hits, one after the other.



MASS EFFECT ANDROMEDA

Secondary Ops

Elaaden: A New World

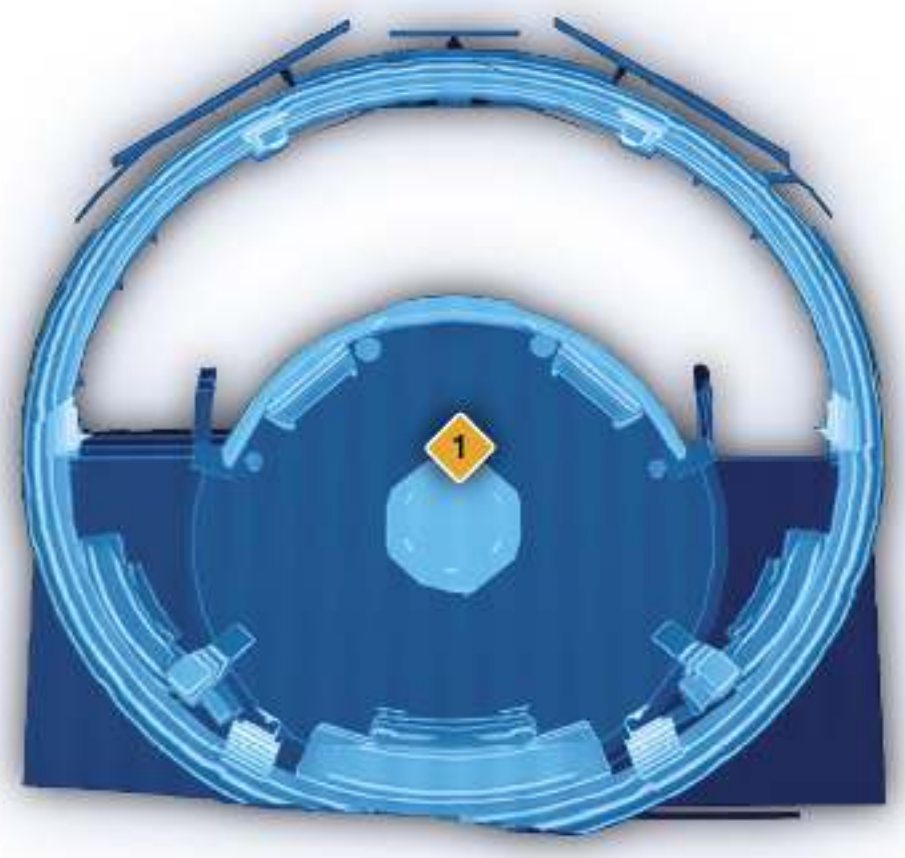
Mission Type: Allies and Relationships

Prerequisite: Must have interrogated Vehn Terev in “Hunting the Archon”

Start Location: Tempest

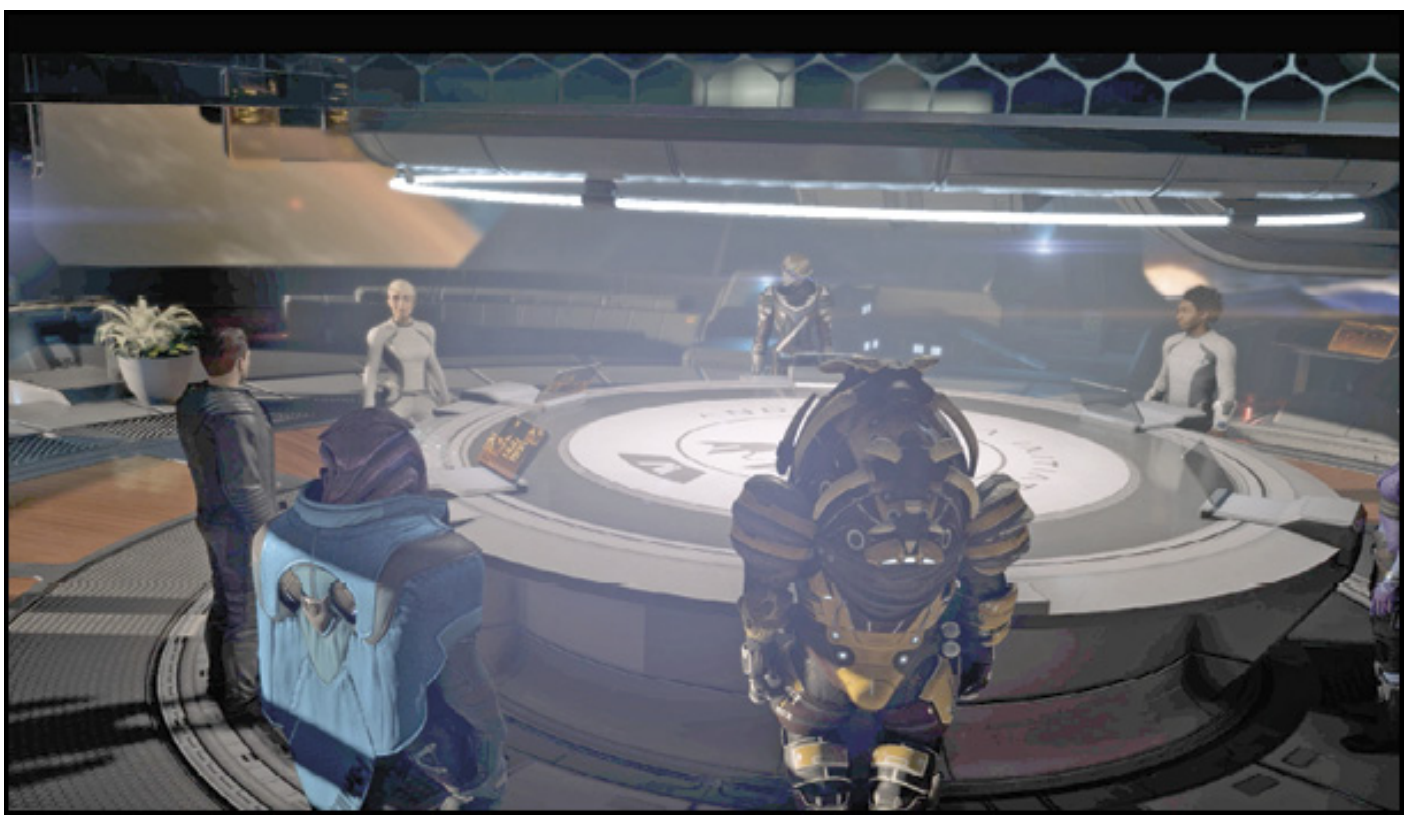
Unlocking: Enter the Tempest after interrogating Vehn Terev in “Hunting the Archon.”

MEET WITH THE KROGAN CONTACT ON ELAADEN



TEMPEST: MEETING ROOM

A meeting is held in the meeting room **(1)** on the Tempest when you return from Kadara (with the prerequisite conditions met). Drack is concerned about tensions at the krogan colony on Elaaden. He’s forwarded you an email from Jorgal Strux, a well-respected krogan from an old family. Strux has asked to meet you at a trading post called the Paradise. He’s also asked that you keep it a secret.



MASS EFFECT ANDROMEDA

Secondary Ops

Emergency S.O.S.

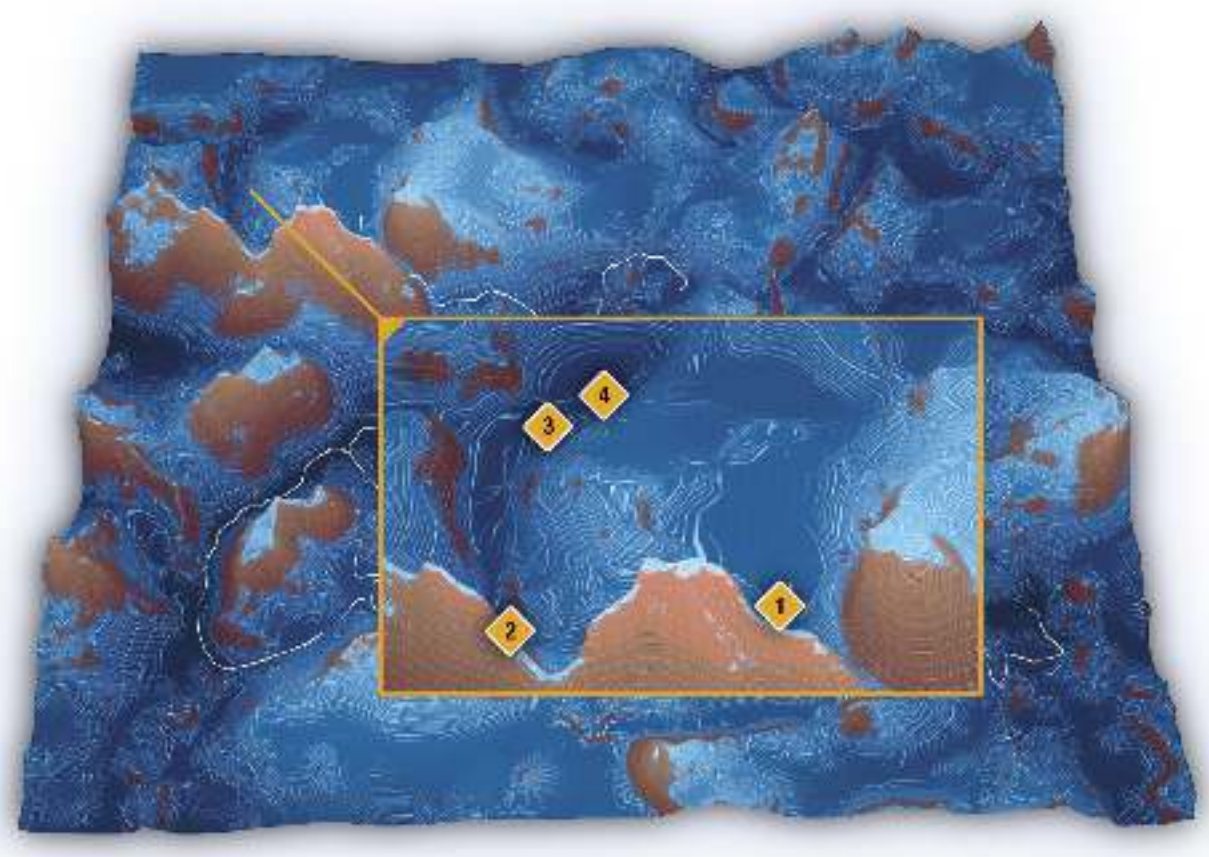
Mission Type: Heleus Assignment: Kadara

Prerequisite: Must have interrogated Vehn Terev in “Hunting the Archon”

Start Location: Kadara

Unlocking: Drive in Kurinth’s Valley.

FOLLOW THE S.O.S. SIGNAL TO ITS SOURCE



KADARA

KURINTH’S VALLEY

You receive an urgent S.O.S. signal from someone in serious trouble as you drive in Kurinth’s Valley in the northwest section of Kadara. Chase the signal (and navpoint) to a gully in the west **(2)**.

If the quest “Contagion” is active, you see a wrecked shuttle up on the hill to the right. You then pass an outpost **(3)** with one of those floaty things overhead. That’s part of “Contagion” too.

When you reach the hut **(4)** on stilts hanging way over the side of a cliff, you’ve come to the right place. Enter this hut through the unlocked front door.

SPEAK TO THE PERSON WHO SENT THE S.O.S. SIGNAL

Inside the hut **(4)**, you meet two humans getting high on their supply. Scan them. They’re baked! Read the **datapads**

MASS EFFECT ANDROMEDA

Secondary Ops
End of Watch

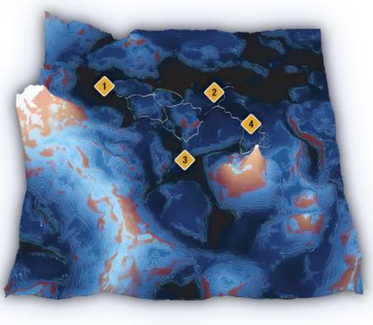
Mission Type: Heleus Assignment: Voeld

Prerequisite: Mission 2, complete "Return to the Tempest" after Aya during "A Trail of Hope"

Start Location: One of three datapad locations

Unlocking: Interact with one of three datapads.

FIND OTHER BATTLE SITES ON VOELD

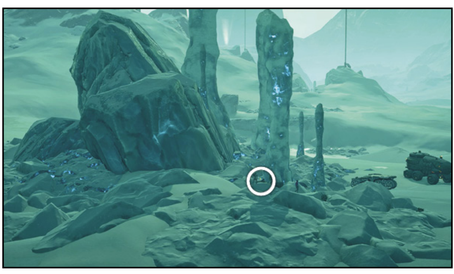


VOELD

Voeld has many battle sites where kett invaders fought angaran Resistance forces. Some sites contain datapads left by an elite team of Resistance fighters hunting kett that exterminated a small angaran outpost. The Resistance may need help bringing the kett to justice. Find and examine the datapads at these three locations:

DATAPAD LOCATION 1

Find this **datapad(1)** next to a dead angara among the ice spires not far from Hjara. This one is titled "The End Is Coming."



DATAPAD LOCATION 2

Find this **datapad(2)** on the ground near a dead kett and his truck. The datapad's content is titled "To Those Who Followed Us."

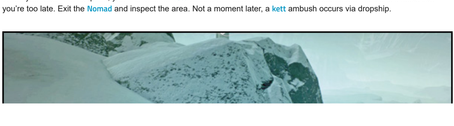
DATAPAD LOCATION 3

Find this **datapad(3)** at a battle site on the frozen river west of the north Remnant monolith. Look for the flare on the ice and an angaran body with a datapad prompt. Examine the datapad. This one is titled "For the Fallen."

INVESTIGATE THE LOCATION PROVIDED BY SAM

After you find the three datapads, SAM analyses geographic distribution, corpse decay, and information in the data entries, then marks a navpoint **(4)** on the map that indicates a high probability of a Resistance presence. Use the forward station to the south of this eastern location to fast travel to the navpoint.

When you reach the navpoint, you find another kett vehicle with dead scattered about. A teammate mentions it looks like you're too late. Exit the Nomad and inspect the area. Not a moment later, a kett ambush occurs via dropship.



MASS EFFECT ANDROMEDA

Secondary Ops
Excess Baggage

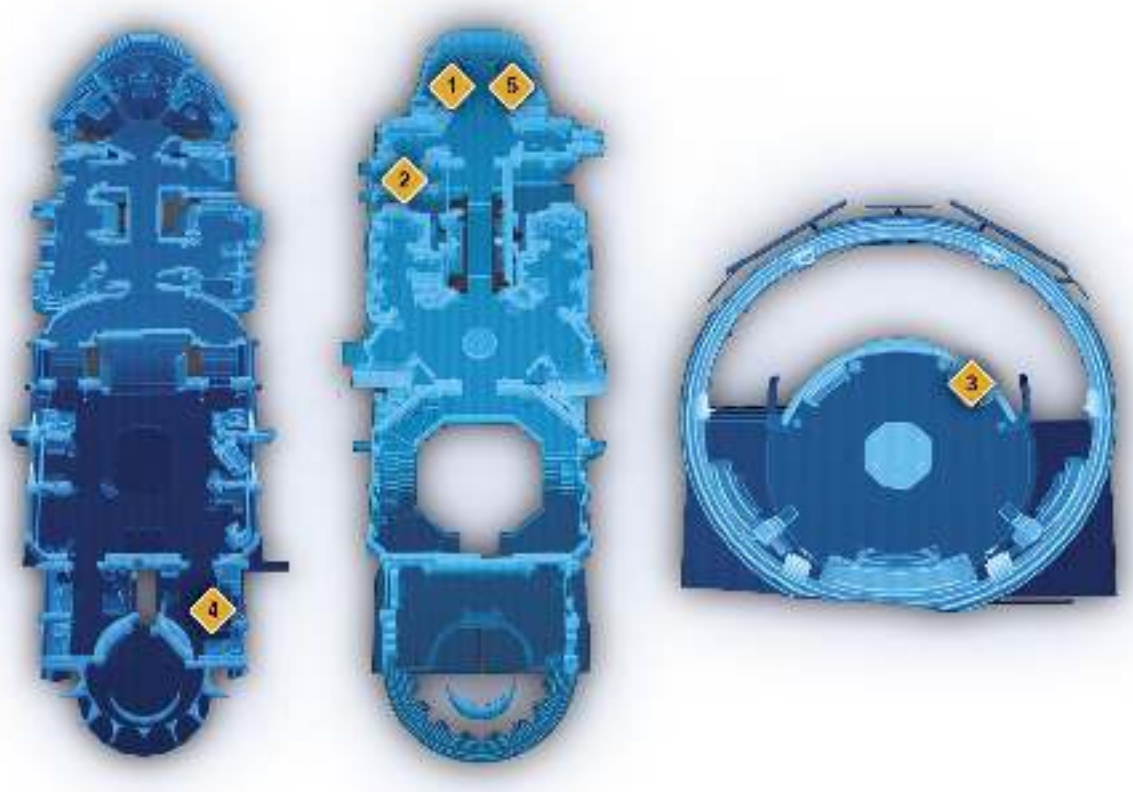
Mission Type: Heleus Assignment: Tempest

Prerequisite: Mission 3, Aya Unlocked

Start Location: Tempest

Unlocking: All other conversations with Suvi are complete.

SPEAK TO SUVI



TEMPEST

Exhaust all conversations with Suvi **(1)** until she talks about the Tempest carrying about 70 kilos of extra mass. Agree to help her by using your omni-tool to discover why there's extra weight.

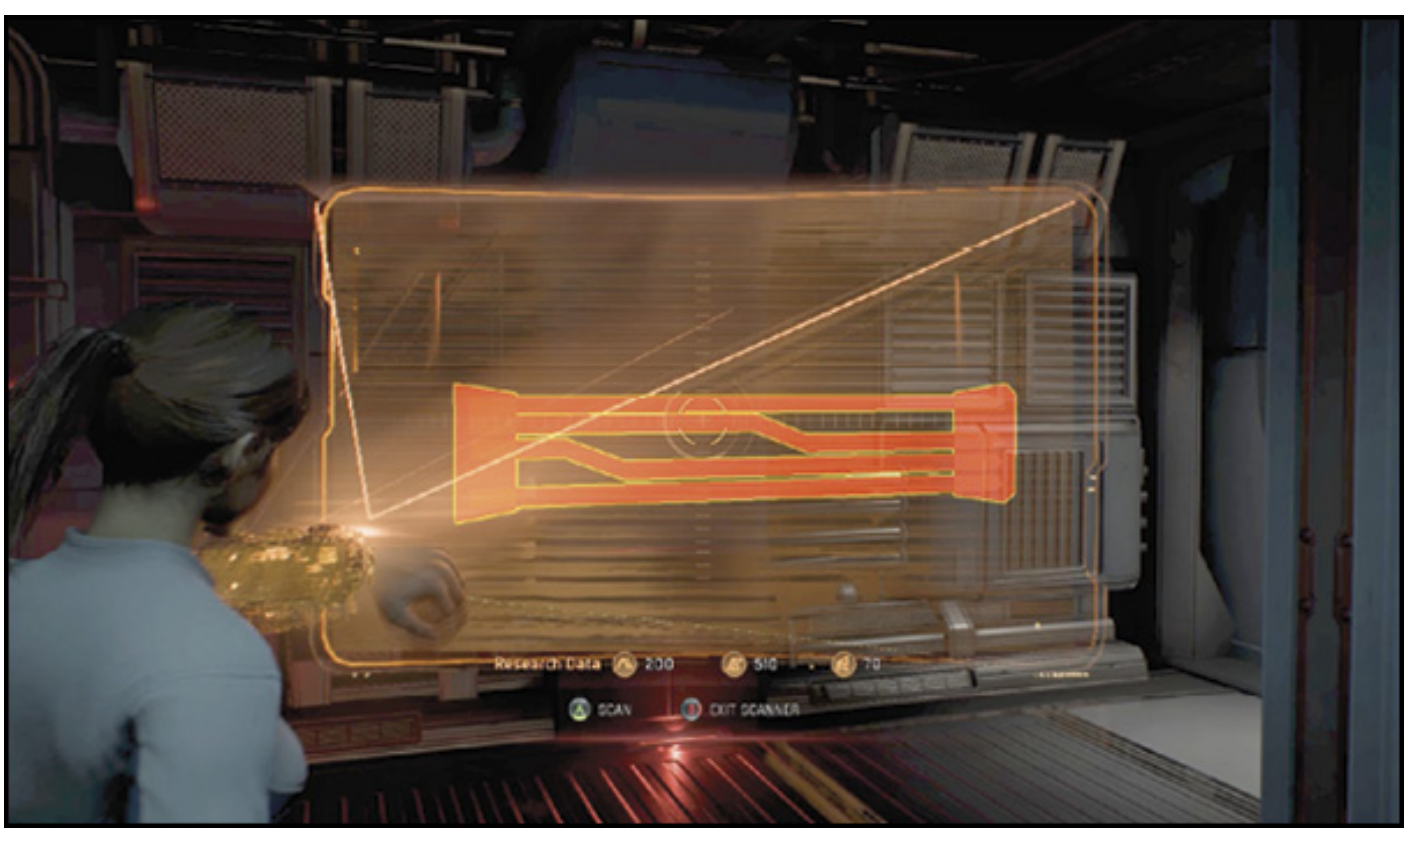
SKIP RIGHT TO THE ARMORY

If you're in a hurry, simply skip all the other scanning options and go right to the armory to find the anomaly.

SCAN ROOMS ON THE TEMPEST FOR ANOMALIES

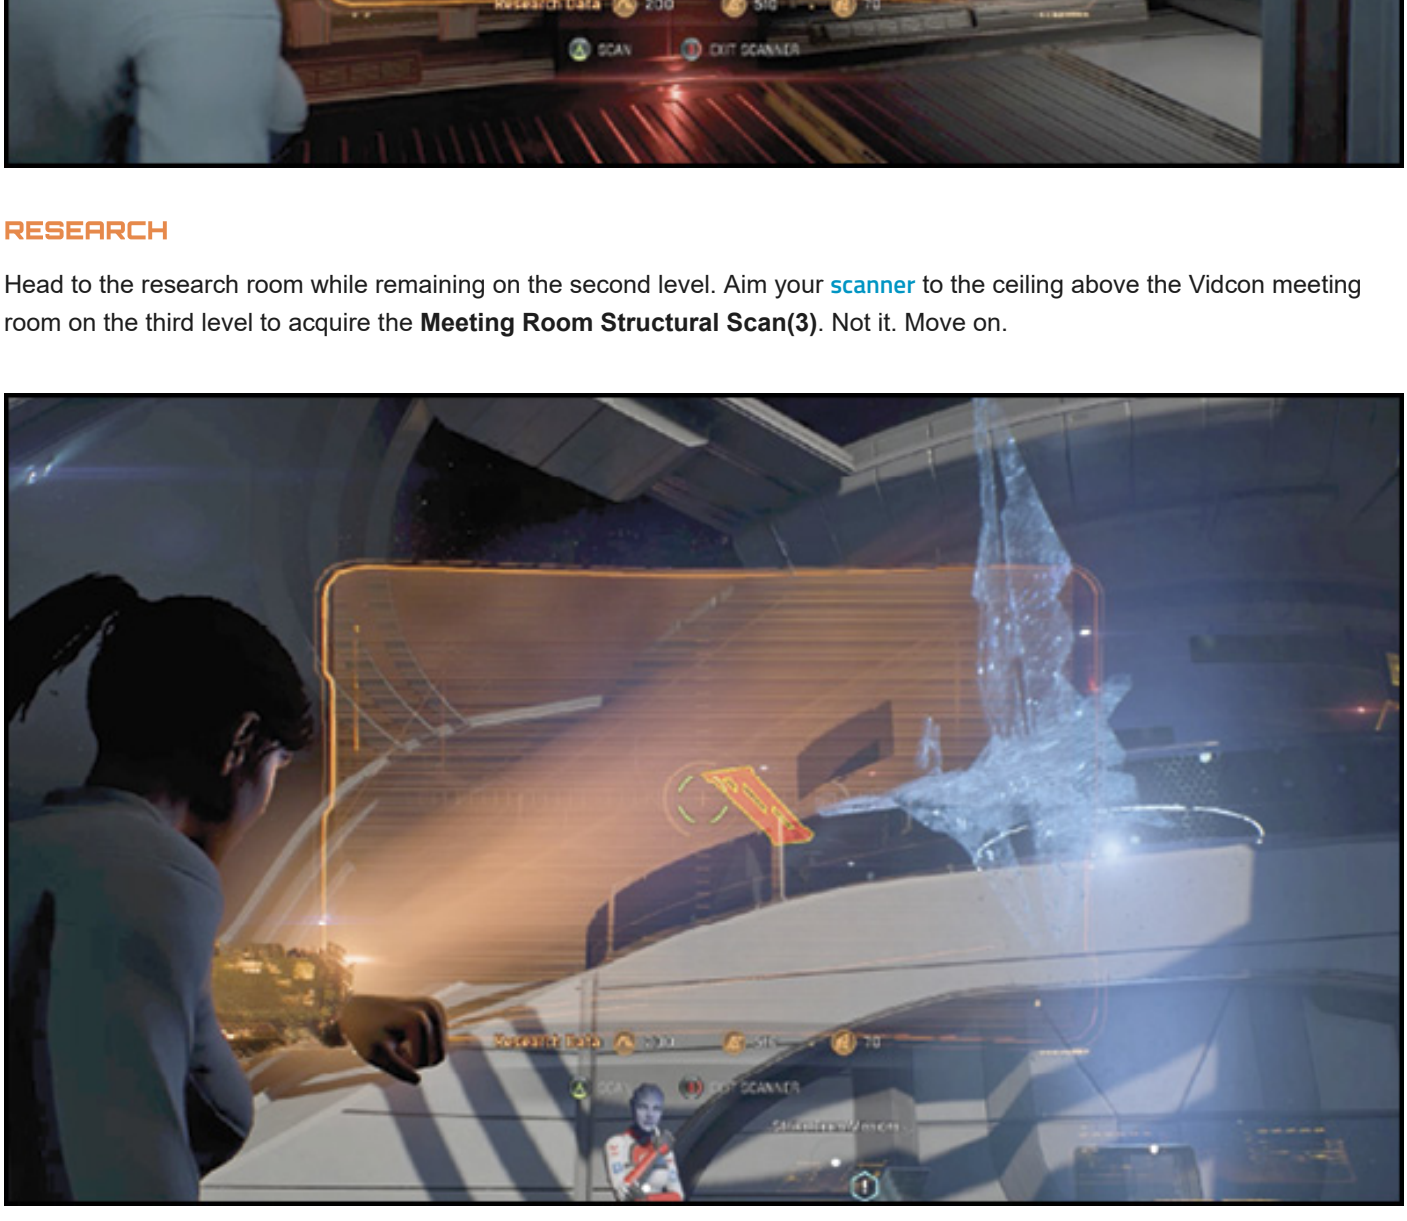
AIRLOCK

Don't leave the bridge. Instead, head into the loadout station room **(2)** and continue into the airlock room. Scan the back wall to acquire the **Airlock Structural Scan**. Not the source of the extra weight. Move on.



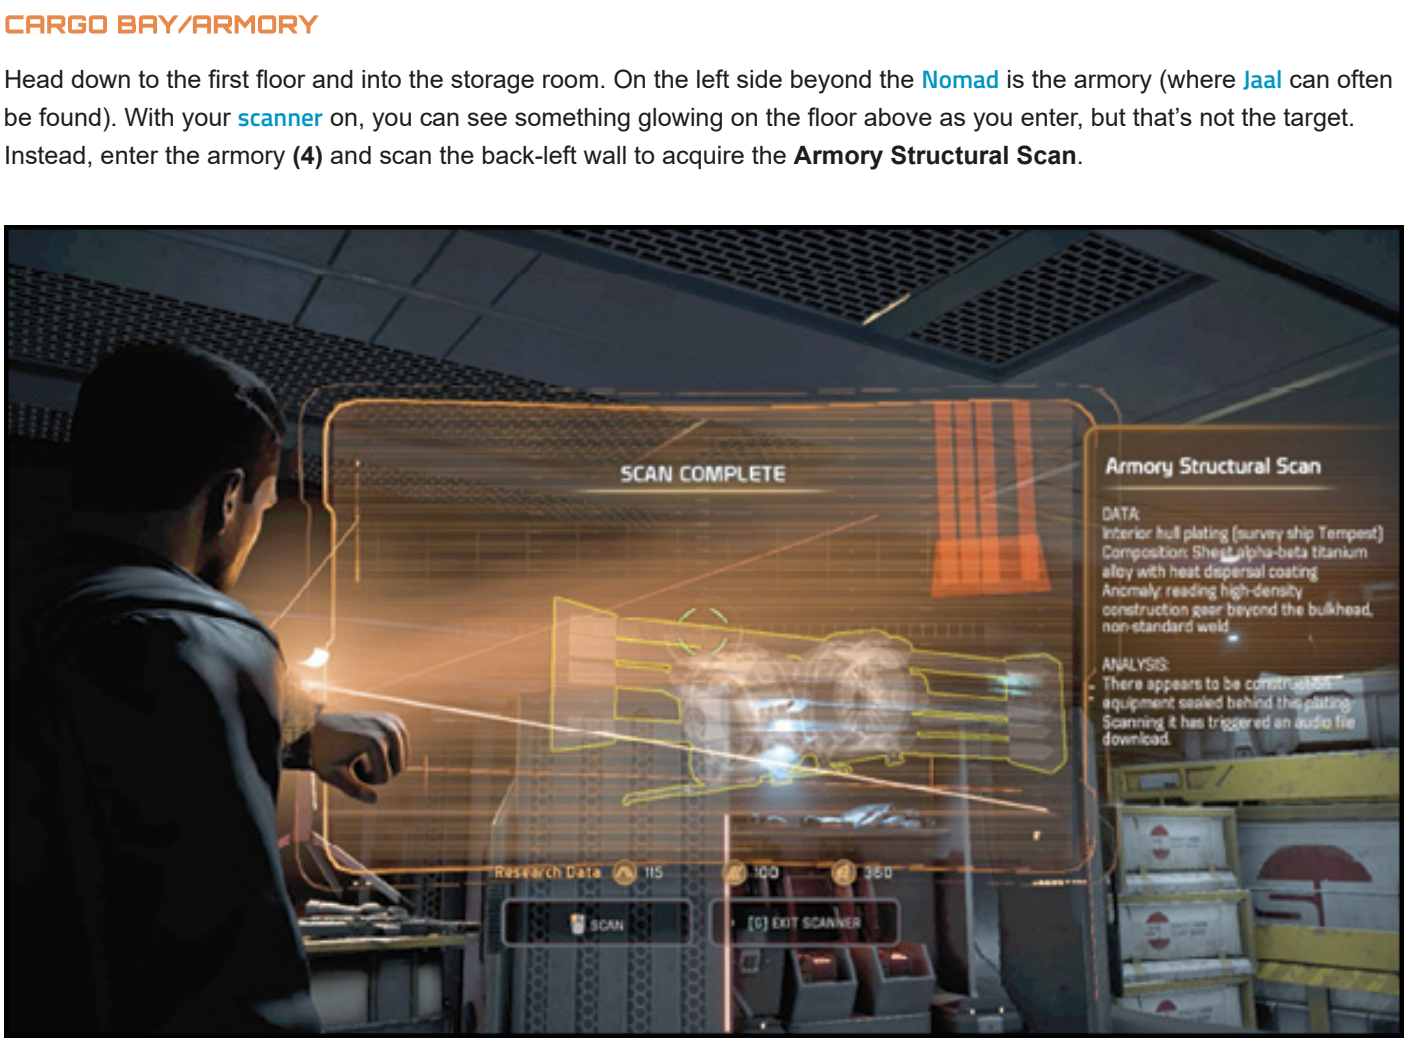
RESEARCH

Head to the research room while remaining on the second level. Aim your scanner to the ceiling above the Vidcon meeting room on the third level to acquire the **Meeting Room Structural Scan(3)**. Not it. Move on.



CARGO BAY/ARMORY

Head down to the first floor and into the storage room. On the left side beyond the Nomad is the armory (where Jaal can often be found). With your scanner on, you can see something glowing on the floor above as you enter, but that's not the target. Instead, enter the armory **(4)** and scan the back-left wall to acquire the **Armory Structural Scan**.



SCAN COMPLETE
Armory Structural Scan
DATA:
Interior hull plating (survey ship Tempest)
Composition: Sheet alpha-beta titanium alloy with heat dispersal coating
Anomaly: reading high-density construction gear beyond the bulkhead, non-standard weld
ANALYSIS:
There appears to be construction equipment sealed behind this plating. Scanning it has triggered an audio file download.
Research Data
115
100
360
SCAN
[Q] EXIT SCANNER

The scan reveals there's a construction mech welded right into the hull. Scanning triggers an audio file. Kallo radios you to say he thinks he knows why the mech is there. Go meet him on the bridge.

SPEAK TO KALLO

Speak to Kallo **(5)** on the bridge. He explains that the mech was put there by the ship's lead designer, Lucille Diawara. She wore the construction mech after breaking her back on the job. The audio log is a thank-you message to the Pathfinders; the mech is her artist's signature. Choose to keep it where it is, or donate the found equipment. You earn 29 AVP for completing this mission and 380 XP.

MASS EFFECT ANDROMEDA

Secondary Ops

Eyes on the Ground/On the Front Lines

Mission Type: Heleus Assignment: Voeld

Prerequisite: Complete "Meet the Resistance"

Start Location: Voeld

Unlocking: Starts during the conversation with Beniska when finishing "Meet the Resistance."

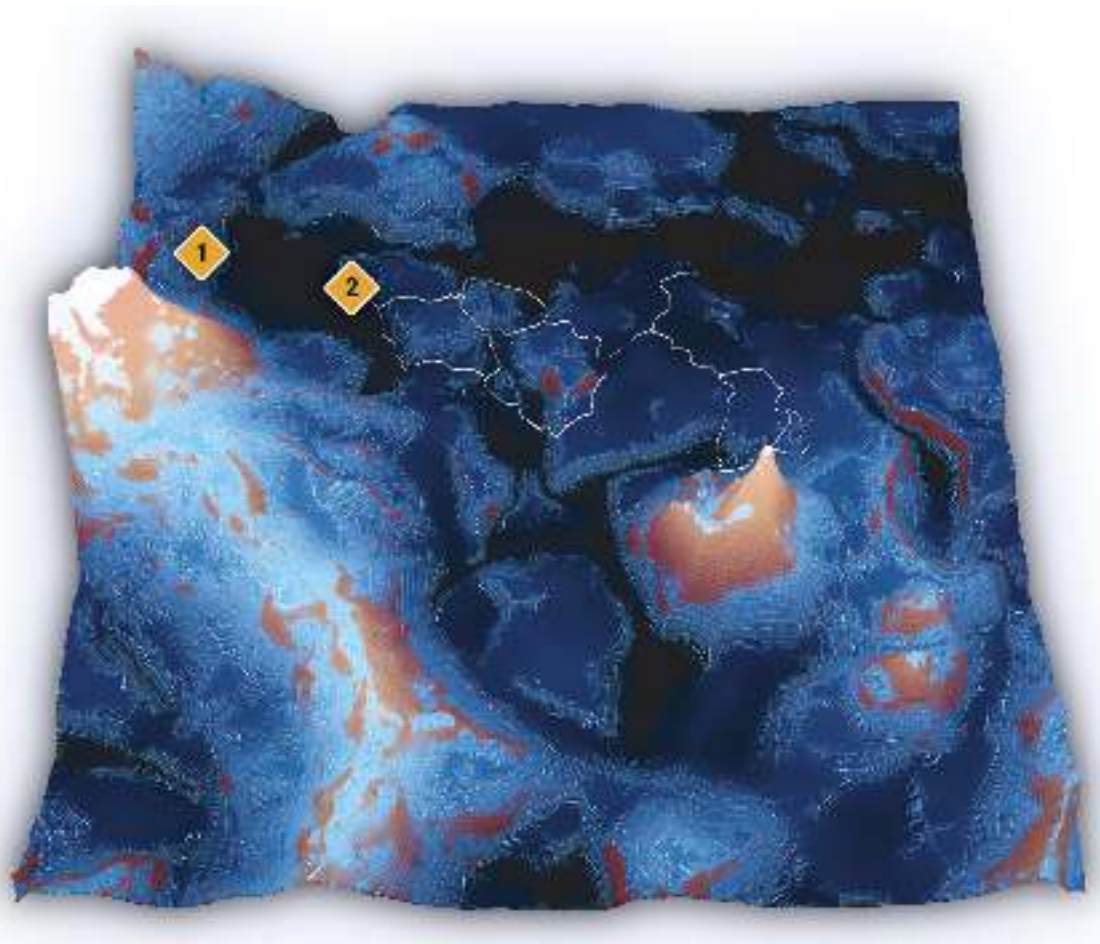
TWO NAMES, ONE MISSION

If you've already completed "Helping Havarl's Scientists," the mission name you receive here is "Eyes on the Ground." If you haven't done any trust quests, you receive "On the Front Lines." If you start "On the Front Lines" but don't follow the quest objectives and instead finish "Helping Havarl's Scientists" first, this mission's name updates to "Eyes on the Ground."

EVFRA'S TRUST QUESTS

Two quests center around gaining Evfra's trust. One is "Stage a Rescue" on Voeld, where you rescue imprisoned angara. The other is "Helping Havarl's Scientists," also on Voeld, where you save angara from Remnant stasis. After completing one of these quests, talk to Evfra to advance the Priority Ops missions.

SPEAK TO BENISKA



VOELD: RESISTANCE BASE

Speaking to the Resistance base lookouts, Beniska and Tseek **(1)**, completes "Meet the Resistance" and begins "On the Front Lines." During this conversation, you speak of the red lights at Hjara—that's your next stop.

GO TO HJARA

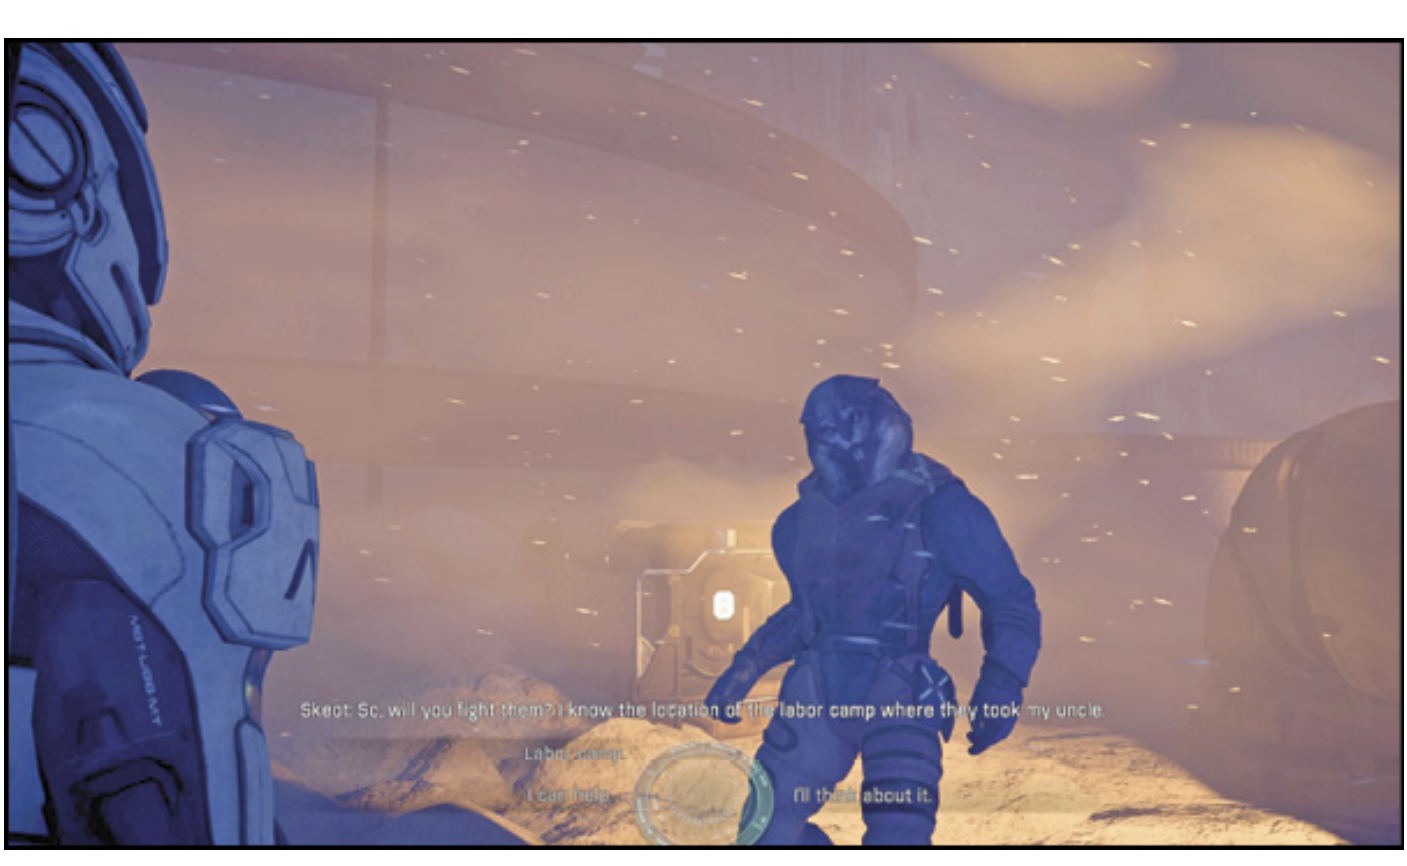
VOELD

Find the research base Hjara **(2)** around the middle of the map. When you get close, you see bright red lights on tall poles. Look for a base carved into a snow-covered mountainside. Just in front of the base is a place for a forward station. Visit this location first to call the forward station.

SPEAK TO SKEOT

Explore the base and scan equipment while looking for Skeot. Behind a bar-like counter in the cave, you find the research lead, Knoeth, and Yveth **(3)**, whom you can trade with for consumables. Find Skeot **(4)** standing outside with another angara between the lit garage and the first building.

Approach the two to overhear them talking about missing comrades and forming a plan to locate them. When your conversation with Skeot starts, he commends you on saving the Moshae. He asks you to rescue his uncle, Niilj, who was captured by the kett and placed in a labor camp. Agree to help him, and he sends you a navpoint to Niilj's location. This completes the current mission and launches the mission "Stage a Rescue."



Before you leave, explore the entire base for things to scan and angara to talk to. Enter the building **(5)** near Skeot to speak to an irritated researcher; examine a console next to him to begin the side quest "Frequency."

MASS EFFECT ANDROMEDA

Secondary Ops
Fact or Fiction

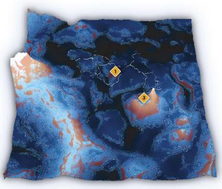
Mission Type: Helios Assignment: Voeld

Prerequisite: Mission 2, must have traveled to Aya and completed "Meet the Family."

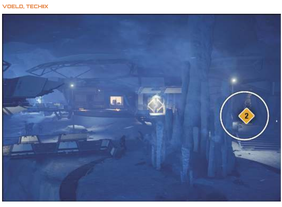
Start Location: Voeld: Techlix

Unlocking: Speak to Ari Vesjek at Techlix, or access the console in the kett base.

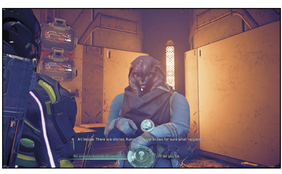
TALK TO ARI VESJEK



VOELD, TECHIX



Find Ari Vesjek (**1**), an angaran scholar, inside the first building (**2**) on the right as you enter Techlix. He's looking for information on first contact between the angara and the kett, specifically from the kett's point of view. He believes logs may be found in the kett operations center on Voeld.



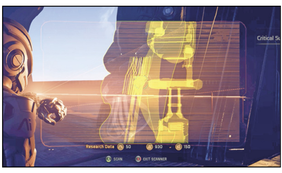
SEARCH THE KETT DATABASE

KETT MOUNTAIN BRISE

The best time to use the console (**3**) to search the kett database is while you're attacking the kett base during "Remove the Heart." Consider it an optional objective of "Remove the Heart," as it gives you access to loot containers previously inaccessible. You're in the second-story room in the central building to destroy the security terminal at that time. After you use the console, SAM performs a search to locate relevant data.

DISABLE SECURITY MATRIX

Enter the building (**4**) and scan the Critical Subsystem console on the support beam seen as soon as you enter through the main east entryway. The scan indicates this is a critical subsystem for the operation of the kett defense matrix. The kett's redundant backup systems ensure that at least three subsystems must be disabled before the defense matrix can be shut down. SAM confirms that disabling three will disable the defense matrix.



Deal with the waves of kett. When you catch a break, sabotage that first console you scanned when you entered. The second critical subsystem (**5**) is on the console facing the inside of the building on your right as you walk in. Sabotage it.

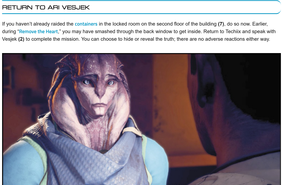
The third and last critical subsystem (**6**) also faces the inside of the building on the left-balcony support wall. Scan it and sabotage it. This unlocks the secure storage structure, and the defense matrix is disabled. Lockdown is lifted, and all automated defenses shut down. This means the first building on the left when you entered the base is now unlocked.

EXTRACT DATA FROM THE CONSOLE

Head into the first floor of the southernmost building (**7**). The previously locked door is now open, revealing a room housing containers and a kett console. Hack the console to extract the data. The record is titled "Angara' First Encounter." You learn that some of the first angara were coerced into working with the kett upon first contact. Ari Vesjek needs this info.

RETURN TO ARI VESJEK

If you haven't already raided the containers in the locked room on the second floor of the building (**7**), do so now. Earlier, during "Remove the Heart," you may have smashed through the back window to get inside. Return to Techlix and speak with Vesjek (**3**) to complete the mission. You can choose to hide or reveal the truth, there are no adverse reactions either way.



MASS EFFECT ANDROMEDA

Nonstop Ops
First Murderer

Mission Type: Nexus Assignment: Nexus

Prerequisite: Mission 1, after Jac Tempest is revealed

Start Location: Nexus Operations: Militia Office

Unlocking: Speak to Kesmiltz, the waiting turian standing in the militia office section of Nexus operations.

SPEAK WITH MARRETTE

NEXUS OPERATIONS: MILITIA OFFICE

Talk to the enlisting female turian in the militia office of Nexus operations (**E**). This explains that her husband is being called the first murderer in Andromeda. He's incarcerated and slated for exile for a murder he didn't commit. To proceed with this mission, agree to talk to him. Nirben Revrus is in the nearby cell.

SPEAK WITH THE PRISON GUARD

Walk across the hallway to the room on the opposite side of operations (**E**) and talk to Sergeant Aivin. the turian guard watching over the prisoner. The conversation is quickly turned over to the prisoner, Nirben Revrus, behind the glass wall. Talk with him to take his case.

SPEAK WITH KANDROS

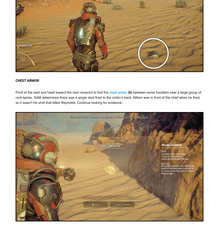
Head back across to the room where you spoke to Nirben's wife and talk to Kandros (**E**), who stands near the Strike Team Mission Hardpoint. When prompted, pick his about the murder case. While he believes that the murder sparked the hostility on the Nexus, so he's not very sympathetic. No matter how you choose to talk to Kandros, the investigation continues. Kandros points you in the direction of the key witness, Cassidy Shaw. He also informs you of the recording of the presentation threatening the victim and uses it as on the nearby console.

OPTIONAL: PLAYBACK RECORDING

This objective is not mandatory, but to hear the damning evidence, walk to the tall console at the entrance to militia office. Interact with the console (**E**) to watch a clip from the weeping wife, Marette, and listen to the recording of a confrontation between the accused and the murder victim.

SPEAK WITH WITNESS SHAW

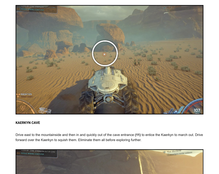
Head to the top level of the Nexus bridge and talk to Cassidy Shaw (**E**). She says she was there during the confrontation you just heard. She's willing to help you, but she's afraid of Ryndok, the man who threatened the victim during the recording. After the conversation, you learn that the body was never recovered or properly examined. Shaw claims Director Tann declared it was too dangerous to go back for Reynolds' body.



SPEAK WITH TANN

Enter the Pathfinder HQ on the Nexus to talk to Director Tann (**E**) about "the Nirben murder charge." You make a request to open the investigation by referring Chief Reynolds' body from Eos. Tann reluctantly agrees and sends you the coordinates of the murder scene.

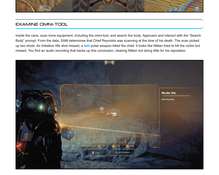
INVESTIGATE MURDER EVIDENCE



EOS: THE GOLDEN WRETTES

LEG ARMOR

Once on Eos, you must search and scan a trail of evidence in the murder of Chief Reynolds. The radiation isn't too bad in the beginning area, but it will be a factor in the Kerwyn Cave and Kadara Valley. Head to the first piece of evidence, the leg armor, late in the Golden Wastes to find the first piece of evidence (**F**). Buried in sand & some leg armor with tissue and bone fragments still clinging to it. Scanning it proves the DNA belongs to Reynolds. Be prepared to fend off some Kaetrayn in this area. If you haven't done so already, scan them to further the mission "Compounding Alien."



HELMET

Head southeast from the first site to find another piece of Reynolds' body that got torn apart and strewn not too far away. Look between some short rock spires for the helmet (**F**) in the sand. Watch out for the nearby Kaetrayn that were probably responsible for scattering the body parts. Scan the Kaetrayn while you're at it to contribute to "Comparatively Alien."

CHEST ARMOR

Proof to the east and head toward the next waypoint to find the chest armor (**F**) between some boulders near a large group of trees. Scan the armor to find more evidence. Watch out for the Kaetrayn in the area back. Make sure in front of the shelf when he fired, as it wasn't him who shot Nalen Reynolds. Continue looking for evidence.

ARMOR SCRAPS

Head southeast until you find the waypoint marking the location of armor pieces (**F**) near more boulders. Scan the area to find multiple armor fragments. SAM comments that the trail leads to a nearby cave.

KADWYN CAVE

Drive east to the mountainside and then in and quickly out of the cave entrance (**F**) to entice the Kaetrayn to march out. Drive forward over the Kaetrayn to squash them. Eliminate them all before exploring further.

EXAMINE OMNI-TOOL

Inside the cave, scan more equipment, including the omni-tool, and search the body. Approach and interact with the "Search Body" prompt. From the data, SAM determines that Chief Reynolds was scanning at the time of his death. The scan pointed up two shots. An initiative rifle shot missed, a sent pulse weapon killed the chief. It looks like Nirben tried to kill the victim but missed. You find an audio recording that backs up the conclusion, clearing Nirben but doing little for his reputation.

CONFRONT NIJUEN

NEXUS OPERATIONS

Next time you're at Nexus operations, head to the cells (**E**) and speak to Nilben again. He asks if you found anything on Eos. You can respond with "You lied to me" or "Yes and no." Either way leads to SAM playing back the recording of Nilben standing over the chief's body, admitting to killing him. But you explain that he's innocent, as he shot missed and the suit's omni killed him. Nilben is relieved that you've cleared his name, but he's still concerned about his reputation. He's concerned about either I might have something to say or "That's for Tann to decide." Either way, you need to speak to Tann next.

SPEAK WITH TANN

TRYNOR OFFICE

Head upstairs to Tann's office and speak with the director (**E**). Depending on your progress elsewhere, he likely takes some time discussing your work with the angara. When it comes, select the conversation option "The Nirben murder charge." You explain the case to him, and ultimately you must decide whether to side Nilben or release him.

There's no wrong choice. Either choice completes the mission, and you receive a large amount of XP. However, if you choose to side Nilben, you can talk with Kandros to get his reaction. You can also find and talk to Nilben on Kadara later.

If you choose to free Nilben, you can talk to his wife, Marette. She reacts to news of his freedom; you can then choose to give her the dirty details and expose his interlocutor. Later, you can find Nilben in the cockpit. He's so upset that he wants to be placed back in stasis.

MASS EFFECT ANDROMEDA

Secondary Ops
First Strike

Mission Type: Allies and Relationships (Priority Ops)

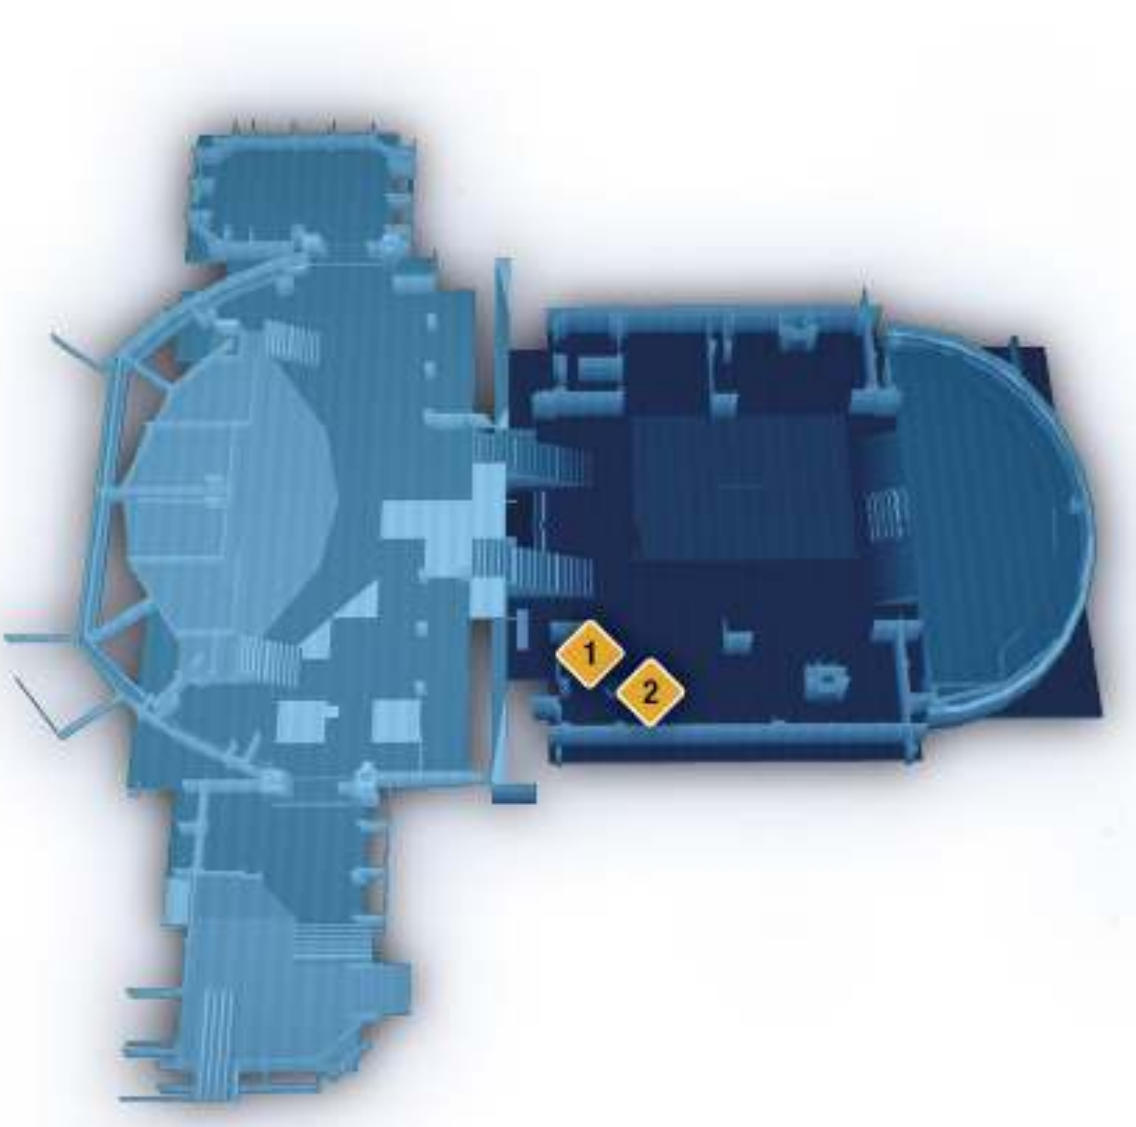
Prerequisite: Available as early as Mission 1

Start Location: Nexus Operations

Unlocking: Talk to Kandros.

SPEAK TO KANDROS ON THE NEXUS OR VIA THE TEMPEST'S VIDCON

NEXUS OPERATIONS



MILITIA OFFICE

Talk to Kandros **(1)** standing near the Strike Team Missions interface. He tells you about the interface. Afterward, interact with it.

INSPECT AVAILABLE STRIKE TEAM MISSIONS

Use the Strike Team Missions interface **(2)** to deploy a strike team to a mission.

Secondary Ops

Forgotten History

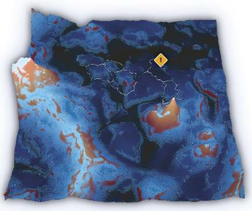
Mission Type: Heleus Assignment: Aya

Prerequisite: Complete "Recovering the Past."

Start Location: Aya: Repository of History (Museum)

Unlocking: Talk to Avela Kjar after completing "Recovering the Past."

SPEAK TO AVELA KJAR



AYA: REPOSITORY OF HISTORY

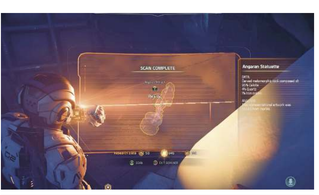
After completing the previous collection quest ("Recovering the Past") for Avela Kjar, speak to her again to receive this quest. She suspects there are angaran artifacts hidden on the planets of Heleus. Search the planets and recover lost relics.

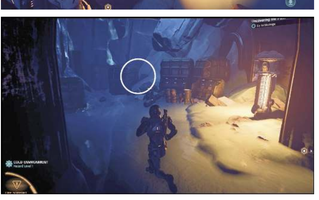
SEARCH VOELD FOR AN ANGARAN RELIC

JR NIHK FROZEN DIG SITE: ICE CAVE

CARVED FIGURE

To recover the angaran statuette, you must enter Ja Nihk **(1)**, but to do so you must first lower the kett force field over this frozen dig site. This requires you to complete "Remove the Heart," which is a lengthy quest through the kett mountain base. Once in the ice cave, and while saving the angaran prisoners, head to the room in the northwest (with a question mark icon over it on the map) and find the **relic** behind some crates **(2)** near the back-left wall. Scan and then pick up this carved figure.

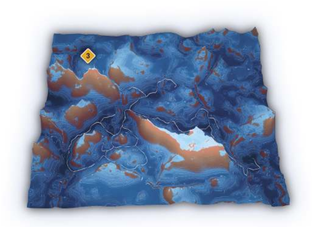




RETURN THE ANCIENT ANGARAN RELICS?

Each time you find an angaran relic, you're directed to return it to Avela at Aya. However, you can ignore the navpoint direction and return all the relics once you've collected the last one. They're available at each location even if you haven't returned one (or any).

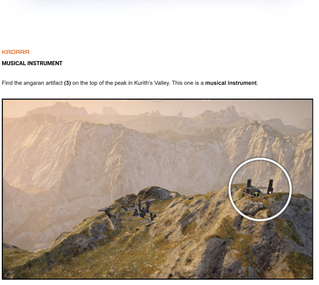
SEARCH KADARA FOR AN ANGARAN RELIC



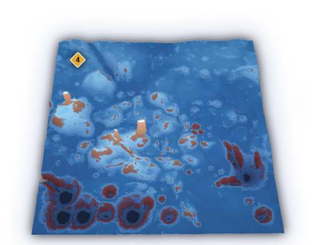
KRORRA

MUSICAL INSTRUMENT

Find the angaran artifact **(3)** on the top of the peak in Kurith's Valley. This one is a **musical instrument**.



SEARCH ELAADEN FOR AN ANGARAN RELIC



ELAADEN

STAR MAP

Land on Elaaden and find the angaran artifact **(4)** on a dais in the middle of the angaran ruins in the northwest corner of the map. This is the **star map**.

MASS EFFECT ANDROMEDA

Secondary Ops

Forgotten Stars

Mission Type: Heleus Assignment: Havarl

Prerequisite: Mission 3

Start Location: Havarl

Unlocking: Talk to Raashel Vier at Pelaav.

SPEAK TO RAACHEL VIER

HAVARL: PELAAV

After speaking with Kiiran Dals when you first enter the main science facility in Pelaav on Havarl, look for Raashel Vier, a female angaran archeoastronomer who lived in the city before it was abandoned after Havarl's vault malfunctioned. She's in the same room **(1)**.

Raashel collects and studies ancient cultural records of pre-Scourge angaran civilization, and believes some of the data she gathered may provide links to lost angaran colonies. However, all Raashel's data was left behind during the catastrophe that ruined the city. What remains of her former home is now infested by mutant wildlife. Volunteer to clean out the beasts and access Raashel's computer to recover the data.

RECOVER DATA FROM RAASHEL'S PERSONAL CONSOLE

On your trek north through the Havarl jungle, check your scanner regularly and forage through containers. You're on a new planet with lots of new tech, vegetation, and wildlife to discover and add to your Research Data.

As you near Raashel's house **(2)**, SAM detects multiple lifeforms in the area. Be prepared to battle numerous new creatures: the cloaked Challyrion, Drall, and maybe even a Rylkor and Galorn. Scan all these creatures, dead or alive, to further the "Comparatively Alien" task.

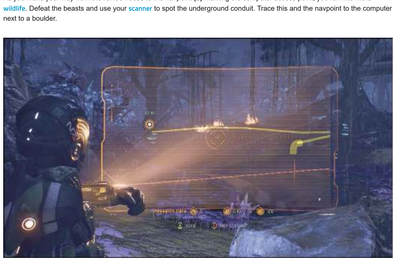
RAASHEL'S HOME

Enter the ruins of Raashel's home **(2)** and find the computer near the front entrance on the wall to the right. SAM tells you the data core in the computer is damaged beyond repair.

You relay the news to Raashel via comms. During your conversation, you learn that backups exist but went down with the city's network center, which is now underground. She mentions the possibility of using an access point on the surface to reach these backups. She puts a navpoint on the map directing you to where a network memory center used to be.

FIND A NETWORK ACCESS NODE

As you make your way from the ruined house to the navpoint **(3)** marking the computer access point, you run into more wildlife. Defeat the beasts and use your scanner to spot the underground conduit. Trace this and the navpoint to the computer next to a boulder.



While using the computer, Raashel remotely downloads the data and congratulates you. She will pass on the data to her colleagues. You earn 29 AVP for completing this mission.

Secondary Ops
Frequency

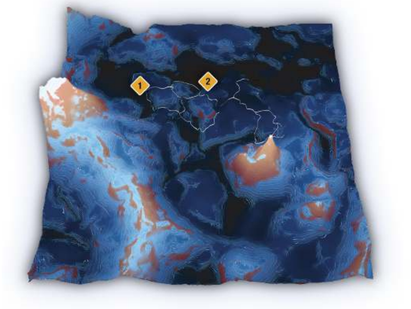
Mission Type: Heleus Assignment: Voeld

Prerequisite: Mission 2, complete "Return to the Tempest" after Aya during "A Trail of Hope"

Start Location: Voeld: Hjara

Unlocking: Speak to the irritated researcher, or start at the meteorite.

SPEAK TO THE IRRITATED RESEARCHER



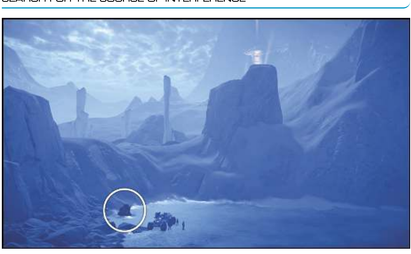
VOELD, HYJARA

While exploring Hjara and finishing "On the Front Lines," enter the building **(1)** next to Skeot and talk to the irritated researcher. He's dealing with equipment malfunctions and can't get important information to the Resistance in Telara.

EXAMINE THE EQUIPMENT

After speaking to the irritated researcher, examine the console directly beside him. This kicks off the side quest. Make sure to scan the communications equipment in this building and other angaran tech around Hjara, like the **infrared surveillance device** near the merchant bar and the large **ice block**. Also, raid the **container** at the base of the westernmost red light (one of the tall red lights Hjara is famous for).

SEARCH FOR THE SOURCE OF INTERFERENCE



Drive the Nomad to the navpoint **(2)** in northern Voeld (just east of the northern holding site in "Stage a Rescue"). Before you inspect the huge meteorite here, take care of any wildlife in the area, which are behaving especially *wild*.

DEFEAT THE ADHI

There's an ammo crate next to the meteorite, and it doesn't take long to figure out why. Eight wild Adhi rapidly approach your position.

You may get so overwhelmed by these beasts that you resort to jumping, ground-pounding area attacks using your blade to damage many at once.

SCAN THE METEORITE

When you catch a break from the wildlife, scan the meteorite. Apparently it's the remainder of a metallic meteor that landed on Voeld. It's emitting strange energy that disrupts communications and, oddly enough, seems to cause aggression in nearby wildlife—no joke.

NEUTRALIZE THE SIGNAL

After scanning the meteorite, you can start dampening it. It's a long hack-like process. As soon as you begin, look for a horde of wild Adhi charging you from across the frozen lake. Stop dampening and deal with the beasts. Afterward, finish dampening. SAM suggests bringing a sample to the Nexus for further analysis. This completes the mission and frees up the angaran communications.

MASS EFFECT ANDROMEDA

Secondary Ops

From the Dust

Mission Type: Helios Assignment: H-047C

Prerequisite: Access to the Remav system

Start Location: H-047C

Unlocking: Interact with the datapad located in the dome closest to the Tempest landing zone.

LOCATE THE DATAPAD

H-047C

FIRST DOME

From the Tempest landing zone (**1**) on H-047C, travel west toward the nearest "Hitting Rocks for Science" marker. The datapad that kick-starts this quest is inside the same dome (**2**) as the marked rock. Drive into the dome entrance and defeat all the Raiders, Sharpshooters, and Pariahs inside.

Enter the facility under the dome and find a Loadout interface—conveniently placed, since you can't exit the Nomad while on the lunar surface to use a forward station for such needs. To the left of the Loadout interface is the **datapad** you're after. It's a message from Alvis that talks of helium-3 mining, and you get a single code snippet with which to enter the Outlaw Headquarters.

LOCATE THE OUTLAW HEADQUARTERS

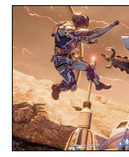
You've discovered an Outlaw gang on H-047C. You need to gain access to their headquarters and stop the Outlaws from completing their plans.

FIND THE THREE CODE SNIPPETS

SECOND DOME

SECOND CODE SNIPPET

You found the first code snippet, now you must find two more. Exit the dome (**2**) and drive south to the next dome (**3**) indicated on the map. There are many more exiled helium miners here, plus a Hydra and turrets to deal with.



After clearing everything, you find the **datapad** with the second code snippet on the counter in the main building. This datapad is titled "Message for Kree." Make sure to raid the **container** in the room behind the counter.

THIRD DOME

LAST CODE SNIPPET

Drive east to the third dome (**4**) and into the vehicle entrance. Inside are Raiders, a Pariah, an Anarchist, and Adhi. Defeat them all. Clear the area and search for containers and **minerals**. You also find **element zero** in here for "Hitting Rocks for Science."

The third and last **datapad** containing a code snippet is located on the second floor of the main building under the dome. There are two datapads in this room; the one you want is on the shelf to the right as you enter. The name: "Progress Report." Raid the **large container** in this room as well.

OUTLAW HEADQUARTERS DOME

SAM marks the navpoint to the Outlaw Headquarters (**5**) on your map. Exit the dome and head west along the beaten path to clear canyons, and then north for the marked location. Along the way, SAM tells you the base comprises two mining domes. The second one can only be accessed with a passcode.

ENTER THE HEADQUARTERS

Inside the dome, expect more resistance than you met in the previous domes, but no Hydra. Defeat Anarchists, Pariahs, Adhi, and Raiders. Follow the navpoint to the doorway between domes, and use your passcode at the airlock console.

CLEAR THE HEADQUARTERS

You're tasked to clear all enemies from the smaller dome, including Raiders, a Berserker, an Anarchist, Adhi, and Krex, the last of which is the toughest of them all. Put the entire team on this krogan target to take him down. Scan the dead, especially the krogan Berserker if you've never scanned one before.

DISCOVER KREX'S PLANS

Follow the navpoint to the second floor in the main building. A **container** and the **target datapad** sit on a table to the left. The datapad is an audio log from Elora. She had plans to take out the Initiative colonies, and to do this, she needed lots of helium-3. She mentions that the Remnant tiller in the conservatory will help get the job done. SAM marks the conservatory on your map. This ends "From the Dust" and introduces you to a new quest: "The Remnant Tiller."

MASS EFFECT ANDROMEDA

Secondary Ops

Gil Brodie: A Game of Poker

Mission Type: Allies and Relationships

Prerequisite: Mission 3

Start Location: Tempest

Unlocking: Receive Gil Brodie's "Poker Awaits!" email.

READ EMAIL FROM GIL

TEMPEST

During Mission 3, be on the lookout for an email from Gil about playing poker in the Vortex on the Nexus. To receive the email, make sure you've exhausted all Tempest conversations with him. This mission becomes active after you read the email.

Poker awaits!
Ram-Tech
Solicitation - Bad
I blame you
[Error 882: Carrier signal interrupted] — Invitation
Something Suspicious
Poker awaits!
To: Ryder
From: Gil
Ryder, the bell tolls for thee. Meet me in the Vortex on Nexus. I'll be the one shuffling the deck of doom.
Cheers,
Gil

MEET GIL AT THE VORTEX

NEXUS: THE VORTEX

Next time you're at the Nexus, enter the Vortex Bar and find Gil sitting at a table all the way against the right wall. At the beginning of the game, SAM offers to give you an advantage by reading Gil's vitals. You can agree or refuse to cheat. Cheating has a negative impact if you're trying to romance Gil; he starts talking about his friend Jill. You can respond positively or take a jab at him with a more jealous remark. At the end of the game, you can fess up and tell him you cheated… or not. If you confess, he relays to Jill that you're also a cheat.

MASS EFFECT ANDROMEDA

Secondary Ops

Gil Brodie: The Friend

Mission Type: Allies and Relationships

Prerequisite: Complete Mission 4

Start Location: Tempest

Unlocking: Read email from Gil.

READ EMAIL FROM GIL

TEMPEST

After Mission 4, make sure you've exhausted all conversation options with Gil and have been friendly toward him. He then sends you the "Come meet Jill!" message. He's asked you to come to Prodromos to meet his friend Jill.

Meet My True Mother
Concerned about Drack
Inspiration
Come meet Jill
One more try...
You okay?
Come meet Jill!
To: Ryder
From: Gil
Hey, next time we're on Eos, I'm meeting up with my buddy Jill. She'd love to meet you, and I kinda said you'd make an appearance.
So don't make a liar out of me!
Gil

MEET GIL AND JILL ON EOS AT PRODROMOS

EOS: PRODROMOS

Travel to Prodromos and head past August Bradley to Gil, who's standing as close to the landing pad as he can get to wait for Jill's arrival. Play around with Jill in your conversation with her. You can turn this into a serious relationship with Gil (if you want to) after this meeting.

MASS EFFECT ANDROMEDA

Secondary Ops

Gone with the Wind

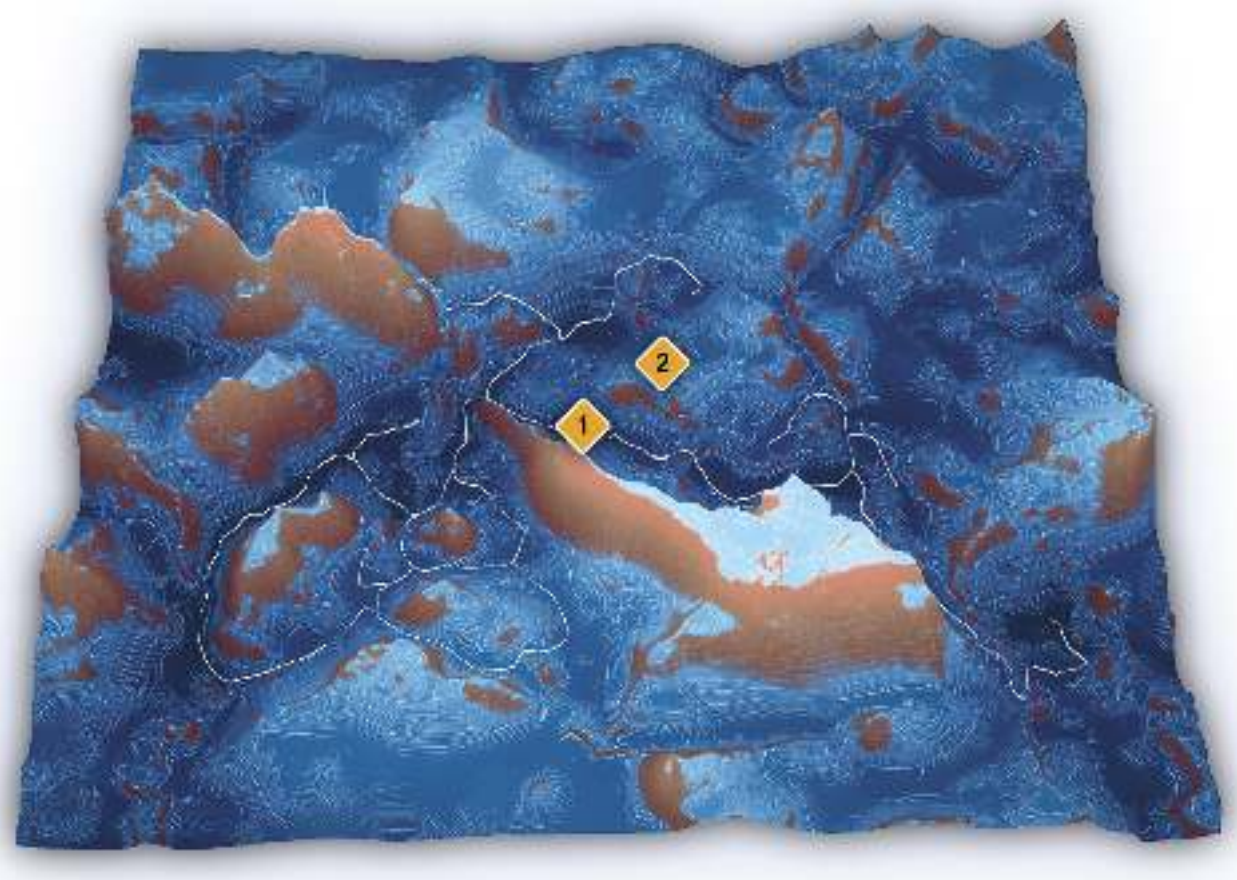
Mission Type: Heleus Assignment: Kadara

Prerequisite: Must have interrogated Vehn Terev in “Hunting the Archon”

Start Location: Kadara: Varren’s Scalp

Unlocking: Speak to Aislin.

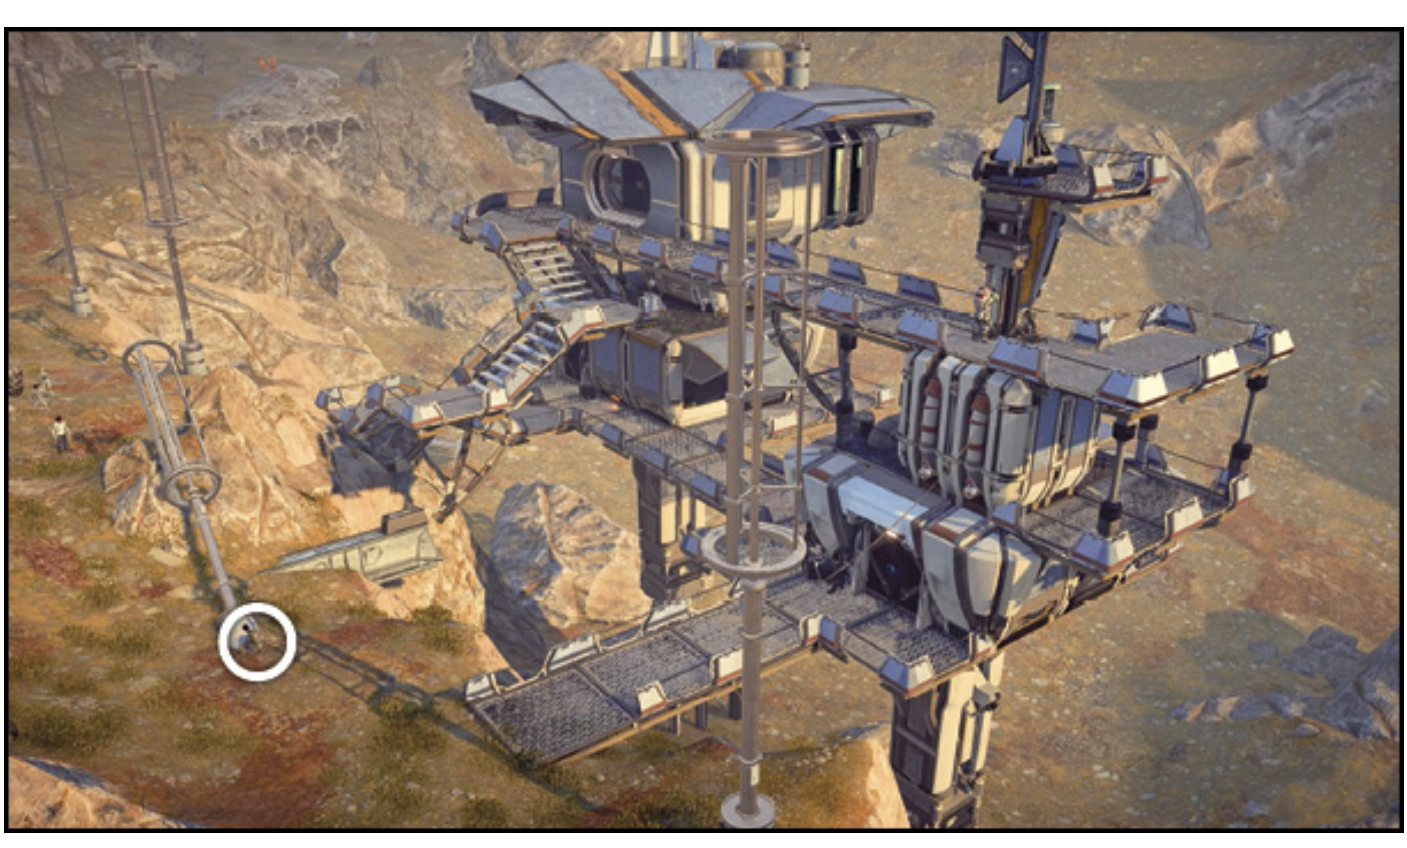
SPEAK TO AISLIN



KADARA

VARREN’S SCALP: WINDFARM

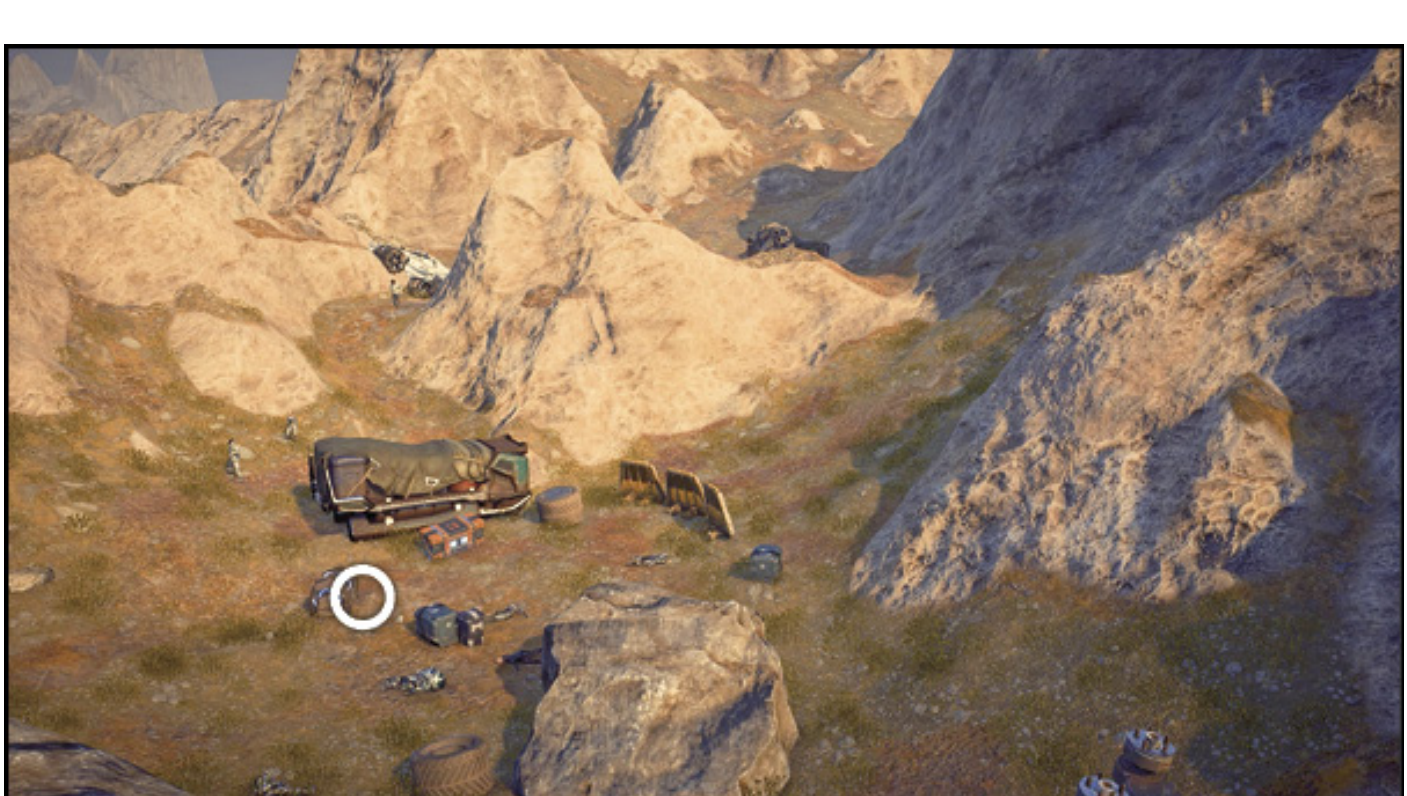
Scavengers are stealing turbine parts from the windfarm outside Kadara Port. When you reach the windfarm, an exile named Aislin **(1)** enlists your help to bring the stolen parts back. Agree to help her. (While you’re here, enter the first floor of the left building—left as you’re walking toward it from the cliff side—and talk to the turian merchant to start “A Packaged Deal.”)



FIND STOLEN TURBINE PARTS

HAARFEL

Drive the Nomad to the mountaintops **(2)** in Haarfel to the northeast of the windfarm. You find this small, empty camp with a generator.



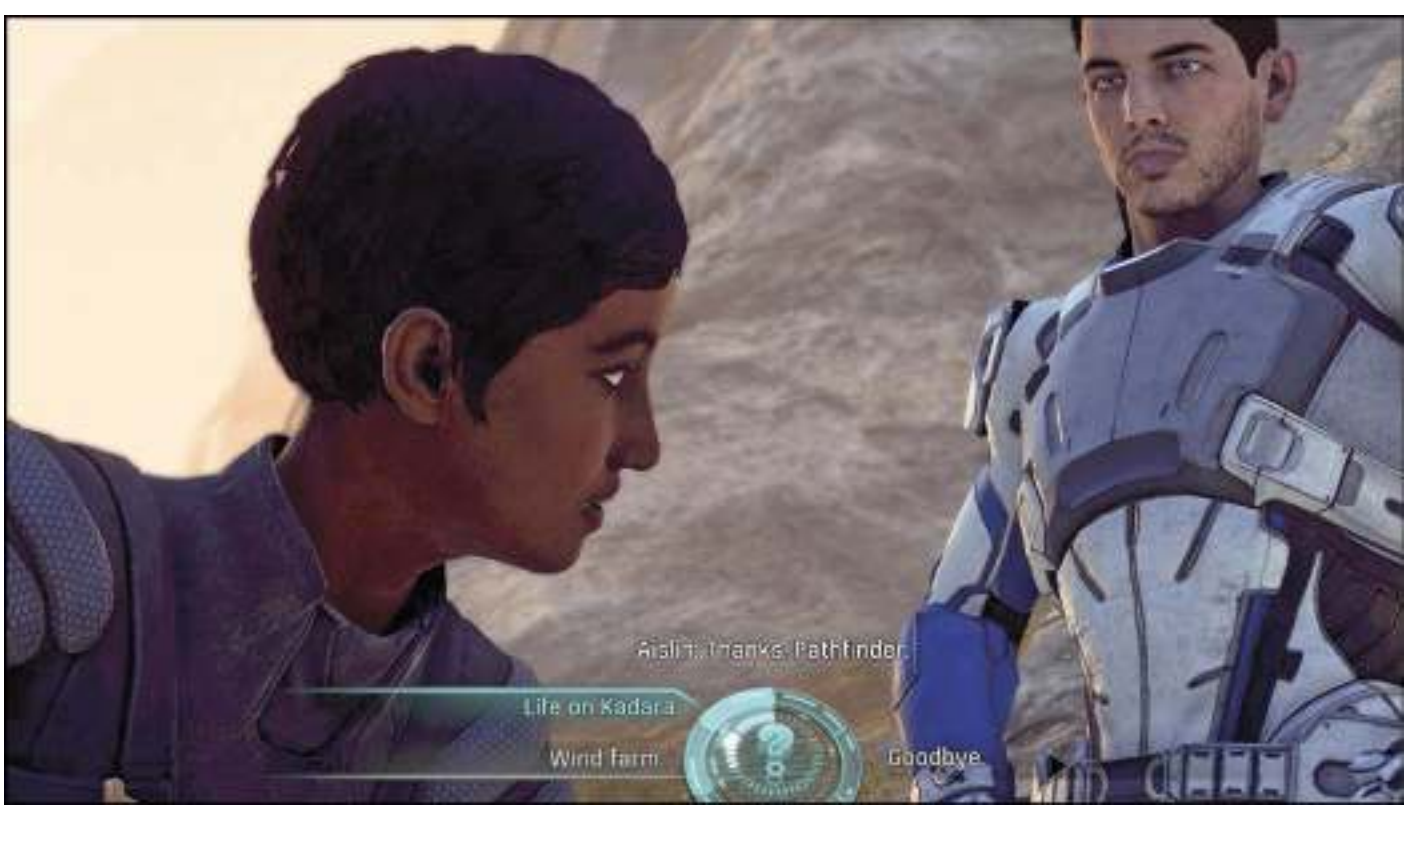
EXAMINE DEBRIS

DEFEAT THE ANCIENT EIROCH

Examine the debris (the prompt on the generator) and then jump to the top of the nearby crates. This keeps you a little safer from the Ancient Eiroch. Scan this guy. He’s rare. Then kill him.

RETURN TO AISLIN

Return to Aislin **(1)**, who’s still toiling on some kind of project in front of the windfarm. You tell her the fiend got the scavengers and the turbine parts are destroyed. She’s happy, at least, that “yaw drive is not being used by a bloody scav.” You can continue talking to her to get more information. The quest completes when the conversation ends.



MASS EFFECT ANDROMEDA

Secondary Ops
Gray Matter

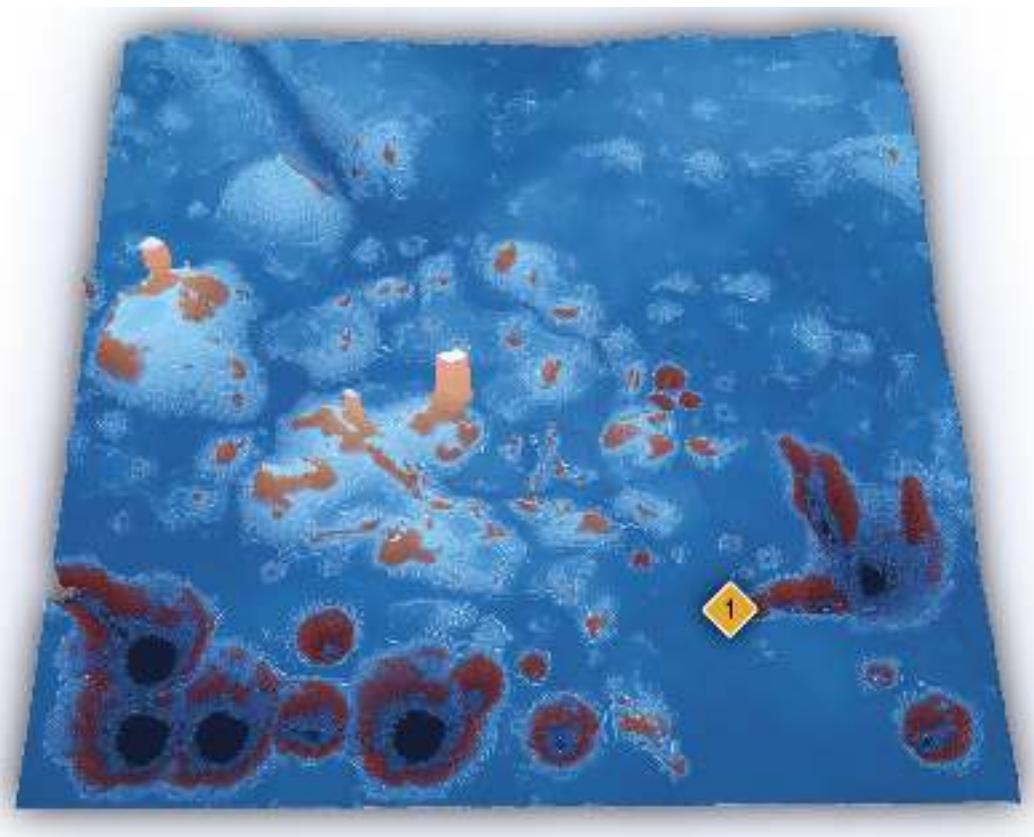
Mission Type: Heleus Assignment: Elaaden

Prerequisite: Complete "The Mind of an Exile"

Start Location: Elaaden: The Paradise

Unlocking: Complete "The Mind of an Exile" and allow a little time to pass.

PICK UP LEXI'S SERUM



ELAADEN: THE PARADISE

After completing "The Mind of an Exile," where you scanned multiple scavengers to give Lexi the data she needed for her research project, give her some time to come up with results. Then this mission begins. Lexi develops a serum that may hold off the symptoms of neural decay that several scavengers are experiencing. All she needs is the perfect test subject.

SPEED UP THE RESEARCH

To begin this mission immediately after "The Mind of an Exile," you must leave the Paradise area. Travel to another forward station, or drive off in the Nomad a short distance, and then return.

Begin by picking up the serum inside the Paradise **(1)**. You find it on the shelf Velonia is facing. Over comms, Lexi says she'd like to test this serum on a live subject, but you need a good candidate.

SCAN SCAVENGERS TO FIND A TEST CANDIDATE

Start by scanning everyone inside the Paradise, and listen as Lexi shoots down each candidate. The quickest way to complete this quest is to go straight to the correct subject, which is not random—it's always the same guy. Head outside and make your way to the west end of the covered path (the opposite end of the forward station). Scan the scavenger **(2)** standing near the parking lot. Lexi confirms this guy is perfect and suggests you ask him nicely if he'll be a test subject for the new serum.

TALK TO THE SCAVENGER

Talk to the raving scavenger. You tell him you have some medicine that will make him feel better. He refuses it; he feels better than he ever has. Tell him either that he can have his life back, or that the serum will repair his mind. He still refuses. Finally, you can choose between asking nicely one more time (select "If you say so"), and forcing him to take it (select "Don't be stupid"). He takes it if you choose the latter. Either way, the mission ends successfully.

MASS EFFECT ANDROMEDA

Secondary Ops

H-047C: A New World

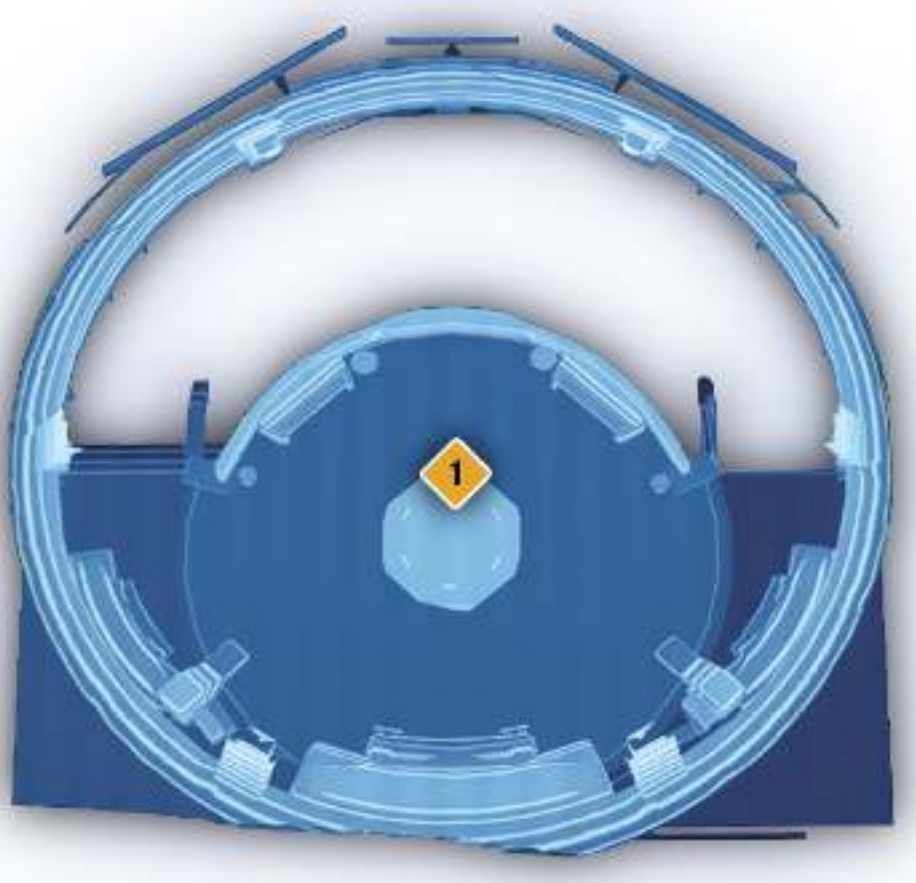
Mission Type: Allies and Relationships

Prerequisite: Must have interrogated Vehn Terev in “Hunting the Archon”

Start Location: Tempest

Unlocking: Enter the Tempest after interrogating Vehn Terev in “Hunting the Archon.”

TRAVEL TO H-047C IN THE REMAV SYSTEM



TEMPEST: MEETING ROOM

A meeting is held in the meeting room **(1)** on the Tempest when you return from Kadara (with the prerequisite conditions met). There are reports of interesting and potentially lucrative activity in the Remav system. While those reports alone seem vague, it’s also the area where the turian ark may have been headed. Vetra and Peebee suggest that we check it out.

MASS EFFECT ANDROMEDA

Secondary Ops
Hard Luck

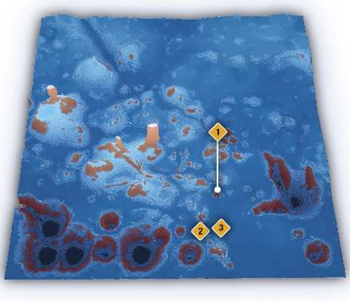
Mission Type: Heleus Assignment: Elaaden

Prerequisite: Unlock Elaaden

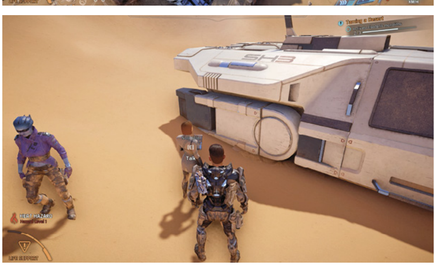
Start Location: Elaaden: Paradise Sands

Unlocking: Speak to Nora Tallis.

SPEAK TO NORA TALLIS



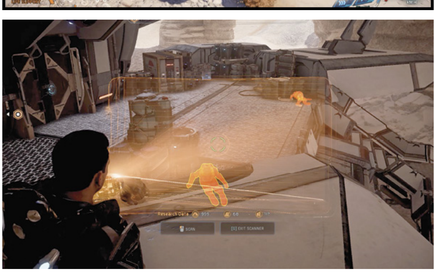
PARADISE SANDS: SINKHOLE



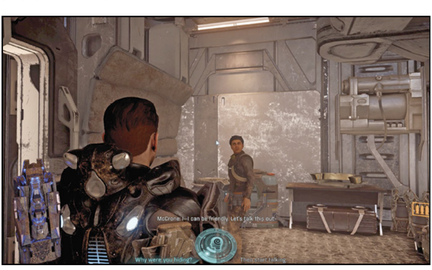
While driving in the area indicated on the map, look inside the many sinkholes to find the one with Nora Tallis **(1)** inside, standing next to her stranded shuttle. Talk to her. She needs your help retrieving a thruster from an exile named Axius. It belongs to her Nexus shuttle.

FIND NORA'S SHUTTLE THRUSTER

Nora gives you the navpoint to Axius's camp **(2)**. It's a short drive south from your location. On approach, you find a camp in the side of a hill. Head to the top exterior balcony on the building where two dead bodies are located. Scan them. SAM analyzes the data and determines they've been dead for some time.

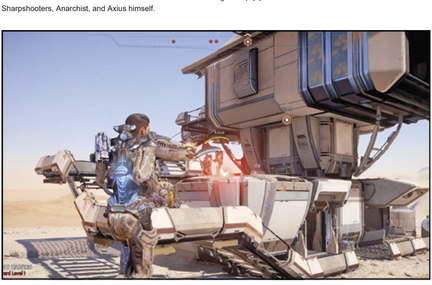


Enter the unlocked room near the bodies to find McCrone inside. Ask him why he was hiding. Apparently he hid when he saw Axius coming. According to him, Axius is the meanest gang leader in Elaaden. Axius' gang runs raids on other scavenger camps and leaves no one alive. You ask him for the location of the thruster they bought. He says Axius probably took it and gives you your death-wish navpoint.



RETRIEVE THE THRUSTER FROM AXIUS

Re-enter the Nomad and drive due east. You discover a semi-large camp **(2)** full of Outlaw Raiders and Adhi. Eliminate the Sharpshooters, Anarchist, and Axius himself.



INVESTIGATE AXIUS' CAMP

MASS EFFECT ANDROMEDA

Secondary Mission
Healing Kadara's Heart/The Outlaw Monolith

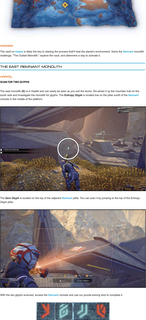
Mission Type: Nexus Assignment: Kadara

Prerequisite: Must have interrogated "Girl Toes in Thrusting Ma Archos"

Next Location: Kadara

Debunking: Approach one of these monoliths on Kadara

ACTIVATE THE TWI THREE MONOLITHS



ANDROMEDA

The vault on Kadara is likely the key to starting the process that'll lead the planet's environment. Solve the Remnant monolith challenge. The "Golden Monolith," seems the vault, and determine a way in to activate it.

THE EAST REMNANT MONOLITH

THE EAST REMNANT MONOLITH

KADARA

YOUR FOR THE SOPHS

The east monolith (**E**) is located in the Hyperion Outpost. Head to the Nexus Assignment: Kadara marker on the map and approach the outpost. Use a pair of Profiles compatible with Shapeshifters and an Adh. Sol roll of the locals and head into the base until the glyphs symbols are visible.

The **Alien Glyph** is located on the top of the adjacent Remnant pillar. We can reach it by jumping to the top of the Omega Vault pillar.

With the two glyphs activated, access the Remnant console and use our probe-reading tool to activate it.

THE WEST REMNANT MONOLITH

PILLAR SPINNING

YOUR FOR THE SOPHS

The west Nexus monolith (**W**) is found in Hub. The Remnant platform is inside a cave. The tunnel that leads to the platform is accessible from the west, near a pair of Profiles compatible with Shapeshifters and an Adh. Sol roll of the locals and head into the cave until the glyphs symbols are visible.

Get out of the tunnel before you reach the platform. There's a glyph you can scan before you get too deep. On the right side of the tunnel, just before the platform, is the **Melding Glyph**. Use it to unlock the Remnant relic being summoned.

Locate the door a tunnel system. You can talk to him. He kindly tells you to leave. It's not until your have things about how good you are with Remnant consoles that he wants to warn up to you. Pull out the scanner and probe him how to door.

Once the **Hydrodynamic Glyph** at the Remnant pillar right in front of the Remnant console. Once, scan, up and scan it. Now activate the Remnant console. There's not even a Remnant puzzle to solve here.

THE SOUTH REMNANT MONOLITH

PILLAR SPINNING

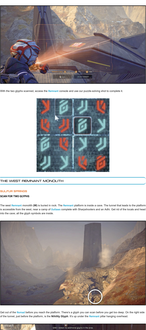
YOUR FOR THE SOPHS

The south Remnant pillar (**S**) also has a nice entrance that allows you to reach the glyphs and Remnant console. Not only are you in a position to begin the puzzle, but you can activate the Remnant console from here.

At the end of the narrow tunnel is a chamber hosting a glyph. Hit the scanner and head toward the next passage. Scan the **Internal Glyph** and hit the pillar to put all of the passage ashamed.

So you climb the next platforms, look for the next glyph high on your right, just before you reach the clearing with the Remnant platform. Once the **Summons Glyph (S)**.

The **Kinetic Glyph(K)** is at your left as you step up onto the platform. The last one, the **Thermodynamic Glyph(T)**, is at a step behind the Remnant console. Activate all of the symbols in reverse order to unlock the Remnant vault door.



NAVIGATE THE VAULT'S ENTRANCE

Find the first vault symbol directly at a cliff in Hub#4. Go approach, the vault-scape out of the ground. Enter the vault and use the Gravity field to explore below.

ACTIVATE THE VAULT'S EMERGENCY POWER

VAULT ENTRANCE

Once you're at the lower floor (**S**), jump up to the platform to the back of the chamber and interface with the Remnant console (**S**). Three more vaults appear over there more Remnant consoles in the room (**ACCESS**).

REMOVE THE VAULT'S LOCKDOWN

Hit puzzle in the room. Just activate all three consoles (**ACCESS**) to open the main door, allowing access to the main vault (**P**). Once you're in, you'll see the Remnant vault door.

On the first two platforms (**S**), find the next Nanites Remnant glyph to further the quest. Activate it to reveal some pillars on your right. Use your Jetpack to jump from the front of pillar to vantage over the cliff (**S**) and activate your scanner and then scan the Kinetic Glyph (**K**).

Jump the next to reach the northwest platforms, and activate the Remnant console (**N**). The cliffside looks pretty high, but it's the perfect vantage point to scan the next glyph on the platform (**N**). Once the Thermodynamic Glyph (**T**) is activated, the Kinetic Glyph (**K**) will create a bridge that leads from the platform (**S**). Head north and interface with another Remnant console (**N**). Scan the Summons Glyph (**S**) and activate the relic. Jumping over obstacle (**S**), and a Remnant vault will appear (**P**). Defeat the Architect and head there next.

Head to a **controller** in the room in the middle of the floor (**M**), and interface with **access** (**M**) and then a console at the **controls**. Interface with the console (**M**) on the right side of the broken door (**D**) to unlock it. A console (**D**) on the right-hose you can interface with to open the door. Inspect Nanites shield to the window using your probe (**D**). Remnant.

Inside you find a Destroyer, an Assembler, and a Sentinel. A Nanites console (**D**) in the back of the room hosts a small Remnant puzzle. Activate the console (**D**) to reveal the Remnant puzzle. Activate the first node (**D**) to reveal the first node. Head to the Remnant Nanites Puzzle Room to find a new node on the northern side. Try to use it to activate the Remnant Nanites Puzzle Room to find a new node on the northern side. Try to use it to

ACTIVATE CONTROLS

REMNANT GATE CORE

Defeat the first wave and use the glyph under on the door to get it to your head. Or use the accompanying movement to reheat your memory. Each of the six consoles has one of these symbols over it. Activate them in the same displayed on the door to open the door. Head to the Remnant Core and the completed vault. Note that the door (**D**) (**D**) (**D**) (**D**) inside to the vaults are for Tiger Nanites and Data.

BACK ON TRACK

Head all the way back to the south platform (**S**) you interacted with, and take a running leap off the end of that ledge (**S**) to make it down to west and thus platforms. Head to the right side of the vault and use the Remnant console there (**S**) to unlock the door (**S**).

AND EXIT THE VAULT

In the penultimate chamber, you find the Remnant consoles (**P**)(**S**)(**S**)(**S**)(**S**) that control shields and lasers aimed at the platforms that (**M**) - interface the Assembler.

Activate all the consoles and defeat all the Remnant (Sentinel, Architect, and Assembler). Once the room is clear, activate the pyroflame field (**M**) and run to console (**M**) to put the core pillars (**P**) back. Activate the console (**M**) that raises pillars (**P**) and jump to access the main platform (**P**) again. The next and last the scanners room (**M**) to turn your core the completed.

Secondary Ops

Helping Havarl's Scientists

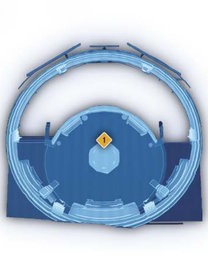
Mission Type: Heleus Assignment: Havarl

Prerequisite: During "A Trail of Hope," pick up Jaal on Aya

Start Location: Tempest

Unlocking: Leave Aya for the first time with Jaal on board the Tempest.

TRAVEL TO HAVARL



TEMPEST: THIRD FLOOR

This mission unlocks after the conversation between the crew and the newest member of the team, Jaal, which happens on the third deck of the Tempest **(1)** right after you leave Aya for the first time. Kiiran Dals' research team was studying one of Havarl's monoliths when they triggered a strange Remnant stasis field. It's kept them in a frozen state, alive but unresponsive. You complete this objective by landing on Havarl.

EVFRA'S TRUST QUESTS

There are two quests you can choose between (or you can do both) to gain Evfra's trust: this one, and "Stage a Rescue" on Voeld, where you rescue imprisoned angara. After completing one of these missions, talk to Evfra via Vidcon on the Tempest to advance the Priority Ops missions.

MAKE CONTACT WITH THE SCIENTISTS AT PELAAV

HAVARL: PELAAV

The lead scientist, Kiiran Dals, is in the main building **(2)** at Pelaav, which is near the Tempest landing zone and a convenient forward station. Talk to her, and Jaal asks her where all the scientists are, as your team has some Remnant experience you'd like to share. She says they're frozen in some kind of stasis field. Agree to help her.

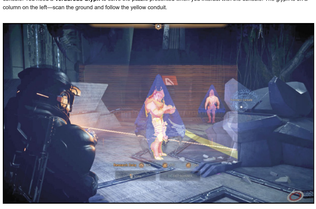
HELP THE RESEARCHERS TRAPPED AT THE MONOLITH

HAVARL: MONOLITH

Travel east and stick to the right side of the jungle as you look for the next forward station location. Call it down and head south from that location into a narrow pathway that leads to the monolith **(3)**.

You likely run into some Roekaar Raiders, Adhi, and Galorn in this area, so prepare to engage in some jungle warfare. You may even see some Creepers as you approach the Remnant tunnel. In the tunnel, you encounter Observers, Assemblers, and a Nullifier. If you have the mission "Better Crafting" active, make sure to find the hops you need in this Remnant-tech tunnel.

Find the scientists **(2)** trapped in stasis at the end of the tunnel on a Remnant monolith platform. They surround a Remnant console. You need a **Verdurous Glyph** to solve the puzzle presented when you interact with the console. The glyph is on a column on the left—scan the ground and follow the yellow conduit.



The **Magnitude Glyph** is located on the platform, on the back of a Remnant block beside the console (on the right). You only need two glyph scans to solve the puzzle. Use our shot for a quick completion.

Solving the puzzle frees the scientists. Assistant Torver adamantly thanks you. You suggest he should return to Pelaav and speak with Kiiran. That's exactly where you need to return as well.

RETURN TO KIIRAN DALS

Head back to Pelaav and speak with Kiiran **(1)**. There's a bit of a party atmosphere in the science building, as the angara are ecstatic for the return of the scientists and the discovery of your Remnant-tech savvy. With this trust quest complete, Evfra will surely be convinced that you're an ally.

MASS EFFECT ANDROMEDA

Secondary Ops
High Noon

Mission Type: Helius Assignment: Kadara

Prerequisite: Must have interrogated Vehn Tarex in "Hunting the Archon"; must have completed the following quests: "Behind Enemy Lines," "A People Divided," "Healing Kadara's Heart," "Modern Medicine," "Precious Cargo," "Night on the Town".

Start Location: Kadara Port: Outcast Headquarters

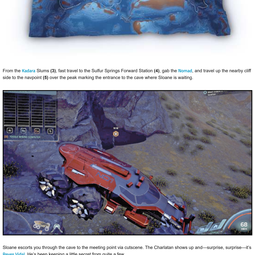
Unlocking: Speak to Sloane.

SPEAK TO SLOANE

KRORRR

OUTCAST HEADQUARTERS

After completing "Night on the Town," re-enter Sloane's Outcast Headquarters and speak with her **(1)**. She complains about the Charlatan using her people to beat up Kaetus, who's barely alive. She says the Charlatan left a note on Kaetus' body. He wants to settle things and sets a meeting spot in Draylir. You both agree it could be a trap, but Sloane trusts you'll have her back. Use the terminal **(2)** to reach the Kadara Slums.



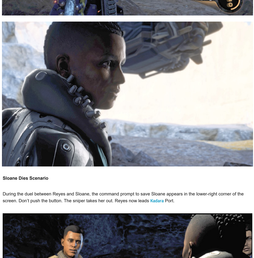
MEET SLOANE AT THE CHARLATAN'S SPECIFIED LOCATION

KRORRR

DRAULUR

From the Kadara Slums **(3)**, fast travel to the Sulfur Springs Forward Station **(4)**, grab the Nomad, and travel up the nearby cliff side to the navpoint **(5)** over the peak marking the entrance to the cave where Sloane is waiting.

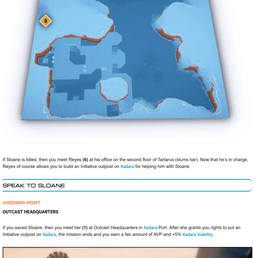
Sloane escorts you through the cave to the meeting point via cutscene. The Charlatan shows up and—surprise, surprise—it's Reyes Vidal. He's been keeping a little secret from quite a few.



You can respond to this discovery by saying, "You lied to me" or "This was your plan all along." Choose either; they both lead to the next discovery: Reyes wants a duel between Sloane and himself. Winner takes Kadara Port. She accepts.

Sloane Lives Scenario

Watch the lower-right corner of the screen during the duel pacing. Execute the command prompt as soon as it appears if you want to save Sloane by tackling her to the ground as a sniper tries to kill her with a cheap shot. She gathers herself and shoots the gun from Reyes' hand. He runs off while the sniper covers him.



When you run out to the ledge after him, a dropship arrives and quickly sweeps him up. During this sequence, watch the lower-right screen again for another button prompt. To shoot Reyes, hit the button with time remaining on the gauge. Unfortunately, you just clip him. A shield envelops Reyes, and the dropship rescue is successful; if you choose not to shoot, you tell Sloane it's because he was unarmed. Either way, Reyes escapes, but Sloane is convinced of your loyalty.

Sloane Dies Scenario

During the duel between Reyes and Sloane, the command prompt to save Sloane appears in the lower-right corner of the screen. Don't push the button. The sniper takes her out. Reyes now leads Kadara Port.

SPEAK TO REYES AT TARTARUS

KRORRR SLUMS

TARTARUS

If Sloane is killed, then you meet Reyes **(6)** at his office on the second floor of Tartarus (slums bar). Now that he's in charge, Reyes of course allows you to build an Initiative outpost on Kadara for helping him with Sloane.

SPEAK TO SLOANE

KRORRR PORT

OUTCAST HEADQUARTERS

If you saved Sloane, then you meet her **(1)** at Outcast Headquarters in Kadara Port. After she grants you rights to put an Initiative outpost on Kadara, the mission ends and you earn a fair amount of AVP and +5% Kadara Viability.

Secondary Ops
Intercepted

Mission Type: Heleus Assignment: Voeld

Prerequisite: Mission 3

Start Location: Voeld

Unlocking: Use one of the three requisition terminals in the Resistance base.

USE THE REQUISITION TERMINAL

VOELD: RESISTANCE BASE

Examine the **datapad** located at any one of three consoles in the main operations area of the Resistance base **(1)(2)(3)** to begin this mission. The datapads contain reports of medical supplies failing to reach their destinations.

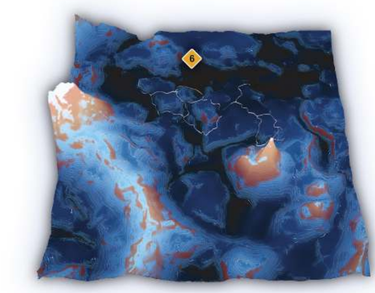
SPEAK TO OLISK

Olisk **(4)** stands near the stairs where you find Anjik Do Xeel in the operations area of the Resistance base. Speak to Olisk. After reading up on the problem with supplies, you ask if Olisk is the requisitions officer. He denies any problems at first. You can press him by saying, "Why are you lying?" or "Not from what I hear." He then lets you in on the secret and wants it kept hush-hush so morale doesn't drop. He eventually gives you the navpoint for the drop location so you can quietly investigate.

USE THE REQUISITION TERMINAL

Head to the requisition terminal **(5)** directly behind Olisk to get the navpoint for the supply drop.

REACH THE DROP POINT



VOELD

Descend the mountain in the Nomad, leaving the Resistance base, to come within proximity of the navpoint Olisk sent you. Make the first possible left and check out the navpoint **(6)**. You come across a supply drop guarded by Roekaar.

DEFEAT THE ROEKAAR

You confront a Roekaar Sharpshooter and a couple of Raiders. It's a small group, and your team makes quick work of them.

SEARCH THE DROP POINT

The **datapad** is in the middle of the camp on the edge of a small crate. Examine it and earn AVP by completing this quick mission.

MASS EFFECT ANDROMEDA

Secondary Ops

Investigate the Remnant Derelict

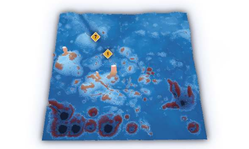
Mission Type: Helius Assignment. Cluster.

Prerequisite: Complete "Parley with the Kenger"

Start Location: Cluster.

Unlocking: Approach the derelict Remnant ship.

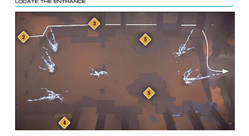
GO TO THE DERELICT REMNANT SHIP



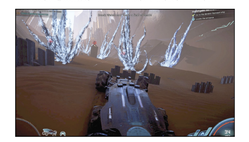
ELARDEN: HELL'S PROMISE

To keep Morda from potentially building a bomb, you must retrieve the drive core located inside the heart of the Remnant derelict. The initiative needs to get it before Morda's people do. Head to the Remnant derelict ship (**1**) in Hell's Promise.

LOCATE THE ENTRANCE



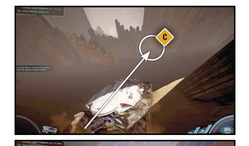
Deploy the nearby Hell's Promise Forward Station and then approach the south entrance of the ship, which is in a low area between the gateway between large sand dunes. Scale the Nomad on the tunnels and don't stop until you reach the interior where the Scourge energy pockets (**2**) begin. Tunnels behind them stop you from safely taking the Nomad any farther.

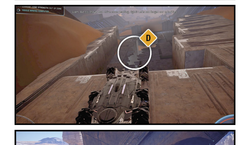


SUPER SNEAKY

Finding the derelict's entrance the conventional way requires you to fight through multiple tunnels. No matter what pathway you take, you eventually face tunnels. Ladies you can the sound bush door. Once you're facing the Scourge and tunnels, re-enter the Nomad, exit the tunnel (**A**) the way you came in, and drive around the derelict's ship until you encounter a wide path (**B**) between ship sections. Large, stacked Remnant pillars stop you from platform-jumping over the wall, but there's a hole (**C**) big enough to drive the Nomad through. Once you're in, drive along the ceiling area above the Remnant console. Drop through a crack (**D**) in the ceiling, and then you only need to deal with the Remnant constructs and Raiders before working on the Remnant puzzle.

If you don't mind battling a few turrets (not all of them), the best way through the battlefield is to enter one of the side trenches at one of two points (**Click**), destroy a turret, and fight some Raiders and another turret at the end of the trench. Both paths lead you on the other side of the field, where you find an access point (**B**) that leads to the rear entrance of the derelict ship.



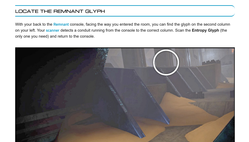


If you take this route, explore the chamber (**E**) in the middle of the side pathways that lead underneath the field of turrets. You find more enemies inside, but you also find three containers of loot.

In the next chamber, you battle Raiders, Assemblers, and Observers. Once the area is clear, scan the Remnant console and the missing drill behind it. You need to find one glyph for the Remnant puzzle.

LOCATE THE REMNANT GLYPH

With your back to the Remnant console, facing the way you entered the room, you can find the glyph on the second column on your left. Your scanner detects a conduit running from the console to the correct column. Scan the **Entropy Glyph** (the only one you need) and return to the console.



LOCATE THE REMNANT GLYPH

Interface with the Remnant console and solve the Remnant Decryption Puzzle using the solution here.

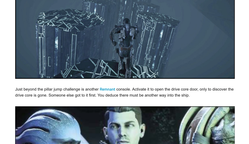
ENTER THE DERELICT REMNANT SHIP

Go through the vault-like door near the console and into the ship. You can get through the ship with very little fuss. Run past any Remnant inside since they're reluctant to attack until you get close or attack them first.

LOCATE THE DERELICT SHIP'S DRIVE CORE

The path through the ship is linear. You reach one Remnant console that activates a Remnant flash-forged bridge (motion-responsive plating). Head through an unlocked door to reach another console and flash-forged bridge. The trickiest part is jumping across the Remnant pillars when the bridge fails halfway across a chasm.

Just beyond the pillar jump challenge is another Remnant console. Activate it to open the drive core door, only to discover the drive core is gone. Someone else got to it first. You deduce there must be another way into the ship.



FIND AN ALTERNATE EXIT FROM THE DERELICT SHIP

Take a left of the drive core door console platform and head down a hallway toward red flares on the floor. Use the very small doorway there to enter a narrow passageway that leads to more Observers and the way out of the ship.

MASS EFFECT ANDROMEDA

Secondary Ops

Jaal Ama Darav: Angaran Affection

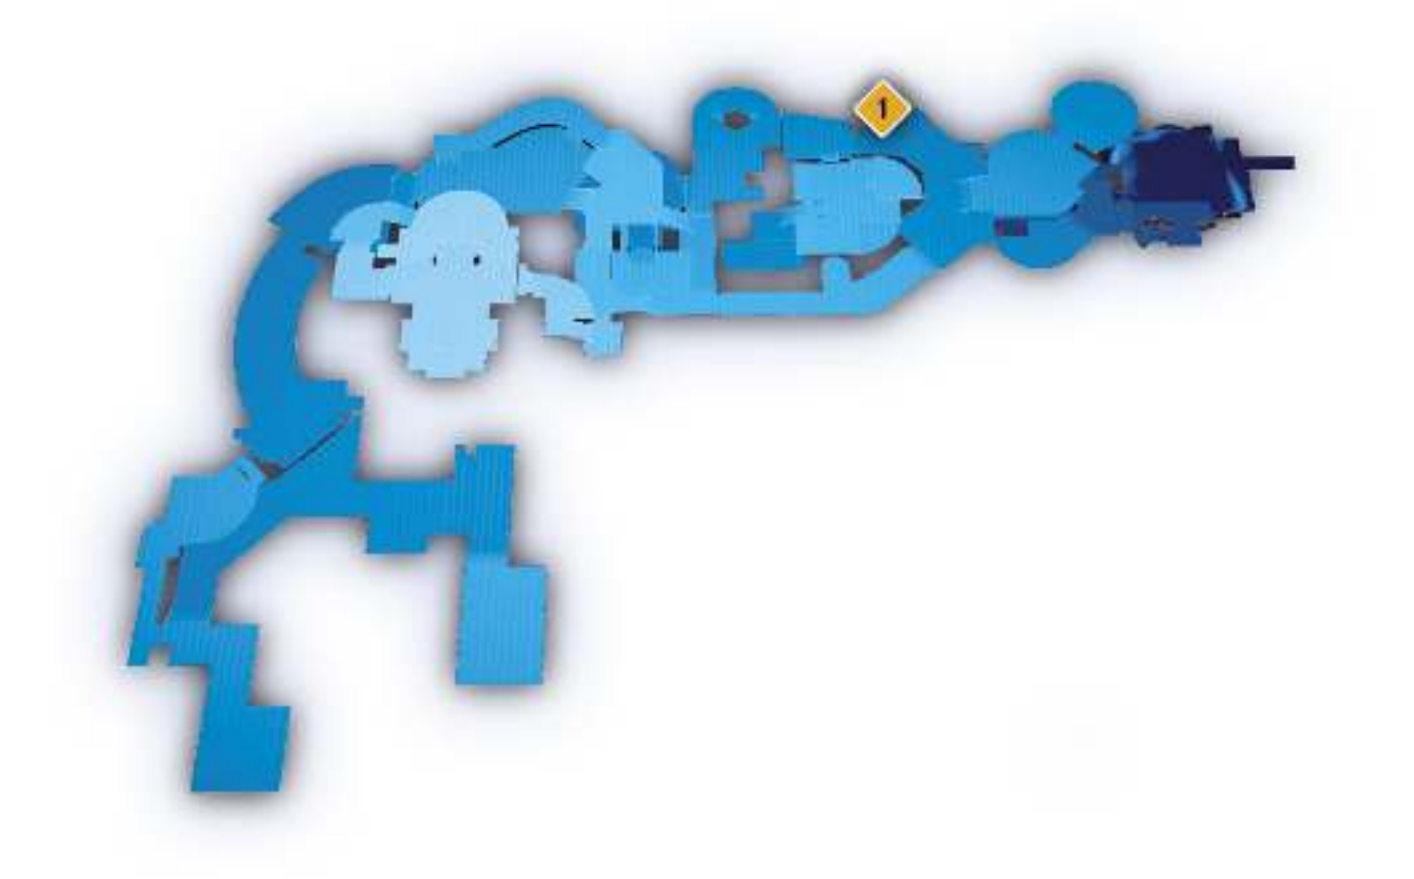
Mission Type: Allies and Relationships

Prerequisite: Complete Jaal's Loyalty Mission: "Jaal Ama Darav: Flesh and Blood"

Start Location: Aya: Resistance Headquarters

Unlocking: Talk to Jaal

MEET JAAL AT RESISTANCE HQ ON AYA



AYA: RESISTANCE HEADQUARTERS

Jaal has asked Ryder to meet him on Aya. The next time you're on the planet, find Jaal **(1)** on the sidewalk near Resistance Headquarters. However, you can only share this moment with Jaal if you've been flirting with him and finished his Loyalty Quest, Flesh and Blood.

MASS EFFECT ANDROMEDA

Searching for
Jaal Ama Darav: Friend or Foe?

Mission Type: Meet-and-Redecorchase.

Prerequisite: Reach 2 Loyalty after "Helping Hand in Ketelon" or "Tough Choices" on Voeld.

Post-Location: Tempest: Tech Lab.

Unlocking: Talk to Liv at the Nexus.

Jump to the START

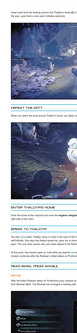
This is a Full Mass Quest that leads to the Loyalty Mission, Friend and Rival. You must first complete an Echo-local Quest Chain to unlock this mission and then complete it to progress.

SPREAD: TO JAAL (ON THE TEMPEST

TEMPEST

While getting Echo's ear, you garnered the attention of the Pioneer, a set of grayish fighters who look all alike. Jaal (the one without stars) is the Pathfinder's friend. Kallo: There's no friend in a hologram.

FREE THALLOYDA (IN HAVARL



Keep a with from the landing zone to find Tiladia's home (@) or a narrow passage in the city walls. You have borrowed along the way—you'll have to return it before collection.

CONTACT: THE VETT

Walk over near the door and you'll find a Turian, you likely see the same face found on squadmate.

ENTER THALLOYDRA HOME

Enter the home at the required and use the **engrain integrated** and **note** skill nodes. Find a **customer** of goodies on the second floor.

SPREAD: TO THALLOYDA

Talk to Tiladia at home. Finding Jaal's comfort is the heart of the room. Speak to her. Upstairs, you'll find the second part of the Tiladia's Quest. Finding Jaal's comfort is the heart of the room. Speak to her. Upstairs, you'll find the second part of the Tiladia's Quest. The only other person you can talk to is Kallo.

At this point, the Quest gets a bit more difficult as you'll be on the go a lot, including a visit to the Meridian. You start TEC. This is a Quest that leads to the Loyalty Mission, Friend and Rival. You must first complete an Echo-local Quest.

PRECO RIVAL, PRIOR ANYRIA

RECAP

After the Quest Relays about on Prometheus (you started on Eos), read the email titled "Meeting with Ulfsaar" in Initiative the Nomad Apex. The Nomad has arranged a meeting with you and Ulfsaar for the Nomad to Eos.

SPREAD: TO THE MESSAGE ON ALYA

ALYA

Alya Team to the Repository of Nexus (@). You start a strong accumulation between Nexus and the Nomad. You Nomad Nexus (@) and Nexus Nomad (@). Nexus between the Nexus Nomad (@) and Nexus Nomad (@). Nexus between the Nexus Nomad (@) and Nexus Nomad (@). Nexus between the Nexus Nomad

Jaal Ama Darav: Runs in the Family

Mission Type: Allies and Relationships

Prerequisite: Complete Jaal's Loyalty Mission, "Flesh and Blood"

Start Location: Tempest

Unlocking: Read email from Jaal.

READ JAAL'S EMAIL

TEMPEST

After gaining Jaal's loyalty, and if you're on good terms with him, you receive an email titled "Meet My True Mother" when you return to the Tempest. Jaal has asked you to accompany him to Havarl to meet his mother.

Meet My True Mother
Concerned about Drack
Inspiration
Come meet Jill
One more try...
You okay?
Meet My True Mother
To: Ryder
From: Jaal
Ryder,
I've been telling my family about you and my time on the Tempest. I'd love for you to meet them and see where I grew up.
My true mother, Sahuna, is especially interested in meeting you. Next time we're on Havarl, let's stop by.
Jaal

ACCOMPANY JAAL TO HAVARL

HAVARL

PELAAV

From the landing zone **(1)**, head to the nearby forward station **(2)** at the Pelaav Research Station, then get to the top of the shuttle platform. Interact with the angaran shuttle parked there.

Sahuna Ama Darav comes running to greet you and Jaal—especially Jaal. He introduces her to you as his true mother. You can hug her if you follow the command prompt in the lower right of the screen fast enough. She talks Jaal up as if you're going to marry him. He then leads you into a room full of family members.

He takes you to his room and shows you a kett weapon he took apart when he was seven. And he saves the best for last, turning on his celestial map projector and filling the room with holographic solar systems.

MASS EFFECT ANDROMEDA

Secondary Ops

Jaal Ama Darav: Flesh and Blood

Mission Type: Ahern and Resistance/ops

Prerequisite: Complete "Jaal Ama Darav: Friend or Foe?"

Start Location: Tempest

Unlocking: Read email from Jaal

FLESH AND BLOOD

"Flesh and Blood" is Jaal's Loyalty Mission. Jaal earns Rank 4 skills when you complete this quest.

READ JAAL'S EMAIL

TEMPEST DECK 2F

When you receive the email from Jaal titled "Need to Speak With You," head 5 m and 90 degrees right to Jaal's quarters. Jaal is waiting outside an Ahbouf. It doesn't look good. He wants you to come see him (R) in his room.

Need To Speak With You
From: Jaal
Date: Now
Subject: Need To Speak With You
I'm stationed in a cabin on Ahbouf. Can't get a Tempest connection so I'm using a relay.
Jaal

SPEAK TO JAAL ON THE TEMPEST

Head to Jaal's tent (R). You catch Jaal in an awkward and emotional moment. He's struggling over Ahbouf and how Ahbouf has pressured his followers with his hatred of aliens. At the end of the conversation, spoke to Jaal (or save his home world) from Ahbouf's corruption.

MEET JAAL'S RESISTANCE CONTACT ON HAVARL

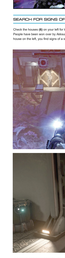
HAVARL

Head to Jaal's landing zone (B), head northeast to the reserve forward station (D), right there at the science facility. Talk to Kalo on the landing pad platform.

Jaal asks Kalo if there's any word on Tonbi (the other rebel) and the others. She tells you Ahbouf's assumed control. Tell her you need a way in, not to fight the entire Ahbouf resistance army but just to run in and grab Jaal's family. She agrees to do a shuttle drop-nearby, but that's the best she can offer.

BOARD THE SHUTTLE

Head toward the shuttle on the same platform; then to the ramp/exit and tell the shuttle pilot you're ready to go. Select your gear and your team for the operation.



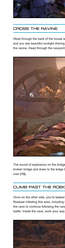
ENTER THE CLEARING

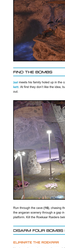
THE FORGE

Check the new map when control returns from the loaded trip. You begin (A) in the northeast corner of the Forge. Traverse the Ahbouf passage ahead and push into the clearing and a waypoint (B) ahead and to the right. Look for signs of Jaal's family.

SEARCH FOR SIGNS OF JAAL'S FAMILY

Check the houses (C) on your left for loot. There's an **audio log** from the archaeologist in the second building on the left. Continue toward the waypoint (B) and investigate the **Ahbouf Camp** (C) on your left and the **Ahbouf Tent** (D) on the right. In the first house on the left, you find signs of a struggle. An **angaran stim** is scannable and shielded on the floor.





In a house across the pathway, you find another **audio log#2** from the same archaeologist. He talks about how Shrow calls Ahbouf out for the radical he is. Even the blood spatter on the floor and the carbonized plant in the nook before you leave.

Head for the waypoint (B), which leads you to a door to another home.

DEFEAT THE ROEKAARR

Enter the home (B) to find a couple of Roekaar Raiders on the other side of the door. Defeat them. Find the note on a table to the left as you follow the waypoint to the back door. The note is in Ahbouf, stating that all civilians have been accounted for. Head out the back door and into a new clearing (B).

You've caught up to the Ahbouf Defiled the Roekaar Raiders ransacking the town. Raiders are everywhere. The stage is pretty large, so use the terrain to your advantage. Get to higher ground (the top of the waterfall area) and watch the water to find your next victim. A biogenic eliminates the battle with more Raiders and a Shadowhunter. Head to the waypoint on the higher waterfall plateau area, at the end of a narrow passage (F).

RETURN POWER TO THE DOOR

Use your scanner at the door to lower the yellow conduit underground to a nook around the corner with a generator.

SCAN THE GENERATOR

Scan and then activate the generator to send power to the door (F5). Use this doorway now.

CROSS THE RAVINE

Head through the back of the house and open the door to a new part of the Forge. You're outdoors again, on a large bridge and you see beautiful sunlight shining through the finely-crafted angaran bridge in the distance. This is what you see to cross the ravine. Head through the waypoint (F8).

The sound of explosions on the bridge reverberate and deters you get there. The bridge goes down. Drop off the end of the broken bridge and down to the bridge below to reach the waypoint. Then leap from the edge of the scene to the next plateau over (F8).

CLIMB PAST THE ROEKAARR

Once on the other side, you're tasked with climbing past the Roekaar. Follow the waypoint up the pathway (H) and defeat the Roekaar Raiders that attack you. Then head to the waypoint (I) and climb the ladder to the next plateau and then climb the first part of Kadara's Ascent by the ladder (J#8). Ahead of you, you see Jaal from the Tempest's POV escape the ledge battle. Inside the cave, work your way to the back and jump up onto a higher ledge to get to the exception.

FIND THE BOMBS

Jaal meets his family locked up in the cave. Introduce yourself and explain that the humans want to work with them against the AIP. The first they don't like the idea, but Ahbouf is preparing to blow the place up and there's no time to argue. You have to get out.

Run through the cave (H8), clearing the reception down a narrow passage that reveals a large cavern (H7) with a great view of the angaran scanning through a gap in the side. The next waypoint (H6) appears in the middle of the cavern on an explosive platform. Kill the Roekaar Raiders below.

DISARM FOUR BOMBS BEFORE DETONATION

ELIMINATE THE SENTRY

You have three minutes to disarm all four bombs: (H6) on the platform in the middle of the chamber, (H8) on the short set on the right side, (I8) on a short wall on the north side, and (I6) on a stick on the left side. Kill the white, you must hold off attacking Aeth. The Roekaar can be eliminated on the way to the bombs or after they're all disarmed (preferred since I part of the three objectives).

REUNITE JAAL'S FAMILY

Once you've killed the last Raider after defusing the last bomb, you meet up with Jaal's family in a cutscene reunion. Ahbouf enters the springboards. You can choose to stand up to him during the conversation options.

Jaal shows you before you ouch Ahbouf down. Ahbouf, in turn, draws on Jaal. Watch the lower-right corner of the screen to

Secondary Ops

Kett's Bane

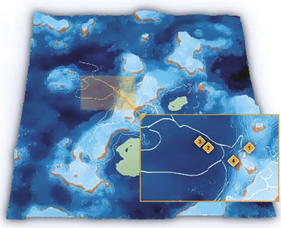
Mission Type: Heleus Assignment: Eos

Prerequisite: Approach the kett facility to receive a radio transmission from the contact (check to see if Prodromos has to be up before this unlocks)

Start Location: Eos

Unlocking: Approach the kett facility to receive a message from Bain.

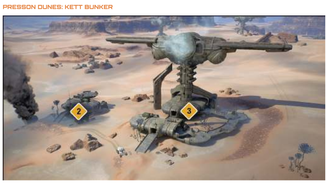
MEET THE CONTACT



EOS

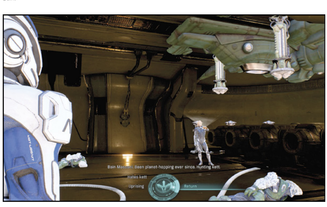
Safely approach the kett base **(1)** on Eos to receive radio contact from a man named Bain Massani. The message often triggers when you're driving along the narrow mountainside roads reached from the direction of the nearby forward station. The voice over the radio (which is identified on-screen as Bain Massani) mentions that the duck has wandered far from the flock—you being the duck. When you ask who's speaking, he places a navpoint **(2)** on the map and invites you to come see him. Visit Bain to learn how to weaken the kett base enough for easier entry.

PRESSON DUNES: KETT BUNKER



Follow the Presson Dunes navpoint **(2)** to a kett bunker near a large outpost. A burning shuttle is billowing thick black smoke next to the bunker; you can see it for miles.

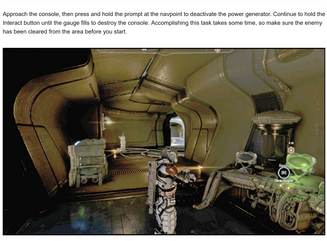
A conversation strikes up between you and Bain the moment you enter the bunker through the front door. He audaciously introduces himself as a kett hunter, which sets the mood for the conversation. Pick his brain, and he offers you a job that will weaken the main kett base—the crown jewel, as he puts it. He gives you two kett target-location navpoints: a power generator and a barracks. There are a few other kett buildings around the area, but hitting these two fulfills your duty to Bain.



DESTROY THE POWER GENERATOR

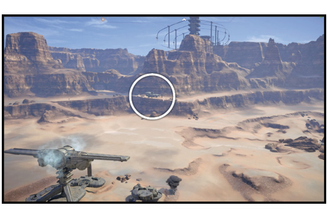
The power generator **(3)** in the kett facility is just next door to Bain's bunker. Approach cautiously, beginning with long-range attacks (sniping if possible). You face many Chosen and a couple Anointed. Enter the facility through the front door to find a **container** of goodies behind some crates on the left. Continue into the main room using the connecting exterior walkway, and deep inside the room you find the kett security console (scan it before you leave).

Approach the console, then press and hold the prompt at the navpoint to deactivate the power generator. Continue to hold the Interact button until the gauge fills to destroy the console. Accomplishing this task takes some time, so make sure the enemy has been cleared from the area before you start.

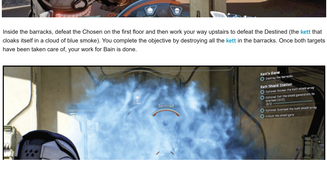


DESTROY THE BARRACKS

Get in the Nomad and climb back up the hill to the east near the forward station, and then head south to the kett barracks **(4)** on the narrow ledge below the kett base. It's possible for this objective to be accomplished before you even pick up the job, if you've already taken this base out. Defeat the Chosen on the grounds around the barracks' foundation, using the large boulders for cover. Eliminate the Anointed on the back balcony out before entering.



Inside the barracks, defeat the Chosen on the first floor and then work your way upstairs to defeat the Destined (the kett that cloaks itself in a cloud of blue smoke). You complete the objective by destroying all the kett in the barracks. Once both targets have been taken care of, your work for Bain is done.



Kett's Bane
Return to Bain
Eos Hostile Station
Destroy the power source to weaken the kett shield wall
Destroy the kett generators
Destroy the kett shield wall
Destroy the kett gate

MASS EFFECT ANDROMEDA

Secondary Ops

Know Your Enemy

Mission Type: Allies and Relationships

Prerequisite: Mission 3 to get an email, Mission 4 to complete

Start Location: Tempest

Unlocking: Read email from Raelis.

READ EMAIL FROM RAELIS

TEMPEST

WAIT UNTIL MISSION 6

If you wait to do this mission until after you've completed Mission 6, you have the opportunity to disable Primus's ship and face fewer enemies in combat.

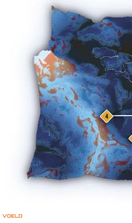
Read the email (**1**) from Raelis titled "Message from Voeld: Intel on Kett." In this email, Raelis introduces herself as a member of the angaran Resistance. She claims some of their scouts have returned with interesting information concerning the kett, and she's certain it will intrigue you. She'll wait for you on Voeld.

MEET WITH RAELIS ON VOELD

VOELD: ANGARAN RESISTANCE BASE

Speak to Raelis (**2**) in the angaran base on Voeld. She's standing near a wall of instruments on the left pathway in the main operations area of the base. She's surprised you showed up to meet her and grateful you saved the Moshae form the kett. She tells you scouts have detected increased kett science and research vessels moving through areas of Voeld. Raelis asks for your help, as the Resistance lacks the tech to break into the kett bases.

GO TO THE KETT FACILITY



VOELD

Bring up your exterior Voeld map and select the forward station (**3**) closest to your destination, if it's active. Travel to the southeast part of Voeld, then northwest to reach the kett facility (**4**).

There are about 10 kett Chosen guarding the base. It's a fight as soon as you exit the Nomad. Find cover around the base and start picking off the kett one by one.

SEARCH THE FACILITY FOR ANY USEFUL DATA

Enter the facility once the area is clear. You should face no opposition inside.

COLLECT THREE KETT BIO SAMPLES

As soon as you enter through the front door, locate the desk in the left corner. A syringe containing a biospecimen sits there, along with a kett **datapad**. Scan the syringe, then pick it up. Don't forget to pick it up. There are syringes all over the room. Scan them and pick them up to complete this objective. SAM informs you that the samples all contain the same genetic sequence.

GO TO THE KETT COMMUNICATIONS STATION

Travel east to the communications station (**5**) on the southeast side of the kett mountain base. As you approach, note the impressive defenses this base boasts. A good attack strategy is to use a sniper rifle from behind a boulder on one of the cliffs beside the station.

INVESTIGATE THE COMMS STATION

Once you've cleared the enemy from the site, enter the building and follow the navpoint to a rear balcony. Pick up the **datapad** titled "Received from Central"—it's a message to this post containing a command to find a way to deliver regular reports regardless of the communication problems caused by the Scourge. Here you learn there's more than one Archon in the kett's organization. When a new species is discovered, they send data to the home world and start making more kett.

SEARCH FOR MORE INFORMATION

Follow the navpoint back inside the station, to a device on the wall near an exit. It's an **audio log** from Primus, containing orders for the station to accept the demands of the Archon; he is the senate's voice in Helsus. Looks like there's dissension in the ranks.

MISSION ON HOLD

While "Know Your Enemy" ends here, the story continues in "Dissention in the Ranks."

Liam Kosta: Armor Diplomacy

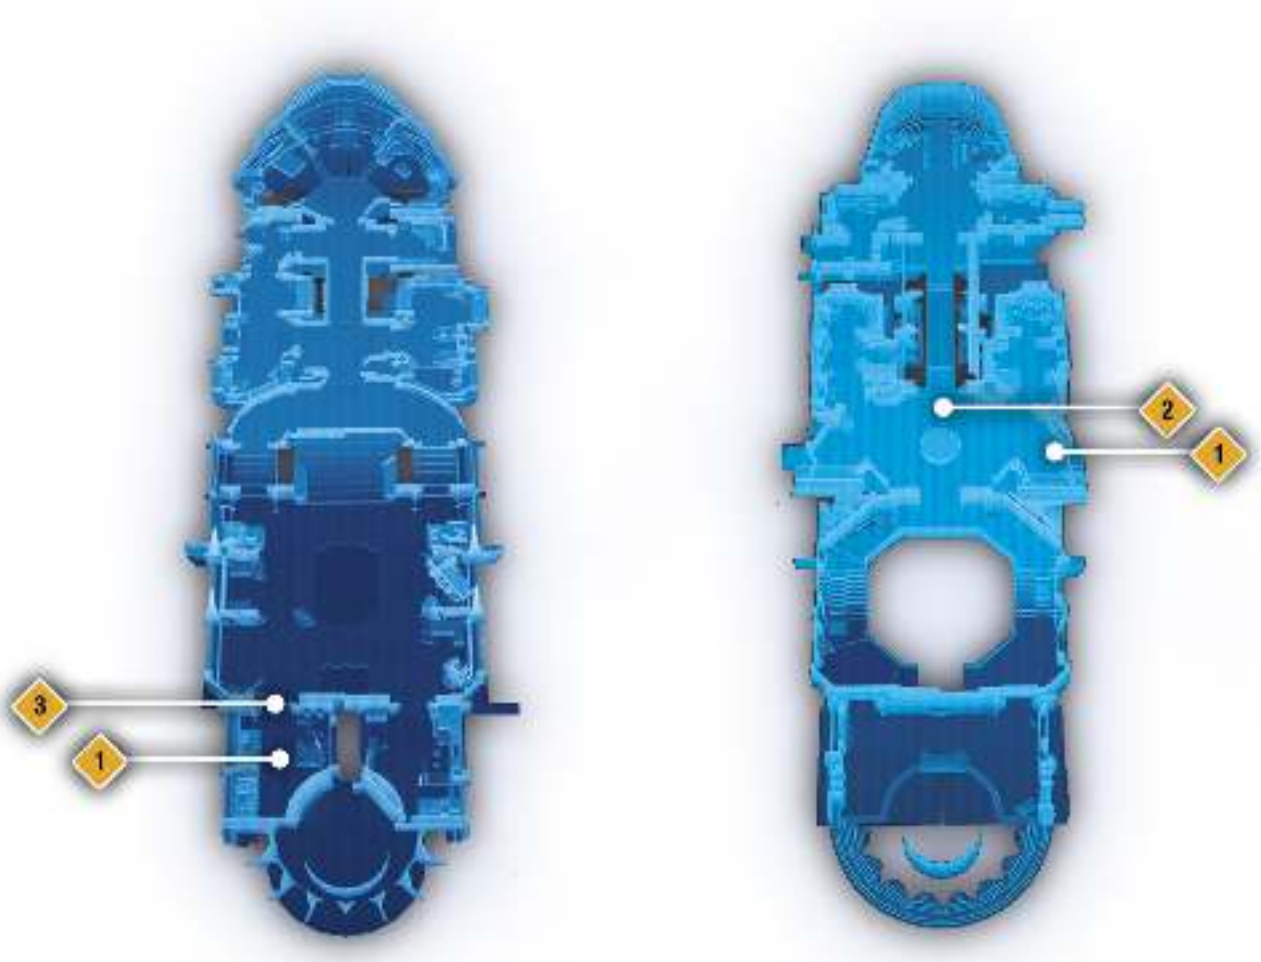
Mission Type: Allies and Relationships

Prerequisite: Must have traveled to Aya, all conversations completed, must have left and then returned to the Tempest

Start Location: Tempest storage room or research area

Unlocking: Talk to Liam on the Tempest.

TALK TO LIAM



TEMPEST: STORAGE ROOM OR RESEARCH AREA

Taking the prerequisites into consideration, talk to Liam **(1)** aboard the Tempest, and he asks you to help him with a project he and Jaal are working on. He hands you the blueprints needed to develop a set of armor.

BUILD LIAM'S RESEARCH PROJECT

TEMPEST: RESEARCH AREA

Liam wants a small armor project approved, calling it a diplomatic effort with Jaal. Complete the research project to secure what he needs. Access the Development interface at the research center **(2)** under the Special category. It only costs 10 Aluminum and 10 Iron. If you tend to pick up every item you see while exploring planets, you won't have an issue fulfilling the ingredient requirements. You can also buy these ingredients from merchants.

TALK TO LIAM IN HIS ROOM ON THE TEMPEST

TEMPEST: STORAGE ROOM

Head down to the cargo bay and enter the back-right door **(3)** to the storage room where Liam hangs out. When you walk in, you catch a horrific site of the naked duo—Jaal and Liam working on their new armor project together. Kind of a team-bonding moment.

MASS EFFECT ANDROMEDA

Secondary Ops

Liam Kosta: Community

Mission Type: Allies and Relationships

Prerequisite: Complete Liam's Loyalty Mission "Liam Kosta: All In"

Start Location: Tempest

Unlocking: Talk to Liam

TALK TO LIAM

TEMPEST

Talk to Liam on the Nexus. Exhaust all conversation options, and he asks you to take a break on Eos in Prodromos. He sends you the navpoint.

GO WITH LIAM TO PRODROMOS

EOS

PRODROMOS

Liam has arranged something special on Eos "for everyone." Travel with him to the meeting spot **(2)** near the Prodromos landing zone **(1)**.

When you arrive, you find exactly what he promised: not work. You get some alone time with Liam and a soccer game to boot.

MASS EFFECT ANDROMEDA

Secondary Ops

Liam Kosta: Day Out on Aya

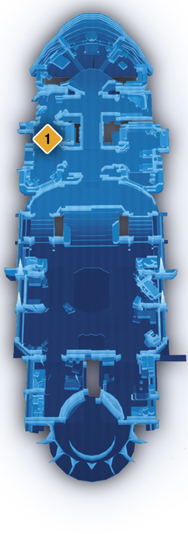
Mission Type: Allies and Relationships

Prerequisite: Complete Mission 3, and after Aya Vault

Start Location: Tempest: Crew's Quarters

Unlocking: Talk to Liam on the Tempest

TALK TO LIAM ON THE TEMPEST



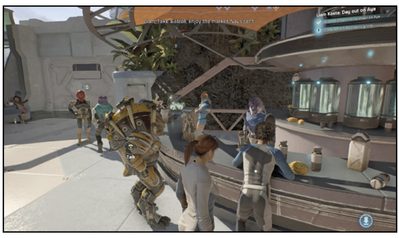
TEMPEST: CREW'S QUARTERS

Find Liam in the crew's quarters **(1)** on the Tempest and talk to him. If all other conversations are caught up, Liam asks you to take a break from all the madness and take a day out on Aya.

TALK TO LIAM AT THE TAVETAAN ON AYA

AYA: TAVETAAN

You can always find Drack and Liam at the bar on Aya. Go there and talk to Liam **(2)**. He asks if you're ready to go hit those scans. When you ask what kind of scans he means, he replies, "Verand called out supplies that may have useful properties for our tech. Just need to get SAM's eye on them."

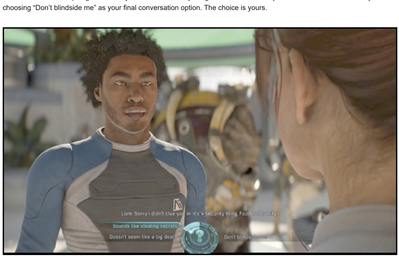


SCAN THE HOSTILE VENDOR'S GOODS

Run over to the market and scan the northernmost vendor's booth **(3)**. The vendor's name is Xaan Ingil. Return to Liam **(2)** after the scan is acquired.

TALK TO LIAM AT THE TAVETAAN

Talk to Liam at the Tavetaan **(2)**. He apologizes for screwing up the date, and when pressed, he informs you that you were being cased. Liam says he was trying to gather data that would be helpful at the outposts. Verand told him what to scan, but Liam called it off. He apologizes and says it's a food-security thing. You can take it easy on him or come down hard by choosing "Don't blindside me" as your final conversation option. The choice is yours.



The conversation gets a little more intimate, and you can soften the last remark (if you chose to be stern) with an affectionate response…or not, depending if you're trying to be exclusive with him or someone else. Completing this quest earns you 190 XP.

MASS EFFECT ANDROMEDA

Secondary Ops

Liam Kosta: Outpost Worlds

Mission Type: Allies and Relationships

Prerequisite: Settle Eos

Start Location: Havarl

Unlocking: Land on Havarl, Voeld, Kadara, or Elaaden

FIND WORLDS TO EVALUATE

TEMPEST

More planets need to be evaluated for potential outposts. You did the impossible on Eos by restoring a golden world and giving colonization an overdue start. Liam helped coordinate efforts on the ground, and he's confirmed the obvious—you need to keep pushing. Thousands of lives in Heleus depend on you as their Pathfinder. Evaluate UNC worlds and call for the placement of outposts where possible.

Each of the following objectives is met when you place an outpost on the respective planet:

- Evaluate Havarl for outpost: Complete "Helping Havarl's Scientists" and "A Dying Planet"
- Evaluate Voeld for outpost: Complete "Settling Voeld" and "Remove the Heart"
- Evaluate Kadara for outpost: Complete "High Noon"
- Evaluate Elaaden for outpost: Give Morda the drive core during "Search for the Stolen Remnant Drive Core"

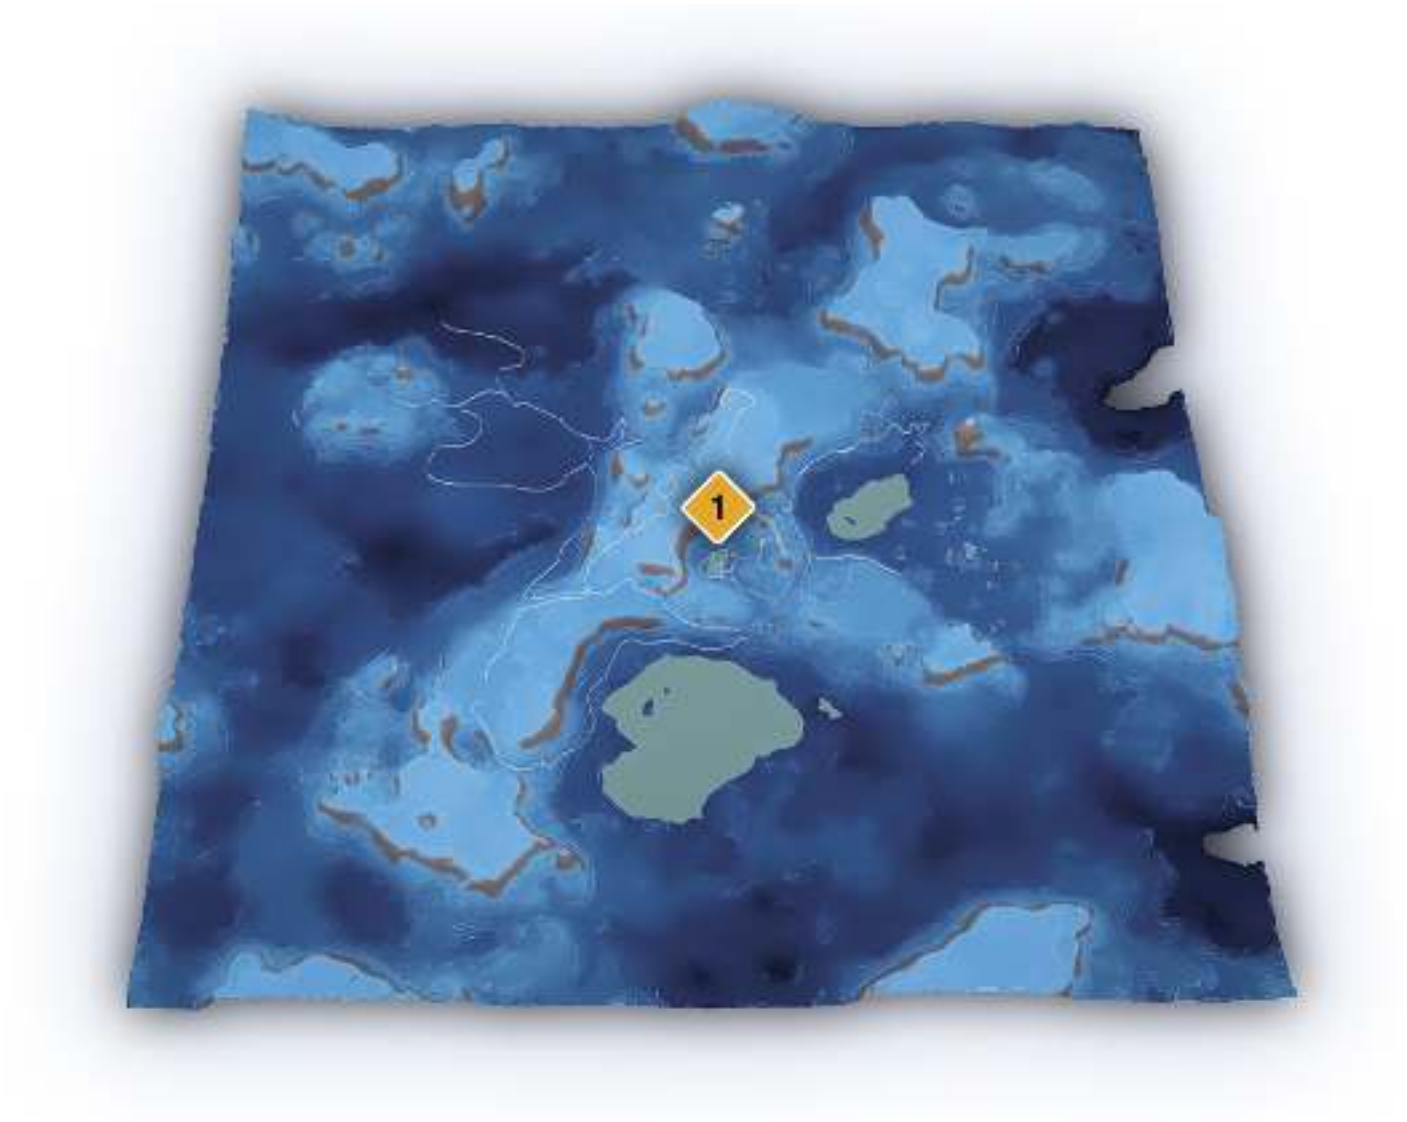
BUILD LIAM'S LOVER'S-LEAP MOD



TEMPEST

Liam has asked you to rubber-stamp a jump-jet mod and then travel with him to a special spot on Eos. All he's said is that it's something for the two of you. Access the Development interface at the research station, find the Special category, and develop the Lover's-Leap mod.

GO WITH LIAM TO THE NAVPOINT ON EOS

EOS

Travel to Eos with Liam in your party. Follow the navpoint to the top of the rock arch **(1)** near Prodromos and take the Lover's-Leap with Liam.

MASS EFFECT ANDROMEDA

Secondary Ops
Life on the Frontier

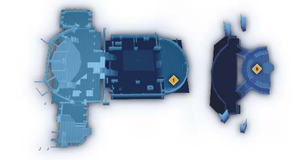
Mission Type: Heleus Assignment: Nexus

Prerequisite: Mission 2, Nexus Phase 2 after opening Aya

Start Location: Nexus Operations

Unlocking: Speak to Sid in Addison's office, or read her "Something Suspicious" email

MEET WITH SID ON THE NEXUS



NEXUS: OPERATIONS

To start this mission, read Sid's "Something Suspicious" email, or talk to her **(1)** while she's working in Addison's office on the Nexus in operations. She explains she's found something interesting while monitoring comms on the Nexus. She's discovered multiple attacks by people called the Three Sabers, who are hitting outposts and supply vessels.

She goes on to say the Three Sabers are receiving intel from within your organization, which means there's a mole. Take the mission by responding, "It's worth investigating." Sid sends you navpoints for the Three Sabers' most recent raids.

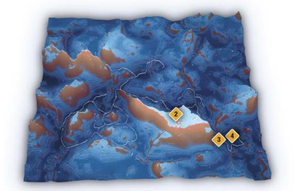
INVESTIGATE SPACE ATTACKS ON NEXUS SHIPS

There are four systems to search for space attacks (from left to right): Solminae, Joba, Nalesh, and Jirayder. Not all of these may be opened when more space attacks hit. This mission lasts a while unless you hold off on attempting it until all the systems are unlocked.

FOUR SPACE ATTACK NAVPOINTS

Scan each of the four systems for anomalies, and then investigate those sites. You find four sets of **starship wreckage:** one with a leaky drive, one with no clues, one that prompts Suvi to confirm you're narrowing down the list of possibilities, and the final one that gives you the Three Sabers' location and navpoint on Kadara.

FOLLOW THE THREE SABERS TO THEIR HIDEOUT



KADARA

Fly to the Govorkam system and land at Kadara Port, then take the travel terminal to the Kadara Slums. There, hop the warden's fence and get to the Nomad near the forward station **(2)**. Use the forward station **(3)** in Spirit's Ledge to get very close to your destination **(4)** just over or around the bend.

DEFEAT THE THREE SABERS

Attacking this outpost with the large landing pad is best done from up high. Driving over the hill from the forward station **(3)** puts you on the hill just above the complex. Snipe the Agents and Raiders delivered via dropship. Defeat all remaining enemies and then search the hideout.

SEARCH THE HIDEOUT

There are things to find and scan on the first floor, but the target prize is the **datapad** titled "Three Sabers Memo," sitting on a water cooler on the second floor. It mentions someone named Yale at Eos. Go to Eos.

SPEAK TO YALE

EOS: PRODROMOS

Enter the Prodromos building **(5)**. Inside, talk to Yale, and don't let up on him during the conversation. He doesn't need to be pacified. Tell him you need to make a report, which seems to worsen matters, as Addison already knows. Go talk to Addison.

We are sharing this with the Initiative and only the Initiative. Only with Addison and Ryder.
Do not a problem anymore
I have to report this

CONFRONT ADDISON

NEXUS: OPERATIONS

Head to Addison's office in Nexus operations. Speak to Addison **(6)** about the data. Turns out she was waiting for you, as Yale told her to expect a visit. Respond to her question regarding the elimination of the Three Sabers with either "Doesn't erase what you did" or "Yes."

She admits that she made a poor decision, but as far as anyone knows, the Three Sabers acted on their own. That's when Sid, Vetra's sister, enters the discussion. Introduce the two by replying, "Vetra's sister" or "Sid started the investigation."

As Addison and Sid argue over whether to expose the truth, you're given the choice to side with Sid (exposing the truth) or with Addison (hiding the truth to hopefully quash another angaran uprising).

Secondary Ops
Making an Impression

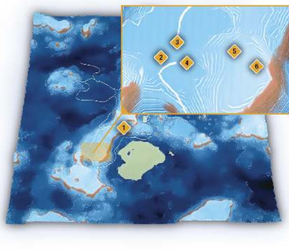
Mission Type: Heleus Assignment: Eos

Prerequisite: Settle Eos

Start Location: Eos

Unlocking: Place a seismic hammer

PLACE THE FIRST SEISMIC HAMMER

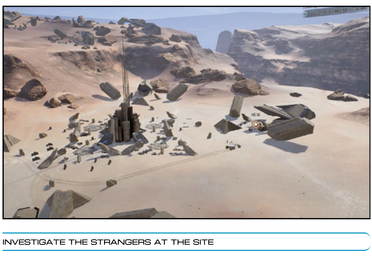


EOS: SAWTOOTH PLATEAU

Eos is experiencing seismic activity. Altering the tremors with a survey hammer might allow better irrigation for Prodromos. Find the location for the first seismic hammer **(1)** at the Remnant monolith near the forward station at Sawtooth Plateau. Approach the navpoint and activate the survey hammer, which forces Remnant to surface and attack. Take them out with explosives while they're grouped together.

PLACE THE SECOND SEISMIC HAMMER

Follow the navpoint **(2)** to the Remnant monoliths where a second hammer is to be placed. As you approach, you find humans.



INVESTIGATE THE STRANGERS AT THE SITE

Approach the scout under the tent at the navpoint. He claims to be from the sovereign nation of Advent. His group is in this region because of their dropping water levels. He suggests that they mine natural gas if your hammers find gas instead of water. They'll trade gas to your outpost for water. You can opt to agree, in which case he directs you to the hammer after the deal has been made.

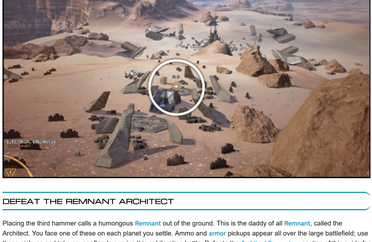
After your conversation, two navpoints appear on the map **(3)(4)**. Drill either for water **(3)** for Prodromos, or for natural gas **(4)** for Advent, which can be traded for water. You can't drill in both locations. Whatever you choose, the outcome is the same. An epic battle lies beyond.

PLACE THE SECOND HAMMER TO DRILL FOR WATER OR GAS

After choosing a drill location, one more navpoint appears nearby for placement of the final seismic hammer **(5)**. This also calls Remnant to attack. Defeat the small group of Observers, Creepers, and Assemblers.

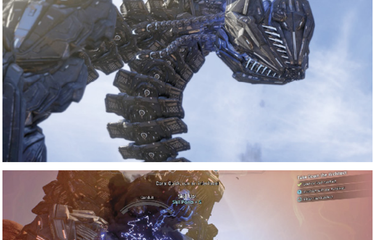
PLACE THE THIRD SEISMIC HAMMER

After the battle, you discover the tremors are caused by neither the Remnant nor the hammers. Place the last hammer at the last navpoint **(5)**.



DEFEAT THE REMNANT ARCHITECT

Placing the third hammer calls a humongous Remnant out of the ground. This is the daddy of all Remnant, called the Architect. You face one of these on each planet you settle. Ammo and armor pickups appear all over the large battlefield; use these pickups and take cover often to survive this exhilarating battle. Refer to the Architect Encounters section of this guide for our Architect battle tips.



Secondary Ops
Medical Caches

Mission Type: Heleus Assignment: Voeld

Prerequisite: Mission 2, after visiting Aya

Start Location: Voeld

Unlocking: Talk to Dr. Harihn

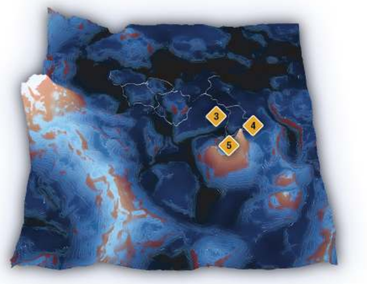
COLLECT THE SUPPLIES

VOELD: ANGARAN RESISTANCE BASE

Dr. Harihn **(1)** at the Voeld Resistance base needs the emergency medical supply caches around Voeld to be restocked so that injured fighters and civilians can tend to their wounds and improve their chances of survival in the harsh wasteland.

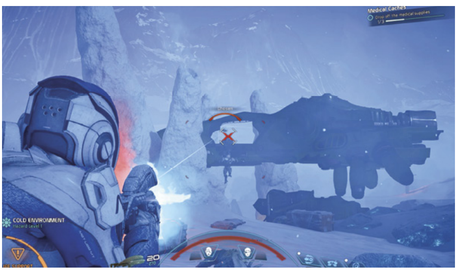
Before you leave the room, head to the right of the bar and find the **medical supplies(2)** on a shelf. Pick them up. These are what you need to deliver.

DROP OFF THE THREE CACHES OF MEDICAL SUPPLIES



VOELD

You can find the medical cache drop-off location **(3)** around the middle of the map just north of the large kett base in the mountain. Follow the navpoint to a group of icy spires to find a crate. Be prepared for a kett ambush arriving via dropship after you use the medical cache. Fight the Wraiths and Chosen.



REOESK RUINS

While you're at the Reoesk ruins **(4)** retrieving the ancient Voeld map for Rjoek from Techiix (during mission "Brought to Light"), explore the ruins for the medical cache location. Select this mission to have the navpoint guide you to the second-level storage room. Use the medical cache to complete the delivery. You can talk to the injured angara, Yeda, in this room and get her story of hardship.

KETT MOUNTAIN BASE

While you're working on the mission "Remove the Heart," and after you've activated the vault (to lower the temperature by 13 degrees, making the mountain base approachable), find the last medical cache drop site **(5)** just inside the kett mountain base tunnel entrance. It's along the right wall as you enter. Drop the last shipment here.

REPORT BACK TO THE DOCTOR

Return to the angaran Resistance base and speak with Dr. Harihn again **(1)**. He thanks you for the many lives you saved today and informs you that Yeda made it back and is recuperating, thanks to you. He rewards you with multiple consumables.

MASS EFFECT ANDROMEDA

Secondary Ops
Meet the Family

Mission Type: Heleus Assignment: Voeld

Prerequisite: Complete "Stage a Rescue"

Start Location: Voeld

Unlocking: Complete "Stage a Rescue"

SPEAK TO NIILJ AT THE POW SITE NORTH

VOELD: POW SITE NORTH

Skeot's Uncle Niilj is released from a cell **(1)** during "Stage a Rescue." Talk to him. You can tell him that Skeot told you about him, or choose "Doesn't matter" in the first conversation option. He says the Resistance needs to be debriefed and that they're heading back to the base. He needs a data drive—full of data downloaded from the kett network—delivered to Buxil so she can start the analysis. This completes "Stage a Rescue" and begins the mission "Meet the Family."

Niilj, Can you deliver this drive to Techiix? If we work together, no time will be wasted.
What is it?
right away.
This seems sensitive.

DELIVER THE DATA DRIVE TO BUXIL IN TECHIIX

VOELD: TECHIIX

Reenter the Nomad and travel southeast to the angaran town of Techiix **(2)**. There's a forward station location right in front of the daar, so make sure to call one down. When you enter the cave, you find Buxil **(3)**, Niilj's sister, in the second building on the right.

When you hand over the data, Buxil discovers it contains the layout of the kett command center. She feels confident that with this data, they'll be able to cripple kett operations. The bad news is there's a security code on the command center doors that changes often, so the attack needs to happen soon. Agree to help her to unlock the next mission, "Remove the Heart." She sends you the navpoint to the side door of the facility.

MASS EFFECT ANDROMEDA

Secondary Ops

Meet the Resistance

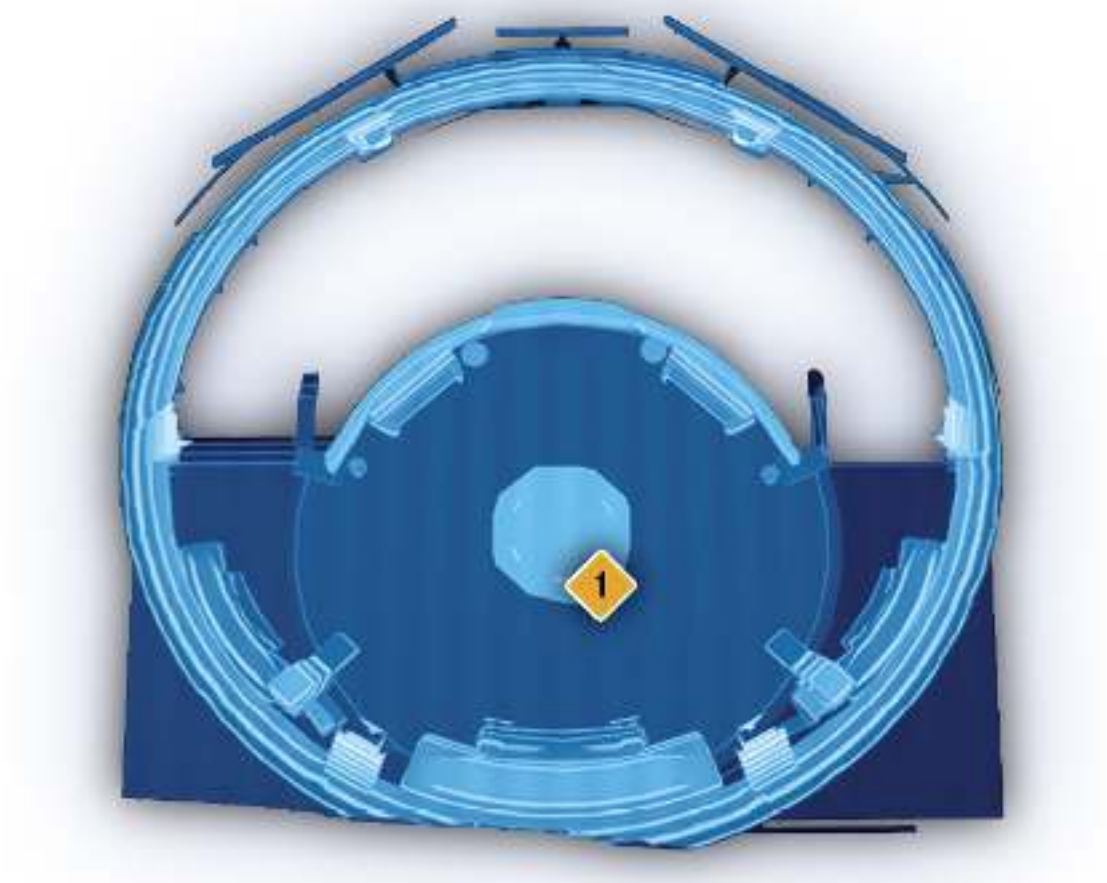
Mission Type: Heleus Assignment: Voeld

Prerequisite: During “A Trail of Hope,” pick up Jaal on Aya

Start Location: Tempest

Unlocking: Leave Aya for the first time with Jaal on board the Tempest

AID THE ANGARA ON VOELD



TEMPEST: MEETING ROOM

This mission unlocks after the conversation between the crew and the newest member of the team, Jaal. This happens on the third deck of the Tempest **(1)**, right after leaving Aya for the first time. Voeld is home to the angaran Resistance, who fight the kett across the planet and system.

LOCATE THE RESISTANCE LEADER

VOELD: ANGARAN RESISTANCE HEADQUARTERS

In the main operation area in the angaran base at Voeld, find Anjik Do Xeel **(2)**, the Resistance leader. She recognizes you as the Pathfinder who saved the Moshae and welcomes you as an ally of the angara. You agree to help them with their fight against the kett on Voeld. She says you can get more details from the lookout. You can also ask her about the Resistance and Evfra.

SPEAK TO THE RESISTANCE LOOKOUT

VOELD

Speak to Beniska **(3)**, the Resistance lookout, outside the angaran base on Voeld (the map switches over to a view of Voeld when you step outside). She recognizes you as that alien who helped their kind on Havarl. When you ask about what to expect out in the cold world, Tseek, another angara nearby, answers. He asks for your help in their fight in Hjara, where the red lights are.

You can ask these two about the red lights, the alien facility, the Remnant, or just leave them alone. If Jaal is with you, Tseek asks if his sister has recovered from her mission. This opens the mission “On the Front Lines.”

MASS EFFECT ANDROMEDA

Secondary Ops
Mind Games

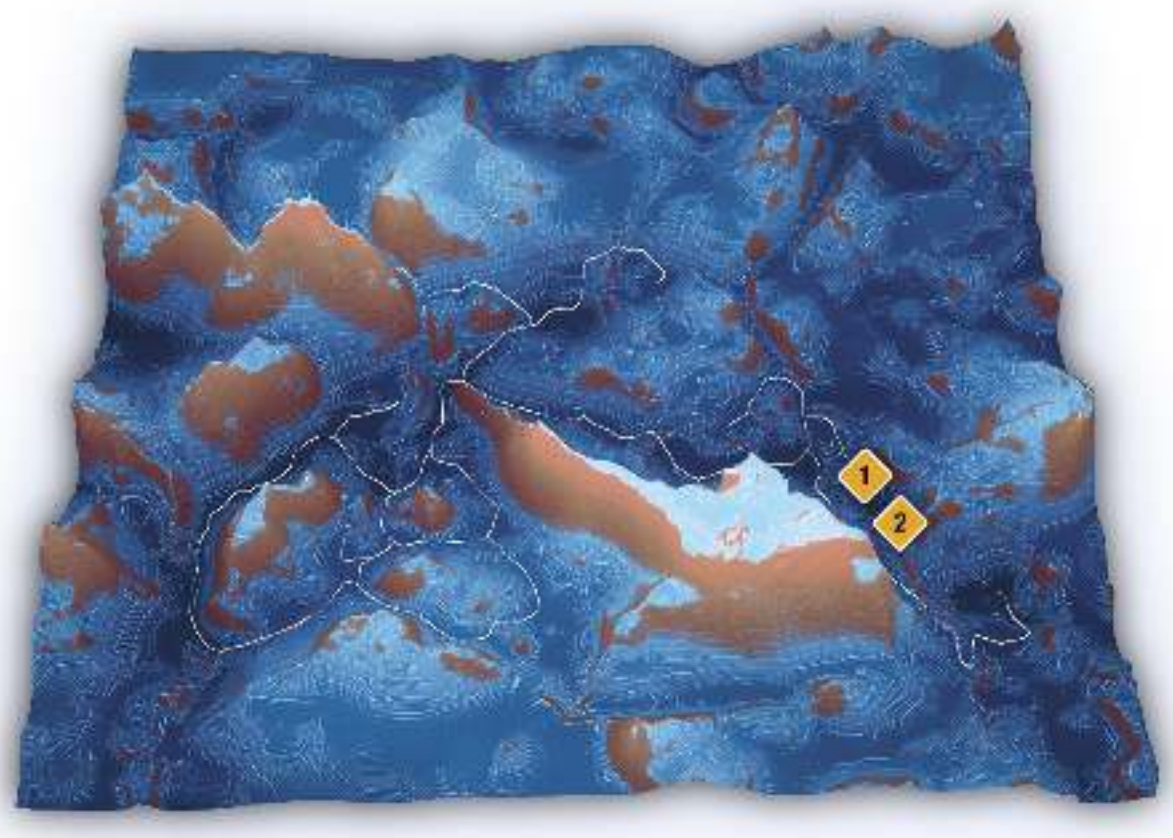
Mission Type: Heleus Assignment: Kadara

Prerequisite: Must have interrogated Vehn Terev in “Hunting the Archon”

Start Location: Kadara: Haafel

Unlocking: Speak to the exile in the Haafel hut

SPEAK TO THE EXILE



KADARA: HAAFEL

You come across some people living in a hut **(1)**; they’re acting strangely and babbling nonsensically. Speak to the exile crouched near the bed. He seems more put-together than the other two in the room. He goes on about a datapad someone left in the hut and how everyone is going out of their minds. Investigate the cause of their odd behavior.

EXAMINE THE DATAPAD

Pick up and read the **datapad** from the floor at the foot of the bed. It’s an observation log, what appears to be someone’s notes on the effects of a drug on the various species in the room.

SCAN THE THREE PEOPLE

Scan all three of the people in the room: a salarian, an angara, and a krogan. The scanner data comes up with the same result for each of the subjects—an unknown signal is targeting the brain and interfering with mental activity. SAM traces the source of the signal, and a navpoint appears on your map not far from the hut.

LOCATE THE SOURCE OF THE MYSTERIOUS SIGNAL

The signal seems to be emanating from a nearby building **(2)** on the hill. Enter the building.

SPEAK TO THE SCIENTISTS

Scan the large **electromagnetic processor** on the left side of the room when you enter the lab, then talk to the two scientists inside. You ask them what they’re doing to those people, and they reply that it’s an experiment and that no physical harm has come to the subjects. The scientists used to work for Cerberus until they started wanting to bring people back from the dead. Their experiment aims to connect everyone’s consciousness to create a supercomputer. You can probe them for much information that leads to Knight’s organization (See **Firefighters**). In the end, SAM locates the source of the mind-control signal, and you tell the scientists you’re shutting it down.

Before you leave the lab, scan the **neural analysis machine** for Research Data. Accessing the terminal next to it allows you to catch up on their research, as well as review the record of termination for the project from higher-ups at Cerberus.

ALTER THE MIND-CONTROL SIGNAL

In the same lab, interface with the **mind-control device** (the electromagnetic processor you scanned on the left when you entered). You have three choices. You can turn the signal against the scientists as punishment, freeing the people in the hut. The scientists will likely suffer complications as a result. Or you can alter the nature of the signal to ease the victims’ predicament, and lock the system from further changes. Lastly, you can do nothing and just walk away. You earn a small amount of AVP and +2% Kadara Viability no matter what you choose. Stick around and listen to the scientists start babbling.

MASS EFFECT ANDROMEDA

Secondary Ops
Missing Arks

Mission Type: Allies and Relationships

Prerequisite: Must have spoken to Director Tann about settling Eos during Mission 1 Priority Ops mission “Nexus Reunion”

Start Location: Nexus Operations

Unlocking: Speak to Director Tann about settling Eos

SPEAK WITH TANN

NEXUS OPERATIONS

After speaking to Director Tann **(1)** for the first time, you unlock “Getting to Know the Nexus” and this challenge, “Missing Arks.” This initiates a series of missions involving the salarian, asari, and turian arks. These are B-stories where each ark is connected to a future team member, and each becomes a mission that can help you earn their loyalty.

FIND LEADS ON THE ASARI ARK

VOELD

Following Cora’s B-story leads you to a search for the Periphona, a ship that escaped the asari ark, the Leusinia. The ship is found wrecked on Voeld during “Cora Harper: Asari Ark.” The transponder eventually leads you to the ark. This find completes this “Missing Arks” objective.

FIND LEADS ON THE TURIAN ARK

The turian ark’s arrival in Andromeda was met with internal sabotage and a collision with the Scourge, which resulted in its destruction. Most of the turians escaped, but the SAM Node and turian Pathfinder are missing. Her successor, Avitus Rix, a former Spectre, enlists your help locating her in the Havarl quest “Turian Ark: Not Dead Yet.” Once you advance the Priority Ops to the point of interrogating the prisoner at Kadara port, you receive an email from Avitus Rix that reveals scavengers found pieces of an ark on Elaaden. Confirming you received the email completes this objective.

The asari ark
Sid
Got a Lead on Ark Natanus
[Error 982: Carrier signal interrupted] - Invitation
Please see me.
Another interview?
Got a Lead on Ark Natanus
To: Ryder
From: Avitus Rix
Ryder,
I'm hearing rumors that scavengers found pieces of an ark on a planet called Elaaden. Might be nothing, but worth checking out.
Avitus

FIND LEADS ON THE SALARIAN ARK

Finish the Priority Ops mission “Hunting the Archon” to complete this objective. During this mission, you can choose to save the captive salarians or save the krogan. Either way, the salarian ark is discovered—the kett are tethered to it in this mission.

MASS EFFECT ANDROMEDA

Secondary Ops

Missing Science Crew

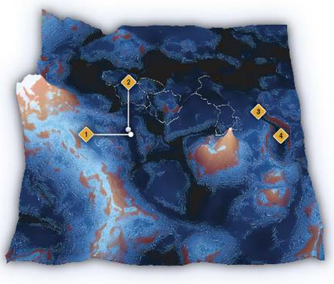
Mission Type: Heleus Assignment: Voeld

Prerequisite: Place a settlement on Voeld

Start Location: Voeld

Unlocking: Speak to Priya Blake

VISIT PRIYA BLAKE



VOELD: INITIATIVE OUTPOST

Priya is in the same building **(1)** you pop into when you build the outpost and talk to the holographic Addison. She's available to give you this mission as soon as the outpost is built. She needs your help finding some missing drill technicians.

SEARCH THE LAB FOR CLUES REGARDING THE MISSING SCIENTISTS

While searching for clues, make sure to find the **turian frigate model** on this desk in the screenshot It's two rooms away from Priya. Follow the navpoint out of the building and into the one adjacent.

Use the scanner to locate a scannable crate in the lab **(2)**. There's a **hand-drilling device** inside. On top of the crate is a **datapad** titled "Brynn Kemper, Log 478." The cryptic message contains a navpoint.

GO TO THE NAVPOINT FOR THE FINAL TRANSMISSION

Travel across Voeld to the navpoint in the east **(3)**. What you discover there is grim.

SEARCH THE AREA FOR CLUES

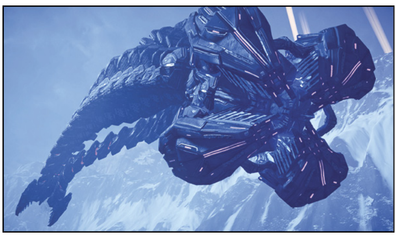
Scan the wrecked transport vehicle **(3)** and a few corpses for info that reveals they are members of the drill team. They were killed by electrical shock and vehicle impact. The vehicle was taken out by a long-range Remnant weapon. Examine the **datapad** lying near the open end of the broken vehicle, which gives you the scientists' planned path.

FOLLOW THE SCIENTISTS' PLANNED PATH

Follow the new navpoint **(4)** south through the vale. When the tires hit a frozen river, you see an Architect flying above a large kett outpost. The kett have been run off, but you're sure to encounter some Remnant here. That's right—prepare for an Architect battle.

DEFEAT THE REMNANT ARCHITECT

Refer to our battle tips in the Architect Encounters section for full details on defeating an Architect.

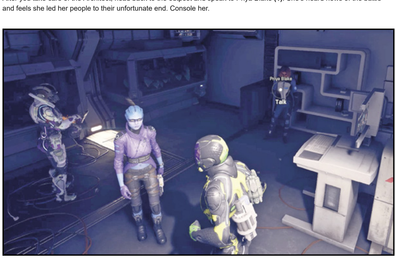


Of course, each new battlefield brings with it unique strategic options. In this case, on the east side of Voeld is a Hazard Level 2 cold environment. This hazard cannot be mitigated by completing the Remnant vault challenge, which lowers the temperature by 13 degrees, but doesn't effect this east valley. Given that additional obstacle, a big part of this fight is about battling frostbite. You must run from heat lamp to heat lamp to warm up throughout the stages of the Architect battle.

Lastly, make use the many buildings around this battlefield. You can take cover inside and even underneath some of them, which gives you a tactical advantage.

SPEAK TO PRIYA BLAKE

After you take care of the Architect, head back to the outpost and speak to Priya Blake **(1)**. She's heard news of the battle and feels she led her people to their unfortunate end. Console her.



MASS EFFECT ANDROMEDA

Secondary Ops

Mixed Messages

Mission Type: Heleus Assignment: Kadara

Prerequisite: Must have interrogated Vehn Terev in “Hunting the Archon” and returned to Kadara Port

Start Location: Kadara Port

Unlocking: Speak to Jim

SPEAK TO JIM IN JAIL

KADARA PORT: 2F JAIL CELL

Speak to Jim **(1)** through the bars of his cell on the second floor of Kadara Port. He wants you to deliver a message to someone on the outside. His girlfriend, Cele, works at Tartarus. He wants you to tell her that he’ll have the credits to pay Sloane’s protection fees soon and to wait for him—leave out the part about him being in jail. Use the transit console **(2)** on the first floor to travel to the Kadara Slums.

SPEAK TO CELE AT TARTARUS

KADARA SLUMS BAR

Enter the second floor of Tartarus (the slums bar) and approach the cage dancers. The first one is Cele, Jim’s special friend. Give her the message. She can’t believe he called her his girlfriend. She gives you a message to take back: “Thanks, but I’m happy at Tartarus. I don’t need rescuing.”`

RETURN TO JIM

KADARA PORT: JAIL CELL

Return to Jim **(1)** and deliver the news. He seems upset that she’s happy at the club. Alternatively, it’s possible for Jim to be killed before you’re able to deliver Cele’s message, as a result of the Collective pushing the Outcasts out of Kadara Port. The mission completes either way.

MASS EFFECT ANDROMEDA

Secondary Ops
Modern Medicine

Mission Type: Heleus Assignment: Kadara

Prerequisite: Must have interrogated Vehn Terev in "Hunting the Archon"

Start Location: Kadara Slums

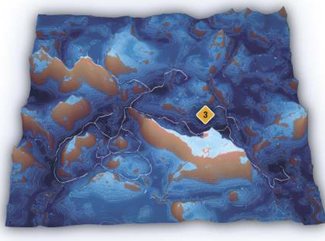
Unlocking: Speak to Dr. Nakamoto

TALK TO DR. NAKAMOTO

KADARA SLUMS

From the slums lift **(1)**, head up to the main platform level of the slums and straight back along the leftmost catwalk to find the doctor in a shipping container. Enter and talk to Dr. Ryota Nakamoto **(2)**. He requests your help in stealing back a medical formula that Sloane Kelly has been abusing to create a drug called Oblivion. He says the formula is in his old lab and sends you a navpoint.

GO TO DR. NAKAMOTO'S OLD LAB



HAARFEL

Follow the road in front of the slums east, staying left at the intersections, to reach Dr. Nakamoto's old lab **(3)** in the hills of Haarfel.

DEFEAT THE OUTCAST GUARDS

When you arrive, you quickly realize you're not alone. Defeat the Collective Sharpshooter and Raiders. Once they're toast, enter the lab.

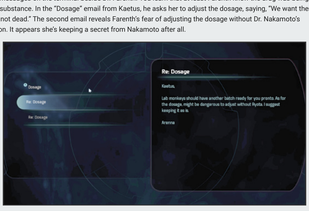
RETRIEVE THE FORMULA

Scan the unknown plants for Research Data as you enter, then follow the navpoint to Dr. Farenth, who's standing in the back of the lab. Tell her you're here for the **Oblivion formula** and you'll be on your way. She tries to convince you that she and Dr. Nakamoto always intended Oblivion to be an addictive drug and that its medicinal value was incidental.

You can opt to believe either Farenth's or Nakamoto's story. If you believe Nakamoto, select "I'm not buying it" during your conversation with Farenth, and take the formula. Otherwise, take Farenth's side and leave the formula behind. There's no wrong choice here; your reward in the end is the same. Raid the containers in the lab before you leave.

DOSAGE MESSAGE

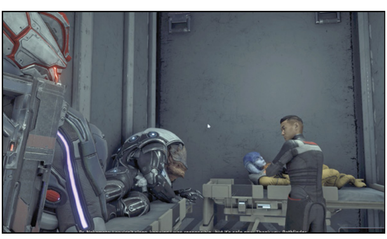
Read the messages on the terminal beside Dr. Farenth. You learn that at least Farenth knew the drug was being used as an illegal substance. In the "Dosage" email from Kaetus, he asks her to adjust the dosage, saying, "We want them addicted, not dead." The second email reveals Farenth's fear of adjusting the dosage without Dr. Nakamoto's supervision. It appears she's keeping a secret from Nakamoto after all.



Dosage
Re: Dosage
Re: Dosage
Re: Dosage
Kaetus,
Lab monkeys should have another batch ready for you pronto. As for the dosage, might be dangerous to adjust without Ryota. I suggest keeping it as is.
Aranna

RETURN TO DR. NAKAMOTO

Return to the Kadara Slums and talk to Dr. Nakamoto **(2)** in his makeshift examination room. The conversation is a pleasant one if you sided with him regarding the Oblivion debacle. You earn a good amount of AVP and +5% Kadara Viability for completing this quest.



JUMPING THE GATE

When returning to Kadara from the slums, you don't have to go through the warden's checkpoint building; you can simply leap over the gate! So much for keeping the riffraff out.

MASS EFFECT ANDROMEDA

Secondary Ops

Movie Night: Better Snacks

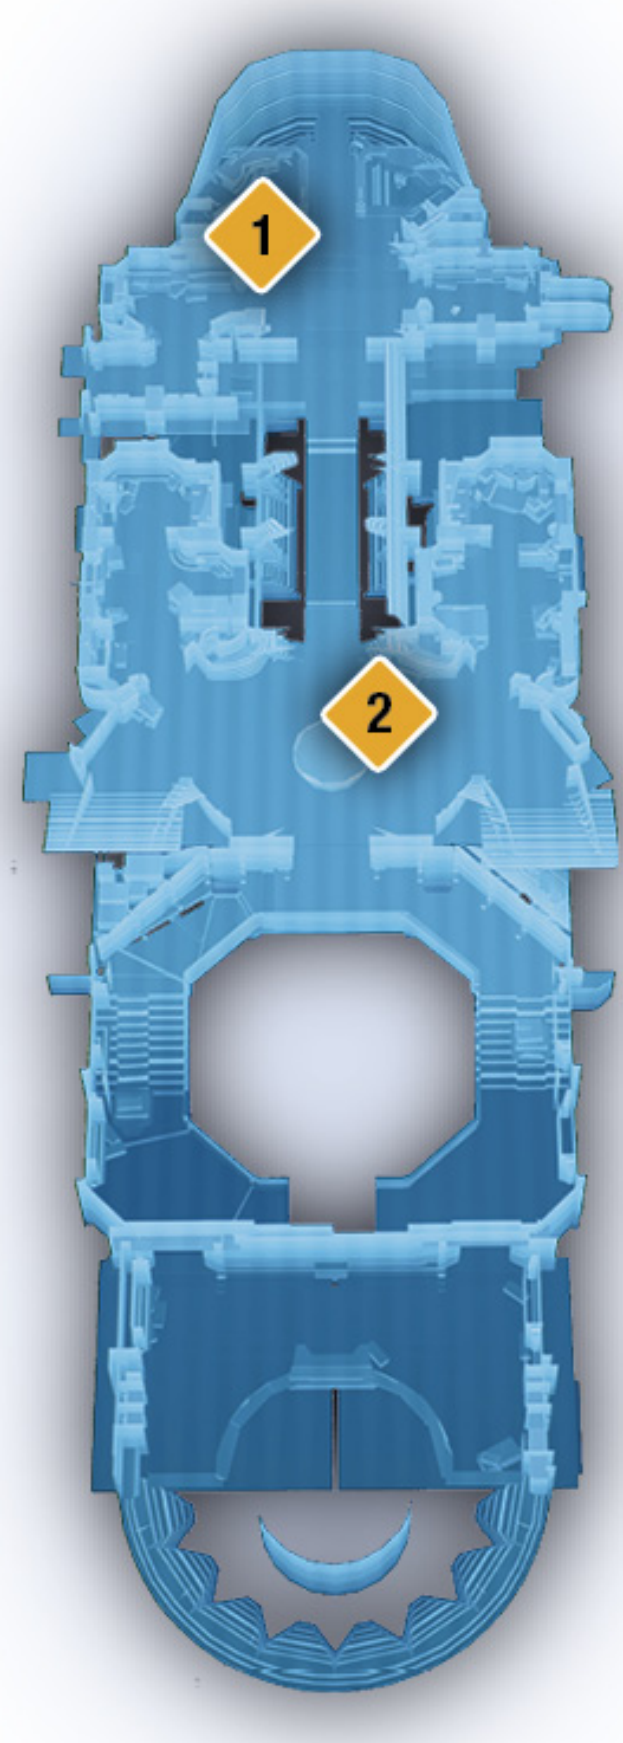
Mission Type: Heleus Assignment: Tempest

Prerequisite: After visiting Kadara Port, with all other conversations with Vetra completed; complete “Movie Night” missions “Getting Started” and “Snacks”

Start Location: Tempest Armory

Unlocking: Read email from Vetra

READ VETRA’S EMAIL



TEMPEST: ARMORY

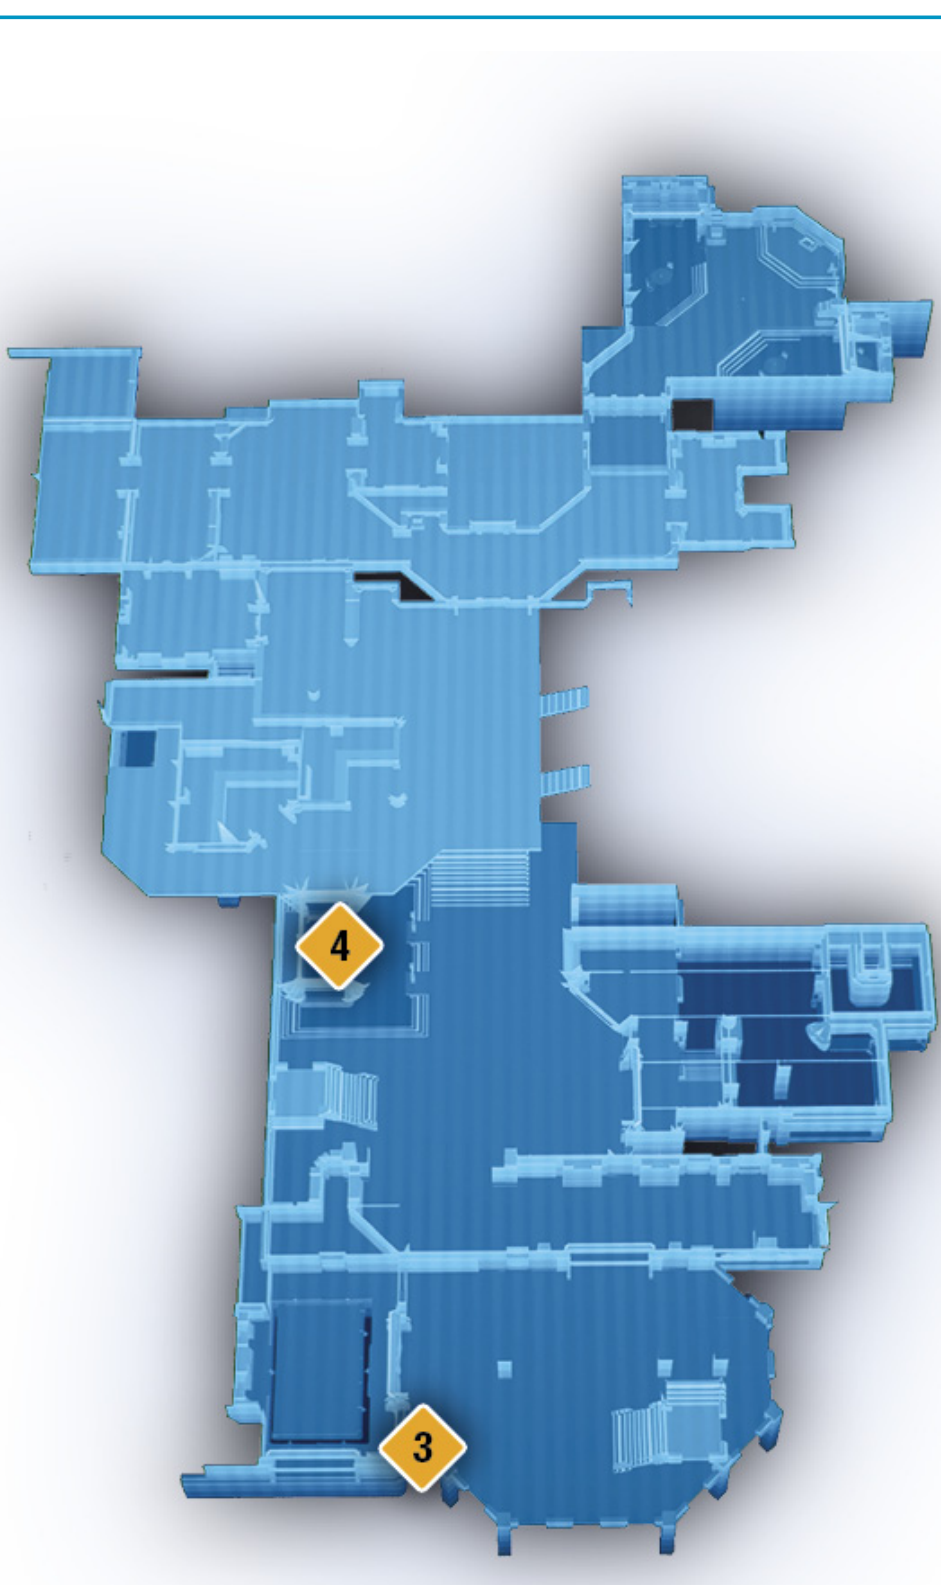
After helping Suvi in “Movie Night: Snacks,” look for an email **(1)** from Vetra. If you don’t see it, advance the Priority Ops progress a little more. Her email is titled “Suvi’s Movie Night Snacks.” Go talk to Vetra.

Suvi's Movie Night snacks
Thanks for listening.
That last talk
Kallo thinks I'm crazy
Update on Jaal
About SAM
Suvi's Movie Night snacks
To: Ryder
From: Vetra
Ryder:
Whatever Suvi's cooking up in the galley smells terrible. She says it's for a movie night? Good cause, bad choice of snacks.
I can do better. Come see me and I'll show you.
-Vetra

SPEAK TO VETRA

Vetra is either in the research room **(2)** or in her armory storage in the back-left corner of the cargo bay. Talk to her. She’s not happy with Suvi’s “green snack things.” She wants you to get popcorn from Kadara Port.

PROCURE SNACKS



KADARA PORT

Vetra isn’t impressed with Suvi’s movie-night snacks. She’s tracked down alternatives in Kadara Port. From the travel terminal **(3),** head into the market and find the salarian merchant **(4)** on the left in the first booth. In the Mod Merchant’s inventory, scroll over to the special items and look for “**Snacks**.” Buy them for 10 credits. Head back to the travel terminal **(3),** and then back to the Tempest.

MASS EFFECT ANDROMEDA

Movie Night: Getting Started

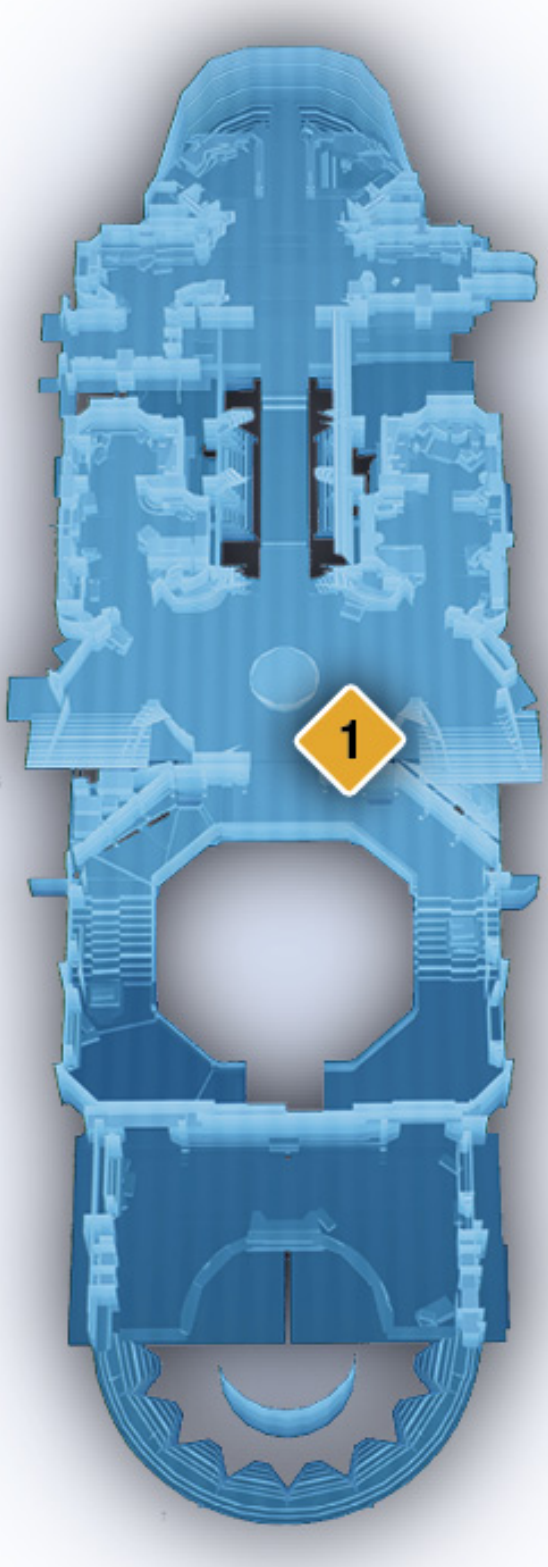
Mission Type: Heleus Assignment: Tempest

Prerequisite: After Aya; Jaal recruited; all other conversations with Liam are completed

Start Location: Nexus Operations

Unlocking: Talk to Liam on the Tempest

SPEAK TO LIAM



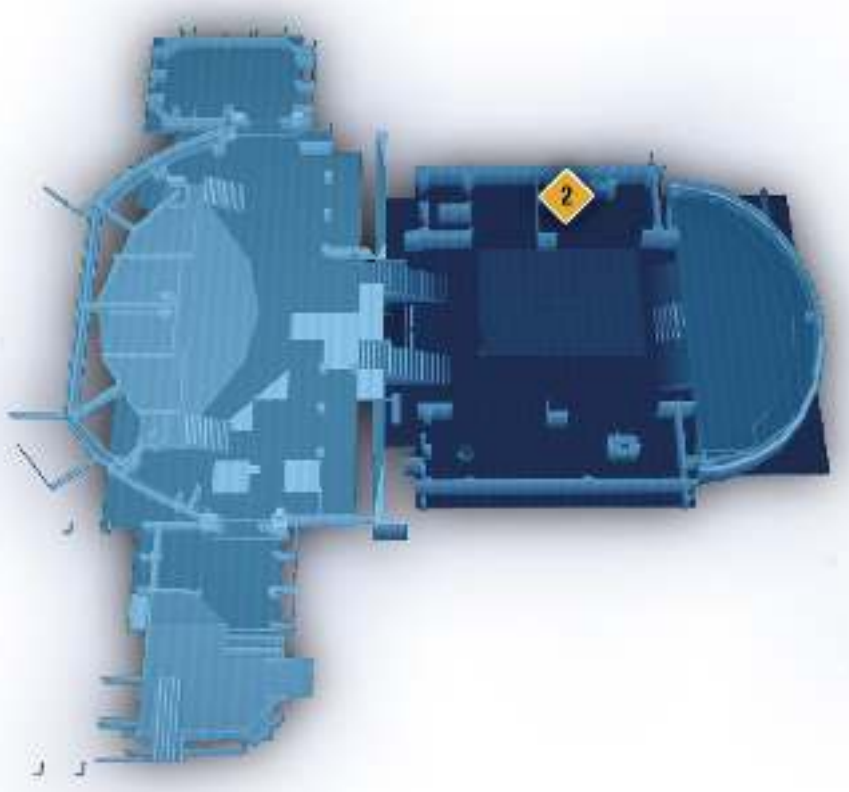
TEMPEST

FIVE MORE "MOVIE NIGHT" MISSIONS

Completing this mission starts a series of five more movie-night-themed missions.

This is the first of many "Movie Night" quests given by different crewmates, all centered around having a nice night off to watch a movie and kid around. Find Liam in his storage room in the cargo area of the Tempest, or in the research room **(1)** on the second floor. Talk to him and exhaust the conversation options in case you haven't spoken to him in a while. If Aya has been unlocked and Jaal has been recruited, then Liam talks about movie night and asks you for a library download.

GET A MOVIE LIBRARY DOWNLOAD FROM THE NEXUS



NEXUS: OPERATIONS

After unlocking this quest by talking to Liam on the Tempest. Enter the room adjacent to the prison cell and Arms Merchant, and look in the back-left corner for a console **(2)** that gives an Archive System prompt. Interact with this console to download the movies file. Now return to Liam (1) and talk to him to deliver the movie file. Look for an email from Suvi that launches "Movie Night: Snacks."

MASS EFFECT ANDROMEDA

Secondary Ops

Movie Night: Raise a Glass

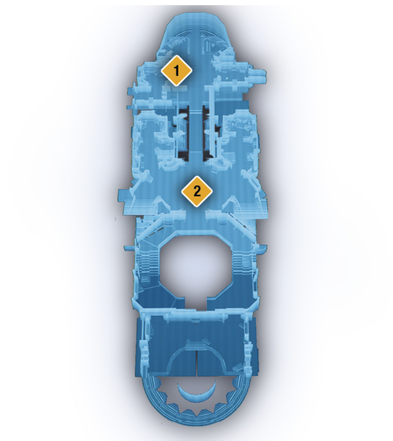
Mission Type: Heleus Assignment: Tempest

Prerequisite: After Mission 5, with all other conversations with Lexi completed; complete all previous "Movie Night" missions: "Getting Started," "Snacks," "Better Snacks," and "The Right Setup," plus Priority Ops mission "Meridian: The Way Home."

Start Location: Tempest

Unlocking: Read email from Lexi

READ EMAIL FROM LEXI

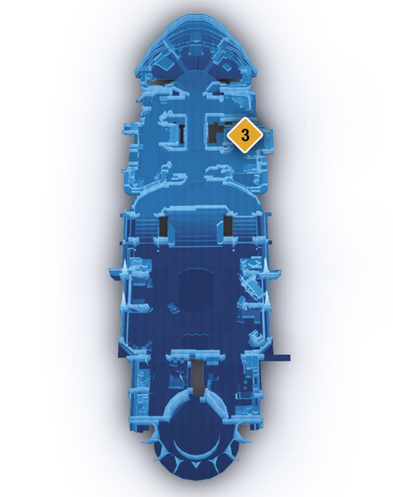


TEMPEST BRIDGE

If you aren't seeing this quest unlock, wait until you've advanced the Priority Ops further (try "Meridian: The Way Home" before probing for Scourge clusters—almost the end of the game). You're looking for an email **(1)** from Lexi titled "Movie Night Plans." She's concerned about everyone's safety and asks you to meet her on the Tempest.

Movie Night plans
To: Ryder
From: Lexi
Ryder,
Liam's Movie Night seems to be catching everyone's interest, especially Drack and Peebee. They're—well, perhaps we should talk. We might head off a medical emergency before it happens.
Lexi
Clows and gardens
I appreciate the support
Belief is weird.
Kett I-acts
Movie Night plans
Thanks for listening

TALK TO LEXI



TEMPEST

You can usually find Lexi in the medbay **(3),** or sometimes in the research room **(2)**. She's worried about the hooch Peebee and Drack are bringing to the party. She wants you to pick up something nicer—an asari liquor called Akantha. You can get it in the Nexus commons.

BUY ASARI LIQUOR

NEXUS COMMONS

With Liam's plans for movie night almost complete, Lexi suggests that asari liquor from the Nexus would make the evening better. On the first floor of the Nexus commons, head to the first merchant **(4)** along the right wall (to the right of the tram). From the General Merchant's Special category, buy **Akantha** for 10 credits and return to the Tempest.

MASS EFFECT ANDROMEDA

Secondary Ops

Movie Night: Snacks

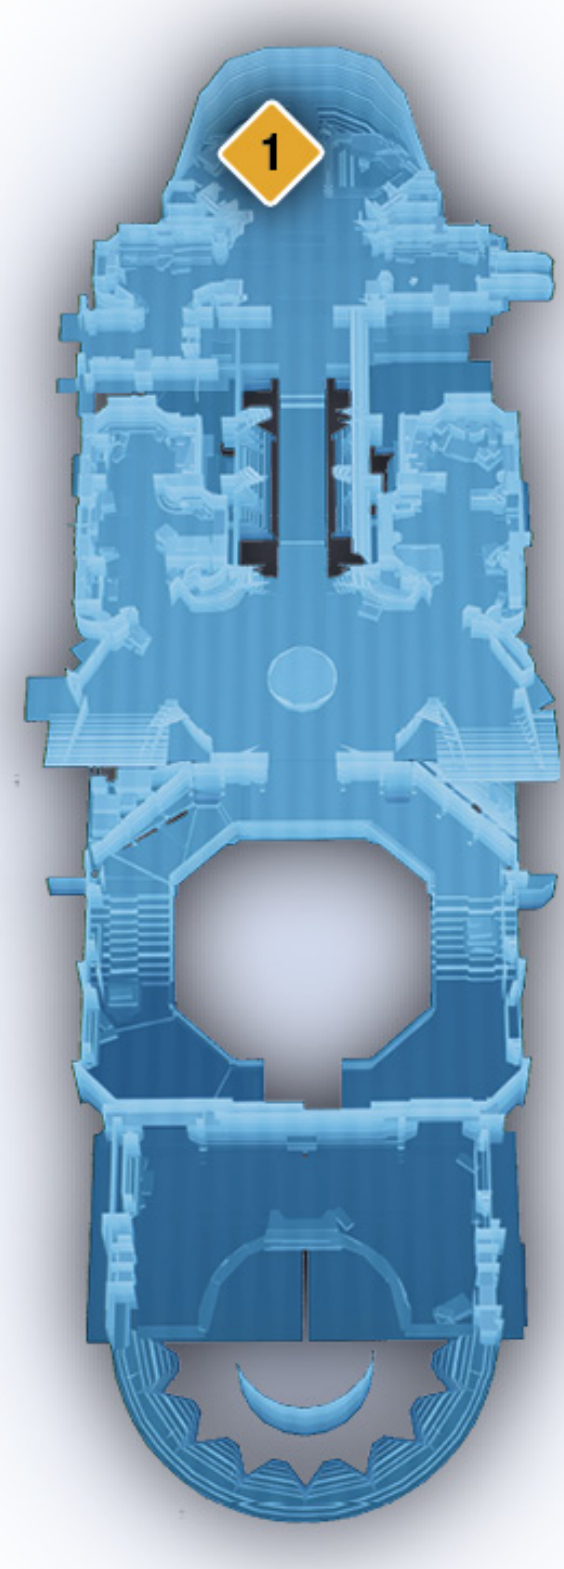
Mission Type: Heleus Assignment: Tempest

Prerequisite: Complete "Movie Night: Getting Started"; all other conversations with Suvi must be cleared

Start Location: Tempest

Unlocking: Speak to Suvi

READ EMAIL FROM SUVI

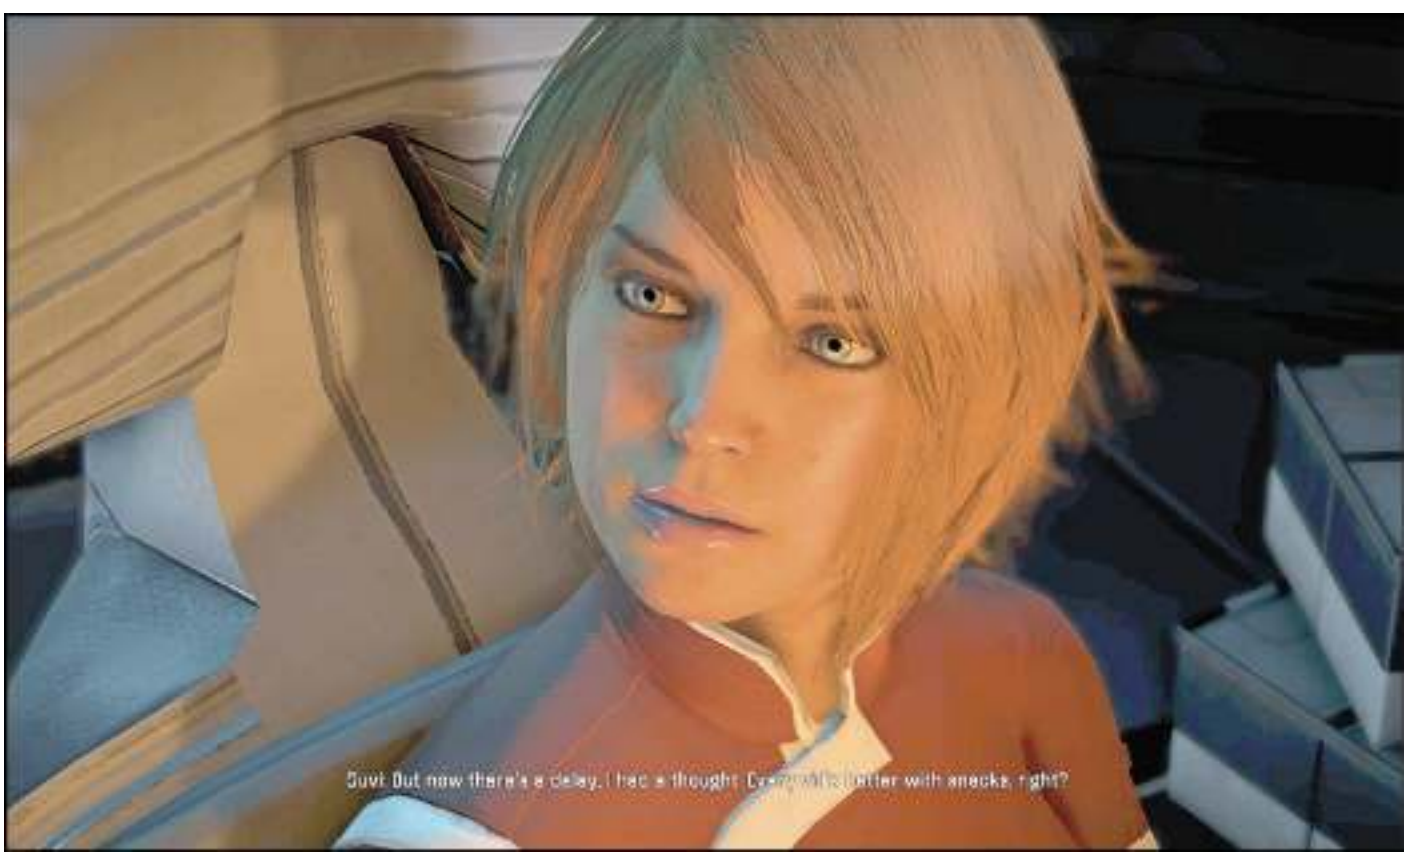


TEMPEST

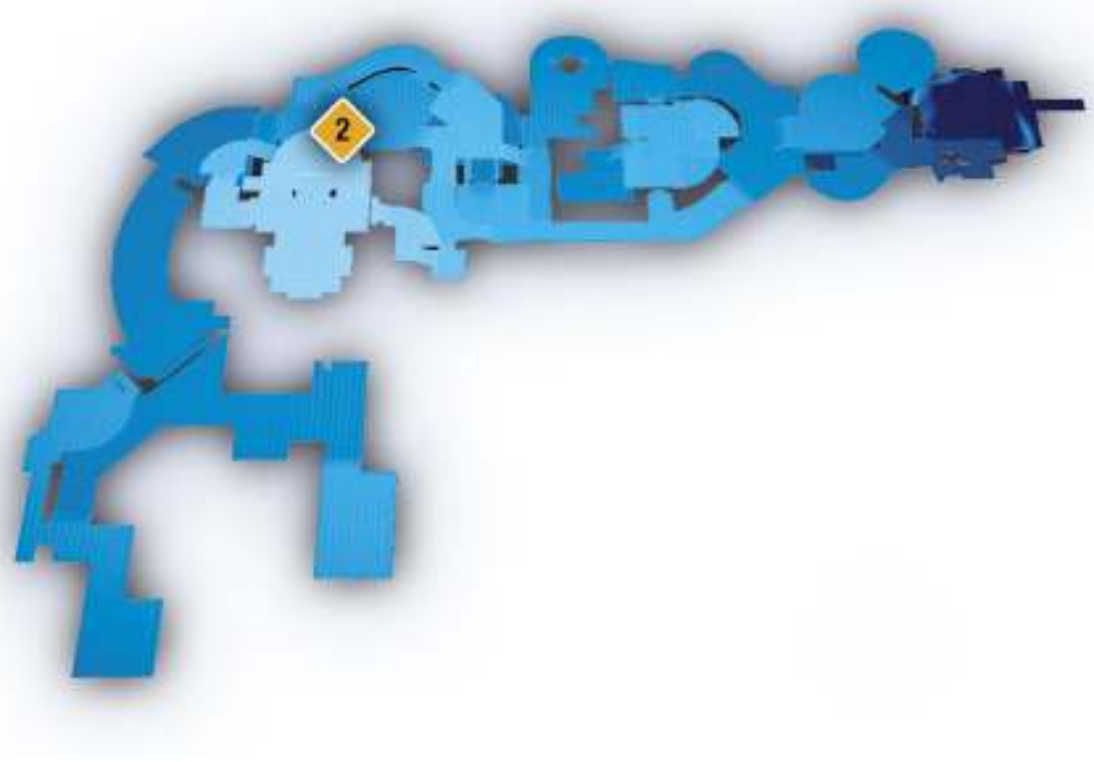
Check the email terminal on the bridge. Look for Suvi's "About Liam's Movie Night" email. She wants to talk to you about snacks.

SPEAK TO SUVI

You can find Suvi **(1)** where she always is, at the science officer seat on the bridge of the Tempest. She thinks snacks would be great for this movie night that you and Liam are planning. She found an angaran recipe for little morsels you can make from a local Heleus plant. She wants you to get a rare plant found on Aya.



FIND A PLANT FOR SUVI



AYA MARKET

Suvi has offered to make snacks for Liam's movie night but needs specific ingredients. Go to the market **(2)** on Aya and talk to the General Goods Merchant (first on the right) until she shows you her goods. Scroll over to her specials and down until you find the **Tavarv Plant**. Purchase it for 10 credits.

RETURN THE PLANT TO SUVI

TEMPEST BRIDGE

Back on the bridge, talk to Suvi about the plant she wanted for movie night, and she thanks you and details a recipe she's going to try. Now look for an email from Vetra that launches "Movie Night: Better Snacks."

MASS EFFECT ANDROMEDA

Secondary Ops

Movie Night: The Final Piece

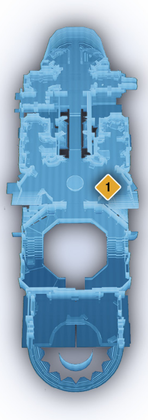
Mission Type: Heleus Assignment: Tempest

Prerequisite: After Mission 5, with all other conversations with Liam completed; complete all previous "Movie Night" missions: "Getting Started," "Snacks," "Better Snacks," "The Right Setup," and "Raise a Glass"

Start Location: Tempest

Unlocking: Speak to Liam on the Tempest

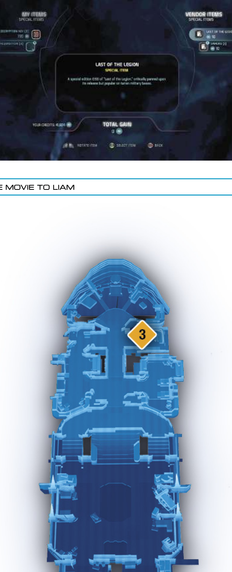
TALK TO LIAM



TEMPEST

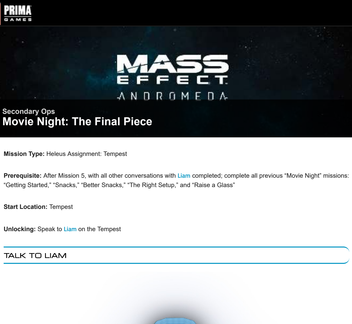
After completing "Raising a Glass," Lexi wanted you to ask Liam what time the party's going to start. You can find Liam in his storage room downstairs, or in the research room (**1**). Liam wants the evening to be perfect, so now he's second-guessing the movie selection and wants you to get *The Last of the Legion*. The banned version, remastered…

LOCATE THE MOVIE



KADARA PORT

Everything is ready, and the crew is invested in movie night. You just need this one last thing. Head to the Mods Merchant (**2**) in Kadara Port. Purchase *The Last of the Legion* from his Special category for 10 credits and return to the Tempest.



RETURN THE MOVIE TO LIAM

TEMPEST

Tell Liam (**1**) you found the rare version of the movie he requested. He's ecstatic. He tells you they've rigged everything up in your quarters and to go there and call everyone in when you're ready.

CALL THE CREW TOGETHER FROM THE PATHFINDER'S QUARTERS

MASS EFFECT ANDROMEDA

Secondary Ops

Movie Night: The Right Setup

Mission Type: Heleus Assignment: Tempest

Prerequisite: After Mission 4, with all other conversations with Jaal completed; complete all previous "Movie Night" missions: "Getting Started," "Snacks," and "Better Snacks"

Start Location: Tempest

Unlocking: Read email from Jaal

READ EMAIL FROM JALL

TEMPEST BRIDGE

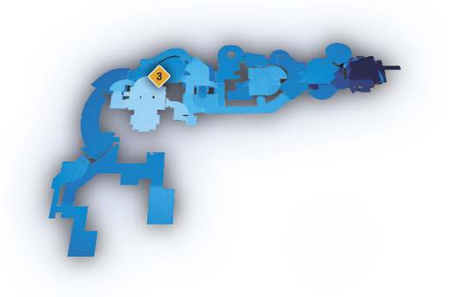
As soon as you finish "Movie Night: Better Snacks," Jaal wants to add something to the party. Read the email **(1)** from Jaal titled "A Communication Concerning Movies." He wants to explain.

TALK TO JAAL

TEMPEST

Go talk to Jaal. You can find him in the tech lab **(2)** or the research room **(2)**. He wants to work on the sound system so the movie can be enjoyed the angaran way…by feeling it in their skin. There are components at the Aya Market.

OBTAIN THE COMPONENTS



AYA MARKET

Jaal believes he can create a superior audio-visual setup for movie night, with Gil's help and certain angaran components. Talk to the General Goods Merchant **(3)** in the Aya Market, and look through her Special category for the **vid components**. Buy them for 10 credits and return to the Tempest.

RETURN THE COMPONENTS TO JAAL

TEMPEST

Head back to Jaal and let him know you got the components. He and Gil are going to try to rig something with the existing system. Now wait until you've advanced the Priority Ops further (try "Meridian: The Way Home" before probing for Scourge clusters—almost the end of the game). You're looking for an email from Lexi titled "Movie Night Plans," which kicks off "Movie Night: Raise a Glass."

MASS EFFECT ANDROMEDA

Secondary Ops

Murder in Kadara Port

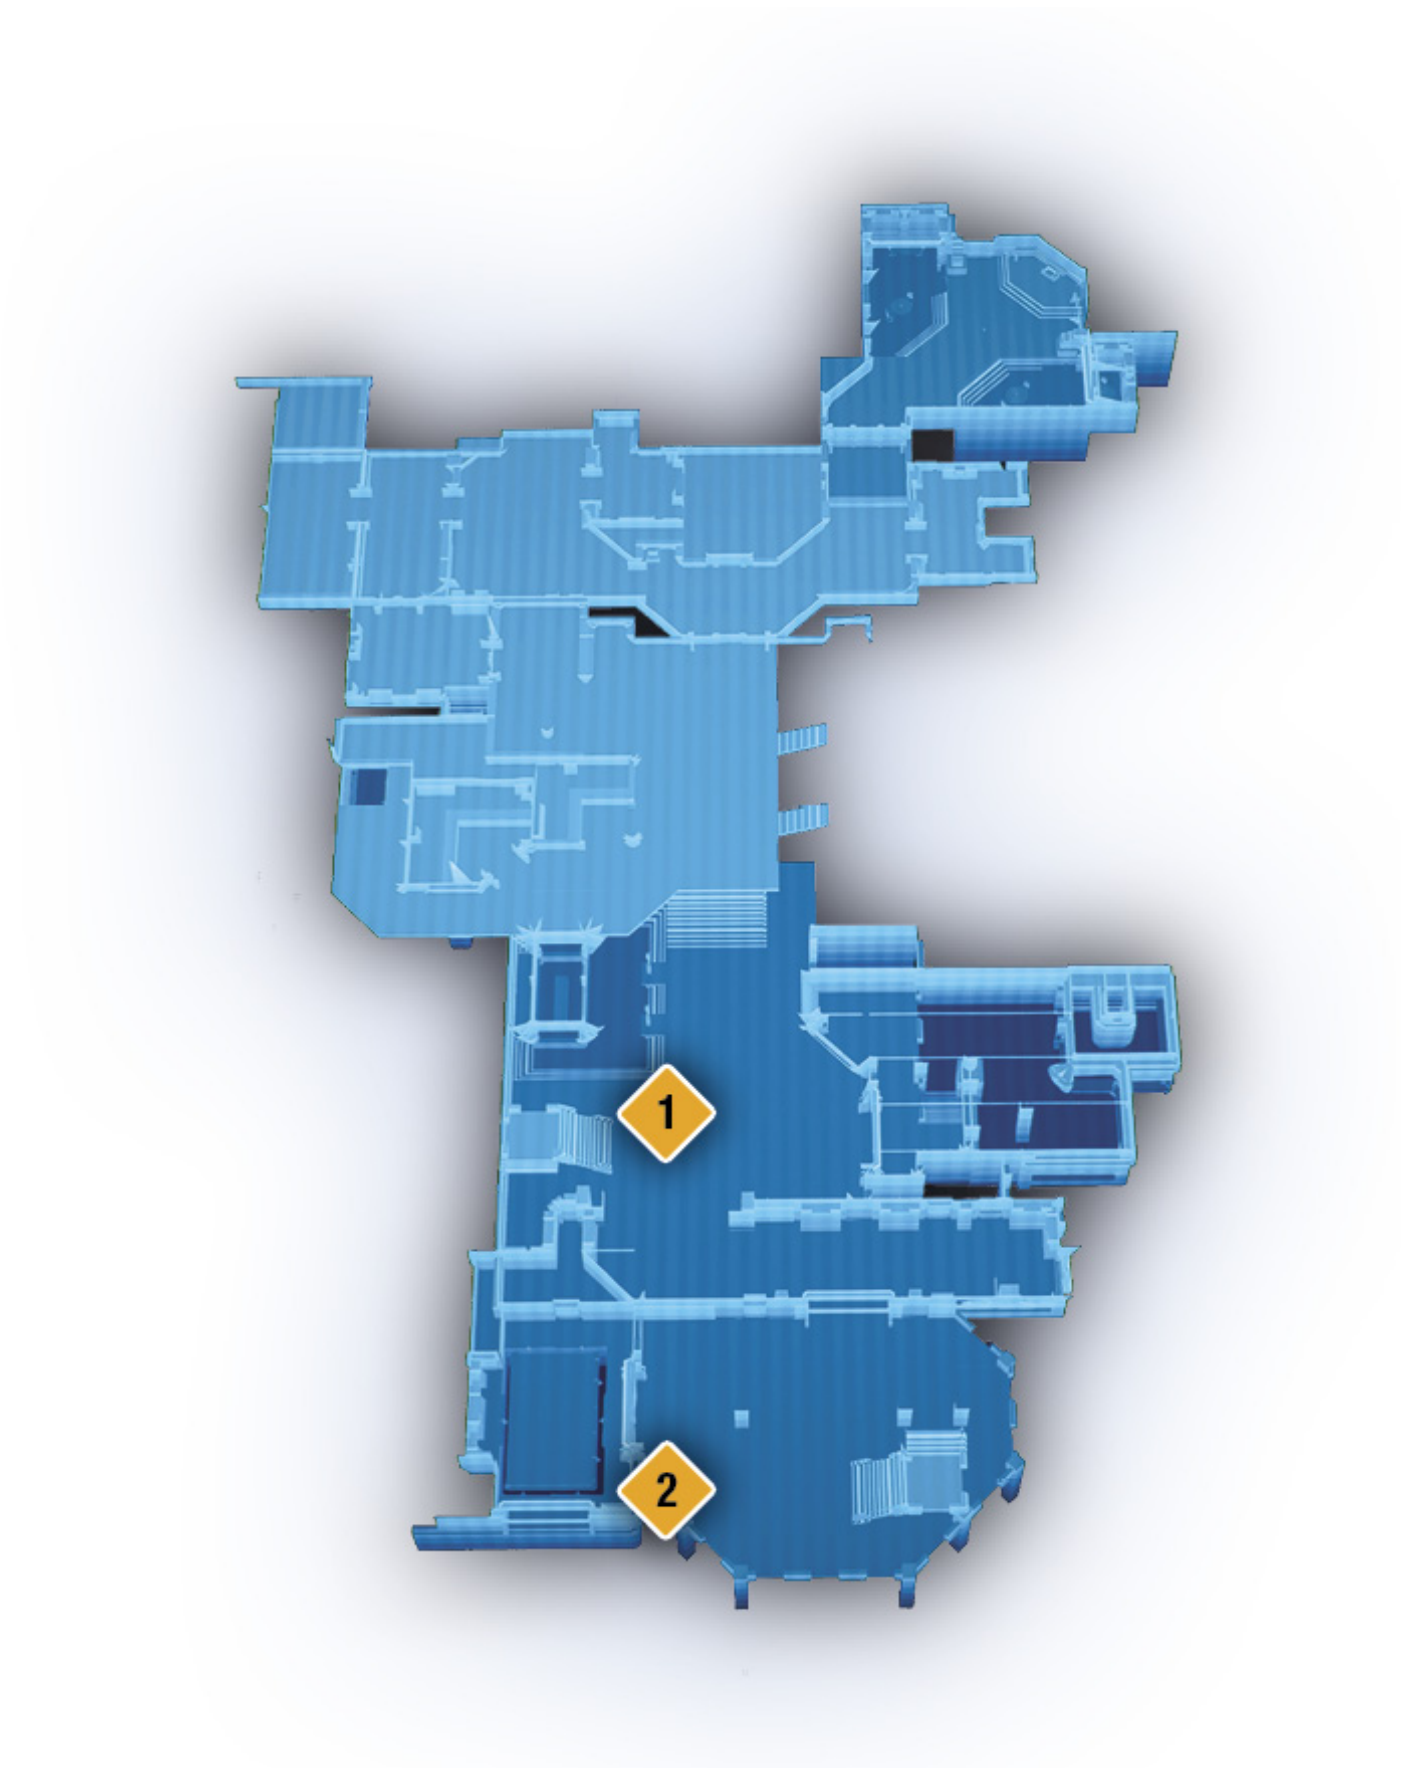
Mission Type: Heleus Assignment: Kadara

Prerequisite: Must have interrogated Vehn Terev in “Hunting the Archon”

Start Location: Kadara Market

Unlocking: Scan the deceased angara

SCAN THE CORPSE



KADARA MARKET

A corpse **(1)** has been discovered in the market. This is the latest in a string of murders plaguing Kadara Port. Approach the murder scene, which is almost impossible to miss, as it’s in the middle of Kadara Market.

A bar patron nearby claims the Charlatan has struck again. Scan the body to begin the mission. The scan reveals the victim was intoxicated and bled out of multiple stab wounds. Wounds to the face were made postmortem. The Outcast guard reveals there have been seven murders, by his count. SAM suggests you speak to Reyes about this. Head to the terminal at the docks to travel to the Kadara Slums **(2)**.

SPEAK TO REYES ABOUT THE MURDERS

KADARA SLUMS

A PEOPLE DIVIDED

“Murder in Kadara Port” ends here, but the adventure picks up in “A People Divided,” where you reach the crime scene Reyes directed you to.

Head to the second floor of the Kadara bar and find Reyes (who is romanceable by either gender, by the way) sitting in a corner couch in his “office” **(3)**. Speak to the debonair Kadaran and tell him about the dead body outside Kralla’s Song (the bar at the market—there aren’t enough bars in Kadara). You add that it looks like the work of the Charlatan.

Reyes is *very* familiar with the Charlatan’s work, and to him, this doesn’t fit the profile. Leaving the bodies to be found is not the Charlatan’s style. Reyes believes the murderer is a Roekaar. In the last conversation option, you can start romancing Reyes by replying, “You need me, huh?” Or if you’re not interested, choose one of the other two answers when he asks about the opportunity to win friends in Kadara Port. Lastly, he tells you one of the crime scenes isn’t far and sends you a navpoint.

Nakmor Drack: Knock 'Em Down

Mission Type: Allies and Relationships

Prerequisite: Complete Drack's Loyalty Mission "A Future for Our People" and "Krogan Betrayal"

Start Location: Tempest

Unlocking: Read email from Drack

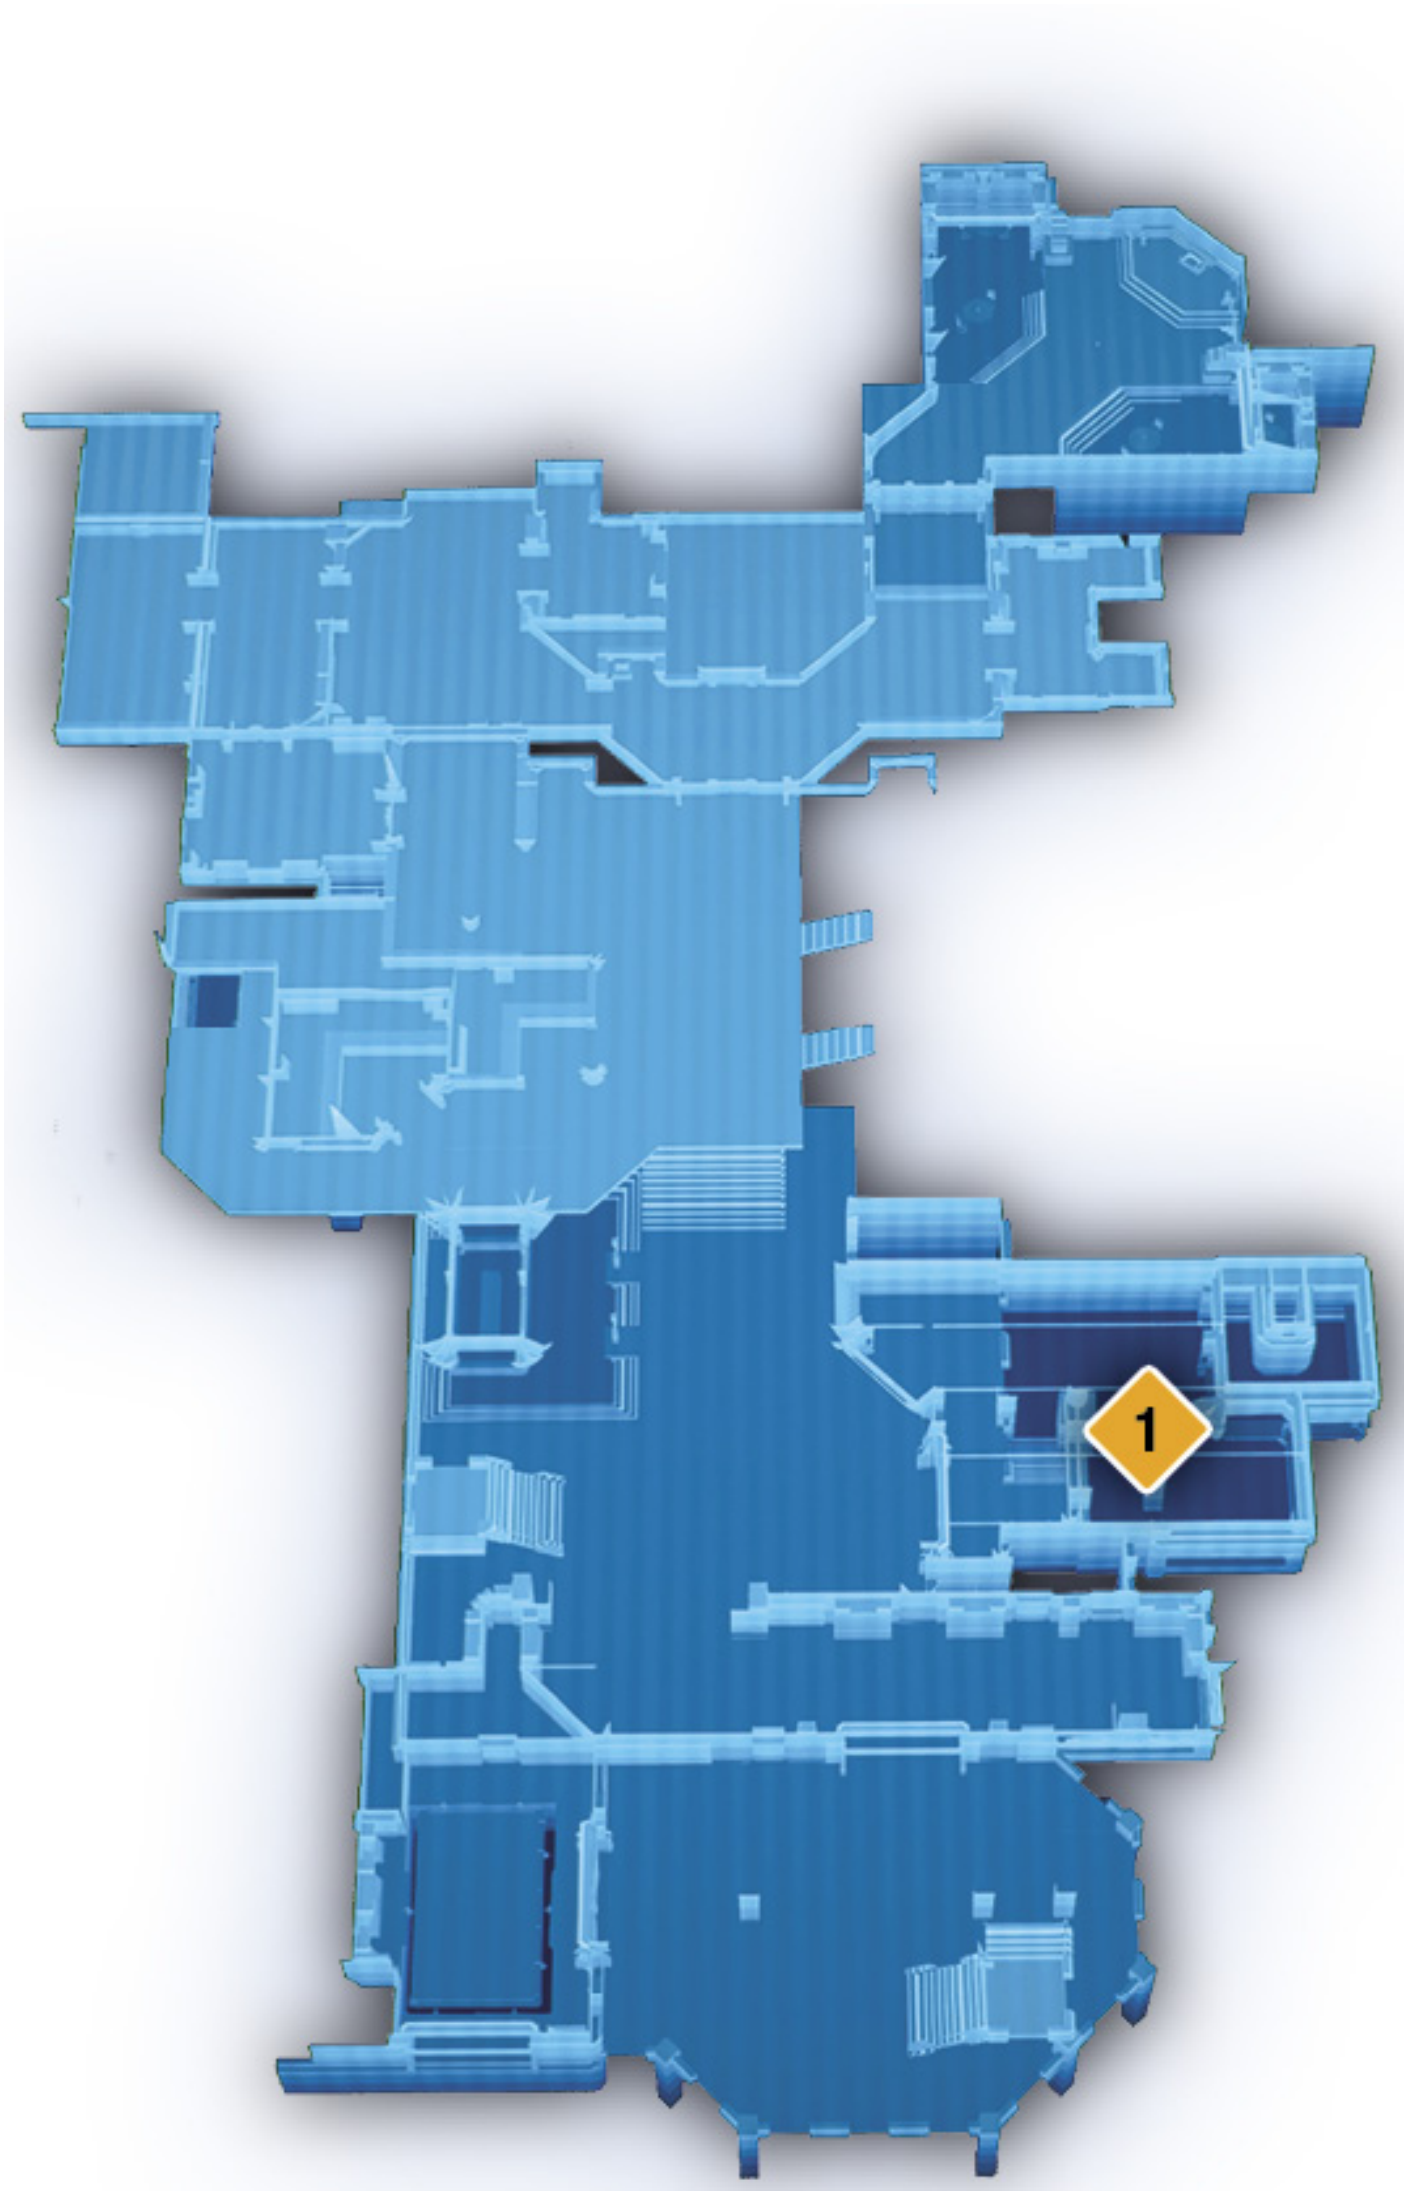
READ EMAIL FROM DRACK

TEMPEST

After completing the prerequisite quests, you receive an email from Drack asking to you to meet him at Kralla's Song (the bar in Kadara Market).

Drinks
To: Ryder
From: Drack
Hey kid.
Now that we've got the transport back, maybe let's take a load off.
Swing by Kralla's Song next time we're in Kadara Port. The bartender's getting to be a friend of mine. She'll mix you up something that'll strip paint.
Drack.

MEET DRACK AT KRALLA'S SONG



KADARA MARKET

Drack wants to have a drink or ten at his favorite bar in Kadara Market. A night on that kind of town with this kind of krogan could get interesting.

When you land at Kadara Port, head to the bar, Kralla's Song. Upon entry you see that Drack has had some fun without you. There's a body at his feet. He says he challenged the guy to a headbutting contest. Guess who lost. A pirate comes up behind you and pushes your shoulder. You're about to have a brawl on your hands. Tell Drack, "He doesn't stand a chance," to get the party started.

Watch for the Dodge button prompt in the lower-right corner to dodge the pirate's swing attempt. The mission ends with you and Drack proudly reflecting on the carnage while sipping a couple of cold ones.

MASS EFFECT ANDROMEDA

Mission(s) Out:
Nakmor Drack: Krogan Betrayal

Mission Type: Side and Relationships

Prerequisite: Nakmor Drack and complete Mission 2

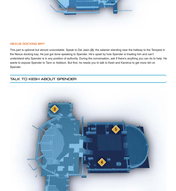
Start Location: Tempest

Unlocking: Speak to Drack on the Tempest after Mission 2

SPEAK WITH DRACK

TEMPEST: SPILLEY

Find Nakmor Drack (B) on the Tempest after Mission 2, and without conversations with him if you haven't talked to him in a while. He and Pryce can host Specter in Combat Affect, per Drack the conversation options.

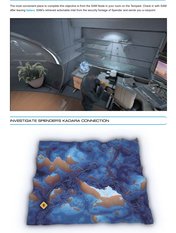


SPEAK WITH DEL JASPI

NEXUS: DOCKING BAY

The pad is optional but almost unavoidable. Speak to Del Jaspi (A) the salarian standing near the hallway to the Tempest to initiate a conversation. Del Jaspi will mention that he's been trying to get Drack to talk to him about something, but he's understand why Specter is in any position of authority. During the conversation, and if there's anything you can do to help, he wants to expose Specter's Tone in Andromeda. But first, he needs you to talk to Nash and Kandros to get more dirt on Specter.

TALK TO KEEBI ABOUT SPRINDER



NEXUS: OPERATIONS: KEEBI'S OFFICE

Enter Nash's office (B) in Nexus operations and select the conversation option "Specter's a piece of work." She confirms that Specter is a traitor and a threat to the Nexus. Agree to help further. She directs you to some security footage evidence of his meetings with Sprinder and instructs you to the Kandros base.

SPEAK WITH KANDROS

KANDROS BASE

Enter the lobby office and talk to Kandros (B) to get permission to view the security footage. Ask him about the "mutiny footage." After getting permission, don't wander far, as the footage is just across the hallway.

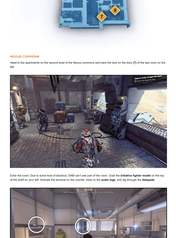
REVIEW THE NEXUSSECURITY FOOTAGE

NEXUS: OPERATIONS: ANDROMEDA OFFICE

Use the computer (B) facing the main hallway in Addison's office to view the security footage. After SAM boosts the low-res quality, you think you see Sprinder handing something to one of the mutineers. Select either "Well, that's suspicious" or "Could be circumstantial" during the first conversation option with SAM.

You both agree that the situation appears to be a cover up attempt. SAM identifies the mutineerlocus, populated location as Sanctum. Then head over to the Sanctum base on the Ketra Galaxy map. Kandros should already be granted to that planet.

CONFRONT SPRINDER ABOUT THE SECURITY FOOTAGE



Move Sprinder works on the bridge in spaceships, you can choose to speak to him at this point. However, doing so puts the mutineers on alert and makes them harder to find. Instead, wait until you've found the mutineers and then speak to Sprinder. You'll still agree that the situation appears to be a cover up attempt. With identifies the mutineerlocus, populated locations as Sanctum. The next step in the adventure is to find the Cerberus camp at Sanctum and Kandros is granted to that planet.

LOCATE THE PLANET MENTIONED IN THE SECURITY FOOTAGE

INTERACT WITH THE SAM NODE

The most convenient place to complete the objective is from the SAM Node in your room on the Tempest. Choose it with SAM after leaving Sanctum. SAM's retrieval automatically notes that the security footage of Sprinder and Jaroth you've received.

INVESTIGATE SPRINDER'S KAGAYA CONNECTION

KAGAYA: SOUTHWEST SCALUR SPRINGS

When you happen upon this outpost (B) in Scalur Springs, investigate closer. There are some active bodies.

DEFEAT THE EXILES

Check your radar as approach. Eight exiles are inside the structure. You have them screaming to each other. They've spotted you and weapon is attacking.

Keep moving to find the next source of the blips on your radar—a landing pad full of Acid and Outlaw Raiders. Jump into the arena and let 'em have it.

SEARCH THE HIDEOUT FOR CLUES

After the last exile drops, head to the control room on the first level of the multi-story outpost. Inside the large room, find the **Hideout** on a table by the entrance.

The viewport contains a letter titled "Paper Trail." From Scourge to William Sparrow. Kvarsis is angry at Sparrow for not delivering the payment he promised for the Kagaya job. Sparrow is a human. Kvarsis is threatening to kill him if he doesn't pay up and cancel. You receive a small amount of XP and 250 Salvage Data for completing the objective. There are some important documents on a terminal in a room at the top floor. Sprinder's in trouble.

SEARCH FOR A SCAVANGER IN SPRINDER'S ROOM

NEXUS: COMMONS

Head to the apartments on the second level of the Nexus commons and track the look on the door (B) of the last room on the left.

Enter the room. Due to some level of blackout, SAM can't see part of the room. Grab the **Initiation Synfer model** on the top of the shelf on your left. Activate the terminal on the counter. Select the **audio logs**, and dig through the **voicepads**.

The good probe is behind the TV. Look behind its right side between it and the wall to find **the scorekeeper(B)**. The explosive SAM's issues with the blackout issue. Pick up the scorekeeper. You need an expert to turn the device off properly.

TALK TO THE CERBARE OFFICER

NEXUS: OPERATIONS: ROSSBERG'S OFFICE

Head all the way up to Nexus operations on the third floor and talk to the comms officer (B) standing next to Addison on her deck. Hand him the scrambler you found in Sprender's room. He tells you they're illegal. You ask him to hand it, and he agrees.

SPEAK TO CRACK ON THE TEMPEST

TEMPEST

Secondary Ops

Night on the Town

Mission Type: Heleus Assignment: Kadara

Prerequisite: Must have interrogated Vehn Terev in "Hunting the Archon"; complete the following quests, then return to the Tempest: "Behind Enemy Lines," "A People Divided," "Heeling Kadara's Heart," "Modern Medicine," "Precious Cargo"

Start Location: Tempest

Unlocking: Return to the Tempest after completing the prerequisite quests

READ YOUR EMAIL

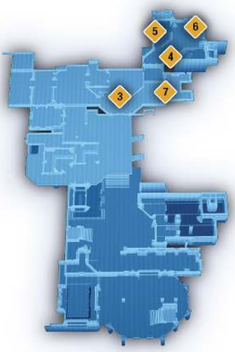
TEMPEST

Use the bridge email terminal **(1)** or the one in your room. Read the email from Reyes titled "Call Me."

CALL REYES

Head to the meeting room on the third floor **(2)** and call Reyes via Vidcon. He asks you to be his plus-one to a party Sloane in throwing. It's a get-together for the locals. You take him up on the invite, naturally.

MEET REYES AT OUTCAST HEADQUARTERS



KADARA PORT

Stop at Kadara Port and follow the navpoint to the Outcast Headquarters **(3)**. Open the door, and you run into an Outcast guard who tries to bounce you, but Reyes comes to the rescue. Seems he's always there at the right time.

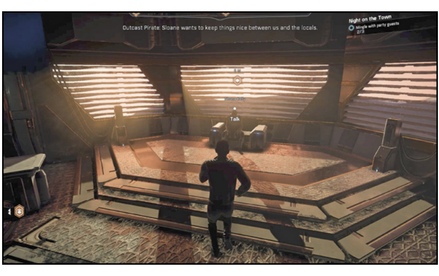
Your first stop at the party is to talk to Keema Dohrgun. The distinguished angara asks to be introduced to you. She's Sloane's angaran representative. After some small talk, you excuse yourself to go mingle while Reyes takes off and leaves you alone at the party.

MINGLE WITH THREE PARTY GUESTS

DRINK TOO MUCH

We suggest you see the bartender and drink too much at the party. You'll wake from a terrible drunken dream where you were dancing on a table, and something happens between you and Sloane.

Speak with Keema Dohrgun **(4)** again after the cutscene. She stands near the entrance. Speak to Velus **(5)**, who's standing with his back to the left wall. You can get his girlfriend talking to him again. Talk to Sloane last **(6)**.



Outcast Pirate: Sloane wants to keep things nice between us and the locals.
Night on the Town
Mingle with party guests
0/3
Talk

FIND REYES

After speaking with Sloane, leave the room and follow the navpoint to a set of easily opened doors **(7)** on the left. Talk to Reyes, who's rummaging through Sloane's stuff. He needs a quick distraction as a guard walks by, so you slug him in the gut—assuming you hit the prompted button fast enough. Watch the lower-right corner during the cutscene to be ready for the cue. The punch feels pretty good.

Reyes climbs a shelf and comes down with some vintage whiskey. Answer, "Sharing is caring," and the next scene involves the two of you slamming back the whiskey while sitting side by side on some crates as the sun sets. After some small talk, the mission ends.

MASS EFFECT ANDROMEDA

Secondary Ops
Old Skinner

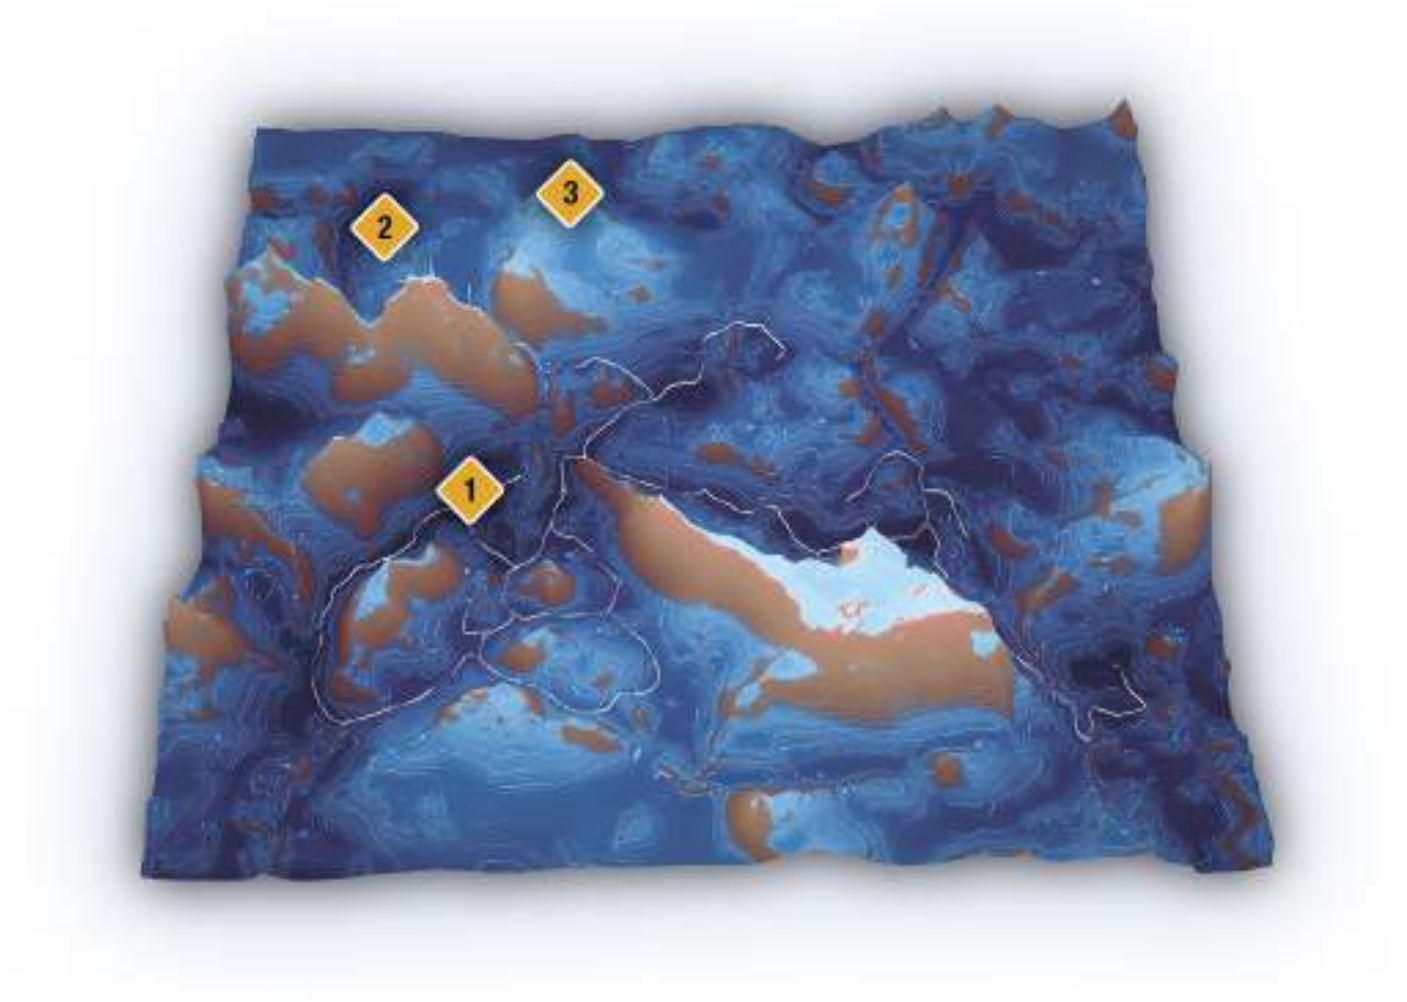
Mission Type: Heleus Assignment: Kadara

Prerequisite: Must have interrogated Vehn Terev in “Hunting the Archon”; complete “Settling Kadara”

Start Location: Kadara

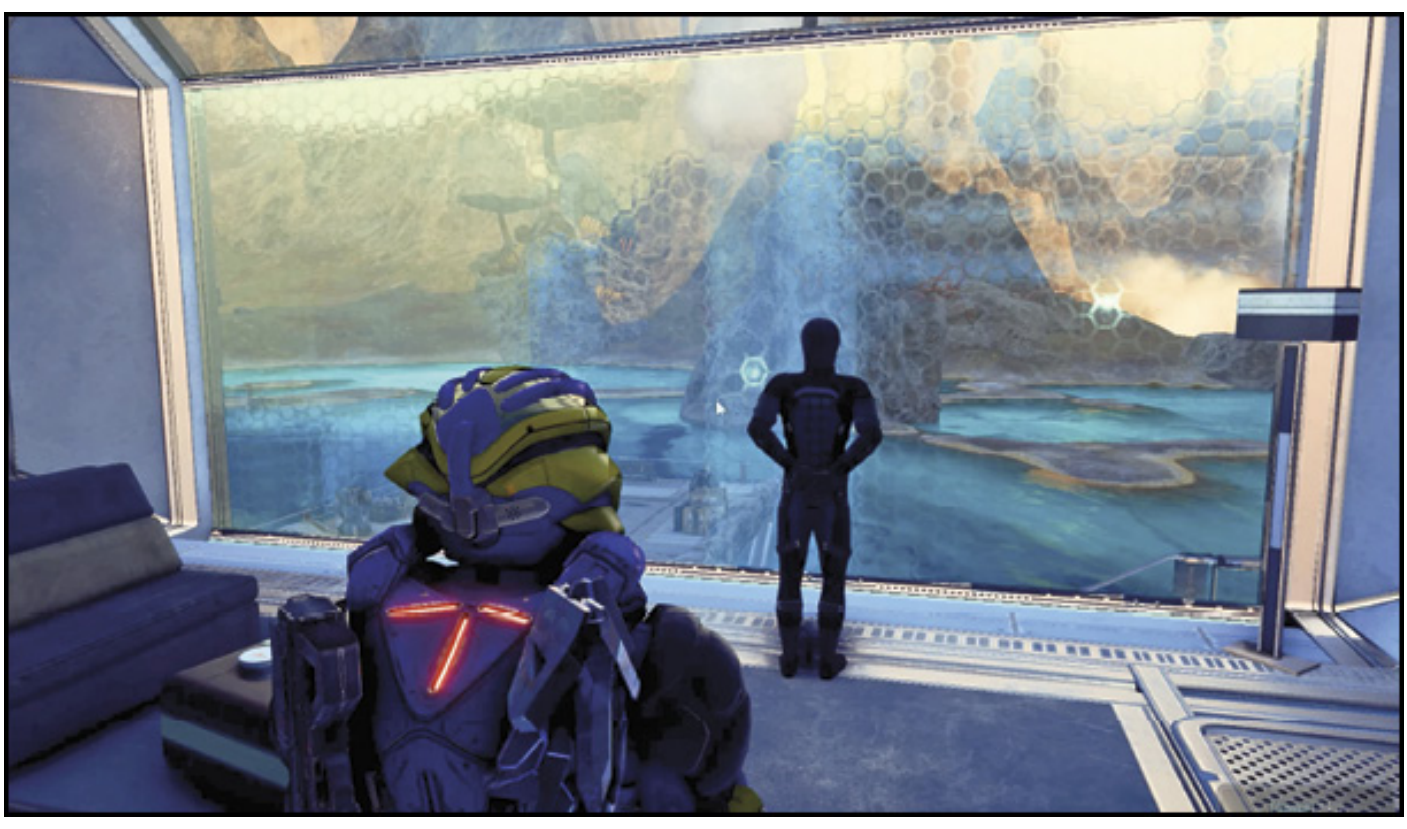
Unlocking: Talk to Christmas Tate at the Initiative outpost

TALK TO CHRISTMAS TATE



KADARA: INITIATIVE OUTPOST

Find Christmas **(1)** in the plush office in the top level of the outpost building on a hill. He’s standing near the window with the colorful view of the acid pools. Talk to him. A group of settlers has created a cult to worship a massive machine they call “Old Skinner.” Their leader, Bishop, left to pay tribute in Kurinth’s Valley and hasn’t returned. Tell him you’ll look into it. This is an Architect battle, so be prepared.



SEARCH FOR BISHOP

Head north up the mountain pathway to Kurinth’s Valley **(2)**. When you arrive at that destination, all you find is an Architect flying around in the skies to the north. Don’t follow yet. Exit the vehicle to find Bishop—dead. Read the **datapad** next to his body.

DEFEAT THE ARCHITECT

Drive north from Bishop’s body to find the Architect’s playground **(3)**. Refer to the Architect battle strategies in the Architect Encounters section of this guide. Defeat one and you can defeat them all. However, the enemies you face during the Remnant rounds vary from one Architect battle to the next.

In this Architect battle, you encounter Nullifiers and Breachers. The terrain is negotiable, there’s plenty of cover, and ammo and health crates are easily accessible. Unique to this battle is that the Architect stands in pools of acid while it fights. Not that you want to get right under the beast regardless, but it’s something to watch out for.

After the battle, activate the Architect at its head area and loot the **container** it leaves. You earn massive amounts of AVP and Kadara Viability +10%.

MASS EFFECT ANDROMEDA

Secondary Ops
Out of Gas

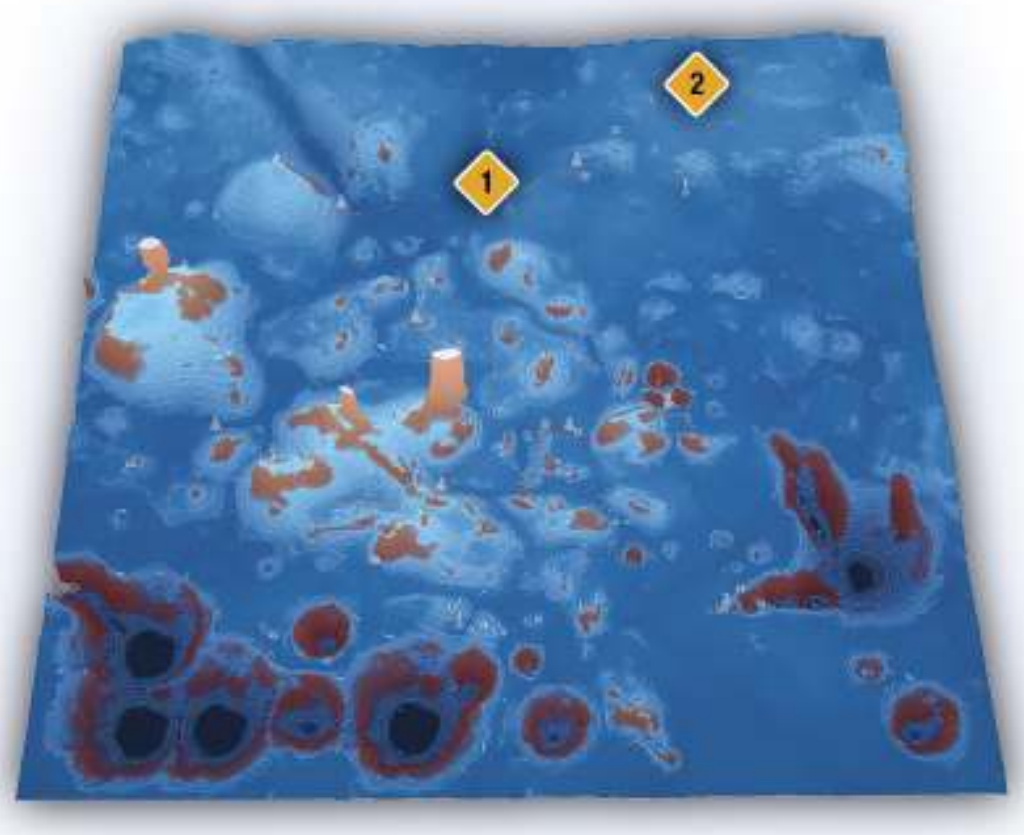
Mission Type: Heleus Assignment: Elaaden

Prerequisite: Unlock Elaaden

Start Location: Elaaden

Unlocking: Come within range of Hardy's camp in northern Elaaden

EXPLORE NORTHERN ELAADEN



NORTHERN ELAADEN

While exploring this area **(1)** in northern Elaaden, you start experiencing mechanical issues with the Nomad. It slows down and sparks profusely, and after three attempts to keep going, it finally shuts down and refuses to budge.

LOOK AROUND FOR SIGNS OF LIFE

When the Nomad stalls, you contact the Tempest to report the problem. Kallo's diagnostic reports that there's an issue with the thrusters, and he tells you to hang tight while they work on a solution.

Moments after you speak to Kallo, a man named Hardy calls you on comms and informs you that he has the part you're looking for. If you're wondering how he knows what part you need, well…you should be. He sends you a navpoint to his location **(2)**—not far from where you broke down, but a good distance on foot. Thank him for the help.

SPEAK WITH HARDY

Hoof it to Hardy's camp **(2)**. There, you discover he's a scavenger, and your suspicions make sense. During the following conversation, Hardy blatantly admits to cheating other suckers.

KILL HARDY

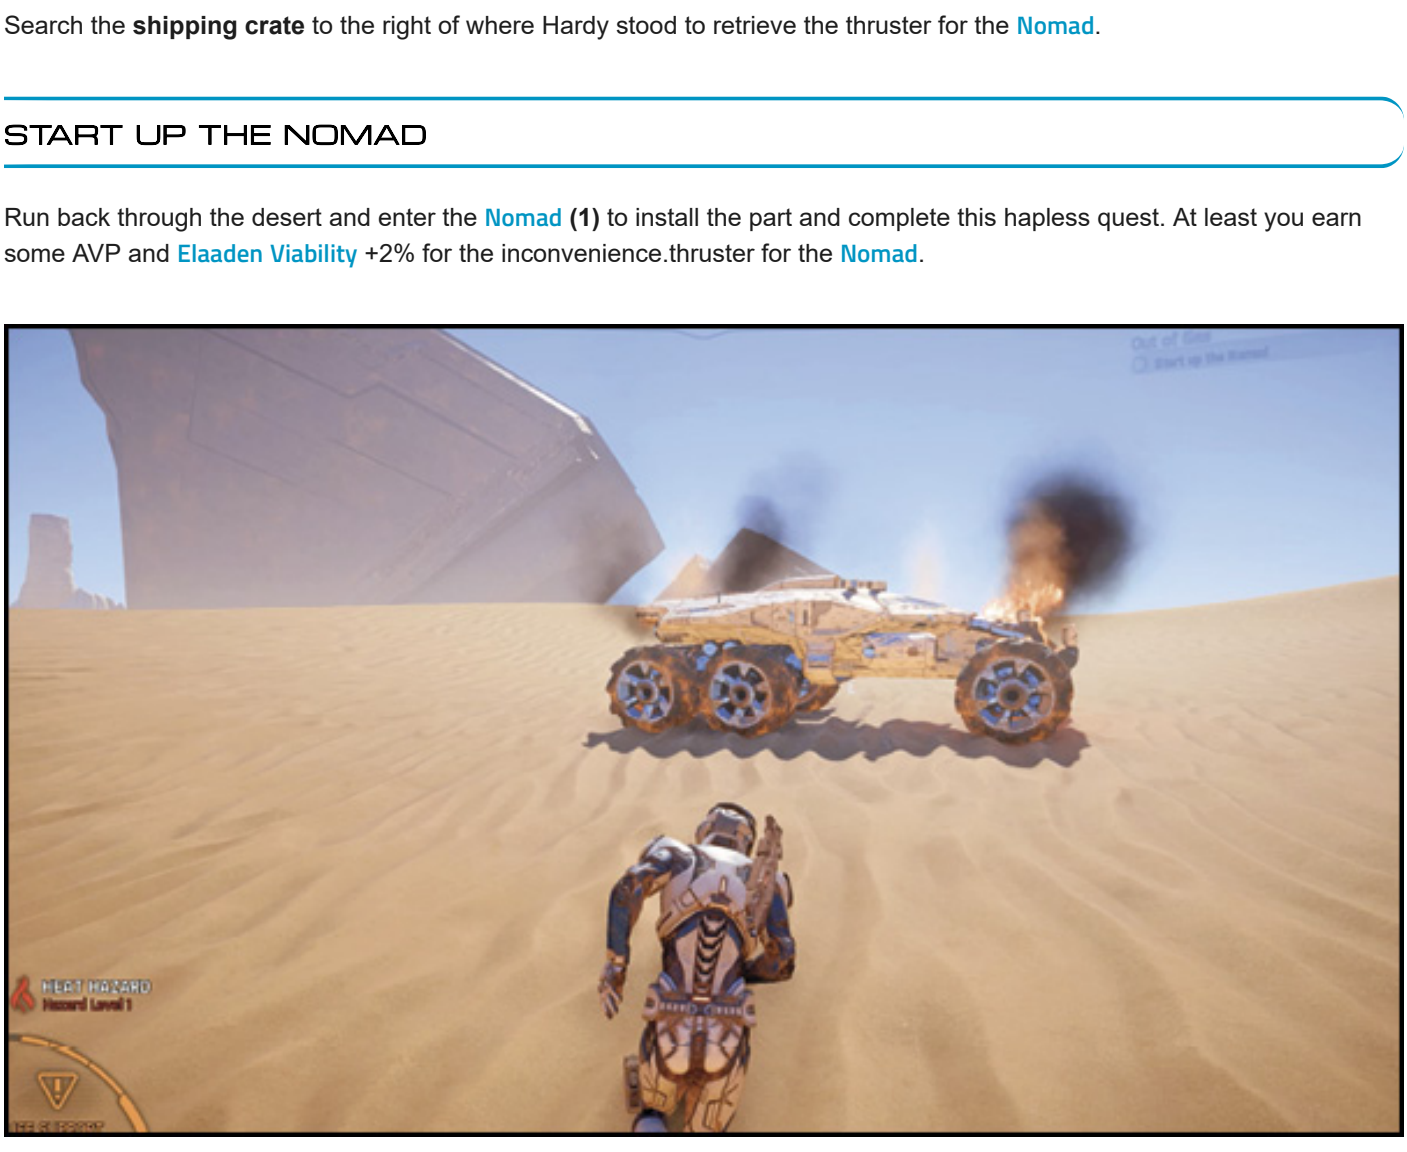
There's really no reason to negotiate with this scavenger. Choose answers such as "This is all too convenient" and "You're the reason we're stuck?" When he asks for money to fix the problem he caused, select "I'm just going to kill you." As soon as the conversation ends, draw and eliminate Hardy.

GET THE PART

Search the **shipping crate** to the right of where Hardy stood to retrieve the thruster for the Nomad.

START UP THE NOMAD

Run back through the desert and enter the Nomad **(1)** to install the part and complete this hapless quest. At least you earn some AVP and Elaaden Viability +2% for the inconvenience.thruster for the Nomad.



MASS EFFECT ANDROMEDA

Secondary Ops

Out of the Frying Pan

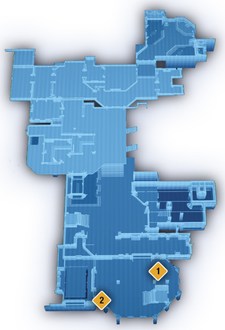
Mission Type: Heleus Assignment: Kadara

Prerequisite: Must have interrogated Vehn Terev in "Hunting the Archon"

Start Location: Karada Market

Unlocking: Speak to Grayson Wessler at the Kadara docks

SPEAK TO THE WARDEN



KADARA DOCKS

At the docks of Kadara port, find Grayson Wessler (**1**) between the stairs and the doors to the market. He says Kaetus tasked him with collecting protection fees. He's dealt with so many people that he accidentally banished someone who had paid their fee. He can't risk Kaetus finding out and asks you to help. He says to look for a lady named Remi Tamayo; she would have gone to the slums for processing with the warden. From there, he has no idea where she might have ended up.

Go to the transit console (**2**) at the docks to travel to the slums.

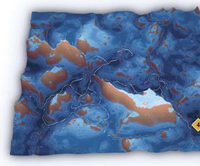
SPEAK TO THE WARDEN

KADARA SLUMS

Once down in the slums, follow the navpoint straight ahead to the guard booth (**3**) that keeps the riffraff of Kadara out of the Kadara Slums.

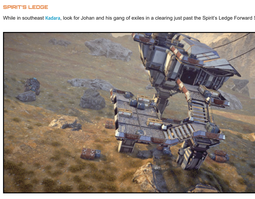
Inside the guard booth, talk to the warden behind the desk. He explains that Kadara is where the exiles get exiled. He warns you about going out there, as the environment alone might kill you before the exiles do. Ask him about Remi Tamayo before you leave. He says he saw her talking with Johan and his crew and sends you their navpoint.

TRAVEL TO THE NAVPOINT



SPIRIT'S LEDGE

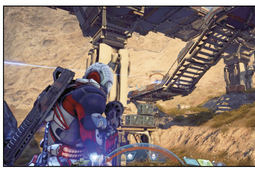
While in southeast Kadara, look for Johan and his gang of exiles in a clearing just past the Spirit's Ledge Forward Station.



DEFEAT JOHAN AND HIS GANG OF EXILES

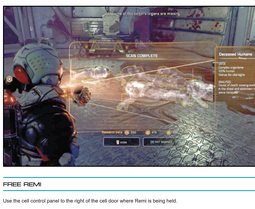
SPIRIT'S LEDGE

Exit the Nomad at the multi-story platform and outpost and take on the Raiders. Johan shows himself almost immediately. Take him out along with his Sharpshooters and Pariahs. Set out to find Remi after eliminating all the enemies.



FIND REMI

Head to the top of the large platform and enter the building. Inside, you find a gruesome scene—human corpses all over the floor and blood everywhere. When you scan the bodies, SAM comments that some of the victims' organs are missing. On the other side of the room is the jail cell where Remi can be found.



FREE REMI

Use the cell control panel to the right of the cell door where Remi is being held.

SPEAK TO REMI

Enter the cell and speak to Remi Tamayo where she sits on the floor. She reveals that the gang was going to eat her. You explain that the Outcast who wrongly kicked her out of Kadara Port is the one who sent you to save her. You earn a small amount of AVP and Karara Viability +2% for completing the quest.

Secondary Ops

Overgrown

Mission Type: Heleus Assignment: Havarl

Prerequisite: Complete "A Dying Planet"

Start Location: Havarl

Unlocking: Talk to Dr. Tassana Rilar

TALK TO DR. TASSANA RILAR

HAVARL, PELAAV RESEARCH STATION

Speak to Dr. Tassana Rilar **(1)**, a scientist studying Havarl biological specimens on the platform near Angaran Headquarters. Initiative scientists have asked you to analyze mutated wildlife to determine what's causing the accelerated growth rate of life on Havarl.

CROSS-REFERENCE GENETIC MARKERS WITH KNOWN CREATURE DENS

The first objective is a hop, skip, and a jump away from the scientists. Enter the Pelaav science facility (first floor) and access the Genetic Archive Database console. Select the three research projects: **Mutated Challyrion**, **Mutated Rylkor**, and **Mutated Eiroch**. Navpoints for each specimen are added to your map.

COLLECT DATA FROM A CHALLYRION

Check your map. The navpoint due north from headquarters is where you find the Challyrion **(2)**. Follow the navpoint to discover a cave. As soon as you spot the opening, five mutated Challyrions come charging out. Scan them while they're alive. Make sure to explore the cave and raid the **container**.

COLLECT DATA FROM A RYLKOR

Head east to the next navpoint to find a mutated Rylkor **(3)**. A simple strategy is to drop down to the top of its cave from the forward station platform and then quickly scan the Rylkor as it exits. Scan in the area to find debris from the **Ark Natanus** while you're here.

COLLECT DATA FROM AN EIROCH

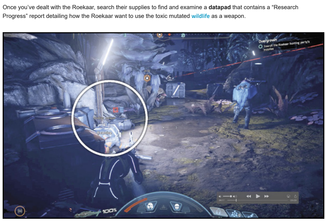
Head to the ancient courtyard and south from the forward station to find a cave **(4)** where you can discover and scan the mutated Eiroch. When you reach the cave, you may find it empty and instead encounter a band of Roekaar. Be prepared to fight; your next objective concerns these enemy angara. The Eiroch often shows up during the battle; get a scan, then search through the camp supplies.

COMPARATIVELY ALIEN

You are killing two Eirochs with one stone. The scans you obtain for the Havarl science team also count toward the wildlife you need to scan for "Task: Comparatively Alien." This hunt should allow you to get the last of the scans you need for that task.

SEARCH THE ROEKAAR HUNTING PARTY'S SUPPLIES

Once you've dealt with the Roekaar, search their supplies to find and examine a **datapad** that contains a "Research Progress" report detailing how the Roekaar want to use the toxic mutated wildlife as a weapon.



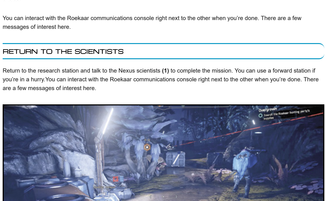
INVESTIGATE THE ROEKAAR CAMP

Go to the north end of the ancient courtyard, following the navpoint **(5)** to a wall of ancient Remnant pillars. Jump to the top of these and defeat the Roekaar and Adhi in the camp. Continue following the navpoint to a console that says "Roekaar Genetic Research Log" and activate it. SAM deduces that the Roekaar took special interest in mutations that would poison a natural environment. You can decide to destroy the files or copy and delete them. No adverse consequences result from either choice.

You can interact with the Roekaar communications console right next to the other when you're done. There are a few messages of interest here.

RETURN TO THE SCIENTISTS

Return to the research station and talk to the Nexus scientists **(1)** to complete the mission. You can use a forward station if you're in a hurry.You can interact with the Roekaar communications console right next to the other when you're done. There are a few messages of interest here.



Secondary Ops

Parlay with the Krogan

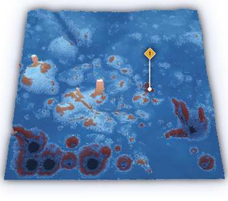
Mission Type: Heleus Assignment: Elaaden

Prerequisite: Complete "Conflict in the Colony"

Start Location: Elaaden: The Paradise

Unlocking: Complete your conversation with Jorgal Strux in "Conflict in the Colony"

GO TO THE KROGAN COLONY



ELAADEN: NEW TUCHANKA

Strux insists that Morda is planning a move against the Nexus. Visit the krogan colony **(1)** in New Tuchanka to check it out, and look for Ravanor Brenk while you're there. Pull up to the south side of the colony and defeat the nearby Roekaar Raiders at a communications camp near the colony. Head toward the entrance to the colony and drop a forward station at their front door.

Speak to the krogan lookout at the guarded entrance. Drack helps you make it past security. If you don't have Drack in your party, he says he'll meet you there and help you get in.

GO TO THE THRONE ROOM

NEW TUCHANKA KROGAN 2F

NEW TUCHANKA KROGAN 1F

There are multiple side quests to pick up here; take some time to fully explore the many layers that make up the desert colony. Afterward, head to the throne room. To skip exploring and go straight to the throne room, follow this route: From the entrance **(1)**, head into the facility through the southeast entryway **(2)**. Follow the stairwell **(3)** down a few levels until you reach the lowest-level landing **(4)**.

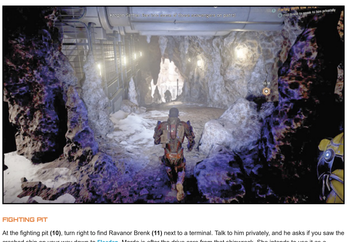
From the lower-level stairwell landing **(4)**, turn right into the cave **(5)** and continue down more stairs that lead into the depths of the caverns. At the bottom of the stairs, take the first tunnel on the left **(6)** and cross over a short metal interior bridge. The next large cavern you enter is the throne room.

SPEAK TO RAVANOR BRENK

When you enter the throne room, turn to your immediate right to find Ravanor Brenk **(7)** standing guard below the throne of Morda. Speak to him. Morda, who is well within earshot, quickly cuts off your conversation when she hears the name "Strux" dropped to get Brenk's attention. Now the unintended party, the leader of the krogan colony, has your ear. Brenk quickly, under his breath, asks you to meet him near the fighting pit as Morda comes down off her perch to show everyone who's boss around here. The conversation is unfriendly and uncomfortable. She's not a big fan of the Nexus. She basically kicks you out, coming just shy of personally showing you to the door.

FIND BRENK TO SPEAK TO HIM PRIVATELY

If you look for Brenk's navpoint while you're in the throne room, it appears as if he's still in the room with you; however, he's a couple of levels below you. The quickest way there from the throne is to use the descending tunnel **(8)** behind the throne platform (rock). Head north from the throne and turn right near the guarded metal door. Follow the tunnel down to the T-intersection, where you see a metal door on the left and the right. Turn right and look up. You should be traveling under the short metal bridge **(9)** you crossed to get into the throne room. Continue moving down through the tunnel and head toward the sunlight. The light is coming from the fighting pit area.



FIGHTING PIT

At the fighting pit **(10)**, turn right to find Ravanor Brenk **(11)** next to a terminal. Talk to him privately, and he asks if you saw the crashed ship on your way down to Elaaden. Morda is after the drive core from that shipwreck. She intends to use it as a bomb. You thank him for the info, and the mission ends. You acquire a good amount of AVP and Elaaden Viability +2%. Just around the corner from Brenk is an **Adapted Initiative Core** Tech that can be scanned for Research Data.

Mission 5: Mysterious Remnant Signal

Mission Type: Side and Relationship

Prerequisite: Complete [Meeting Reyes]

Next Location: [Havarl]

Unlocking: Complete [Meeting Reyes]

OPTIONAL: TO: PATHFINDER

[Remnant Location Data]

Complete the [Meeting Reyes] mission and you can access the [Remnant Location Data] terminal in the [Nexus] aft observation deck. Interact with the terminal to receive the [Remnant Location Data] mission.

GO TO POINT B ON THE GALAXY ASTRO

Travel to the second star in the [Tann] system, then to the fourth star in the [Lodge] system to receive [Lodge Data].

PURSUE THE SOURCE OF THE 'REMNANT' SIGNAL

TIP

Use the [Tempest] tactical menu for additional target options for Pax, or [Undertaking], scans around the system. Each scan has a cooldown period, so you can't use them repeatedly.

FIND A WAY THROUGH THE 'REMNANT' DISTRESS!

Travel to the [Kadara] system and scan the [Kadara Port] with the [Tempest] scanner. Interact with the [Kadara Port] [Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission.

EXPLORE THE CAVERN ENTRY

Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission.

Scanning will reveal the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission.

FOLLOW AND EXPLORE THE SLIPSTREAM

Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission.

SCANNING ALL ANOMALIES IN THE SLIPSTREAM

Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission.

LOG THE SLIPSTREAM'S CONNECTION TO [MIRA TAU GATEWAY]

Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission.

CONTINUE EXPLORATION THROUGH THE VOID

Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission.

MAKE CONTACT TO OBTAIN THE SECRET

Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission.

FIND A WAY TO DEFEND THE REMNANT ATTACK!

Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission.

ANALYZE THE REMNANT VEHICLE

Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission.

LOCATE THE REMNANT SHIP AND LOCATE A TRACKING

Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission.

SCAN THE MILLENNIUM BLOCKING THE GUY-TYPELEY

Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission.

LOG THE REMNANT SHIP'S CONNECTION TO [KADARA: AN ALIEN OBSERVER]

Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission.

PURSUE THE REMNANT TURRET

Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission.

SCAN THE MILLENNIUM

Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission.

CONTINUE TOWARDS THE REMNANT SIGNAL

Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission.

PURSUE [VA-VAA]

Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission.

DEPLOY REMNANT PROBE AND TRACK

Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission.

TRACK THE REMNANT SIGNAL

Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission. Travel to the [Kadara Port] and interact with the [Kadara Port Distress Beacon] to receive the [Kadara Port Distress Beacon] mission.

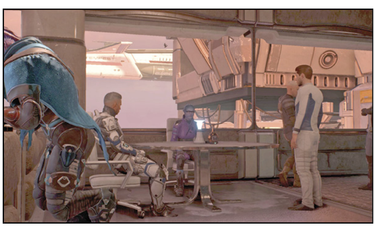
Hey, I've discovered someone who can help us find Poc. He might need a little convincing. When we go to Kadara Port, meet me in the bar, please?
Let's go get my bot back!
Peebee

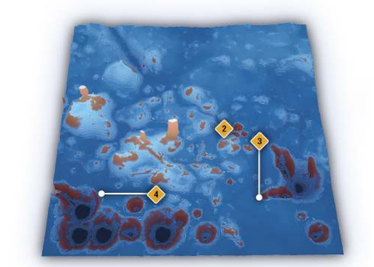
MEET PEEBEE IN THE KADARA BAR

KADARA PORT

Find Peebee **(1)** sitting at a table in the very back corner of Kralla's Song. She introduces you to Samrick, some guy who's sympathetic about Poc being stolen. He used to work for Kalinda and knows where her crews gather. You press and get a navpoint to where Poc is located on Elaaden.



GO TO THE LOCATION ON ELAADEN



ELAADEN

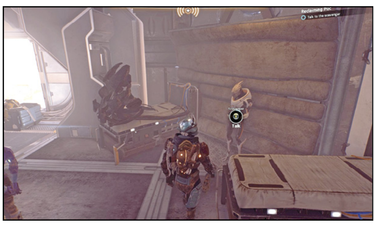
You land on Elaaden either at the Paradise **(2)** or the Elaaden outpost **(3)**, if you've built one. The navpoint directs you to the large sinkhole in the southwest **(4)**.

SEARCH THE SITE

You find a small barracks with **the floaty things** above it. Enter to find Poc on a bed, unresponsive. Talk to the scavenger inside.

TALK TO THE SCAVENGER

The scavenger claims he found Poc in that condition and sells him to you. Buy the broken Observer. You can also ask him about the asari Kalinda. He denies knowing her, but it's obvious that he does. He has no more information. Leave with Poc.



SPEAK TO PEEBEE ON THE TEMPEST

Getting Poc back allows Peebee to finish her Remnant scanner.

Peebee: The Museum Trip

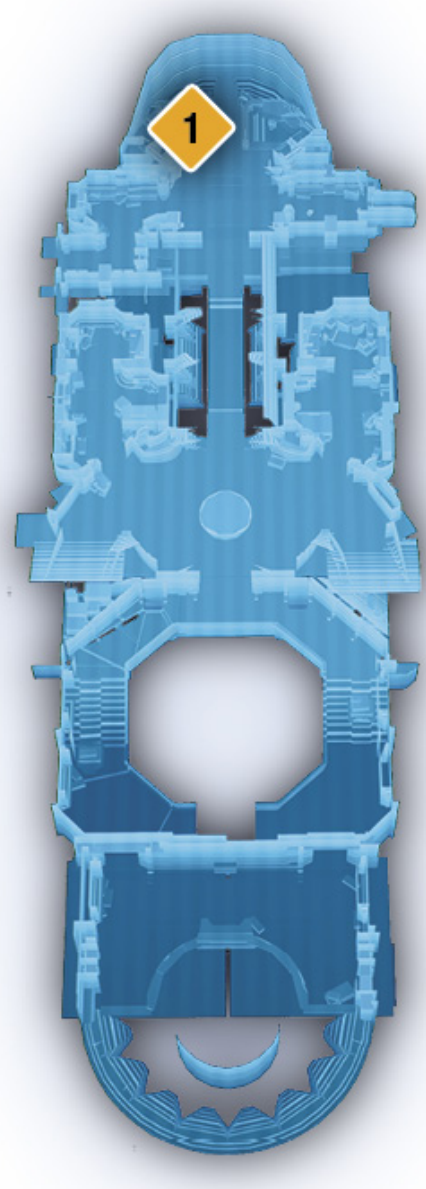
Mission Type: Allies and Relationships

Prerequisite: Peebee must have revealed Poc at her Nexus apartment during "Peebee's Secret Project," with all other conversations completed

Start Location: Tempest

Unlocking: Read email from Peebee

READ EMAIL FROM PEEBEE

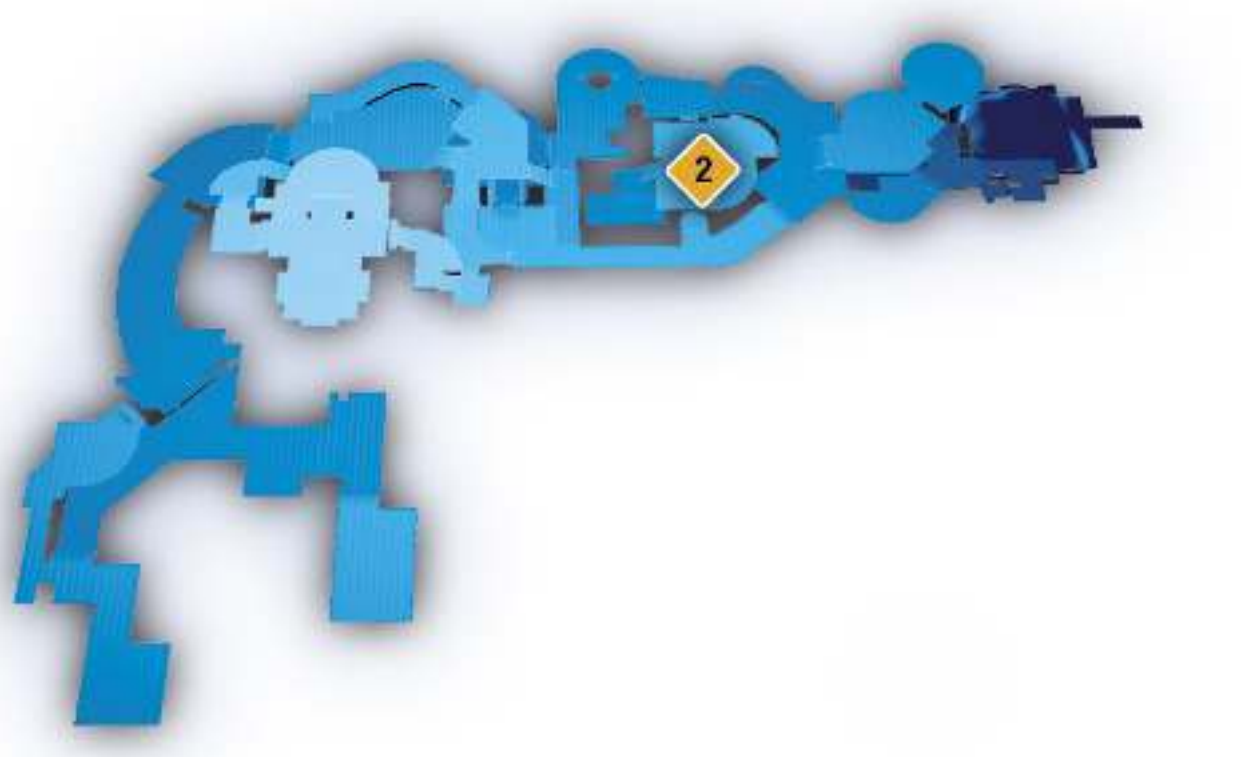


TEMPEST

Read your email from Peebee titled "Ay-Ay-Aya!" Peebee has asked you to meet her at the museum on Aya. Travel to Aya.

Ay—ay— Aya!
Message from Voeld: Intel on Kett
Problem on Voeld
The brothers McCoy
You were right...
Havarl: Science Team Deployment
Ay—ay— Aya!
To: Ryder
From: Peebee
Okay, so the angara have a place they call the "Repository of History" — I know, sounds super dull. They need someone with more of a flair for naming things, huh?
Next time you're running around Aya, come see me there, will ya?
Peebee

TALK WITH PEEBEE AT THE MUSEUM ON AYA



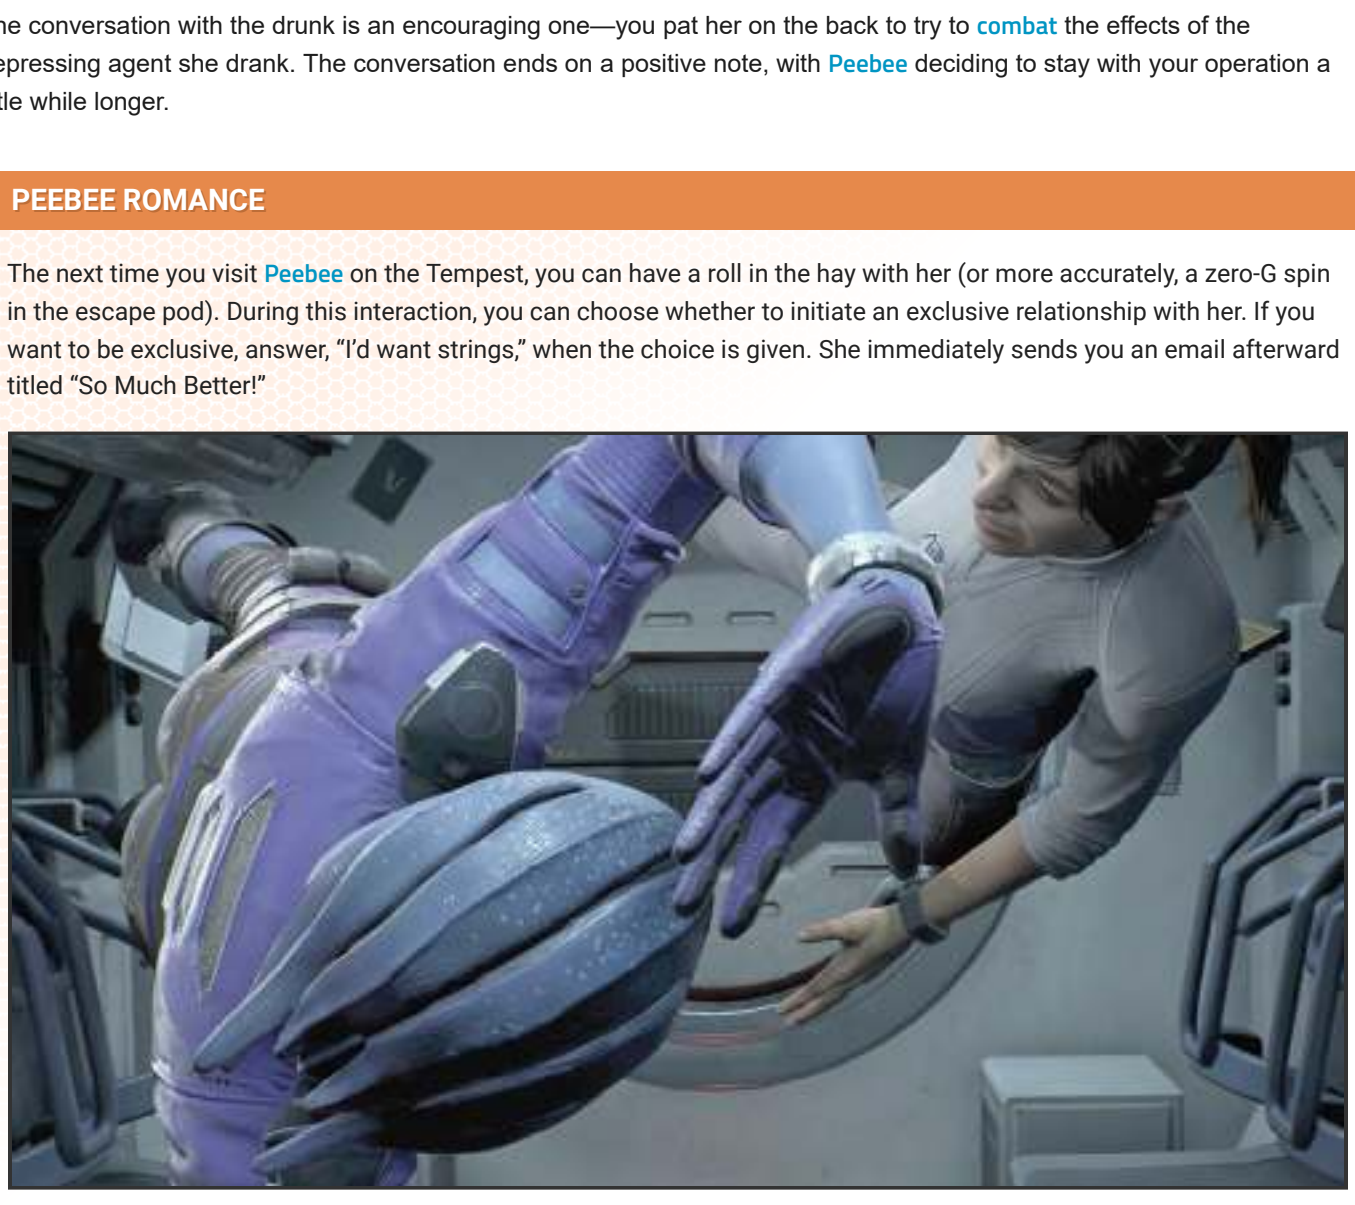
AYA: REPOSITORY OF HISTORY

Enter the museum **(2)** on Aya and find Peebee in the southwest corner, staggering and swaying. She's drunk. Now you know why it's called "The Museum Trip."

The conversation with the drunk is an encouraging one—you pat her on the back to try to combat the effects of the depressing agent she drank. The conversation ends on a positive note, with Peebee deciding to stay with your operation a little while longer.

PEEBEE ROMANCE

The next time you visit Peebee on the Tempest, you can have a roll in the hay with her (or more accurately, a zero-G spin in the escape pod). During this interaction, you can choose whether to initiate an exclusive relationship with her. If you want to be exclusive, answer, "I'd want strings," when the choice is given. She immediately sends you an email afterward titled "So Much Better!"



MASS EFFECT ANDROMEDA

Secondary Ops
Peebee's Remnant Scanner

Mission Type: Meet-and-Relationships

Prerequisite: Advance **Peebee's** Secret Project' up to visiting her Nexus apartment to see Pol.

Start Location: Tempest

Unlocking: Read email from **Peebee**

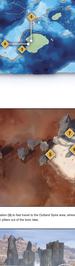
PEEBEE LOYALTY MISSION ORDER

Since our guide lists these missions in alphabetical order, it's important to understand the chronological order as well. "Peebee's Secret Project" is the first quest you do for her concerning **Remnant** ruin. This involves acquiring **Nam-ish** from Voeld, then speaking to her in the escape pod. Next, visit her Nexus apartment to be introduced to Pol. The **Remnant** ruins on Eos are next, followed by the **Remnant** ruins on Havarl. Then you must recover Pol's missing Tempest planes, taking you from Eos to Havarl to Kadara. Then you must reclaim Pol in "Reclaiming Pol." This leads to using the scanner to unlock her final Loyalty Mission, "A Mysterious **Remnant** Signal".

READ EMAIL FROM PEEBEE

TEMPEST

Read your email either from your room on the Tempest or from the small terminal (6) on the bridge. The email from **Peebee** is titled "New Project." It arrives after you visit her Nexus apartment to see Pol for the first time during "Peebee's Secret Project" (which goes on hold afterward).



SPEAK TO PEEBEE ON THE TEMPEST

Don't run off, head right into the escape pod (2) where **Peebee** hangs out and works on research projects. Walking in triggers an automatic conversation. She explains her **Remnant** scanner concept and tells you she needs three specific pieces of Rymn. Ask her about Nam-ish. Explain that Nelita was there the escape pod. Now you must find one **Remnant** ruin on Voeld—the perfect for scanner.

GO TO THE REMNANT RUINS ON EOS

EOS: OUTLAND SPIRE

Travel to Eos and use the forward station (2) to fast travel to the Outland Spire area, where you find a **Remnant** console (3) to interface with, which raises **Remnant** pillars out of the toxic lake.

Use the pillars and the cloaked bridges to get from the shore to the small island containing the **Remnant** ruins (5). Destroy the Observers and Breachers along the way.

RECOVER A RIEA-TECH PIECE ON EOS

Jump down off the last pillar to the island of **Remnant** ruins. Defeat the **Remnant** on the island and pick up the **Remnant** relic from beside the **Remnant** console on the platform. At that point, Drashla arrives and deploys a team of Rumeal Raiders with a Berserker (**B**). Defeat these guys as well as the remaining **Remnant** foes and Creepers. You earn a small amount of AVP (Archeological Value Points) for each **Remnant** you defeat. Once the area is clear, head back to the console you used to activate the horizontal Gravity Well that transports you back to land (or use a forward station via the menu map).

GO TO THE REMNANT RUINS ON HAVARL

HAVARL

From the landing zone (**1**), head to the Central Wilds forward station (**2**) and then dust north to the **Remnant** ruins (**10**). You run into wildlife on the way there and probably when you reach the ruins. All the ruins, there are **Remnant** Observers and Ascendants to deal with. Enter the vault.

RECOVER A RIEA-TECH PIECE ON HAVARL

HAVARL REMNANT VAULT

Take the Gravity Well (R5) down to the lower vault and enter the next chamber (R6) with the large bona fide window. Head through the tunnel on the left, and then take a right (R7) to the next chamber to follow the tunnels that lead to the target chamber (R8).

Look behind the door (opposite the bona fide window) to find a scanner standing in a container room (**15**). You meet Rylie inside. Her team tried to clear out the vault but couldn't defeat the nasty **Remnant** constructs. A Kregan once fled nearby, she says his name is Kurak or Karakt, or something. **Peebee's** second **Remnant** piece is in the container behind Rylie. Take it. Then head to the coordinates for the final piece at Aladea, plus a little BAT and UTV Hazard Visibility. Defeat the bots and get back to the Tempest.

GO TO THE REMNANT RUINS ON KADARA

KADARA

While on Aladea, head to the **Remnant** relic (**16**) near the crash in Haverfall. You notice all the cluster as you approach. Then the enemies blow up things even more.

DEFEAT THE OUTLAWS

Defeat the Outlaw Raiders then ascend the monolith.

SEARCH THE KADARA SITE FOR A RIEA-TECH PIECE

Look for the **Remnant** relic in the small **container** near the dock of Kregan **Kenzeers**. Instead, you find a **datapad** containing a message from Kenzeer. He says he has what you're looking for and that he'll meet you and your squad at Kadara Port. He wants to talk about a truce. If you're leaving now, ask the Aladea Scene Forward Station (R9) to get into the dome and then take Aladea Port via lift.

MEET PEEBEE TO ACQUIRE THE RIEA-TECH PIECE FROM THE OUTLAW KRODAH

MASS EFFECT ANDROMEDA

Secondary Ops
Peebee's Secret Project

Mission Type: Allies and Relationships

Prerequisite: Complete the vault challenge on Eos

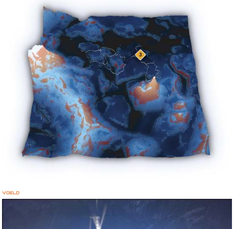
Start Location: Tempest

Unlocking: Talk to Peebee after completing the Eos vault

SPEAK TO PEEBEE IN THE TEMPEST ESCAPE POD

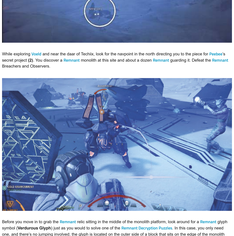
TEMPEST

When you enter the escape pod (**1**) on the bridge, Peebee tells you not to peek, she's trying to keep her project under wraps until she's ready to reveal it. She thanks you for retrieving the critical piece of remtech she needed. You have an opportunity during this conversation to hit on her with a passionate response. She says next time you're on the Nexus, she'll reveal her secret project.



CHECK YOUR EMAIL FROM PEEBEE

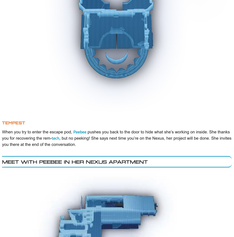
After the escape pod, read your email from Peebee titled "Rem-Tech," in which she asks if you can help her get one piece of rem-tech from Voeld. The navpoint on Voeld is given.



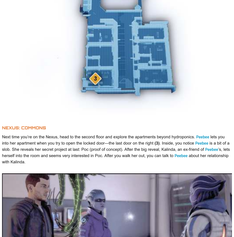
Rem-Tech
To: Ryder
From: Peebee
Thanks to that Remnant storage tip from the Archon, all I need is one piece of rem-tech from Voeld to complete my project. My mentor would really need a hook.
If we have a chance, we can go for it!!
Peebee

RECOVER THE REM-TECH FROM THE REMNANT SITE

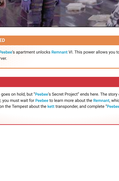
VOELD



While exploring Voeld and near the dase of Techta, look for the navpoint in the north directing you to the piece for Peebee's second project (**2**). You discover a Remnant monolith at this site and about a dozen Remnant guarding it. Defeat the Remnant Breachers and Observers.



Before you move in to grab the Remnant relic sitting in the middle of the monolith platform, look around for a Remnant glyph symbol (**Vertumnus Glyph**) just as you would to solve one of the Remnant Decryption Puzzles. In this case, you only need one, and there's no jumping involved: the glyph is located on the outer side of a block that sits on the edge of the monolith base platform. Solve the puzzle to obtain Peebee's rem-tech.



The order of glyphs used to solve the puzzle.

SPEAK TO PEEBEE IN THE TEMPEST ESCAPE POD

TEMPEST

When you try to enter the escape pod, Peebee pushes you back to the door to hide what she's working on inside. She thanks you for recovering the rem-tech, but no peeking! She says next time you're on the Nexus, her project will be done. She invites you there at the end of the conversation.

MEET WITH PEEBEE IN HER NEXUS APARTMENT

NEXUS: COMMONS

Next time you're on the Nexus, head to the second floor and explore the apartments beyond hydroponics. Peebee tells you into her apartment when you try to open the locked door—the last door on the right (**1**). Inside, you notice Peebee is a bit of a slob. She reveals her secret project at last: Pivi (proof of concept). After the big reveal, Kalinda, an ex-friend of Peebee's, lets herself into the room and seems very interested in Pivi. After you walk her out, you can talk to Peebee about her relationship with Kalinda.

REMNANT VI UNLOCKED

Your introduction to Pivi in Peebee's apartment unlocks Remnant VI. This power allows you to call upon "Zap," a controllable Remnant Observer.

MISSION ON HOLD

The game says the mission goes on hold, but "Peebee's Secret Project" ends here. The story continues in "Peebee's Remnant Scanner." However, you must wait for Peebee to learn more about the Remnant, which happens in Mission 3. You must also speak to Gil on the Tempest about the lost transponder, and complete "Peebee: The Museum Trilgi" on Aya.

MASS EFFECT ANDROMEDA

Secondary Ops

Precious Cargo

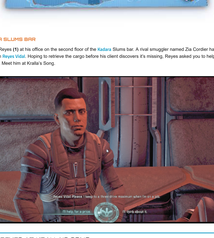
Mission Type: Heleus Assignment: Kadara

Prerequisite: Complete Heleus Assignment, Kadara, "A People Divided"

Start Location: Kadara Slums

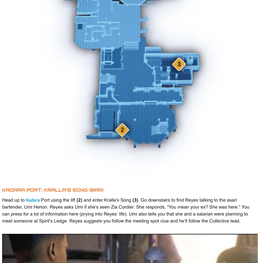
Unlocking: Talk to Reyes Vidal

MEET REYES AT THE KADARA SLUMS

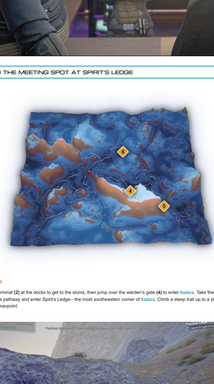


KADARA SLUMS BBR

Speak to Reyes **(1)** at his office on the second floor of the Kadara Slums bar. A rival smuggler named Zia Cordier has stolen cargo from Reyes Vidal. Hoping to retrieve the cargo before his client discovers it's missing, Reyes asked you to help him locate Zia. Meet him at Kralla's Song.



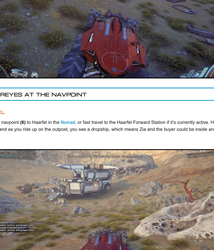
MEET REYES AT KRALLA'S SONG



KADARA PORT: KRALLA'S SONG (BRR)

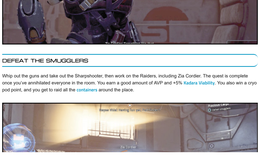
Head up to Kadara Port using the lift **(2)** and enter Kralla's Song **(3)**. Go downstairs to find Reyes talking to the exart bartender, Umi Heron. Reyes asks Umi if she's seen Zia Cordier. She responds, "You mean your ex? She was here." You can press for a bit of information here (prying into Reyes' life). Umi also tells you that she and a salarian were planning to meet someone at Spirit's Ledge. Reyes suggests you follow the meeting spot clue and he'll follow the Collective lead.

GO TO THE MEETING SPOT AT SPIRIT'S LEDGE



KADARA

Use the terminal **(2)** at the docks to get to the slums, then jump over the warden's gate **(4)** to enter Kadara. Take the Nomad east on the pathway and enter Spirit's Ledge—the most southeastern corner of Kadara. Climb a steep trail up to a plateau to reach the navpoint.



SEARCH FOR SIGNS OF ZIA'S MEETING

Jump out of the Nomad and defeat the wildlife that may attack in this area. Scan the ground around the litter to find an underground wire. This leads you to a Rydlot and a console (a laptop on the ground). Activate the console.

EXAMINE DEAD DROP

Activating the laptop doesn't seem to make anything happen. Follow the navpoint back the way you came, to what looks like a blocked cave entrance. Examine the **datapad** in this cave hole. You tell Reyes over comms that you have a navpoint. He says it must be where Zia's holding the cargo. He also informs you that the salarian is a fence. No direct connection to the Collective.

MEET REYES AT THE NAVPOINT

HAARREL

Follow the navpoint **(5)** to Haarfel in the Nomad, or fast travel to the Haarfel Forward Station if it's currently active. Head to the navpoint, and as you ride up on the outpost, you see a dropship, which means Zia and the buyer could be inside and ready to bolt.

Find Reyes inside the building under the stairs on the first floor. He says the place is empty. You can reply, "We were too late" or "This is a setup."

Zia Cordier—Reyes' ex—walks in. She knew you would figure it out eventually. She sics her guys on the two of you.

DEFEAT THE SMUGGLERS

Whip out the guns and take out the Sharpshooter, then work on the Raiders, including Zia Cordier. The quest is complete once you've annihilated everyone in the room. You earn a good amount of AVP and +5% Kadara Viability. You also win a cryo pod paint, and you get to raid all the containers around the place.

MASS EFFECT ANDROMEDA

Secondary Ops

Recovering the Past

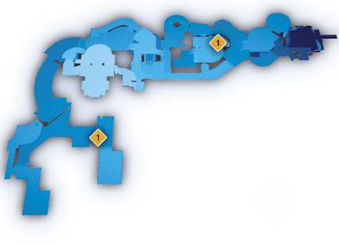
Mission Type: Heleus Assignment: Aya

Prerequisite: Mission 2, after the conversation with Evfira

Start Location: Aya

Unlocking: Talk to Avela Kjar at the docks or in the museum when Aya is open

SPEAK WITH AVELA KJAR



AYA: DOCKS OR REPOSITORY OF HISTORY

ROMANCE HER

You can have a romance with Avela Kjar.

FORGOTTEN HISTORY

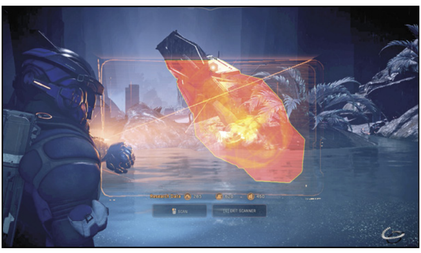
Completing this quest unlocks the next collection quest for Avela called "Forgotten History."

Speak to Avela Kjar **(1)**, who's at the docking area if you aren't allowed into the city, or at the Repository of History once you can roam free. She's the curator for the Repository of History. They study relics and try to piece together what they lost in the Scourge. She tells you about the many angaran ships that went down in Havarl. A scientist sent her a navpoint for a crash site. She's concerned about the Remnant threat, but heard you can deal with them. Agree to help her.

LOCATE THE ANCIENT CRASH SITE ON HAVARL

HAVARL: CHASM OF THE BUILDERS

When you make it to Havarl, find the ancient crash site in the middle of the map **(2)**. The ancient angaran starship wreck is in the water under the bridge (which is not operational until you advance the story a bit more). Be prepared to battle Remnant Observers and Assemblers in this area. Use the stair-like ledges on the west side of the Chasm of the Builders to reach the water's edge. Scan the wreckage and loot the containers around it.



INVESTIGATE THE CRASH SITE

Approach the starship and interact with the cockpit from the east side of the wreckage. You pick up an **ancient angaran pilot's** helmet. This relic needs to be returned to Avela.

RETURN THE RELIC TO AVELA ON AYA

When you're back on Aya, return to Avela in the museum **(1)**. Hand over the angaran pilot's helmet you found on Havarl. This helmet will go on display at the museum. Speak to her again to begin the "Forgotten History" quest.

MASS EFFECT ANDROMEDA

Secondary Ops
Reformation

Mission Type: Heleus Assignment: Voeld

Prerequisite: Access to Voeld; Mission 2, complete "Return to the Tempest" after Aya; complete "Meet Evfra at the Resistance HQ" during "A Trail of Hope"

Start Location: Voeld

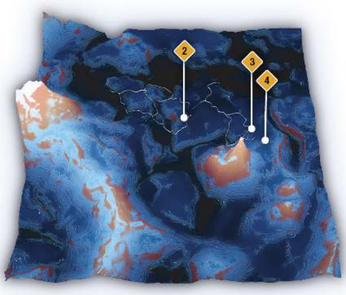
Unlocking: Speak to the angaran priestess

SPEAK TO THE ANGARAN PRIESTESS

VOELD: ANGARAN RESISTANCE BASE

With the prerequisites met, Roshwar Linn **(1)**, the angaran priestess in the angaran Resistance base med room, asks for your help. Speak to her, and she tells you about the Gloryseekers who do not fear death and test themselves against kett in what some might call suicide attacks. One young Gloryseeker named Tej plans to attack a kett station. It's unlikely he'll succeed without help.

SPEAK TO A GLORYSEEKER



VOELD

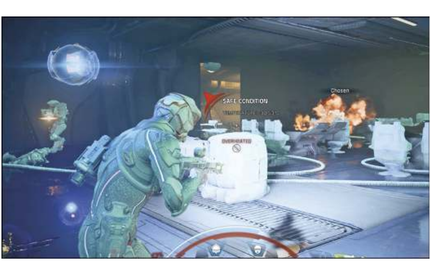
Access your map and switch to the first level to view the exterior map. Travel to the forward station at Techiix **(2)**, then follow the navpoint to a small building deep in the daar, beyond the merchant counter. Inside is a group of three angara.

Speak to Shoraad, and he asks how many kett you've killed. His friend Venish becomes your immediate friend when you can't answer because there have been too many to count. Koff asks what you need from them. You can say you stumbled across them, or mention Gloryseekers. Either way, they begin talking about reincarnated angaran fighters and how Tej is their hope now.

HELP TEJ FIGHT THE KETT

Pull up the map and find the next navpoint east of the kett mountain base. Use the forward station **(3)** to reach the kett base **(4)**.

Open the door and throw explosives. The small outpost is full of kett Chosen, Anointed, and Wraiths. Defeat them all and talk to Tej. He's starting to question the reality of reincarnation. Tell him to go back to Priestess Roshwar. He agrees that's probably a better move than going back to his Gloryseeker friends. This completes the mission. You earn a small amount of AVP and increase Voeld Viability by +2%.



MASS EFFECT ANDROMEDA

Behind the Mask: Remnants Pre-Vault

Game Director: Mac Walters

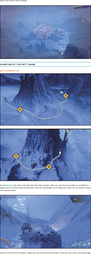
Participants: Elizabeth Baur, Kevin Bayliss

Main Author: Kevin

Interviewer, Compiler & Layout: Shane Hurley

ARRIVAL TO KELVA

Kelva Village

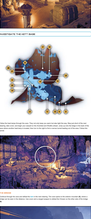


Kelva is where Ryder and the Pathfinder team first make contact with the Kett, and where they establish their base of operations. Kelva is a small village on the planet Eos, and is the first location in the game where players will be able to explore a populated area and interact with the locals and the Remnant. Pre-Vault.

OPTIONAL: ARMORY IN THE ARTI BUILD

Ryder can find the Armory in Kelva's Arti district, at the base of the cliffside and across a bridge from the Pathfinder's base. The Armory is a vendor that sells weapons, armor, and mods. Pre-Vault.

PUZZLE PATH TO THE ARTI BUILD



Ryder can find the Arti Build at the base of the cliffside and across a bridge from the Pathfinder's base. Pre-Vault.

OPTIONAL: THE ARTI SHRINE PUZZLE

Ryder can find the Arti Shrine at the base of the cliffside and across a bridge from the Pathfinder's base. Pre-Vault.

MASS EFFECT ANDROMEDA

Secondary Ops
Resistance Trap

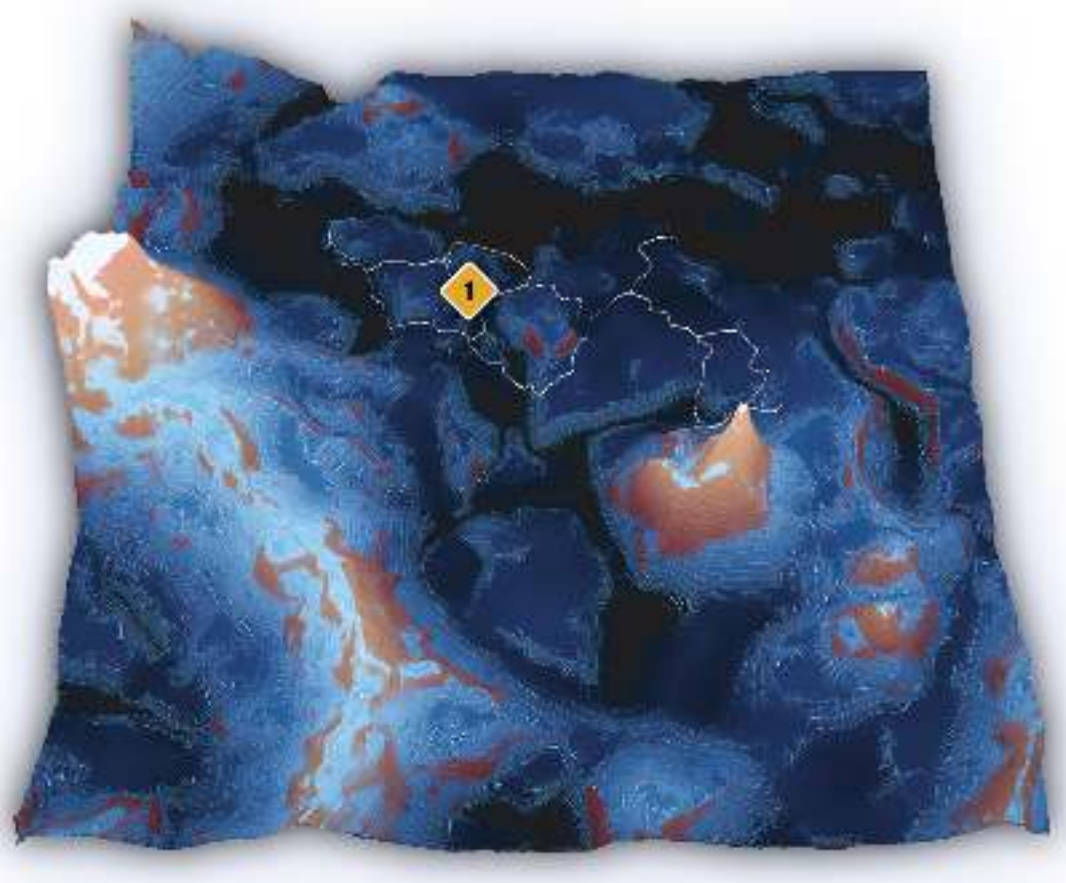
Mission Type: Heleus Assignment: Voeld

Prerequisite: Mission 2, complete “Return to the Tempest” after Aya during “A Trail of Hope”

Start Location: Voeld

Unlocking: Happen upon a battle between angara and kett

INVESTIGATE THE SMOKE



VOELD

Look for thick black smoke while in the area indicated on our map (near a large bridge). As you travel toward the smoke, a fireball shoots down from the sky, landing where the smoke originates **(1)**. Move to the site quickly to find a battle between angara and kett around a wrecked ship.

DEFEAT THE KETT

Rush down to the battle and help defeat the Chosen and Anointed.

SPEAK WITH THE SURVIVORS

After the battle, find and talk to Bennas. Turns out she was setting a trap for the kett by firing off a signal flare. You can tell her it’s a good plan, or you can warn her that there’ll be consequences. Your team would hope you choose the latter.

DEFEAT THE KETT

After the conversation, two kett dropships arrive and dump soldiers off to battle, one on each side of the crashed shuttle. You’re flanked! Send your team to fight in one direction while you hold down the other side. Defeat the Chosen and Anointed to complete the mission. You earn a surprisingly good reward for such a quick little job: 32 AVP and +1% Voeld Viability.

MASS EFFECT ANDROMEDA

Mission Type: Story Assignment [Core]

Prerequisites: Mission 2: Initiation. Reach Kralla Stronghold after exploring Ya Tul in Peak.

Rank Available: Level 7

Unlocking: Follow Mission 2 and then path scouts.

ACTIVATE THE TUNNEL ANTENNA (1/10)

OVERVIEW

The search for nodes and tunnels is available from level 7 onwards. To explore the main path activate the scattered tunnel antennas and then use the connected tunnels to travel between them.

BEFORE YOU ENTER

Before you enter, be sure to search the nearby area, as it does not pay to be tired outdoors! Also, search for Salarian Data Caches and Krogan Data Caches for some extra resources. Finally, be sure to activate the Scanner Upgrade if you haven't already.

Upon re-activation, there's another gigant- er-sized alien to fight. Move to the opposite end of the main room and open the Salarian Cache.

PATH GUIDING TO TUNNEL ANTENNA

After scanning the nearby gigant- ascend to the same cliff-like ledge and proceed to the Krogan Data Cache. Then, continue to the next ledge and use the Jump Pack to reach the next ledge. Then, continue to the next ledge and use the Jump Pack to reach the next ledge. Then, continue to the next ledge and use the Jump Pack to reach the next ledge.

SOLVE THE ENTRY PUZZLE

Then, enter the door and activate the puzzle. Interact with the Nomad connected to the middle of the main platform and solve the puzzle by following the steps below.

ENTRY PUZZLE SOLUTION [SPOILERS]

Activate the Nomad connected to the middle of the main platform. Activate the Nomad connected to the middle of the main platform. Activate the Nomad connected to the middle of the main platform.

Next, you can approach the tunnel at the far-end of the main room by using the Jump Pack or Lopho's Jet Pack and then activating the Nomad connected to the middle of the main platform. Then, activate the Nomad connected to the middle of the main platform. Then, activate the Nomad connected to the middle of the main platform.

Then, activate the Nomad connected to the middle of the main platform. Then, activate the Nomad connected to the middle of the main platform. Then, activate the Nomad connected to the middle of the main platform.

SOLVE THE 2ND PUZZLE

Next, interact with the Nomad connected to the middle of the main platform and solve the puzzle. Then, activate the Nomad connected to the middle of the main platform and solve the puzzle.

PUZZLE SOLUTION [SPOILERS]

Activate the Nomad connected to the middle of the main platform. Activate the Nomad connected to the middle of the main platform. Activate the Nomad connected to the middle of the main platform.

DEFENDER

Approach the next tunnel [1] on the north-end of the main area and activate the Nomad. Then, activate the Nomad connected to the middle of the main platform. Then, activate the Nomad connected to the middle of the main platform. Then, activate the Nomad connected to the middle of the main platform.

Then, activate the Nomad connected to the middle of the main platform. Then, activate the Nomad connected to the middle of the main platform. Then, activate the Nomad connected to the middle of the main platform.

The Salarian Data Cache is the last of the antiquities you can collect. Then, activate the Nomad connected to the middle of the main platform. Then, activate the Nomad connected to the middle of the main platform. Then, activate the Nomad connected to the middle of the main platform.

SOLVE THE 3RD PUZZLE

Then, activate the Nomad connected to the middle of the main platform. Then, activate the Nomad connected to the middle of the main platform. Then, activate the Nomad connected to the middle of the main platform.

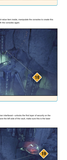
SOLVE THE PUZZLE

Activate the Nomad connected to the middle of the main platform. Then, activate the Nomad connected to the middle of the main platform. Then, activate the Nomad connected to the middle of the main platform.

ESCAPE THE PLANETARY FIELD AND EXIT THE VAULT

Activate the Nomad connected to the middle of the main platform. Then, activate the Nomad connected to the middle of the main platform. Then, activate the Nomad connected to the middle of the main platform.



ESCAPE THE PLANETARY FIELD AND EXIT THE VAULT

Activate the Nomad connected to the middle of the main platform. Then, activate the Nomad connected to the middle of the main platform. Then, activate the Nomad connected to the middle of the main platform.

Once the orbs collect to reach the top platform they explode with a [1]. You need to find these with the assault rifle and the Nomad connected to the middle of the main platform. Then, activate the Nomad connected to the middle of the main platform.

ESCAPE THE PLANETARY FIELD AND EXIT THE VAULT

Then activate the Nomad connected to the middle of the main platform. Then, activate the Nomad connected to the middle of the main platform. Then, activate the Nomad connected to the middle of the main platform.

Once the orbs collect to reach the top platform they explode with a [1]. You need to find these with the assault rifle and the Nomad connected to the middle of the main platform. Then, activate the Nomad connected to the middle of the main platform.

MASS EFFECT ANDROMEDA

Secondary Ops

Rising Tensions

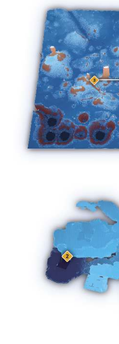
Mission Type: Heleus Assignment: Elsaden

Prerequisite: Begin the quest "Parlay with the Krogan"

Start Location: Elsaden

Unlocking: Speak to Shaman Kortik

SPEAK TO SHAMAN KORTIK



ELARDEN: KROGRN COLONY NEW TUCHINNXR

THRONE ROOM

Find Shaman Kortik (2) in the throne room on the first level of the krogan colony, New Tuchanka (1). He's in a nook, surrounded by metal caging. Talk to him to learn that he fears New Tuchanka may descend into a clan war unless two rival warriors perform the Rite of Union. A krogan war will likely be bad news for the Nexus and the stability of Helexa. He needs your help driving a beast into the arena.

ENTER A WILD FIEND HABITAT

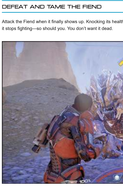
Drive west toward the Remnant derelict when heading away from the krogan colony. If you haven't done so already, call for a forward station in Lerguisk just east of the navpoint (3). The lure location text prompt appears near the ground as you approach the target, which is a small area surrounded by boulders.

PLACE THE LURE

Exit the Nomad and place the Fiend lure. Wait for the Fiend to be drawn to the bait. If it doesn't come right away, move around the site while looking for him. It's likely you'll also attract some Wraiths, so spend some ammo putting them down while you wait for the Fiend.

DEFEAT AND TAME THE FIEND

Attack the Fiend when it finally shows up. Knocking its health down to about a quarter wears the beast down to the point that it stops fighting—so should you. You don't want it dead.



RETURN TO SHAMAN KORTIK

NEW TUCHINNXR

Get back into the Nomad and return to the krogan colony (1). Don't worry about the Fiend; once it gets his wits back he follows your scent and makes it to the colony. Head to the throne room and speak with Kortik (2) again. He wants you to speak to Goren to get him to commit to the Rite of Union. Kortik doesn't think he'll listen to an outsider, but says it's worth a shot.

TALK TO GREN

From the throne room, head down the descending pathway behind the throne, then take a left at the intersection and pass through the doorway to reach the exterior balcony near a landing pad. This is where you find Gren (4).

You need to convince him to fight in the Rite of Union battle. If Drack is in your party (which he should be when you're on Elsaden), ask him to help you out. Drack says Gren could fight or listen to Varka call him a quadless coward for the rest of his life. He believes Varka will gun for him as soon as the Fiend is dead and then requests that you participate to keep her in check. Choose to go to the arena for the fight now.

BEGIN THE RITE OF UNION

Turns out the fight isn't very fair. The Fiend you lured here is a female that, in turn, brought two males with her. Now you have three Fiends to battle. If you're low on ammo, collect some where you begin in the cave, next to Varika's platform.

DEFEAT THE FIENDS

You face the three Fiends at once, and you can guarantee that those krogan are not going to be much help. The key is to keep moving to avoid being grabbed, which means instant death. Use side-evade moves to avoid their slow attacks. Jump over the Fiends when they charge at you, and then shoot while jump-jetting for the slow-descent-shooting maneuver. Do this while aiming for their backs. Their backs and their mouths are their weak points; you can get the most damage targeting these areas. Don't completely give up on the krogan's help, though. Assign them to attack one beast together at the same time while you take on another.

SPEAK WITH VARKA AND GREN

Speak to Gren in the cave near Varka's platform after the battle. This concludes the quest.

MASS EFFECT ANDROMEDA

Secondary Ops

Search for the Stolen Remnant Drive Core

Mission Type: Helios Assignment: Elaaden

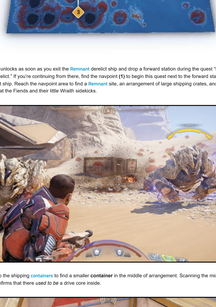
Prerequisite: Complete "Investigate Remnant Derelict"

Start Location: Elaaden

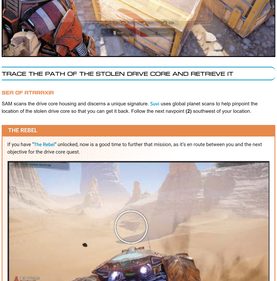
Unlocking: Scan the shipping container

SCAN THE SHIPPING CONTAINER

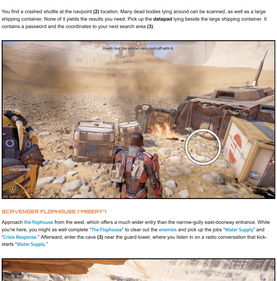
ELAADEN: LANGUISH REMNANT SITE



This mission unlocks as soon as you exit the Remnant derelict ship and drop a forward station during the quest "Investigate Remnant Derelict." If you're continuing from there, find the navpoint **(1)** to begin this quest next to the forward station in front of the derelict ship. Reach the navpoint area to find a Remnant site, an arrangement of large shipping crates, and two large Fiends. Defeat the Fiends and their little Wrath sidekicks.



Jump up onto the shipping containers to find a smaller **container** in the middle of arrangement. Scanning the middle container confirms that there *used to be* a drive core inside.



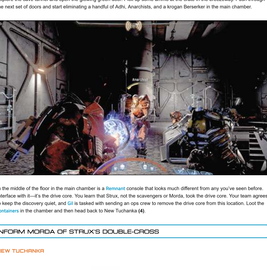
TRACE THE PATH OF THE STOLEN DRIVE CORE AND RETRIEVE IT

SEE OF RTTRRNOR

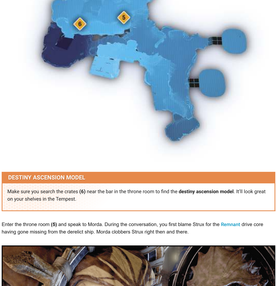
SAM scans the drive core housing and discerns a unique signature. Suvi sees global planet scans to help pinpoint the location of the stolen drive core so that you can get it back. Follow the next navpoint **(2)** southwest of your location.

THE REBEL

If you have "The Rebel" unlocked, now is a good time to further that mission, as it's en route between you and the next objective for the drive core quest.



You find a crashed shuttle at the navpoint **(2)** location. Many dead bodies lying around can be scanned, as well as a large shipping container. None of it yields the results you need. Pick up the **datapad** lying beside the large shipping container. It contains a password and the coordinates to your next search area **(3)**.



SCRVENGER FLOR•USE ("MSSERY")

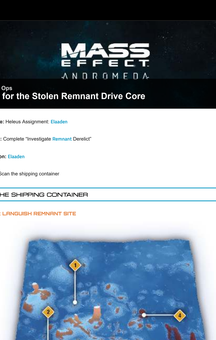
Approach the Rophouse from the west, which offers a much wider entry than the narrow-gully east-doorway entrance. While you're here, you might as well complete "The Flophouse" to clear out the enemies and pick up the jobs "Water Supply" and "Crisis Response." Afterward, enter the cave **(3)** near the guard tower, where you listen in on a radio conversation that kick-starts "Water Supply."

Explore the cave tunnel and open the glowing green door. Pick up some ammo at the crate in the breezeway. Push through the next set of doors and start eliminating a handful of Adhi, Anarchists, and a Krogan Berserker in the main chamber.

In the middle of the floor in the main chamber is a Remnant console that looks much different from any you've seen before. Interface with it—it's the drive core. You learn that Strux, not the scavengers or Morda, took the drive core. Your team agrees to keep the discovery quiet, and GI is tasked with sending an ops crew to remove the drive core from this location. Loot the containers in the chamber and then head back to New Tuchanka **(4)**.

INFORM MORDA OF STRUX'S DOUBLE-CROSS

NEW TUCHANKA



DESTINY ASCENSION MODEL

Make sure you search the crates **(6)** near the bar in the throne room to find the **destiny ascension model**. It'll look great on your shelves in the Tempest.

Enter the throne room **(5)** and speak to Morda. During the conversation, you first blame Strux for the Remnant drive core having gone missing from the derelict ship. Morda clobbers Strux right then and there.

One of your crew (Drack, if he's with you) spills the beans and tells Morda and Strux that the Nexus is now in possession of the drive core. In your next conversation option, you can choose to say, "We've been tricked," or "I took it from Strux," or "Oh, now you're interested," or "It's safe."

MASS EFFECT ANDROMEDA

Secondary Ops
Settling Elaaden

Mission Type: Heleus Assignment: Elaaden

Prerequisite: Land on Elaaden

Start Location: Elaaden

Unlocking: Starts as soon as you land on Elaaden

CLEAR OUT THE SCAVENGER FLOPHOUSE

An injured krogan scout at the krogan colony New Tuchanka gives you a navpoint to the flophouse if you haven't stumbled upon it otherwise. See "The Flophouse" for details.

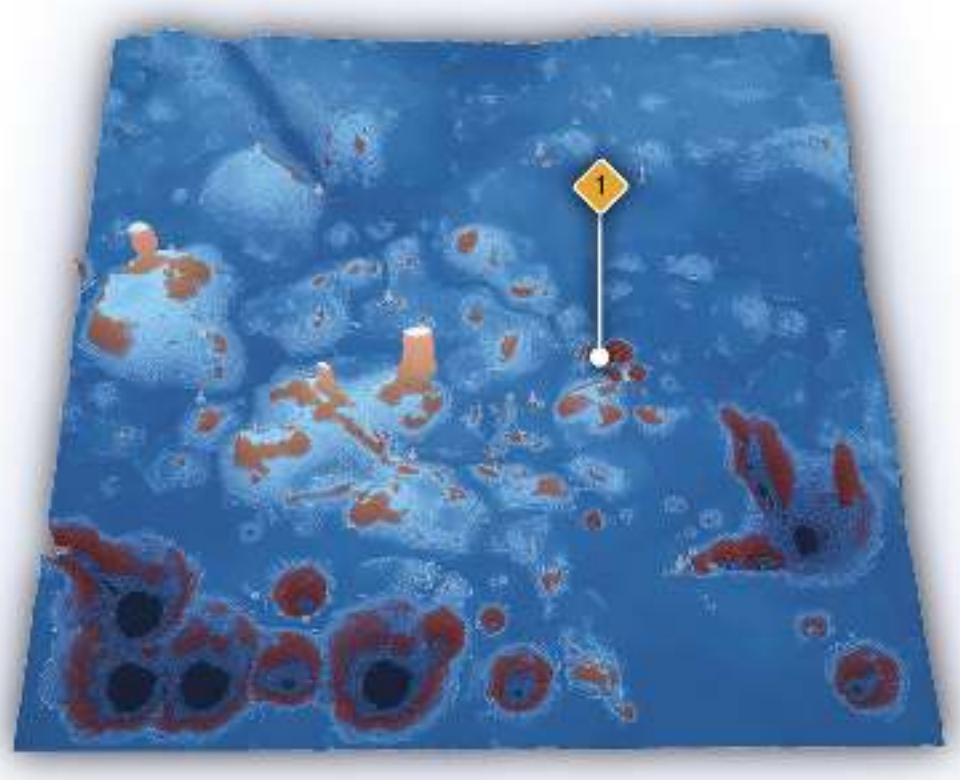
RESOLVE THE TENSION AT THE KROGAN COLONY

You complete this objective by finishing the mission "Search for the Stolen Remnant Drive Core." You reach an agreement with the krogan colony, which determines whether you can create an outpost on Elaaden.

REACH 40/ VIABILITY ON ELAADEN

This can be done by performing side quests (that's all there is on Elaaden). Big payoffs include "Water Supply," "Search for the Stolen Remnant Drive Core," and "The Flophouse."

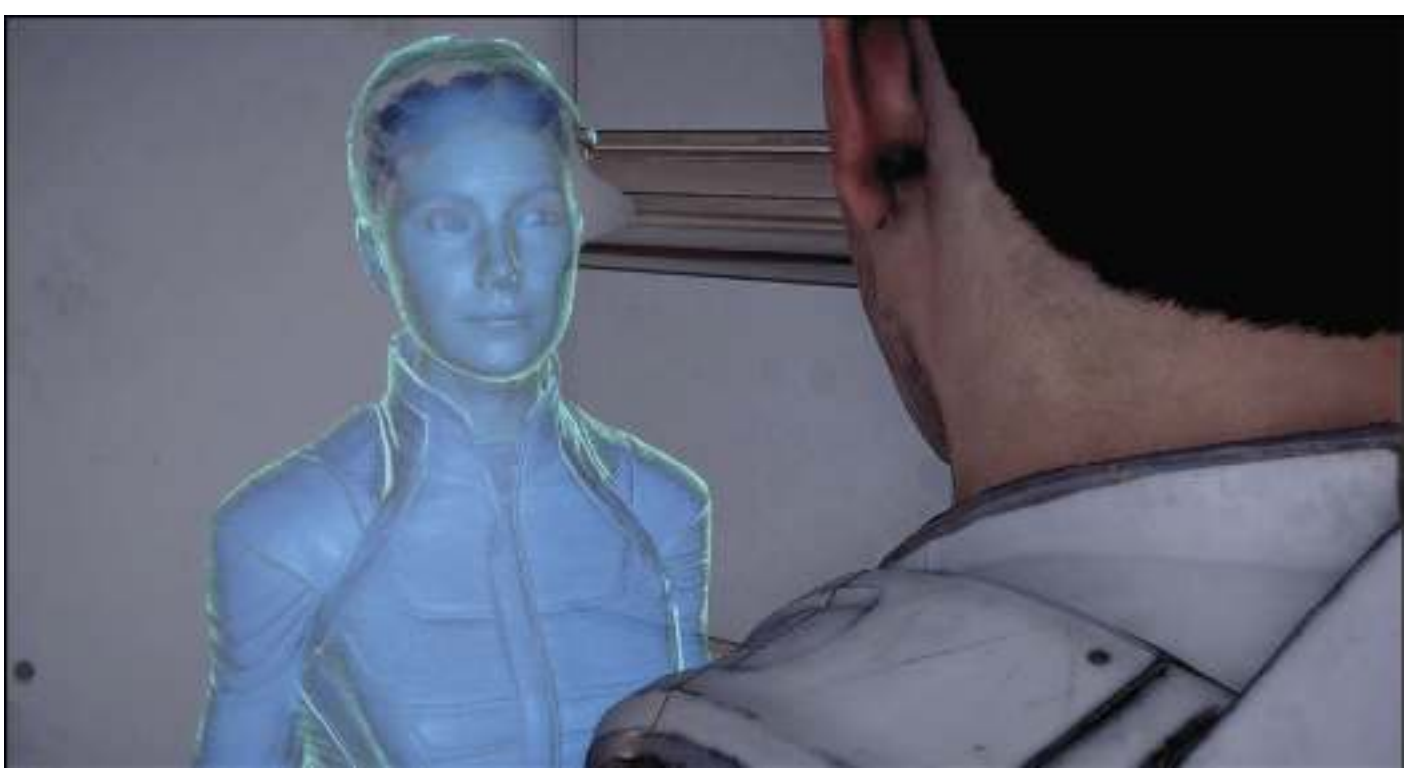
CREATE AN OUTPOST



You don't need to activate the Elaaden vault to obtain the amount of Viability needed to create an outpost. Once you reach 45% Viability, call down the outpost with the outpost beacon **(1)** near New Tuchanka. Be aware, if you keep the drive core for the Initiative instead of giving it back to Morda in "Search for the Stolen Remnant Drive Core," you can't put an outpost on Elaaden.

ADDISON CONVERSATION

After you settle Elaaden, holographic Addison talks to you inside the new outpost. During the conversation, she sincerely congratulates you but, in the same breath, says Tann will hate the new settlement (krogan territory and all). You can use a sentence enhancer to share your true feelings regarding what Tann thinks in the next conversation option. She then asks for a quote for the press. Choose "Strap in, it's a wild world" or "The groundwork is done."



ARCHITECT ON ELAADEN

Settling Elaaden allows you to battle an Architect there. Talk to Kariste Archana **(2)** in the new outpost. See the "Architect on Elaaden" side quest entry and our Architect fighting tips in the Enemies section.

Secondary Ops

Settling Kadara

Mission Type: Heleus Assignment: Kadara

Prerequisite: Must have interrogated Vehn Terev in "Hunting the Archon"; complete the following quests, then return to the Tempest: "Behind Enemy Lines," "A People Divided," "Healing Kadara's Heart," "Modern Medicine," "Precious Cargo," "Night on the Town," "High Noon"

Start Location: Tempest

Unlocking: Return to the Tempest after completing the prerequisite quests

FIND AN OUTPOST SITE

SULFUR SPRINGS OUTPOST

This quest follows and tracks your progress through Kadara's side quests. Most of the objectives in this quest are the same as those of the associated quests, so completing an objective for a Kadara side quest also completes the corresponding objective here. This quest follows you from the moment you set foot on the sand until you drop an outpost.

LOOK FOR SIGNS OF VIOLENCE BETWEEN RIVAL FACTIONS IN KADARA PORT

Complete "A People Divided."

WORK WITH REYES

Help Reyes in "Precious Cargo."

RETURN TO THE TEMPEST

Return to the Tempest after finishing these missions: "Behind Enemy Lines," "A People Divided," "Healing Kadara's Heart," and "Precious Cargo."

CHECK YOUR EMAIL AND RESPOND TO REYES

Complete the first objective in "Night on the Town."

ATTEND SLOANE'S PARTY WITH REYES

Complete "Night on the Town."

INVESTIGATE DRUG USE IN THE KADARA SLUMS

Start "Modern Medicine."

HELP DR. NAKAMOTO RETRIEVE THE FORMULA

Complete "Modern Medicine" to Nakamoto's liking.

ASK OUTCAST LEADERSHIP ABOUT TROUBLE ON KADARA

Start "Behind Enemy Lines."

HELP KAETUS WITH THE KETT ON KADARA

Complete "Behind Enemy Lines."

WAIT FOR TROUBLE TO COME CALLING

Heleus Assignment: Kadara, "High Noon" unlocks.

MEET SLOANE

Begin Heleus Assignment: Kadara, "High Noon."

SPEAK WITH SLOANE

If she survived, speak with Sloane after the cave meeting with the Charlatan in "High Noon."

SPEAK WITH REYES

If Sloane was killed, speak to Reyes during the cave meeting with the Charlatan in "High Noon."

STABILIZE KADARA'S ENVIRONMENT BY RESETTING THE VAULT

Complete "Healing Kadara's Heart," where you activate the three monoliths, then activate the Remnant vault purification field.

REACH 40% VIABILITY ON KADARA

Complete this objective by carrying out a couple of big quests or many of the smaller ones.

CREATE AN OUTPOST

Create an Initiative outpost after finishing "High Noon."

MASS EFFECT ANDROMEDA

Secondary Ops
Settling Voeld

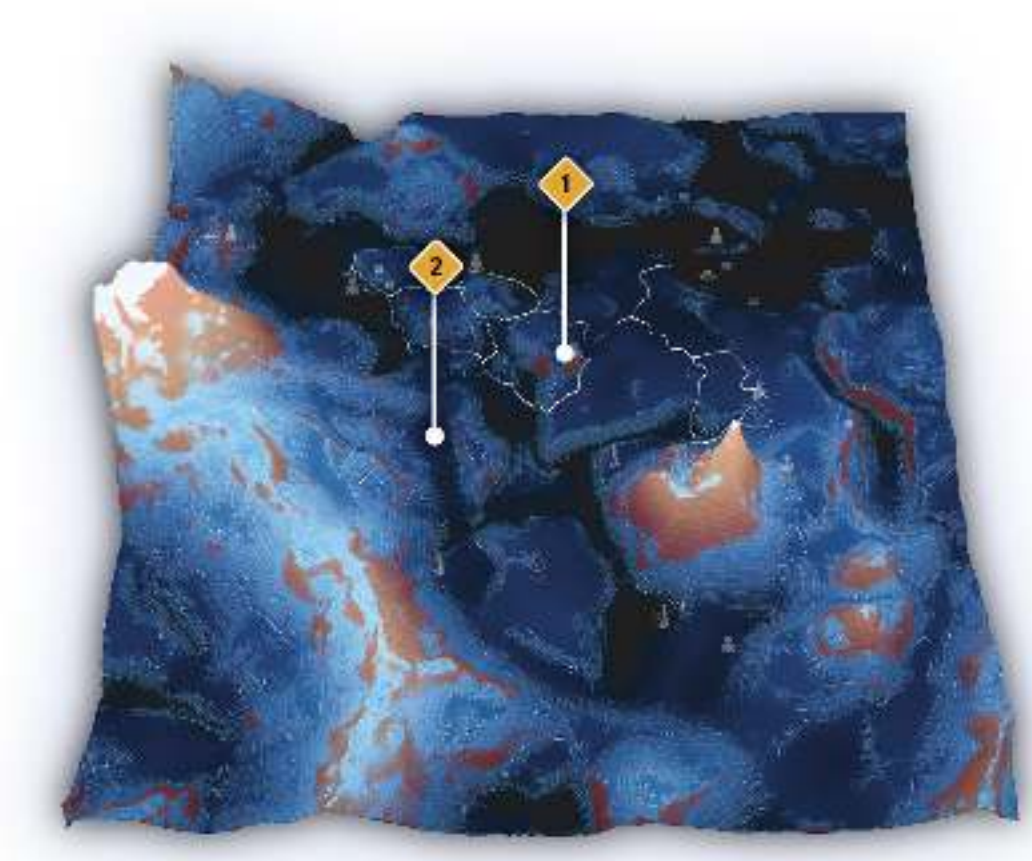
Mission Type: Heleus Assignment: Voeld

Prerequisite: Reach 40% Voeld Viability

Start Location: Voeld

Unlocking: Complete the mission "Meet the Resistance"

PREREQUISITES



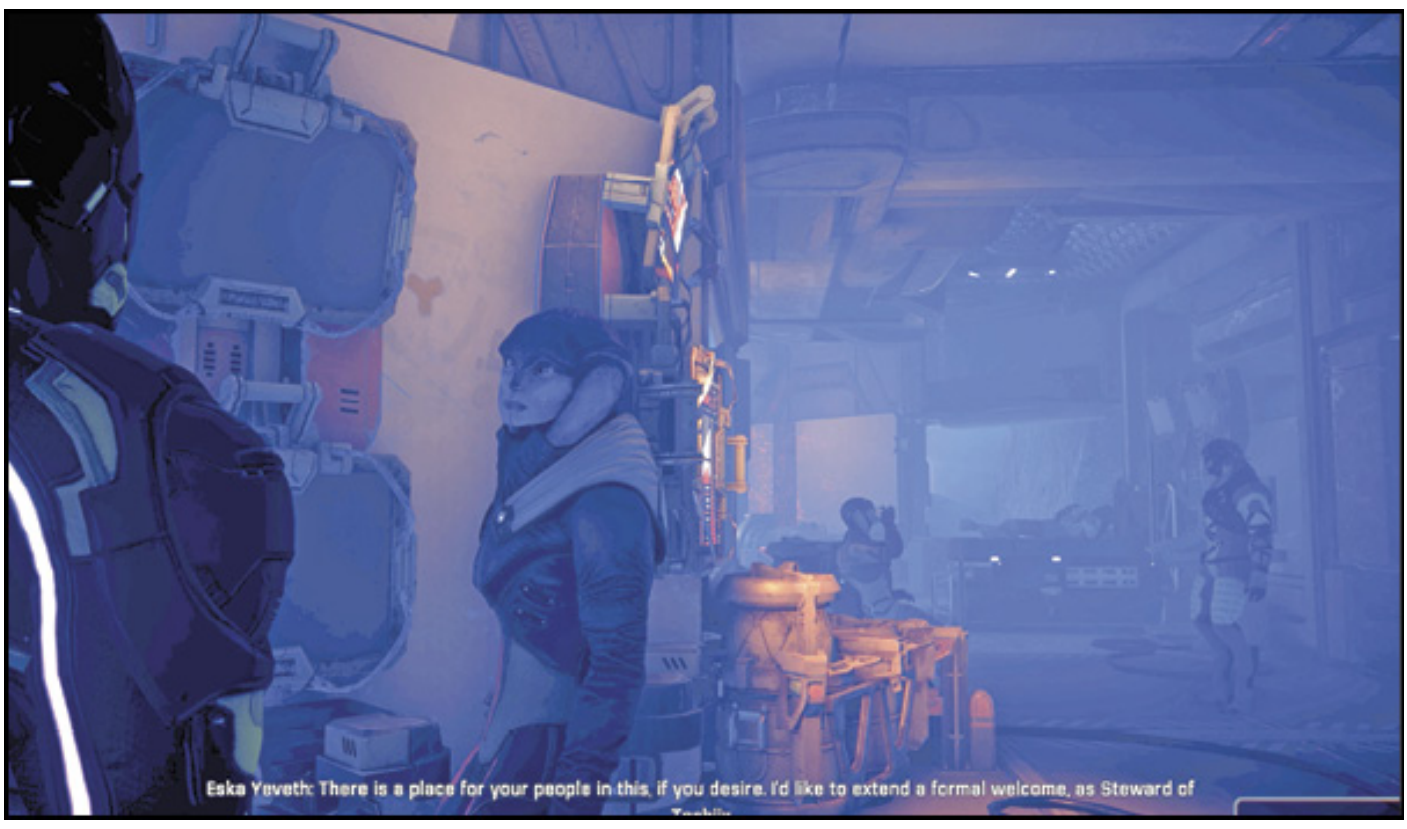
VOELD

The following must be done before you order an outpost for Voeld:

- **Destroy the kett operations center:** see "Remove the Heart"
- **Learn about the angara's past:** see "Uncovering the Past"
- **Speak to Eska Yeveth, the steward of Voeld:** talk to Eska Yeveth after the previous objectives are complete
- **Reach 40% Viability on Voeld:** this can be done through side quests without solving monoliths and Remnant vault challenges

FIND AN OUTPOST SITE

After meeting the given criteria (and playing the nice alien) and getting Eska Yeveth's **(1)** blessing to settle on Voeld, you can find your location and build an outpost. Eska Yeveth is in Techiix in the back building behind Buxil's place, by the way.



Find the planned outpost location **(2)** along the west edge of Voeld. There's a **memory trigger** on a hill nearby, and you can erect a receiver for the task "Boosting the Signal" near the memory trigger. But only after building the outpost.

CREATE THE OUTPOST

A conversation with a holographic Addison begins as soon as the outpost is built. She reluctantly congratulates you on a job well done. Again, she needs a great quote for the press. You acquire one Cyro Pod point, a load of AVP, and raise Voeld Viability by +20%.

MASS EFFECT ANDROMEDA

Secondary Ops
Shock Treatment

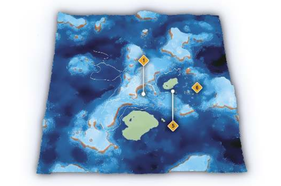
Mission Type: Heleus Assignment: Eos

Prerequisite: Place a settlement on Eos

Start Location: Eos

Unlocking: Access the audio console at the Eos outpost, Prodromos

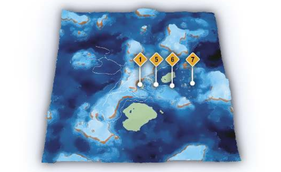
ACCESS DATA ON THE TERMINAL INSIDE THE RESEARCH BUILDING



EOS: PRODROMOS

After settling Prodromos (**1**) at Eos, enter the research building (**2**) and access the terminal. Select "Please Help" and check out the "Work Rosters: Week 2" entry. It's about a group of settlers hacking Remnant technology, trying to turn the machines into friendly assistants. The person who left the note is worried about the possible ramifications of such an experiment.

FIND THE WORK ROSTERS



Follow the navpoint to the top floor of the two-story structure (**3**).

INVESTIGATE MEDBAY

Enter the top floor of the building next door (**4**). Scan the medical equipment. Ryder learns this machine was used to treat wounds caused by the Remnant and that the crew has tried to control them before. You can also converse with a medic, Ramirez, in the same room.

INVESTIGATE THE MONOLITH SITE

Drive to the navpoint northeast of the settlement to the monolith (**5**). Jump up the tall platforms to reach the top and the monolith console.

SCAN THE COMMUNICATIONS EQUIPMENT

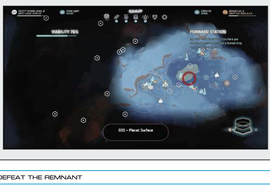
On the first tier of the monolith base and a little to the left is a communications array. Scan it to find an open comms channel on the unit.

GET TO THE WORK CREW

You now have 2:26 to reach the next location. If you fail to get there in time, most of the crew dies. Access your map and place a waypoint on the marked monolith navpoint due east from your position (**7**).

FORWARD STATION SHOORTCUT

Enter the map view and click on the forward station (**6**) between you and the target destination to warp halfway to the goal and save some serious time.

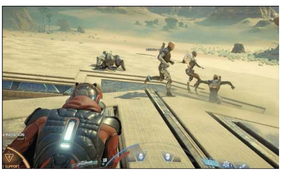


DEFEAT THE REMNANT

Using the forward station as a shortcut, you should make it to the site with 1:46 left on the clock. Quickly exit the Nomad and begin attacking the three Observers, the Assembler, and the Nullifier. Assign your teammates to attack one while you attack another until they're all destroyed.

SPEAK TO THE SURVIVOR(S)

If you're on time, you save the entire crew. However, if you're late, you find a sole survivor. Save them all to speak to Jennings. You earn 570 XP. Afterward, loot the area of goods and scan Remnant and the **Adapted Initiative Core** Tech.



MASS EFFECT ANDROMEDA

Secondary Ops
Sleeping Dragons

Mission Type: Heleus Assignment: Nexus

Prerequisite: Mission 3 or later; Nexus Phase 2; outpost on Eos

Start Location: Nexus

Unlocking: Speak to hydroponics protesters

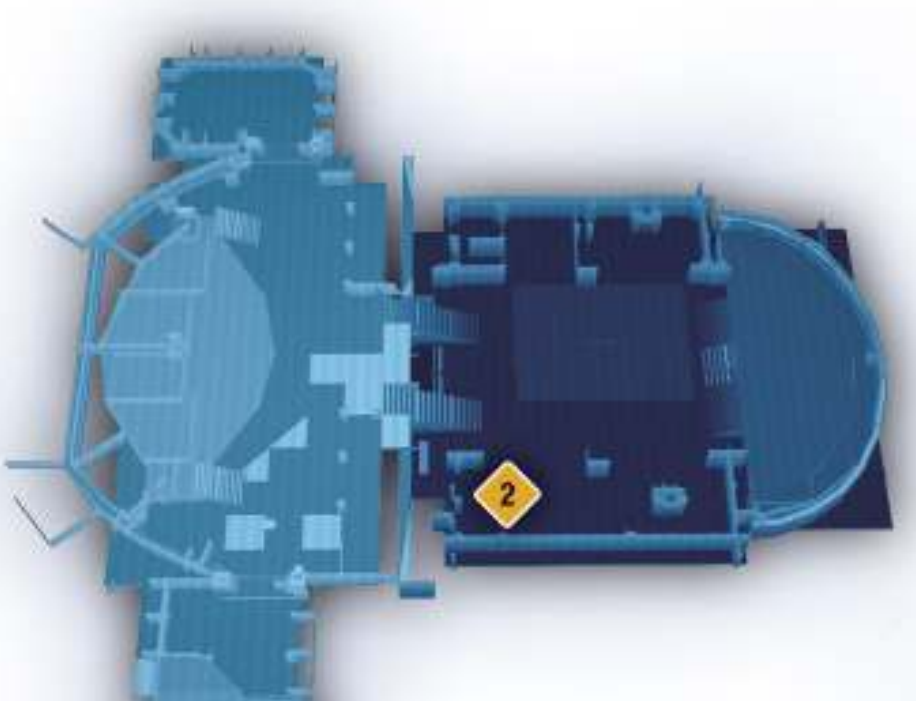
SPEAK WITH THE PROTESTERS

NEXUS: HYDROPONICS

With the hydroponics protestors growing more violent, Nexus authorities deemed it necessary to remove them by force.

Speak to Rhys, one of the protesters **(1)**. They want their families and friends out of stasis, and no one will listen. Agree to talk to the leaders in charge of stasis revivals.

SPEAK WITH KANDROS



NEXUS OPERATIONS

Head to the militia office in Nexus operations and speak to Kandros **(2)** about “stasis protestors.” The meeting attendees expand as Director Tann, Addison, and Kesh join in, and you argue the protestors’ point. The concern is there are no resources and nowhere to place people if they’re revived. To side with the protesters and get a non-violent conclusion, answer, “We have a whole planet!” End the conversation with “No. The protestors are right,” to avoid confrontation with them.

AUTHORIZE STASIS REVIVALS FROM NEXUS OPERATIONS

Head up the stairs to Addison’s office on the deck of the Hyperion and use the pod control console **(3)** to authorize stasis revivals. Rhys shows up as you’re reviving the families, and you get the satisfaction of telling him to go see his mother as she awakens. This mission rewards you with a large amount of AVP.

MASS EFFECT ANDROMEDA

Secondary Ops
Something in the Water

Mission Type: Heleus Assignment: Kadara

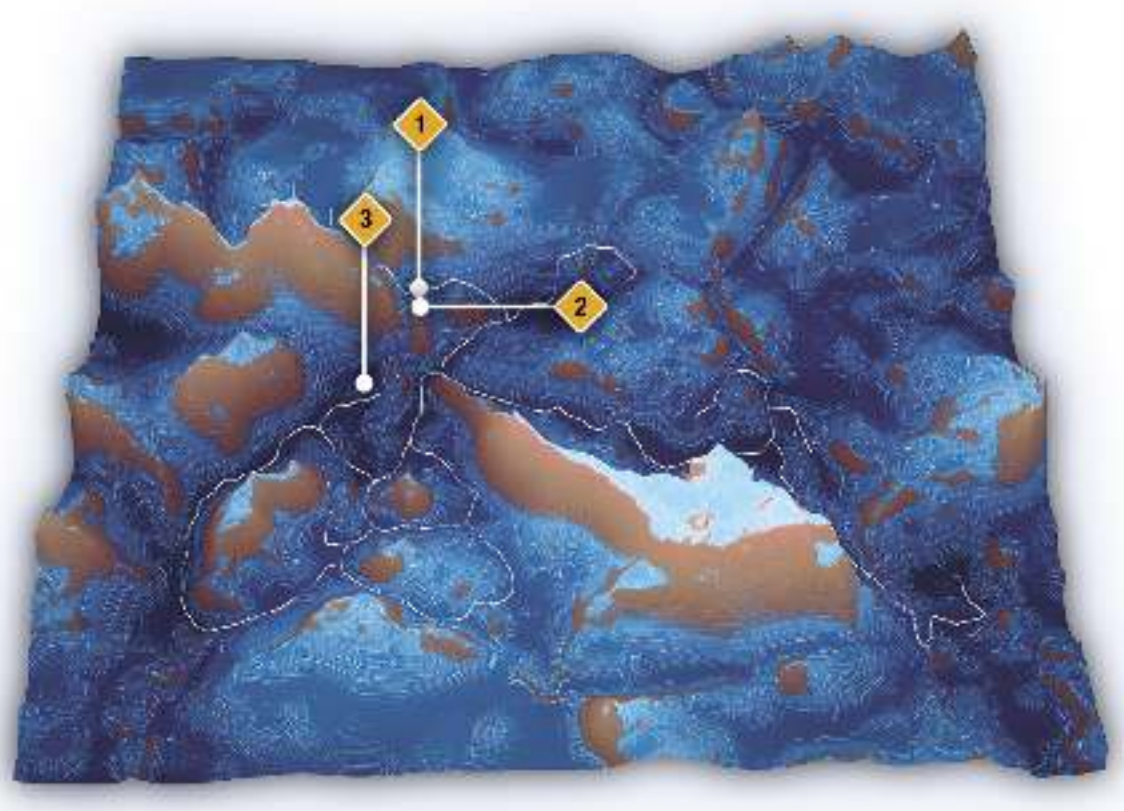
Prerequisite: Must have interrogated Vehn Terev in “Hunting the Archon.”

Start Location: Kadara

Unlocking: Approach the murder scene

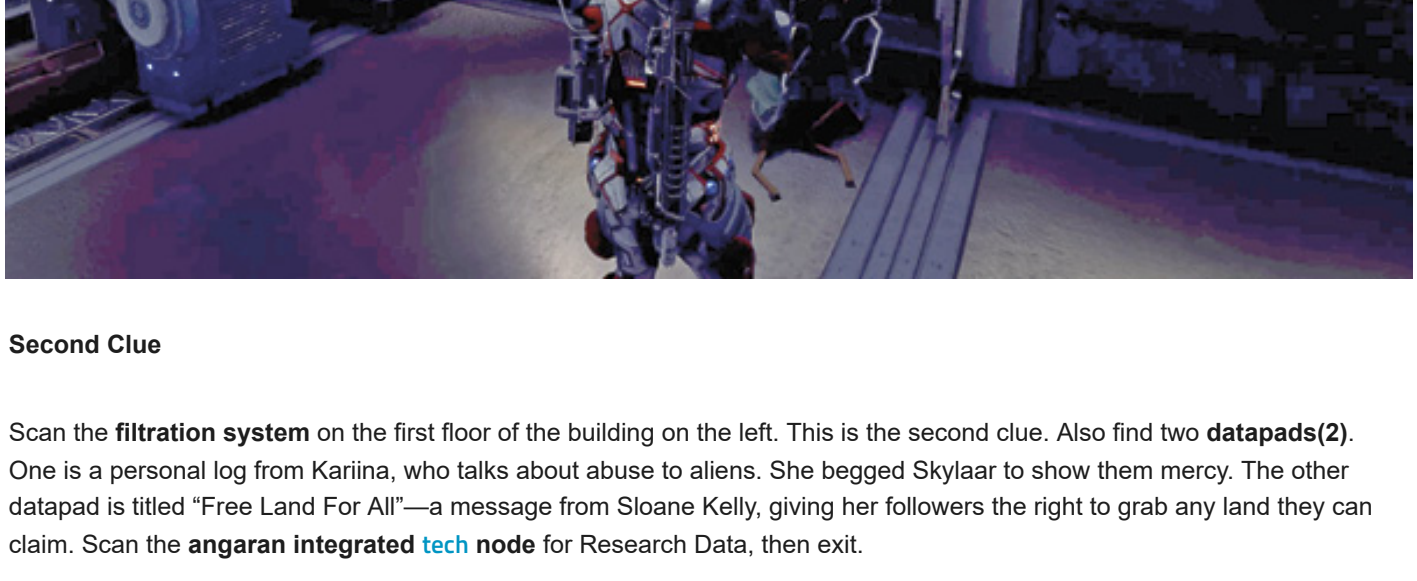
SEARCH FOR TWO CLUES TO THE ANGARAN DEATHS

KADARA: KURINTH'S VALLEY



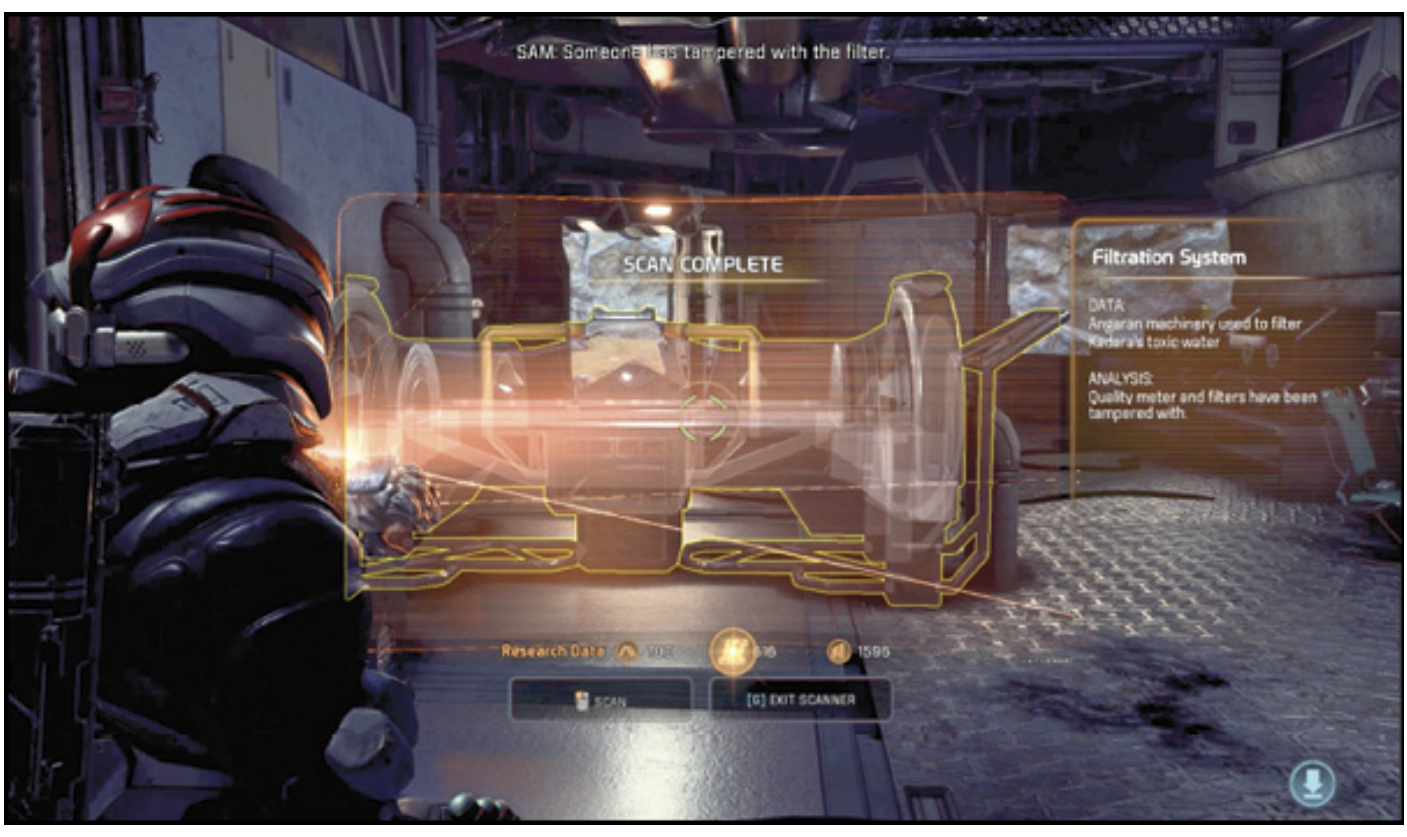
First Clue

While exploring Kadara, you find a settlement littered with dead angara **(1)**. Enter the building on the right side of the road. In a narrow room, find a **datapad** on a desk near a large window. It belongs to Skylaar Yefir, an angara who lived there. Listen to the three logs. One of them mentions Charybdis Point. That’s your next destination, and this was your first clue.



Second Clue

Scan the **filtration system** on the first floor of the building on the left. This is the second clue. Also find two **datapads(2)**. One is a personal log from Kariina, who talks about abuse to aliens. She begged Skylaar to show them mercy. The other datapad is titled “Free Land For All”—a message from Sloane Kelly, giving her followers the right to grab any land they can claim. Scan the **angaran integrated** tech **node** for Research Data, then exit.



SEARCH CHARYBDIS POINT FOR EVIDENCE

Drive southwest to Charybdis Point **(3)** to look for more evidence. Enter the building through the unlocked front door and find the **crate** to the left on the floor.

Opening the crate starts a conversation with SAM. He says the make and design match those found in the angaran town. This means the exiles were not involved. Just then, Mallox bursts into the room. He asks why you’re there, but you answer with questions of your own: “Where’d you get the design for these water filters?” and “Why did you murder an entire town?” He says the flapheads stole everything. The angara are the ones who know how to properly filter the planet’s water. Using this knowledge, he poisoned the water.

MASS EFFECT ANDROMEDA

Secondary Ops
Something Personnel

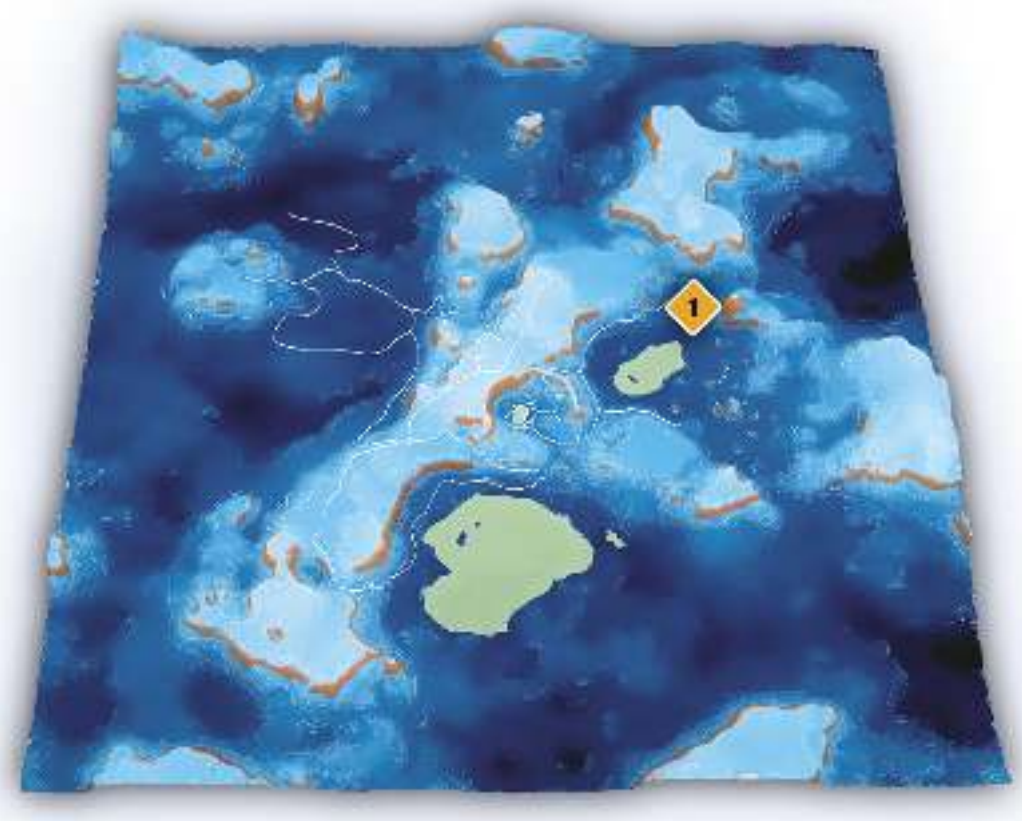
Mission Type: Heleus Assignment: Eos

Prerequisite: Land on Eos

Start Location: Eos

Unlocking: Find the datapad at the muster point on the hill near Site 1: Promise

FIND THE EMERGENCY MUSTER POINT



HILLS NEAR SITE 1: PROMISE

Head east out of Site 1: Promise through the gully behind Clancy's building. You come to a steep incline. Use your jump-jets, or drive up the left side of the canyon to discover a precipice with a muster point (a small unscannable device with a green glowing light on top). Next to the device is a **datapad(1)**. Examine it.

It's a recording from Chief Engineer Grace Lito. She was the last one out during the evacuation. You learn that she didn't want to leave the outpost, but she ran out of options to try to stabilize the atmosphere or to secure the outposts from kett.

TALK TO VLADIMIR BRECKA TO REDEPLOY LITO

NEXUS OPERATIONS: ADDISON'S OFFICE

Next time you're on the Nexus, stop at the third level in Addison's office and speak with Vladimir Brecka **(2)** at the cryo pods console. Ask him about "Eos Chief Engineer Grace Lito"—you'd like her to be taken out of cryo and redeployed. He complies. That completes the mission.

Secondary Ops
Stage a Rescue

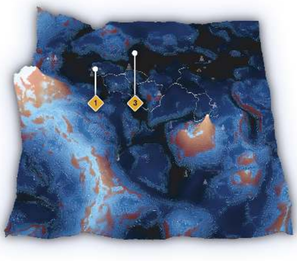
Mission Type: Heleus Assignment: Voeld

Prerequisite: Complete "On the Front Lines"

Start Location: Voeld

Unlocking: Complete the mission "On the Front Lines"

SPEAK TO SKEOT AT HJARA



VOELD: HJARA

At the angaran research base, Hjara **(1)**, speak to Skeot **(2)** to complete the first stage of the mission "On the Front Lines." Skeot's father died in a kett labor camp, and Skeot doesn't want his captured Uncle Niilj to fall to a similar fate. He sends you a navpoint to Niilj's location.

EVFRA'S TRUST QUESTS

There are two quests that can be played to gain Evfra's trust: this one and "Helping Havarl's Scientists." The latter is played on Havarl, where you rescue angara in Remnant stasis. After completing either of these missions, talk to Evfra on the Tempest Vidcon and advance the Priority Ops missions, having earned Evfra's trust.

REACH THE KETT HOLDING SITE

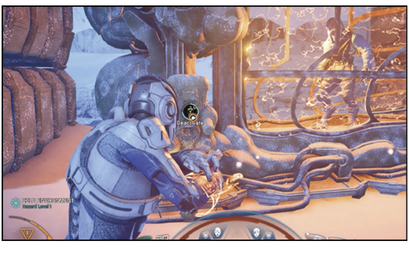
Get back in the Nomad and travel northeast to the northern holding site **(3)**. Exit the Nomad when you approach, and quickly look for cover; it doesn't take long for the kett to spot you.

RESCUE THE CAPTURED ANGARA

NORTHERN HOLDING SITE

The best approach is the northwest bridge entrance to the compound. We've mapped a helpful route through the facility. Start by crossing the bridge near the first ground-level cell **(4)**. If you have ranged weapons, take up cover before you cross the first bridge, and eliminate as many kett as you can see around the entire base before moving in.

Battle the Chosen and Destined guards, along with the Wraiths, while advancing through the compound, using cover when available. Find and deactivate the prison cell consoles to free the angara. When you free a prisoner **(5)**, they take up arms and help you fight the kett.



CLEAR THE REMAINING KETT

Work through the compound, freeing prisoners. Be prepared for kett to enter the battle via dropship when you approach the main building and its landing platforms. Defeat the enemy and free the final two angara **(6)(7)** for a total of four freed prisoners.

SPEAK TO THE RESCUED ANGARA

Skeot's Uncle Niilj is released from one of the cells **(7)**. He's likely to move to the platform in front of the main building. Tell him **(8)** that Skeot sent you. He needs a data drive (of downloaded info from the kett network) delivered to Buxil so she can begin analysis. This completes "Stage a Rescue" and unlocks "Meet the Family." Raid the containers in the central building before leaving.

MASS EFFECT ANDROMEDA

Secondary Ops

Station Sabotage

Mission Type: Helius Assignment: Nexus

Prerequisite: Unlock the Tempest

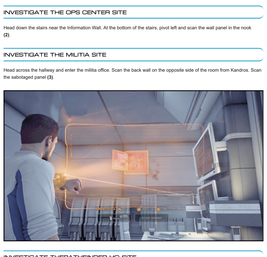
Start Location: Nexus Operations

Unlocking: Talk to Raj

SPEAK TO RAJ PATEL

NEXUS OPERATIONS

After you speak to Director Tann about settling Eos (during the quest "Nexus Reunion"), Raj Patel starts work outside Tann's office near the stairs. Raj (**1**) is showered by electrical sparks. He's surprised there have been three malfunctions in equipment this long after the mutiny. He suspects a saboteur. He trusts you since you were in stasis while the mutiny went down. Agree to help him.



Raj sends the locations of the malfunctioning systems to your omni-tool. He asks you to send the scan data from the three locations.

REFUSED THE QUEST?

Don't worry if you refused the quest; you can still pick it up. Simply save and load, or leave the area and return, then talk to Raj again. This works for most side quests.

SCAN IN ANY ORDER

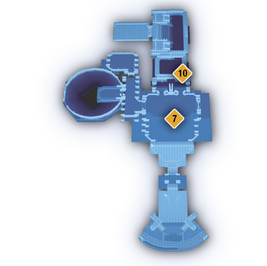
You can scan the consoles in any order.

INVESTIGATE THE OPS CENTER SITE

Head down the stairs near the Information Wall. At the bottom of the stairs, pivot left and scan the wall panel in the nook (**2**).

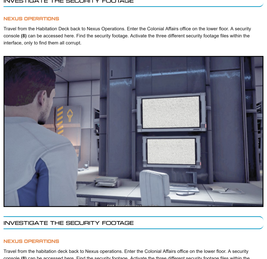
INVESTIGATE THE MILITIA SITE

Head across the hallway and enter the militia office. Scan the back wall on the opposite side of the room from Kandros. Scan the sabotaged panel (**3**).



INVESTIGATE THEPATHFINDER HQ SITE

Enter Director Tann's office and scan the wall to your immediate left to find another sabotaged panel (**4**). Scan the wall in the same location to trace a line through the wall, running out of the office and up to the top deck of Colonial Affairs. Scan the power junction box (**5**) on the back wall of the upper deck.



The third panel in operations is on the wall (**6**) near the entrance to Kesh's office. Scan to see a conduit running through the wall from the console beside the stairs (**2**) to this one. When all panels have been scanned, Raj contacts you and determines that the malfunctions are indeed the result of sabotage, and that Zarah Kellus worked on these panels. She's currently on the Hyperion in the habitation deck.

CONFRONT THE SABOTEUR

HYPERION: HABITATION DECK

Travel from operations to the habitation deck. With this quest selected, follow the navpoint to Zarah Kellus, who's working on the central console in the atrium. Confront her (**7**) with the evidence of sabotage, and she claims both she and Raj have been framed.

INVESTIGATE THE SECURITY FOOTAGE

NEXUS OPERATIONS

Travel from the Habitation Deck back to Nexus Operations. Enter the Colonial Affairs office on the lower floor. A security console (**8**) can be accessed here. Find the security footage. Activate the three different security footage files within the interface, only to find them all corrupt.

INVESTIGATE THE SECURITY FOOTAGE

NEXUS OPERATIONS

Travel from the habitation deck back to Nexus operations. Enter the Colonial Affairs office on the lower floor. A security console (**8**) can be accessed here. Find the security footage. Activate the three different security footage files within the interface, only to find them all corrupt.

SCAN SECURITY PERSONNEL IN THE OPS CENTER

SAM can identify the culprit from the scrambled security footage if you scan for human males on the Nexus and Hyperion. Start by climbing the stairs and scanning the security guard, Lieu Dutt (**9**). He's not the culprit. Head back down the stairs and scan Bart Cummings, who's standing behind Kandros near the Strike Team Missions interface. Not it.

SCAN NEXUS SECURITY TRANSFERRED TO THE HYPERION

HYPERION: HABITATION DECK

Travel back to the Hyperion habitation deck and scan the kneeling security guard (**10**) in the first room to the right. SAM reports a partial positive reading and says this is most likely your suspect.

CONFRONT DALE

Dale Atkins (**10**) reports to Kandros, so he'd have the clearance to pull off this high-level sabotage. Confront him, and he confesses and tells you to do whatever you want with him. You can choose to exile Dale with "You need to go," or turn him over to Nexus leadership by choosing "Not up to me." Either way, you earn a fair amount of AVP and XP for completing the mission.

REACTIONS

If you've visited Kadara Port, Dale name-drops Sloane during the interaction. Also, the next time you speak to Kesh, she reacts to the outcome of this mission and mentions it in an email.

MASS EFFECT ANDROMEDA

Secondary Ops

Suvi Anwar: New Discoveries

Mission Type: Allies and Relationships

Prerequisite: Must have pursued a relationship with Suvi

Start Location: Tempest

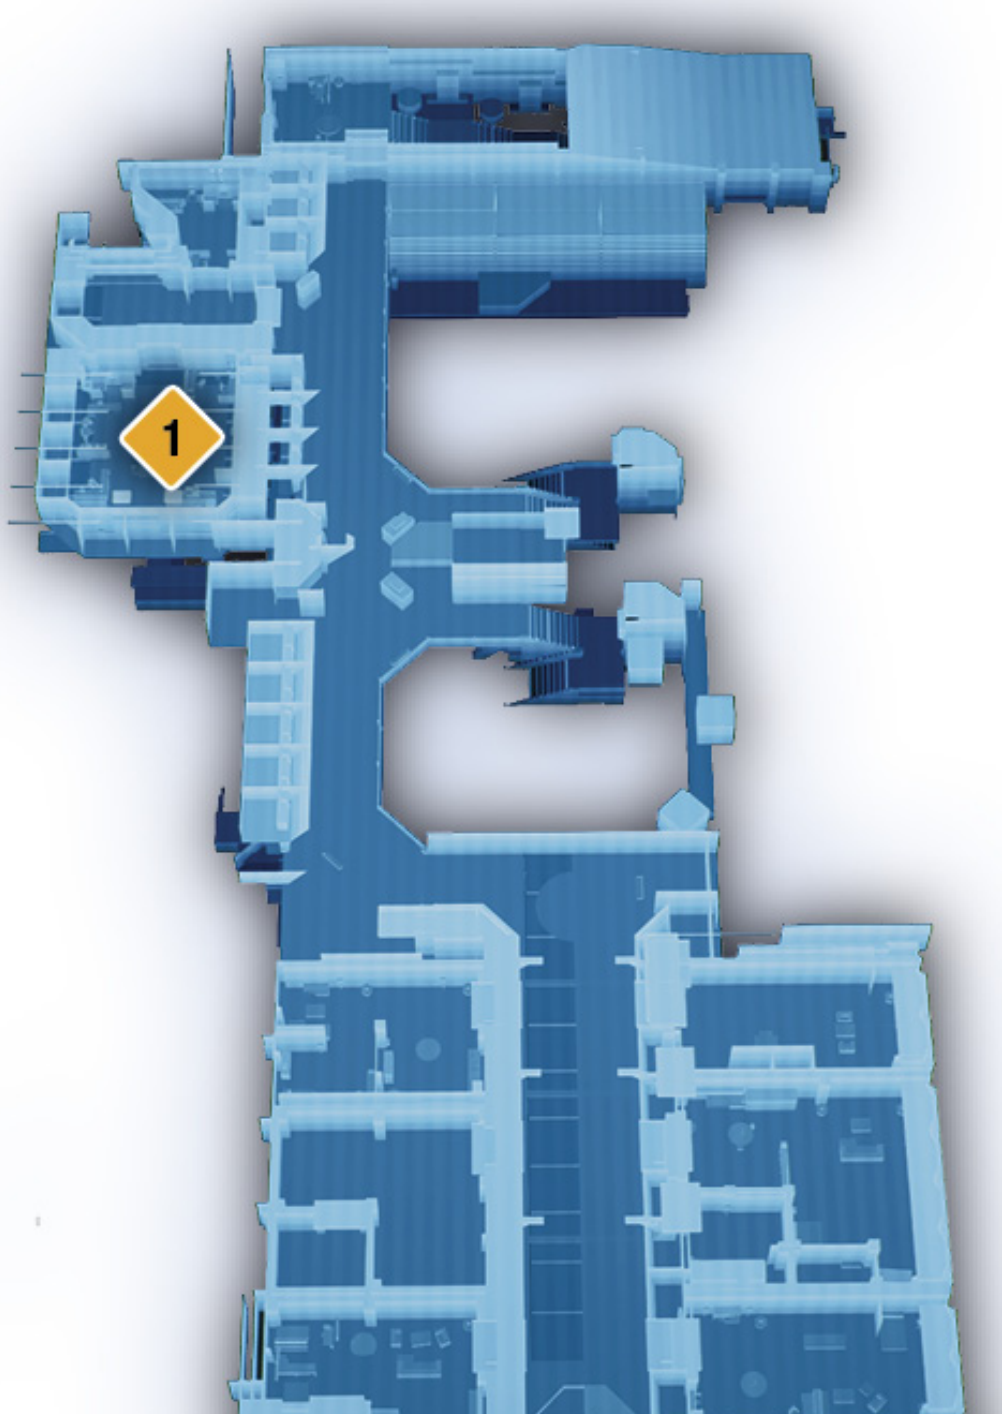
Unlocking: Read email from Suvi.

READ EMAIL FROM SUVI

TEMPEST

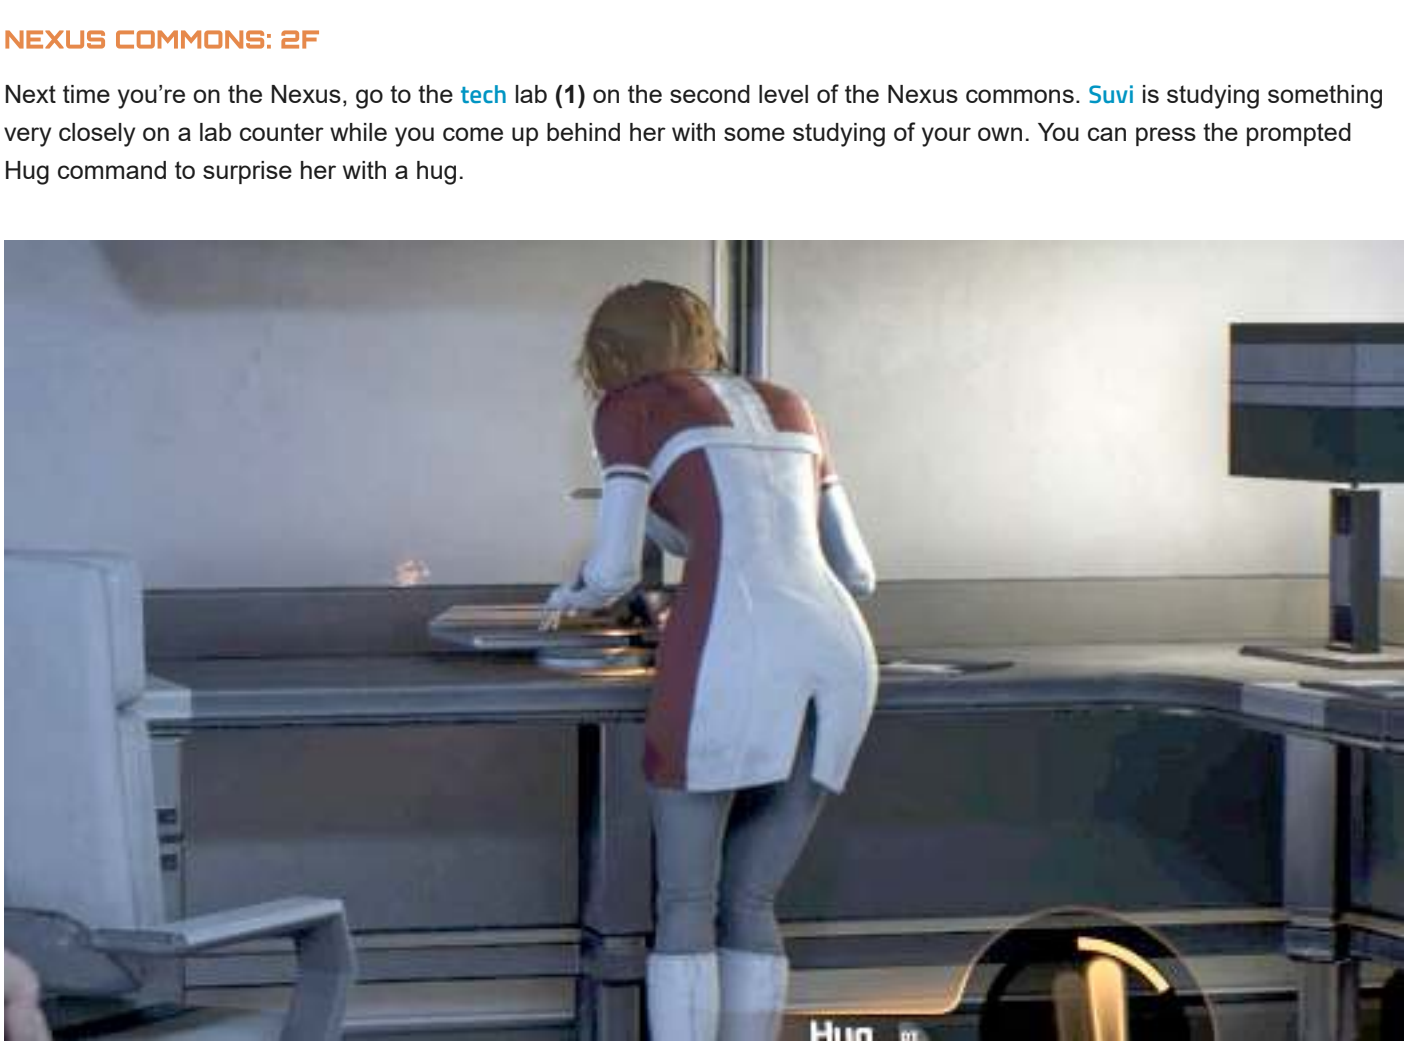
Read the email from Suvi titled “Message from Suvi.” She asks you to meet her at the tech lab on the Nexus.

MEET SUVI AT THE NEXUS TECH LAB



NEXUS COMMONS: 2F

Next time you’re on the Nexus, go to the tech lab **(1)** on the second level of the Nexus commons. Suvi is studying something very closely on a lab counter while you come up behind her with some studying of your own. You can press the prompted Hug command to surprise her with a hug.



She’s very excited about her Jardaan project and shows you her amazing discovery. Continue to choose passionate replies to take the interaction into more intimate territory, until you receive a Kiss prompt and the conversation option to be exclusive with her. If you want to be, select “I’d love to forever,” or if not, “Nothing’s forever.” How romantic.

MASS EFFECT ANDROMEDA

Updated: 03.21.17
Taming a Desert/Making This Dust Bowl Livable

Mission Type: Nexus Assignment: Kadara

Prerequisite: Land on Kadara

Next Location: Kadara

Unlocking: Approach one of these Nomad motorbikes

ACTIVATE BLACKBIRD'S NOMADLYNX

BLACKBIRD

Head to the Kadara Dropship motorbike stash to another Nomad spot, which must be activated and read to change Ryder's Blackbird motorbike. Each motorbike upgrade also upgrades the motorbike Peebing The Dust Bowl Livable. There are motorbikes to the northern, western, and southern areas of Kadara.

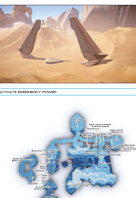
HEIDI'S NOMADLYNX

The nomadlynx is in the Nest of Nomads. Three pilums are required to unwrap the Nomad puzzle. All three are easily accessible on the nest of the Nomads platform. Shoot the pilums to unwrap the nomadlynx from the tree.

Scan the Aeration Vent on the top of each rib cage from that spire to the top of the rock adjacent rib and scan the Aeration Vent on the top of the rock adjacent rib. Scan the Aeration Vent on the top of the Nomad rock with the Nomad scanner to unwrap the nomadlynx and ready it for use at the garage.

ANDY NOMADLYNX

Find the nomadlynx in the Nest of Nomads. Unwrap the nomadlynx by scanning the Nomad puzzle pieces around the nomadlynx. Three pilums are required to unwrap the nomadlynx. Shoot the pilums to unwrap the nomadlynx from the tree with the Nomad scanner. Scan the pilums on the tree with the Nomad scanner to unwrap the nomadlynx and ready it for use at the garage.



ANGUS NOMADLYNX

The southern motorbike pile is in Paradise Ravine, west of a nearby Nomad shelter. A Fire Lance pilum, use Fire Nomad. Then smooth pilums to unwrap the Nomad nomadlynx, you can try some pilums for the peeling challenge.

The challenge can be confusing, but don't keep it simple. Each nomadlynx pile has a pilum on the left and right sides of the nomadlynx. Shoot the pilums with the Nomad scanner to unwrap the nomadlynx. Scan the pilums on the right and left of the nomadlynx to unwrap the nomadlynx and ready it for use at the garage.

You'll scan back at the left side while using each nomadlynx. Start with nomadlynx #3, it's important. It's the only nomadlynx that needs to be scanned from the left side.

Complete #3 to leave the nomadlynx #2. You may need to activate it a couple of times or a few.

Nomadlynx #1 is the most accessible with the last nomadlynx #3 and the closest pilums. It's one on the other, and both up at least at the same time. Shoot the Nomad and Cryomine Lancelets (#6) and #3 to get at the other pilums up at the same time.

Now all three pilums are up, so jump on the nomadlynx #3 to reach the top of the right nomadlynx #2. Shoot and scan the top nomadlynx #2 with the **Nomadlynx Scan**.

Scan the top of the Nomadlynx Scan shard, you can jump quickly to the top of the right-most #2 to scan the **Nomadlynx Scan**.

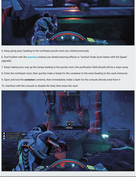
Now you're in the previous pilum-stash #3, you're in the middle of the #3. Scan the pilums on the left and right sides of the nomadlynx #3 to unwrap the nomadlynx and ready it for use at the garage.

INVESTIGATE THE VAULT'S ENTRANCE

UPGRADE

The Langrisi Nomad unit (#8) is in the center of Kadara.

ACTIVATE EMERGENCY POWER



CAVE NEWCOMER TUNNELS PUZZLE

At the entrance is a somewhat confusing puzzle, revealing a few Nomad consoles, all linked to locked door. Each of the consoles has a different color and a different number of lights on the console's left side. Your goal is to light up all five consoles. To find what each the controllers, see the following diagram.

The only task that some of it has just once. Knowing which console triggers which three consecutive makes the puzzle challenging. Start with the Nomad console with the single light, then the console with the two lights, and then the console with the three lights. Activate the three consoles in that order to open the door.

NEANDRAT'S OPEN THE ANDROMEDA PATH!

The puzzle is much simpler than the previous one. Activate the two Nomad consoles with consecutive loading up to platforms raised to the level, which can then be used to reach up to the higher platforms (which have Nomad consoles) in a clockwise pattern.

Activate the two right consoles, then return to a toggle the two previous ones (again). This activates the central platform, which then opens the locked door.

Go through the door to move around the western area. Fight through the Nomad Outposthere, then to enter the main area the Nomad door.

RESCUE THE VAULT'S LOCKDOWN

NEANDRAT IS UNLOCK THE DOOR FROM INSIDE, THE BRIDGE TO THE PURIFICATION CORNER IS

Next, there's another Nomad console to interface with that opens the door to the purification console and makes a platform appear to the left of the door. Activate the console to open the door.

Activate the Nomad console to the left to open the door to the purification console room. You can travel and activate the Nomad console and then travel to the door to activate the door. Or activate the door and then travel to the console.

NEANDRAT IS PROVIDE CONSOLE ONLY WHEN ALL OF THE LIGHTS ARE

Head to the Purification Console room. Here, you'll find a console with a number of buttons, nicknamed, we're nearby Nomad generating the controlled room. Use the various consoles to raise and lower four fillers to help you flush the purification system. Activate the Nomad console to the left. Once you get to the console there, you'll see a light. A blue light for another console nearby.

ACTIVATE ALL FOUR LIGHTS

The puzzle is much more manageable than the initial enhanced puzzle. Simply circle the room and activate any console that is not lit. Activate all four consoles to open the door.

After you've activated all four, a small surface appears. Toggling the final console opens a door leading down stairs to the vault entrance (although shooting is required). The battery is nearby during the escape pulse, activated Nomad. You're not done here yet, though. In the center of the purple room is a central raised platform with a Nomad puzzle. Notice it's gen 2 still active. Activate the Nomad console to the left of the door. Then activate the door. Activate the Nomad console to the left of the door.

ACTIVATE ALL FOUR LIGHTS

To the west of the road is another Nomad console. Interface with it to open up the door to the far west of the road, which leads to the Nomad Outpost. Activate the console to open the door. Then activate the door. Activate the Nomad console to the left of the door to open the Nomad Outpost.

RESCUE THE PURIFICATION PUBLIC AND EXIT THE VAULT

SQUARE SLOTS

Head to the Nomad building to the purification console and scan it. Interface the Nomad to guarding the console and exit whatever you want to. Before you activate the console, note the circular path down to the north and west. See the purple circles that end with the Cell Nomad Purple dot? It's near this console and it's the only way to obtain both collectors.

EQUIPPING WITH OPTIONAL LOADOUTS

1. Activate the purification console.
2. Jump up on the platform that's between the two ramps.
3. Jump up on the cell block. Run those going ramp and jump and wastes forward to the platform with the large glass.
4. Sprint toward the large glass at the same point, dash forward with an assault and wastes up onto the platform.

5. Keep going west, heading to the northwest pods room you visited previously.
6. Sprint forward with the Cryonis Lancelet and shoot/destroying #5 on on Tactical Cloak (see earlier) with the Speed Loadout.
7. Keep walking once you've the remote beating to the pods room. Use the purification Nest shoot with to a new record.
8. Enter the northwest room, then quickly shoot a Cryonis Lancelet (#6) to destroy to the west, heading to the vault entrance.
9. Open and loot the **container** container, then immediately make a dash for the console directly over from it.
10. Interface with the console to disable the Nest close the vault.

EQUIPPING WITH OPTIONAL LOADOUTS

1. Activate the purification console.
2. Jump up on the platform that's between the two ramps.
3. Jump up on the cell block. Run those going ramp and jump and wastes forward to the platform with the large glass.
4. Sprint toward the large glass at the same point, dash forward with an assault and wastes up onto the platform.

5. Keep going west, heading to the northwest pods room you visited previously.
6. Sprint forward with the Cryonis Lancelet and shoot/destroying #5 on on Tactical Cloak (see earlier) with the Speed Loadout.
7. Keep walking once you've the remote beating to the pods room. Use the purification Nest shoot with to a new record.
8. Enter the northwest room, then quickly shoot a Cryonis Lancelet (#6) to destroy to the west, heading to the vault entrance.
9. Open and loot the **container** container, then immediately make a dash for the console directly over from it.
10. Interface with the console to disable the Nest close the vault.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: A Flower for Kesh

Mission Type: Additional Task

Prerequisite: Finish Drack's Loyalty Mission

Start Location: Elaaden

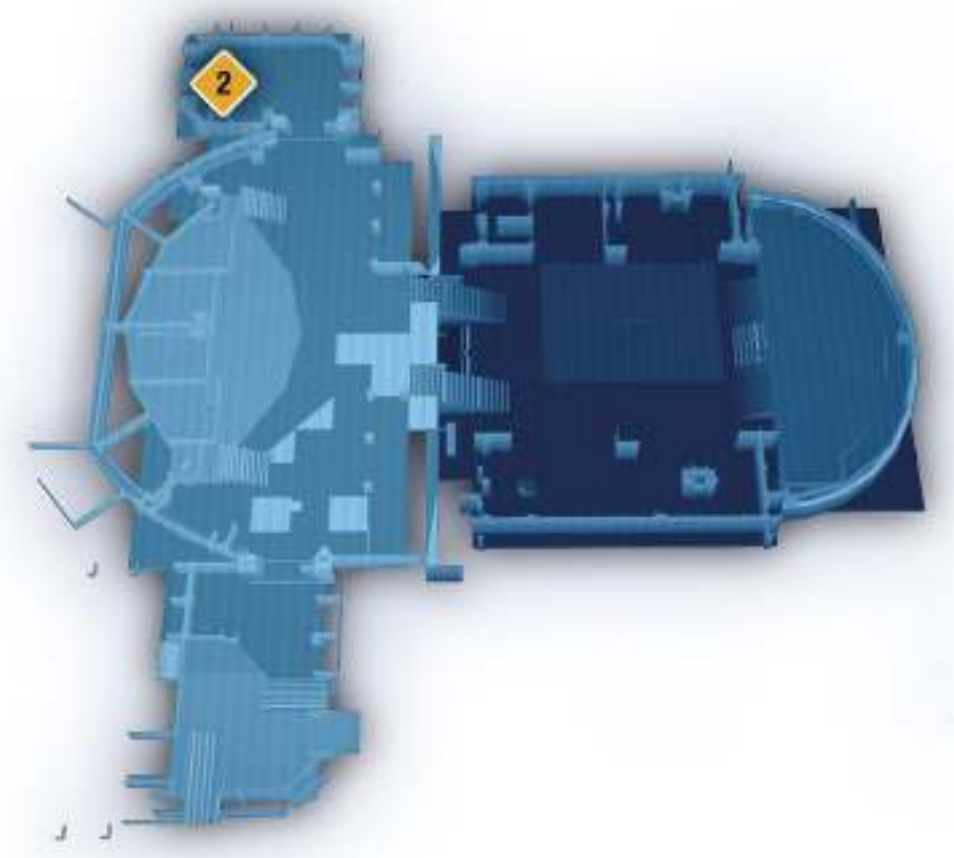
Unlocking: Speak to Vorn

TALK TO VORN

ELAADEN: NEW TUCHANKA

Head to the lower New Tuchanka colony and to the garden area **(1)** to talk to Vorn. He asks you to deliver a gift to Kesh the next time you see her. She's an old friend of his. Agree to give Kesh the special plant he's naming after her.

DELIVER THE FLOWER TO KESH



NEXUS OPERATIONS: KESH'S OFFICE

Head to Nexus operations, then Kesh's office to speak to Kesh **(2)**. If your conversations are caught up, then when you talk to her this time, you give her the flower from Vorn. She has no respect for his gardening. You can ask if she'd like you to take the flower back…or you can snap at her by defending him. The quest ends after the conversation.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: An Exile Raid

Mission Type: Additional Task

Prerequisite: Mission 2, Prodromos established

Start Location: Hyperion

Unlocking: Speak to the medic in the cryobay

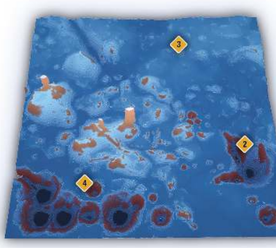
SPEAK TO MEDIC

HYPERION: CRYOBAY

After establishing Prodromos on Eos and after speaking to Director Tann, head to the medbay, not only to check on your sibling, but to speak to the medic **(1)** standing just inside the doors to the right as you enter the cryobay.

The medic is having a bad day. He says a large shipment of medical supplies intended for Prodromos was intercepted by the exiles. Tell him you'll deal with it.

FIND THREE SETS OF MEDICAL SUPPLIES



ELAADEN

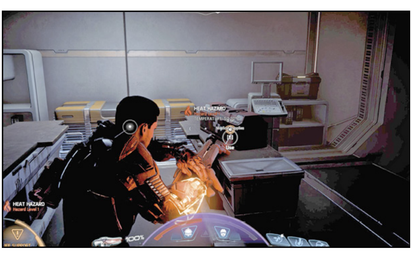
MEDICAL SUPPLIES 1

Head to the northeast side of the large pit next to where the Paradise is settled. As you approach, you spot a small outpost **(2)**. Exit the Nomad and draw your weapons; there are seven Raiders inside the building.

Defeat the Raiders and loot the place of all its containers. Enter the second-floor storage room to find the **medical supplies** the medic asked you to reclaim.

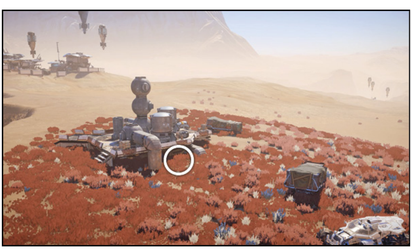
MEDICAL SUPPLIES 2

At the far northern reaches of the Sea of Ataraxia, you find a small Raider outpost **(3)** where the stolen Nexus medical supplies are located. Defeat the Raiders and Adhi at the multi-story outpost, and retrieve the **medical supplies** from the second-level storage room near a large **container** of loot. You can find some ammo and health pickups on the first level.



MEDICAL SUPPLIES 3

In Paradise Sands, attack this small outpost platform **(4)**, ridding it of all Raiders, and then take the **medical supplies** from the platform near the railing. If this is your last pickup for this quest, you earn a good amount of AVP, and Elaaden Viability is raised by +5%.



MASS EFFECT ANDROMEDA

Secondary Ops

Task: Beer Run

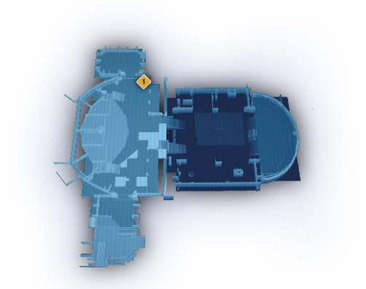
Mission Type: Additional Task

Prerequisite: Must have visited Kadara in "Hunting the Archon"

Start Location: Nexus Operations

Unlocking: Talk to Wilma near Kesh's office

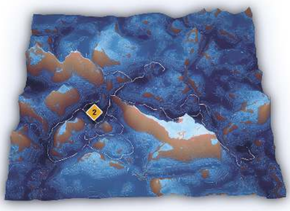
SPEAK TO WILMA



NEXUS OPERATIONS

Kesh's assistant, Wilma **(1)**, wants to surprise Kesh with some bootlegged swill from Kadara. She asked you to secure some.

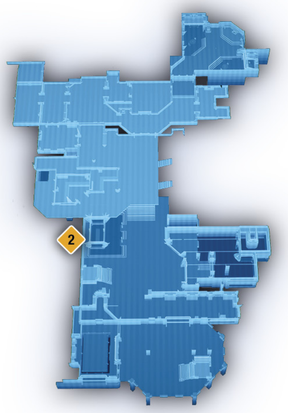
FIND THE BOOTLEGGERS' OPERATION ON KADARA



KADARA: SULFUR SPRINGS

On a peninsula, in the acid ponds, is a shuttle. Beside the shuttle is a Heleus inhabitant—a bootlegger turian peddling beer from some crates by his feet. He announces, "Fresh batch of Kadara's infamous home-brewed ale." SAM reminds you that Kesh's assistant asked you to secure some beer. That completes the quest, and you go on about your business.

KADARA PORT



Find this bootlegger's operation **(2)** in Kadara Port near the merchants. Read the **datapad** on the crates, titled "Best Booze in Universe Has Moved!" The message informs you that he got kicked out of Kadara Port, then directs you to the secret-stash spot.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Better Crafting

Mission Type: Additional Task

Prerequisite: When the Vortex is accessible

Start Location: Nexus

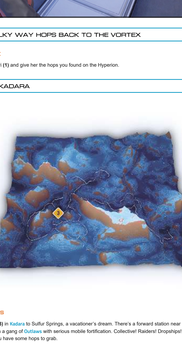
Unlocking: Speak to Anan, the female bartender at the Vortex

SPEAK TO ANAN

NEXUS: THE VORTEX

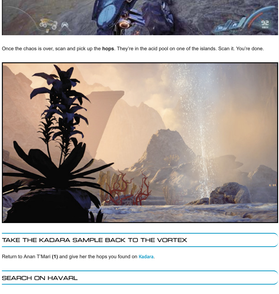
Speak to Anan T'Mari **(1)**, the female bartender behind the bar in The Vortex on the Nexus. She says her customers are complaining about the limited drinks menu and is wondering if you can help by finding some more drink ingredients—you get to test the drinks for free if you help.

SEARCH FOR SUPPLIES IN THE HYPERION ATRIUM



HYPERION: ATRIUM

Find the hops **(2)** in the small control room you reach just after the tram entry stairs and the stairs leading into the atrium. As soon as you enter this room, pivot to the right and find the **hops** in a box on the floor. Scan it.

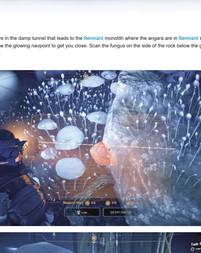


TAKE THE MILKY WAY HOPS BACK TO THE VORTEX

NEXUS: VORTEX

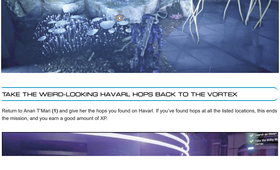
Return to Anan T'Mari **(1)** and give her the hops you found on the Hyperion.

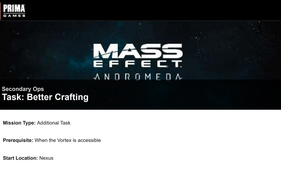
SEARCH ON KADARA



SULFUR SPRINGS

Follow the navpoint **(3)** in Kadara to Sulfur Springs, a vacationer's dream. There's a forward station near the hops you're looking for, along with a gang of Outlaws with serious mobile fortification. Collective! Raiders! Dropships! Take care of these impossible odds—you have some hops to grab.





Once the chaos is over, scan and pick up the **hops**. They're in the acid pool on one of the islands. Scan it. You're done.

TAKE THE KADARA SAMPLE BACK TO THE VORTEX

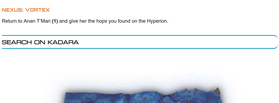
Return to Anan T'Mari **(1)** and give her the hops you found on Kadara.

SEARCH ON HAVARL

The hops here are in the damp tunnel that leads to the Remnant monolith where the angara are in Remnant stasis. Select this mission and follow the glowing navpoint to get you close. Scan the fungus on the side of the rock below the glowing plants to secure the **hops**.

TAKE THE WEIRD-LOOKING HAVARL HOPS BACK TO THE VORTEX

Return to Anan T'Mari **(1)** and give her the hops you found on Havarl. If you've found hops at all the listed locations, this ends the mission, and you earn a good amount of XP.



MASS EFFECT ANDROMEDA

Secondary Ops

Task: Boosting the Signal

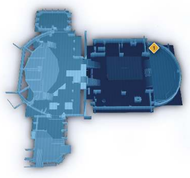
Mission Type: Additional Task

Prerequisite: Mission 2

Start Location: Nexus Operations

Unlocking: Speak to Davis Gar in Nexus operations

SPEAK TO DAVIS GAR



NEXUS OPERATIONS

Talk to Davis Gar (**1**), who's working in Addison's office in operations. Davis is a reporter for Helios News Service. He asks for your help since your job takes you to many planets, especially those that aren't set up for broadcasts. . .yet.

He asks you to place receivers on certain planets; it'll help get the news out to the most far-flung colonists. Accept the job.

Davis Gar: I need someone to cover remotely and keep us up-to-date. We only have a few colonies on Eos right now, and I'm
Skip
Talk

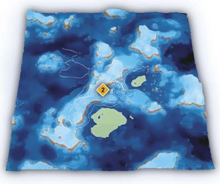
SETTLE NEW WORLDS

Before you can place a receiver on a planet, you must first establish an outpost on that planet. Place an outpost on each planet to complete this quest.

EOS

PLACE A RECEIVER ON EOS

EOS

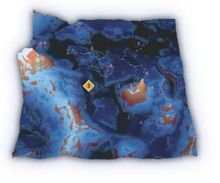


Once Eos is habitationat (40% Viability), drive to the high mountaintop indicated on our map. Look for a cargo supply drop. Inspect it closer for the Receiver Activate prompt. Execute the prompt to raise the receiver (**2**). Inspect the base of the tower on the ladder side to find the Nexus News Signal. Listen to the newscast for kicks.

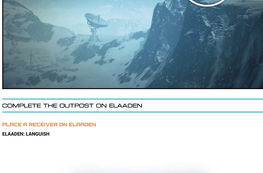
COMPLETE THE OUTPOST ON VOELD

PLACE A RECEIVER ON VOELD

VOELD



Complete the quest "Settling Voeld" by solving the Remnant vault challenge and by clearing the kett mountain base during the quest "Remove the Horn." The receiver (**2**) is built on the top of a mountain overlooking the Voeld settlement. It's possible you may have to fight an Ancient Eimoh for that location.



COMPLETE THE OUTPOST ON ELAADEN

PLACE A RECEIVER ON ELAADEN

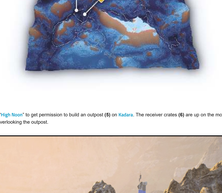
ELAADEN: LANGURSH

To place a receiver on Elaaden, give Morda the drive core during "Search for the Stolen Remnant Drive Core" and then create an outpost nearby. Head to the Langush navpoint (**4**) near the outpost in New Tuchanka. Drive up the steep mountain here and activate the receiver at the supply crates on the top of the mountain.

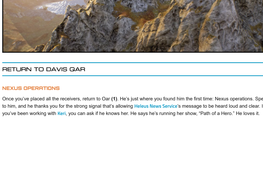
COMPLETE THE OUTPOST ON KADARA

PLACE A RECEIVER ON KADARA

KADARA



Complete "High Noon" to get permission to build an outpost (**5**) on Kadara. The receiver crates (**6**) are up on the mountain to the east, overlooking the outpost.



RETURN TO DAVIS GAR

NEXUS OPERATIONS

Once you've placed all the receivers, return to Our (**1**). He's just where you found him the first time: Nexus operations. Speak to him, and he thanks you for the strong signal that's allowing Helios News Service's message to be heard loud and clear. If you've been working with Keri, you can ask if he knows her. He says he's running her show, "Path of a Hero." He loves it.

MASS EFFECT ANDROMEDA

Secondary Ops
Task: Broken Family

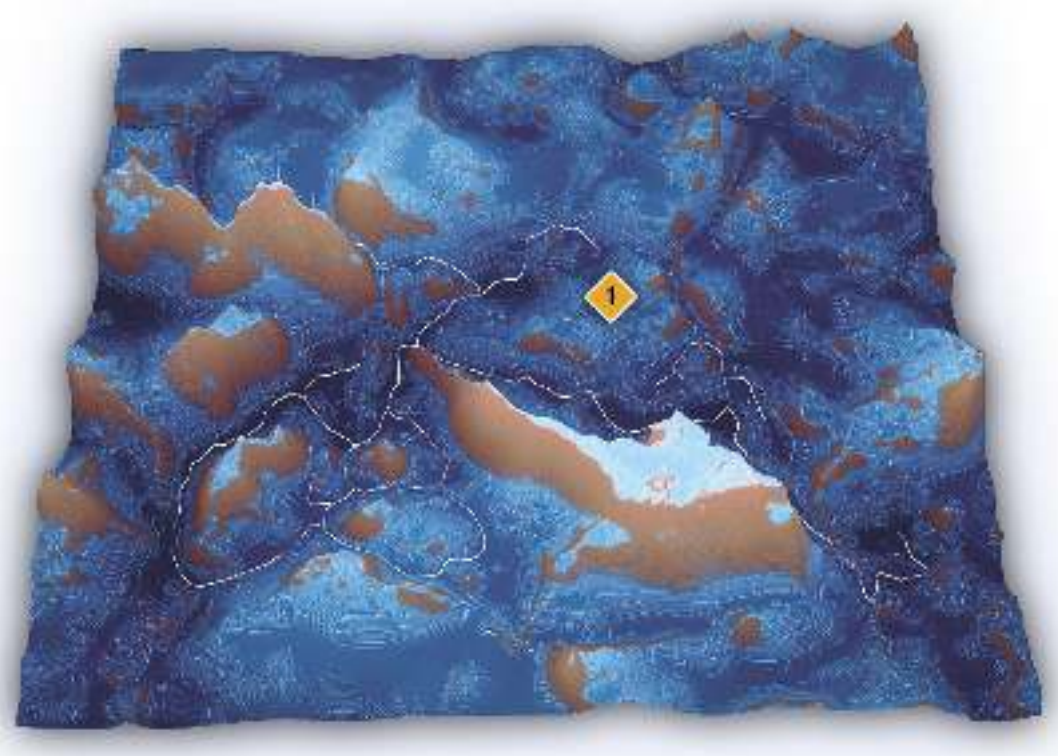
Mission Type: Additional Task

Prerequisite: Must have interrogated Vehn Terev in “Hunting the Archon”

Start Location: Kadara

Unlocking: Talk to the refugee

SPEAK TO THE ASARI REFUGEE



KADARA: HAARFEL

When you happen upon this hut **(1)** in the hills of Haarfel, you find the refugee on the porch. She explains that everyone here was banished from the Nexus and now lives off the grid, refugees on a world of exiles.

The asari refugee hasn’t spoken to her mother since she was banished. There’s a possibility the signal from her communications equipment could reach the Nexus, but it’s broken. Consider repairing the equipment for her.

SCAN THE BROKEN COMMUNICATIONS EQUIPMENT

Inside the hut, scan the **communications terminal** on the desk near the gated window.

Now get on top of the house and scan the **communications array**.

Secondary Ops
Task: Broken Wires

Mission Type: Additional Task

Prerequisite: Mission 2, Nexus Phase 2

Start Location: Nexus

Unlocking: Speak to Shapiro in hydroponics any time after Nexus Phase 2

SPEAK TO SHAPIRO

NEXUS: HYDROPONICS

Talk to Shapiro **(1)**, who's standing next to a terrarium on the upper level of the Nexus in hydroponics. He tells you there are obvious short circuits cropping up all over the place, and he could use a Pathfinder's keen eye on the situation.

SCAN THE TERRARIUM

The terrarium Shapiro is standing next to is scannable. Scan it with your omni-tool.

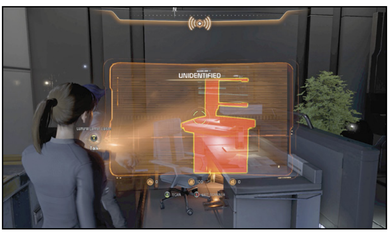
INVESTIGATE POINTS OF FAILURE IN THE COMMONS

NEXUS: TECH LAB

Head to the tech lab **(2)** on the upper level of the Nexus docking bay. As you enter, scan the station's left wall. You discover a **short circuit** in the damaged equipment. No need to try to fix it yourself; just scan it.

NEXUS: CULTURAL CENTER

Exit the tech lab and then enter the top-floor door of the cultural center. Behind the main desk in the top left corner of the room, find another **short-circuited machine(3)**. It appears someone tried to gain access to the base of the machine, but no data was extracted. Now take the tram to Nexus operations.



INVESTIGATE POINTS OF FAILURE IN OPERATIONS

NEXUS OPERATIONS

Find the final **short circuit** in Addison's office. The damage is in a console **(4)** near where the scientists were standing in the beginning of the game.

NEXUS: KESH'S OFFICE

Enter Kesh's office **(5)** and head to the opposite wall from the entryway to spot an interaction prompt that reads, "Creature." Examine it to find the rodent responsible for all the broken wires. Use your omni-tool to scan behind the equipment to find the huge Miniature Pallard—an addition to your wildlife scans. You can choose to capture it or kill it. Either way, the mission is completed once you select an outcome. You earn a large amount of XP.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Cache Flow

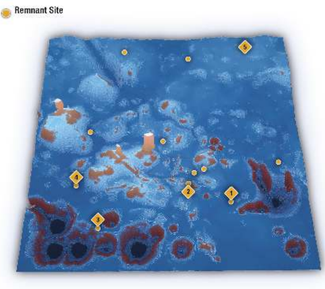
Mission Type: Additional Task

Prerequisite: Unlock Elaaden

Start Location: Elaaden

Unlocking: Scan a Remnant device

LOCATE DATA CACHES



ELAADEN

SAM extracts an entrance code for an intriguing Remnant vault after you successfully find and scan four Remnant data caches. The particular Remnant sites where these data caches spawn are static; however, the data caches themselves spawn randomly at some of these sites.

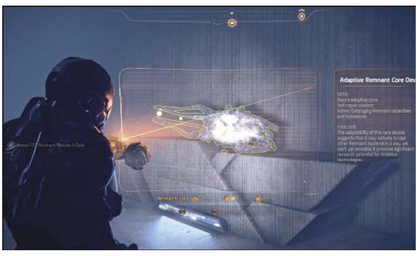
To beat the randomness, we've marked our map with the locations of all possible static Remnant sites. We've also numbered four of them where we found the caches: **(1)**, **(2)**, **(3)**, **(4)**. Keep in mind that these data caches spawn at Remnant sites, which are always guarded by Remnant. Look for a magnifying-glass icon over the caches. They're scannable and identified as "Remnant Data Cache."

ENTER THE REMNANT FACILITY

Once you've scanned four of the data caches, SAM gets a lock on the vault location. Follow the navpoint **(5)** to the northeast desert to find the hidden Remnant vault. Take the Gravity Well down to reach it.

ACQUIRE THE REMNANT DATA

Run through the vault, killing Raiders, Adhi, Pariahs, Anarchists, and two Destroyers. Get them all out of the way so you can reach the farthest chamber.



Once you make it to the back chamber, follow the navpoint to the prize: two **Adaptive** Remnant **Core Devices** sitting on Remnant shelves. Make sure to scan both and to empty the nearby **container** of its loot.

When you find the Remnant puzzle-locked **container** on your way in (or out), use our shot of the solved puzzle to help you get in.

Secondary Ops

Task: Catch and Release

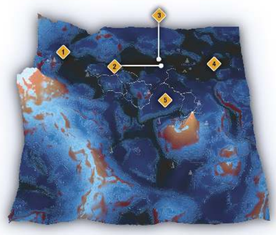
Mission Type: Additional Task

Prerequisite: Complete "Return to the Tempest" after visiting Aya in "A Trail of Hope"

Start Location: Voeld

Unlocking: Scan an angaran body with a kett tracking chip implant

SCAN THE ANGARAN BODIES



VOELD: NEAR THE SOUTH REMNANT MONOLITH

Scan four dead angaran bodies. They appear randomly at a few of many static kett ship crash sites. Defeat the enemies around each site and scan the area closely for angaran bodies. These bodies, when scanned, are revealed to contain kett implants that track the movement of the angara. You only find one angara at each site, so you have to visit multiple kett sites to find all the angara.

ANGARAN BODY 1

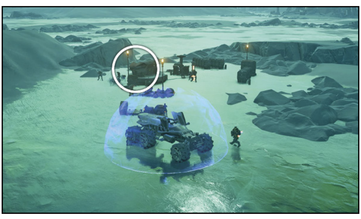
The first angaran body is often found at the crash site **(1)** in the ravine not far fromthe angaran Resistance base.

ANGARAN BODY 2

This kett camp, the dig site and the side of a hill, usually features a kett battle and a dead angaran to scan **(2)**.

ANGARAN BODY 3

This scene near the dig site usually involves a battle and a dead angaran **(3)**.



ANGARAN BODY 4

Defeat the kett on the ground and those arriving in a dropship when you reach this smoking ship crash **(4)** in the east. There's usually an angaran body at this one.

NO BODIES? KEEP DRIVING

The angaran bodies are placed randomly at the kett sites. If you don't find them at the sites we've listed, keep driving up and down the north river (west to south and back again). There are so many Remnant, kett, and ship crashes that you'll eventually find them all on this strip.

ENTER THE TRACKING SIGNAL'S LOCATION

SAM reverses the slave tracking signals to locate their source. Follow the navpoint **(5)** to a cave east of Techlix.

ELIMINATE THE KETT

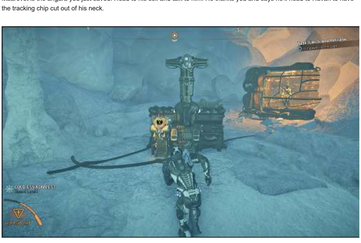
Defeat the many Wraiths, the Anointed, and the Chosen.

CUT POWER TO THE CAGE

Once the enemy is clear, cut the power to the cage holding the angara inside the cave.

TALK TO MAAREVET

Maarevet is the angara you just saved. Head to his cell and talk to him. He thanks you and says he'll head to Havarl to have the tracking chip cut out of his neck.



MASS EFFECT ANDROMEDA

Secondary Ops

Task: Clearing the Air

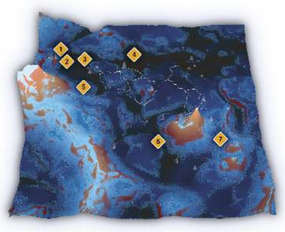
Mission Type: Additional Task

Prerequisite: Mission 2, must have traveled to Aya

Start Location: Voeld

Unlocking: Hack one of the randomly spawned consoles

HACK THE THREE KETT TERMINALS



VOELD

Kett terminals appear at small campsite-type outposts that are usually abandoned. A kett terminal can be seen from a distance, marked with a hand icon above it. Hack three of these consoles to unlock the next objective: **(1)**, **(2)**, **(3)**.

The consoles you can hack spawn randomly at any number of static kett campsites. If you don't find them at the locations we've listed, keep searching the similar sites around Voeld. You can often find them at the following kett sites: **(1)**, **(2)**, **(3)**, **(5)**, **(6)**, (7).

CONSOLE 1

This is the first site **(1)** you reach as you leave the angaran Resistance base.

CONSOLE 2

Many times, random spawns happen at consecutive sites visited. This one **(2)** is the next-closest location.

CONSOLE 3

There's a good chance the third console spawns at this kett site **(3)**. On the third hack, you receive the navpoint to the control center, which is the north holding site **(4)**.

APPROACH THE CONTROL CENTER

SAM assembles the passcode required to access the kett shuttle control center. Gain entry and shut the control center down to keep kett shuttles out of the air. Jump into the empty prison office through the window to follow the navpoint.

USE THE PASSCODE ON THE DOOR

Approach the navpoint on the wall, and use the passcode on the ornate console. This triggers a kett ambush.

DEFEAT THE KETT AMBUSH

The door on the opposite side of the room opens, allowing a dropship-load of kett inside, including Destined, Anointed, and Chosen. Hold down the house, or go play with them outside. Just take care of business.

UNLOCK THE DOOR

After defeating the final enemy, re-enter the same building and use the console again. This opens the door and reveals the communications console.

SHUT DOWN THE CONTROL CONSOLE

Enter the back room and use the console to shut down communications, forcing kett shuttles out of the air. This completes the quest. You earn a small amount of AVP and Voeld Viability +2%.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Cold Hard Cache

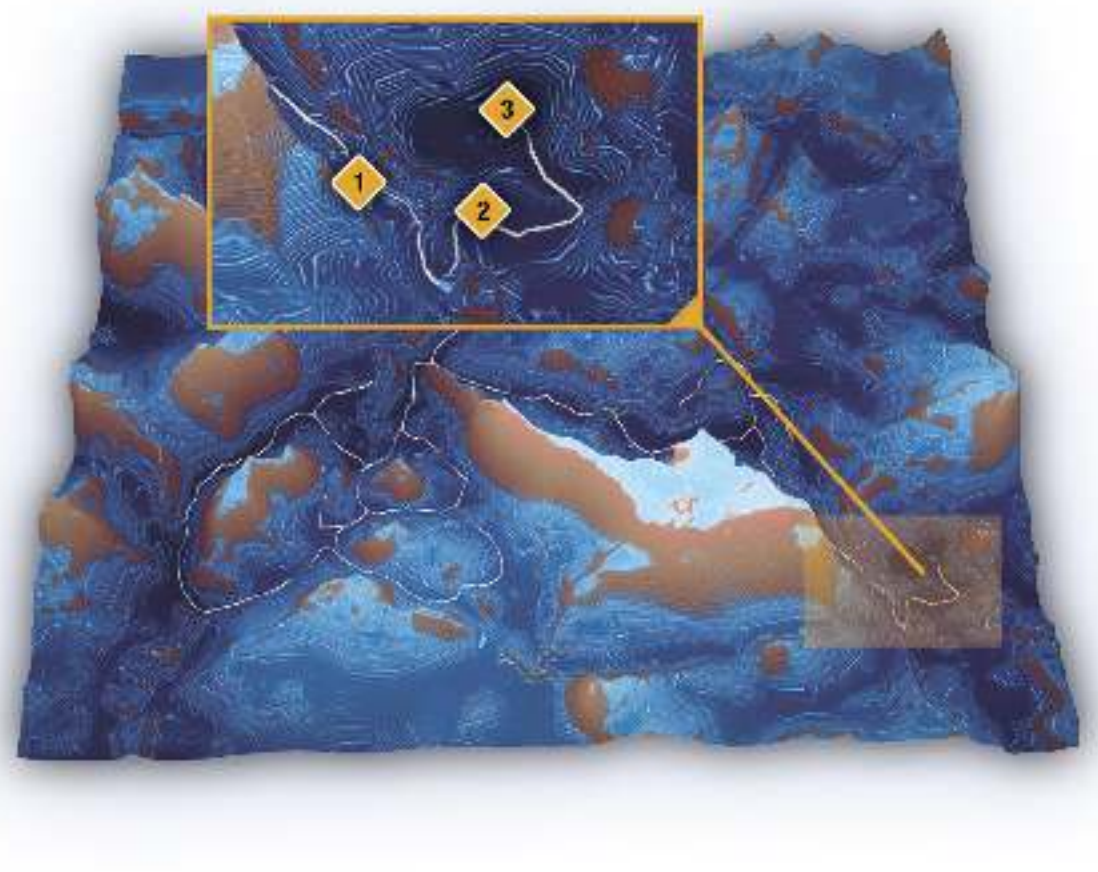
Mission Type: Additional Task

Prerequisite: Must have interrogated Vehn Terev in “Hunting the Archon”

Start Location: Kadara

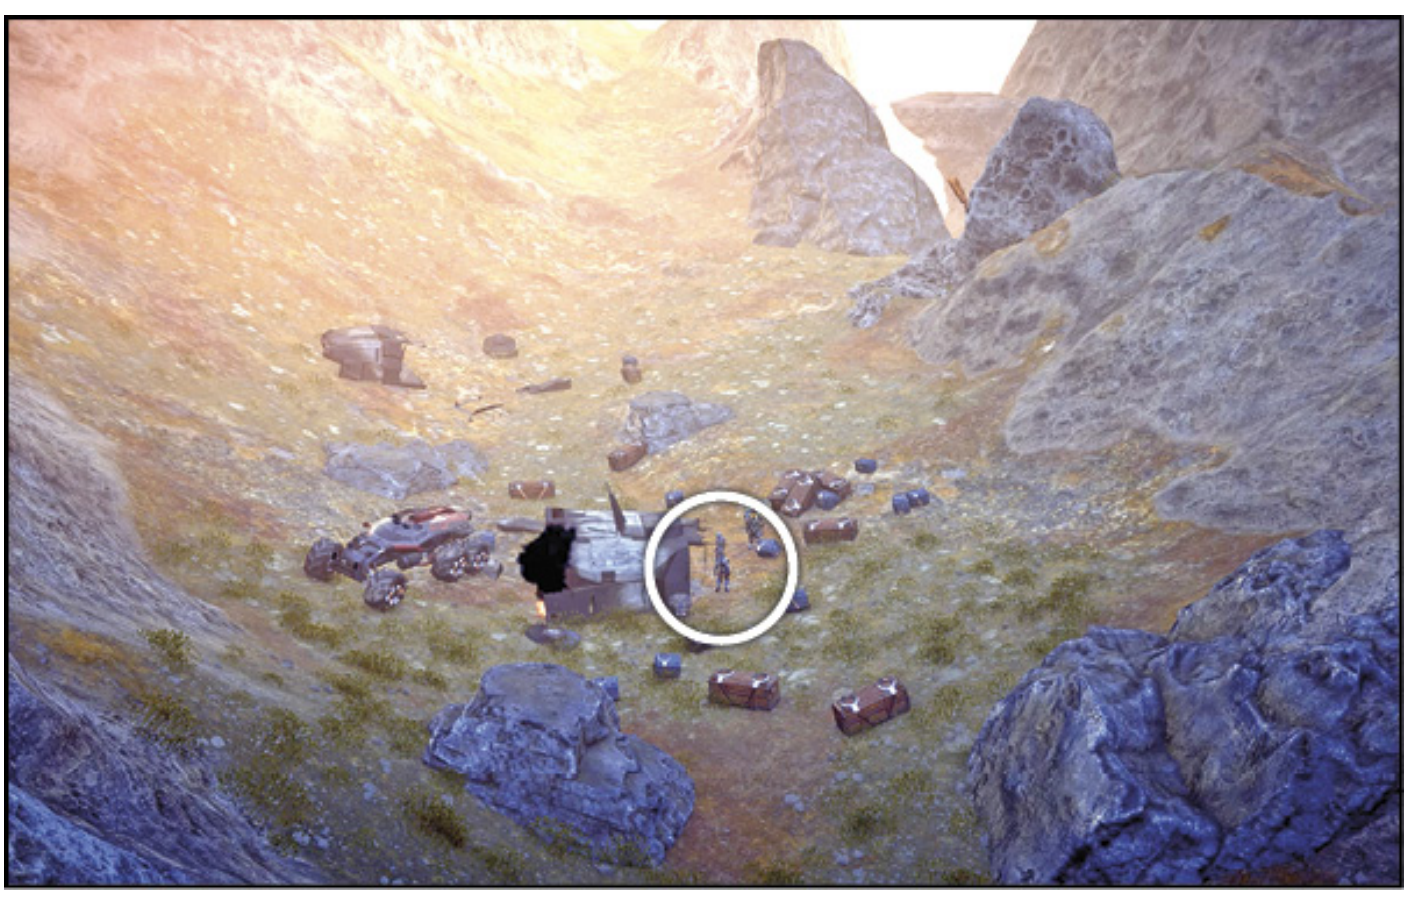
Unlocking: Approach the target area

SCAN THE WEAPONS CACHES



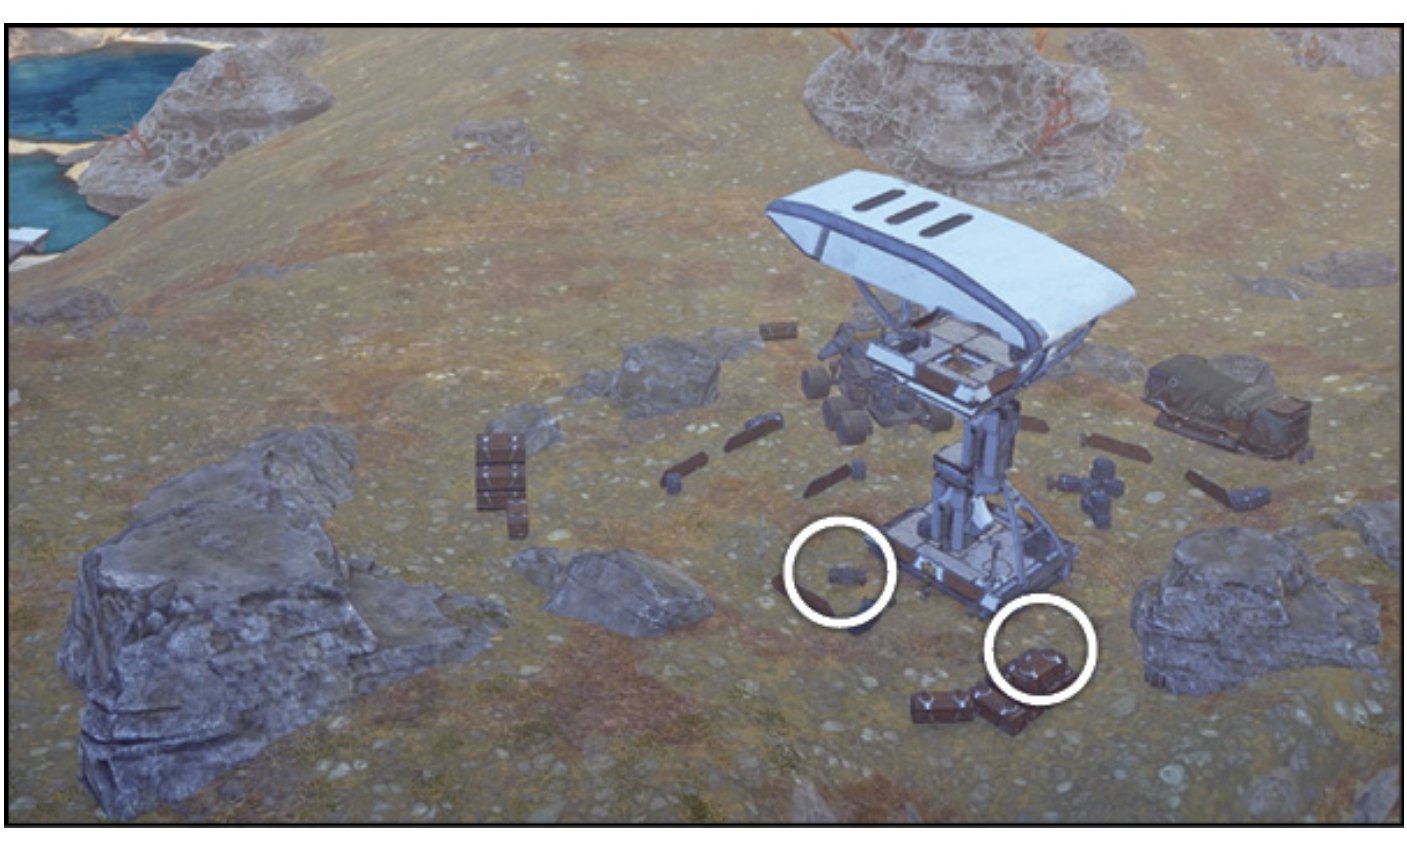
KADARA

Find the wrecked shuttle just south of the Spirit’s Ledge Forward Station. Scan the weapons **cache** crate **(1)** beside the shuttle.



TRAVEL TO THE NAVPOINT

Follow the same road southward and then continue north around the bend to find a camp with a sniper tower **(2)**. Scan the weapons **cache** and pick up the **datapad** from the edge of the crate. It’s a shipping notice.



SEARCH THE MESSAGE SOURCE

Follow the next navpoint **(3)** to the last outpost at the end of the Spirit’s Ledge road. As soon as you approach, you enter battle with the Outlaws.

DEFEAT THE OUTLAWS

When you reach this outpost **(4)**, you have located the weapons caches. Quickly rush the post and get to the top of the helipad.

PREVENT THE SHUTTLE FROM LEAVING KADARA

While fighting through the enemy’s front line to reach the shuttle platform, look near the shuttle for the row of explosives. Shoot the explosives to destroy the shuttle. Defeat the Hydra and the remaining enemies to complete this quest.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Comparatively Alien

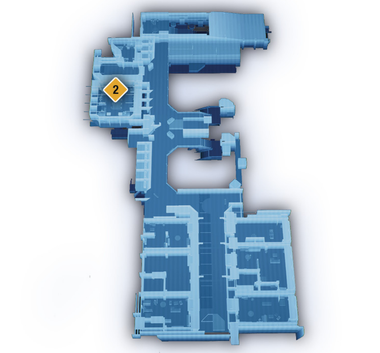
Mission Type: Additional Task

Prerequisite: Unlock the Tempest

Start Location: Nexus Operations or tech lab

Unlocking: Speak to Professor Herik

SPEAK TO PROFESSOR HERIK



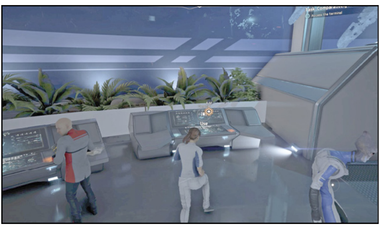
NEXUS OPERATIONS OR TECH LAB

Initially, all the scientists are together in operations on the rear deck (**1**). When the commons opens, the scientists move to the tech lab (**2**). Speak to the scientists to open a collection task from each.

You may need to speak to Professor Herik twice in a row to open the collection mission "Comparatively Alien." The first time you talk to him completes an objective in "Getting to Know the Nexus," as he's someone to get to know. Talking to him a second time (about wildlife scans) unlocks his collection task, in which you're to scan 10 Andromeda wildlife specimens.

ACCESS THE TERMINAL

After speaking to each scientist, you must also access a terminal (**1**) to confirm the scientists' quests (because there's not enough paperwork in Heleus). There's a terminal located in operations and a second one in the tech lab, so no matter where you find the scientists, you can immediately use a terminal to initiate their tasks. In this case, accept the task (to scan wildlife) by selecting "Final Proposal: Prof. N. Herik, et al."



SCAN 10 ANDROMEDA WILDLIFE SPECIES

This mission usually spans a greater part of your travels. If you scan every wildlife critter you can, you'll have this quest done quickly.

EOS

- Wildlife: Spitbug, Remnant Creeper (only around Remnant stuff), Kaerkyn, Shemrys, Challyrion, Eiroch, Ancient Eiroch, Taurg

HAVARL

- Wildlife: Remnant Creeper, Drall, Shemrys, Challyrion, Eiroch, Ancient Eiroch, Galorn, Rylkor, Wild Adhi, Manta

VOELD

- Wildlife: Remnant Creeper, Challyrion, Eiroch, Ancient Eiroch, Galorn, Wild Adhi

KADARA

- Wildlife: Remnant Creeper, Drall, Kaerkyn, Shemrys, Ancient Eiroch, Taurg, Wild Adhi

ELARADEN

- Wildlife: Spitbug, Remnant Creeper, Kaerkyn, Eiroch, Ancient Eiroch, Taurg, Wild Adhi

SPEAK WITH PROFESSOR HERIK

NEXUS COMMONS: 2F

At the tech lab in the Nexus commons (second floor), talk to Professor Herik to let him know you got all the wildlife scans. You earn credits and a large amount of XP!

MASS EFFECT ANDROMEDA

Location Type: Additional Task

Prerequisite: Mission 3 | Nexus Peace

Main Location: Nexus

Unlocking: Quest 6.10 - Corridor at Nexus Subhyperion

INFIRA: TO ION CAVERNS

INFIRA TO IONOSPHERE

Travel to Dr. Cambio (B), who's standing near the tree just outside the Kishes to Nexus hyperspace, this is a side task which creates an on the landing an elevation to the ionosphere and we can ride on the Nexus. During the conversation, the team (P) can reach the rim by paying the operator of Kishes/Ion Lava Rim. Fly past the pyramid and the Kishes tower to reach the rim.

COLLECT 10 PLANT SAMPLES

EOS

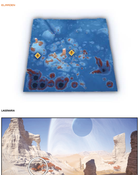
MEADOWS NEAR

Travel to Meadow 01 Rim. 10 plant samples are to spawn near the suggested waypoints for appropriate specimens to be tested. You can find these Rare (B) classified as Terrestrial Rifle (an edible plant) near some rocks on the southeast side of the lake, near Infira Hyperspace.

HAVING, COUNTING, SELLING

LAYOVER ASSETS

The next side quest we will be left to handle using the consultant, especially if you don't know what you're looking for. It's a lot of work to do. Come to the Nexus Outpost (A) and talk to Kandros to start. Kandros will send to Quest 6.10 - Part 2.



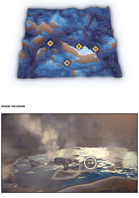
HANGARA FRACTURES

Once the Navigation Foundation (A), and don't forget to scan it up. It's found at the top of a hill in a cave created by these unstable volcanoes.

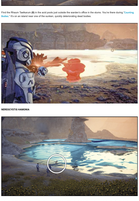
TYMELIE

CARRANCIA (TOWN)

Find the new open pavement in the negotiation room in the back of Nexus. Scan the Conductor's Records (B) and pick it up.



ELARRIEN



LAGRANIA

Find the Lagrania (A) in a little cave with an ancient building in the center. The target and some free range crops and a mining complex, called Ion Rim Mine (B) to the west. If you choose to take the building, then scan "Lagrania" (C) to unlock that mine's name Kishes from the quest "Ion Rim." In case you haven't found her, this is another task.

ANNATE: APOGEE

Find and scan the Annatte: Asteroid (A) in the same cave where you find it Anastasia Hogan. Scale the Tripods and Quest marker to get to the point.

CORVANE

RAGAK TAG-ADAR

Find the Ragak Tag-Adar (A) in the north and point and explore the asteroid cliffs in the sector. You're there during "Hunting Nexus." Scan the asteroid near white asteroid, quickly asteroid-ring island there.

KERECHTO'S HARBINA

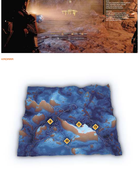
Find the Kerechto Harbina (B) in the far west of the point and from where the Kishes Hellenics support will be settled in Infira Storage.

APLASH-SCOVE

Find the Aplash-Scove (B) in Kishoff's river a cold Snowbeer at 4:48

PUREEA VALLEYS

Find the Pureeia Valleys (A) in one of the hard-to-find areas of the shadow and past.



RETURN TO ION: GUARDIAN AT HERJUS HYPERSPACE

HERJUS: AT ANDROMEDA

Once you've collected 10 of the seeds from the locations we've mapped, head to the Nexus commons and speak to Dr. Cambio about mysterious. You earn a good amount of XP for completing this quest.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Data Trail

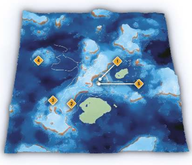
Mission Type: Additional Task

Prerequisite: After Mission 3, radiation must be cleared

Start Location: Eos

Unlocking: Discover and scan the Remnant data core

LOCATE THE REMNANT CORES



EOS

SAM extracts a navpoint once three Remnant cores are located. Following it may provide insight on the kett's plans for the Remnant. The Remnant data core nodes appear at random kett site locations (on Eos). This is where we found them most consistently:

1: NORTH OF PRODROMOS

This data core (**1**) may be located north of Prodromos and very close to a forward station.

2: SHEARTOP

Find this Remnant core (**2**) on a hill overlooking the lake with the Remnant monolith. Fight the kett in this camp to reach the prize.

3: SAINTOOTH PLATEAU

Find a Remnant core (**3**) at this remote kett drilling site. If you don't find the cores at these sites, check the many other kett sites on Eos. If you're having bad luck in your search, use a forward station or leave the planet and come back.

FOLLOW THE NAVPOINT

BLACKROCK TRADE

After locating three Remnant data cores, follow the data trail up into the hills west of the Blackrock Tande Forward Station to find this inconspicuous vault (**4**) dug into the ground.

ENTER THE REMNANT INSTALLATION

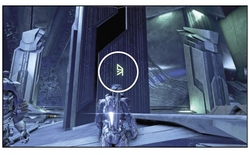
REMNANT VAULT

INTERVAL GLYPH SCAN

Enter the vault and take the Gravity Well down into the depths. On the main platform in the Gravity Well room is a **container** with Remnant writing. This is a Remnant Decryption Puzzle. You need to find and scan some glyphs to solve it. Find the **Interval Glyph** on the wall behind the mysterious container.

THERMODYNAMIC GLYPH SCAN

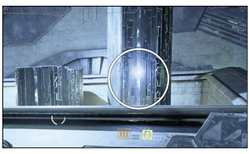
The second glyph is on the side of the large pillar on the opposite side of the Gravity Well from the platform. This is the **Thermodynamic Glyph**. Scan it and head through the long hallway, defeating the kett along the way to the next chamber.



ELIMINATE THE KETT

SEMIOSIS GLYPH SCAN

Open the door at the end of the hallway and defeat the kett in the second chamber. There are two large pits with pillars sticking out of them. When the kett are dead, walk around to the other side of the first pillar pit, face the entry, and point to your right. That's the pillar with the **Semiosis Glyph**. Exit this chamber through the door at the low end.



INVESTIGATE THE CONSOLE

Scan the **Adaptive** Remnant **Core Device** in the middle of the next chamber. Head into the little nook to the left of the core device and interface with the Remnant console. SAM says the console contains vital data on Eos wildlife.

KINETIC GLYPH SCAN

Before you leave this back chamber, scan the **Kinetic Glyph** located on the wall left of the exit. That's the last one needed to open the container in the Gravity Well chamber.

Use our shot to solve the Remnant Decryption Puzzle locking you out of the container, then collect your high-value booty.

DELIVER THE DATA TO PRODROMOS

Head to Prodromos (**5**) and enter the building closest to the parked Tempest. Access the terminal inside against the left wall and confirm the 'Request: Information on Eos' message to Bradley from Addison to complete the mission and earn 530 XP.

Secondary Ops

Task: Drone Recovery

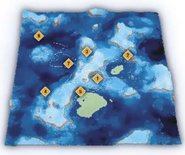
Mission Type: Additional Tasks

Prerequisite: Clear radiation after Aya, Mission 3

Start Location: Eos

Unlocking: Interact with the terminal outside a building next to Jacob Mittney in Prodromos

ACTIVATE MESSAGE TERMINAL



EOS: PRODROMOS

Read the "Lost Drones" message on the terminal **(1)** near the stairs of the building close to the Tempest in Prodromos. Eos' hostile environment caused a lot of drones to malfunction. Location coordinates are included. Mark them with a beacon for recovery.

SITE 1: PROMISE DRONE

Find a malfunctioning drone **(2)** on a cliff side northeast of Site 1: Promise. Scan it, then walk up the hill, approach the drone from the engine side, and interact with the Place Beacon prompt to build a beacon so the drone can be located and recovered later.

FIND THE FIVE REMAINING MALFUNCTIONING DRONES

There are six total crashed drones around Eos. Find them and place beacons to mark them. There are five others to find.

KETT BASE DRONE

This drone **(3)** is on cliff top near the kett facility. Scan it and interact with the Place Beacon prompt to complete this site's objective.

PRESSON DUNES DRONE

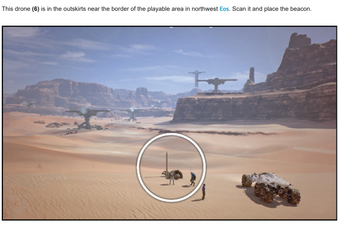
This drone **(4)** is on the flatlands in Presson Dunes near a cliff and a crashed kett ship where a "Task: Watchers" surveillance device is also located. Look for the smoke from the kett ship and head toward the nearby cliff to find the location of this drone. Scan it and place the beacon for recovery.

OUTLAND SPIRE DRONE

This drone **(5)** is nestled in between some shoreline rocks on the north side of the lake. Scan it and interact with the prompt to place the beacon.

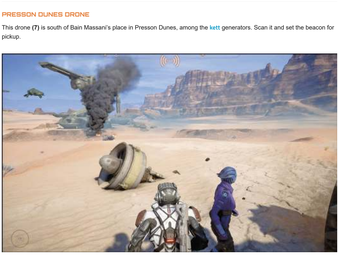
PRESSON DUNES DRONE

This drone **(6)** is in the outskirts near the border of the playable area in northwest Eos. Scan it and place the beacon.



PRESSON DUNES DRONE

This drone **(7)** is south of Bain Massani's place in Presson Dunes, among the kett generators. Scan it and set the beacon for pickup.



MASS EFFECT ANDROMEDA

Secondary Ops

Task: Getting to Know the Nexus

Mission Type: Additional Task

Prerequisite: Speak to Director Tann about settling Eos during Mission 1 Priority Ops “Nexus Reunion”

Start Location: Nexus Operations

Unlocking: Speak to Director Tann about going to settle Eos

SPEAK WITH DIRECTOR TANN

NEXUS OPERATIONS

This mission is about exploring the Nexus and getting to know everyone. If you’ve talked to some of the characters already, you’re not directed to talk to them again—after speaking to Tann **(1)** a second time. It’s even possible to compete this mission the moment it’s accepted, if you’ve already talked to everyone listed: Kesh, Kandros, Addison, and the scientists (Herik, Aridana, and Lucan).

MISSING ARKS

Speaking with Tann now opens the Allies and Relationships quest “Missing Arks.”

SPEAK WITH KESH

Find and speak to Nakmor Kesh **(2)** in her office opposite the Pathfinder HQ on the same level of the Nexus.

SPEAK WITH ADDISON

Find and speak to Foster Addison **(3)** on the top deck of Colonial Affairs.

SPEAK WITH KANDROS

Find and speak to Tiran Kandros **(4)** in the militia office, near the Strike Team Missions interface.

SPEAK WITH THE SCIENTISTS

Speak to Professor Kerik **(5)** on the opposite side of the Nexus. Speaking to him strikes up a conversation with all the nearby scientists—if you haven’t already spoken to them. Speak to all the scientists to unlock additional collection missions.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Gone Dark

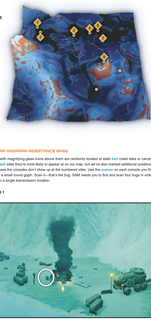
Mission Type: Additional Task

Prerequisite: Complete "Meet the Resistance"

Start Location: [nard]

Unlocking: Scan any of the angaran bugs

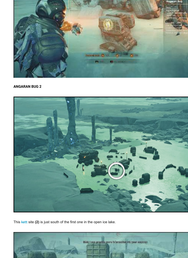
LOCATE AND SCAN RESISTANCE BUGS IN KETT CAMPS



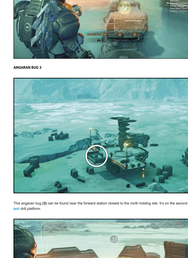
VOIDLO: NEAR PAGARIN RESISTANCE BASE

Four consoles with magnifying-glass icons above them are randomly located at static [kett] crash sites or campsites. We've numbered the [kett] sites they're most likely to appear at on our map, but we've also marked additional positions—more than four consoles will appear, but only four will have the numbered sites. Use the [scanner] on each console you find, and search all around it for a small round glyph. Scan it—that's the bug. SAM meets you to find and scan four bugs in order to narrow the signal source to a single transmission location.

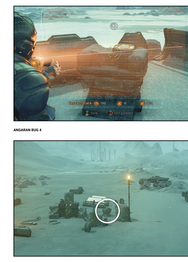
ANGARAN BUG 1



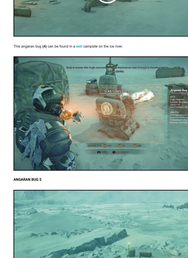
You're likely to come across this [kett] ship crash site (S) as you descend the steep mountainside while leaving the angaran Resistance base. Look for fire on a small strip of ice in a small gully. Defeat the [kett] and scan the glyph-like symbol on the console.



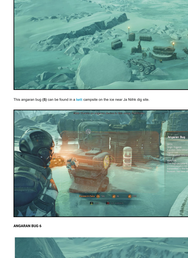
ANGARAN BUG 2



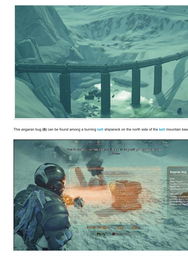
This [kett] site (S) is just south of the first one in the open ice lake.



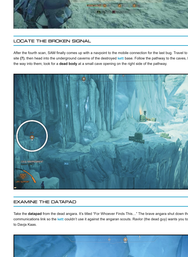
ANGARAN BUG 3



This angaran bug (S) can be found near the forward station closest to the north holding site. It's on the second level of the [kett] drill platform.



ANGARAN BUG 4



This angaran bug (S) can be found at a [kett] campsite on the ice river.

ANGARAN BUG 5

This angaran bug (S) can be found in a [kett] campsite on the ice near Ja'Nihk dig site.

ANGARAN BUG 6

This angaran bug (S) can be found among a burning [kett] shipwreck on the north side of the [kett] mountain base.

LOCATE THE BROKEN SIGNAL

After the fourth scan, SAM finally comes up with a waypoint to the mobile connection for the last bug. Travel to Ja Nihk dig site (F), then head into the underground caverns of the destroyed [kett] base. Follow the pathway to the caves, but don't go all the way into them; look for a **dead body** at a small cave opening on the right side of the pathway.

EXAMINE THE DATAPAD

Take the **datapad** from the dead angara. It's titled "For Whatever Finds This..." The brave angara shut down the communications link so the [kett] couldn't use it against the angaran scouts. Rankir (the dead guy) wants you to take this info to Dezja Kaas.

RETURN TO INTELLIGENCE OFFICER KAAS

VOIDLO: PAGARIN RESISTANCE BASE

Head to the Resistance base main headquarters room and speak to Dezja Kaas (B), who's standing next to the holo-globe. During the conversation, tell him you found the technician. He thanks you, and you earn a good amount of XP.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Herbal Entrepreneurs

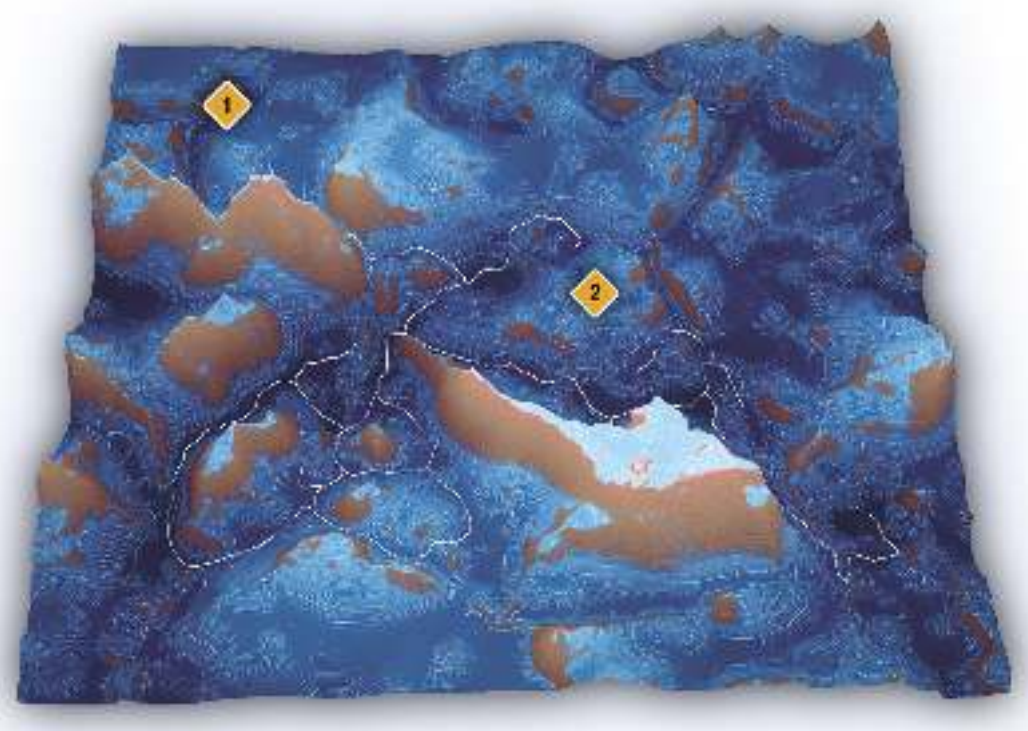
Mission Type: Additional Task

Prerequisite: Complete Heleus Assignment: Kadara, “Emergency S.O.S.”

Start Location: Kadara

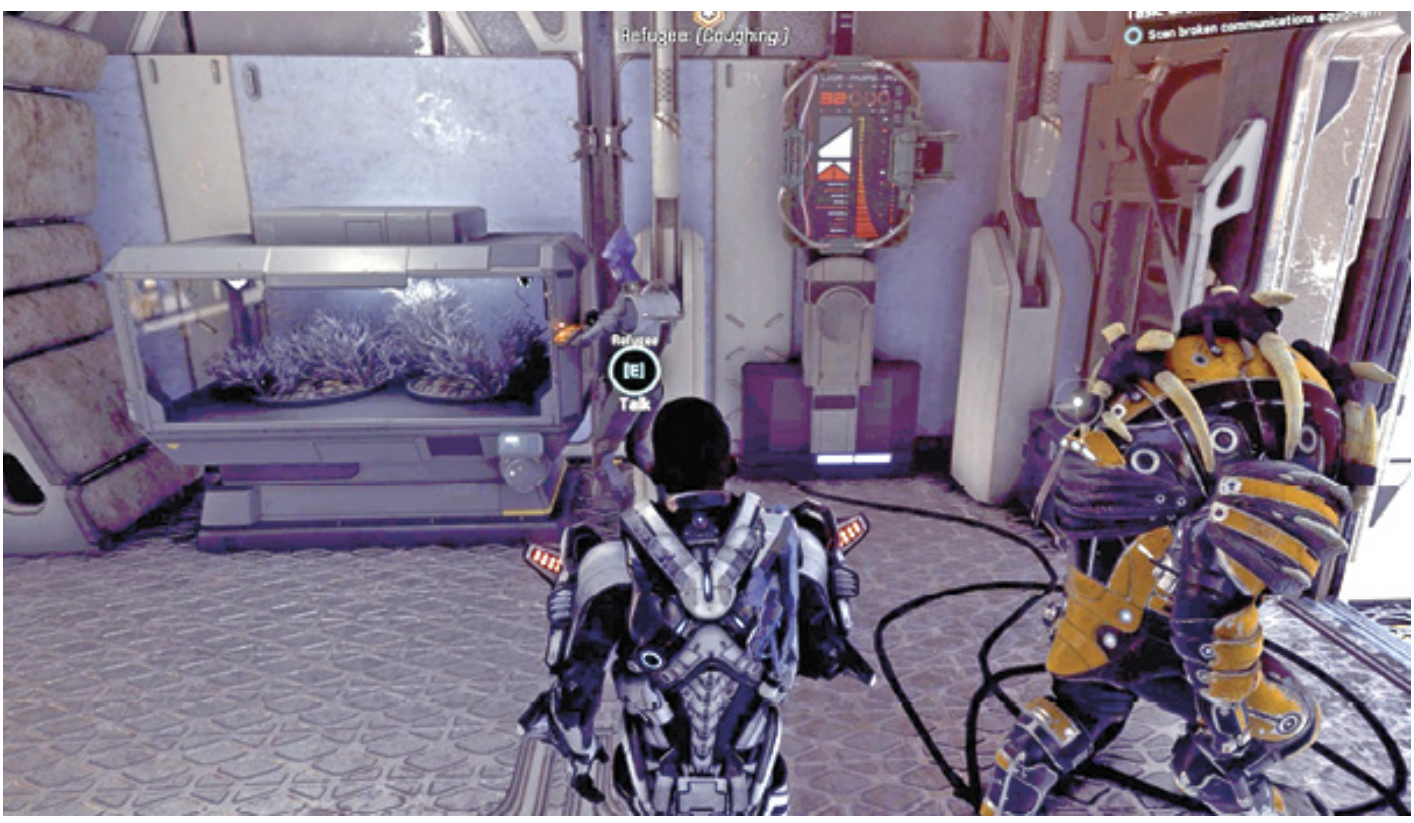
Unlocking: Find the UV light

BRING THE UV LIGHT TO THE HERBAL ENTREPRENEURS



KADARA

Remember talking to the Outlaw herbal entrepreneurs **(1)** during “Emergency S.O.S.”? Remember how they said they needed to replace their broken UV light? That’s what this quest concerns.



MASS EFFECT ANDROMEDA

Mission Type: Optional Task

Prerequisite: Reach the Nexus

Next Available: Post-Operations on Voeld

Unlocking: Reach Voeld Level

SPOILER: YES EVERYTHING

SOLVE SPARTAN PUZZLE SECTION 1 AND

Inside of the complex are puzzles to interact with to access the vault. When the scanned spaces are shut the complete [Puzzle Guide](#) for Spartan Vault Solutions and a complete Video Full Guide.

Outside of Vault are side activities. The first one is to help the scientists inside. Go to the one in the SW area and activate the Relay Station. Then go to the one in the NE area and activate the Relay Station. Then go to the one in the central location.

SOLVE SPARTAN PUZZLE SECTION 2 AND ACCESS THE TERMINAL

Inside the vault are puzzles to interact with to access the terminal and find the missing scientists and retrieve their data. Solve the puzzles in the first room. Once you enter the second vault section of the vault, there are 3 puzzles to solve. Solve the first puzzle in the second vault section. Solve the second puzzle in the second vault section. Solve the third puzzle in the second vault section.

RELAY: N7 CHEMICAL LAB

ASH

LIGHTSTATUS ICE SMALL: ELEMENT ASH SMPLE

Ice

The Asteroid Belt location has the Kralen station in Heliosphere Phase one. The Kralen Asteroid has many ore and metals.

Ore and minerals spawn from the Kralen Asteroid, but in specific areas only. Find more detailed here.

SPOILER: NOTE EVERYTHING

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Infection

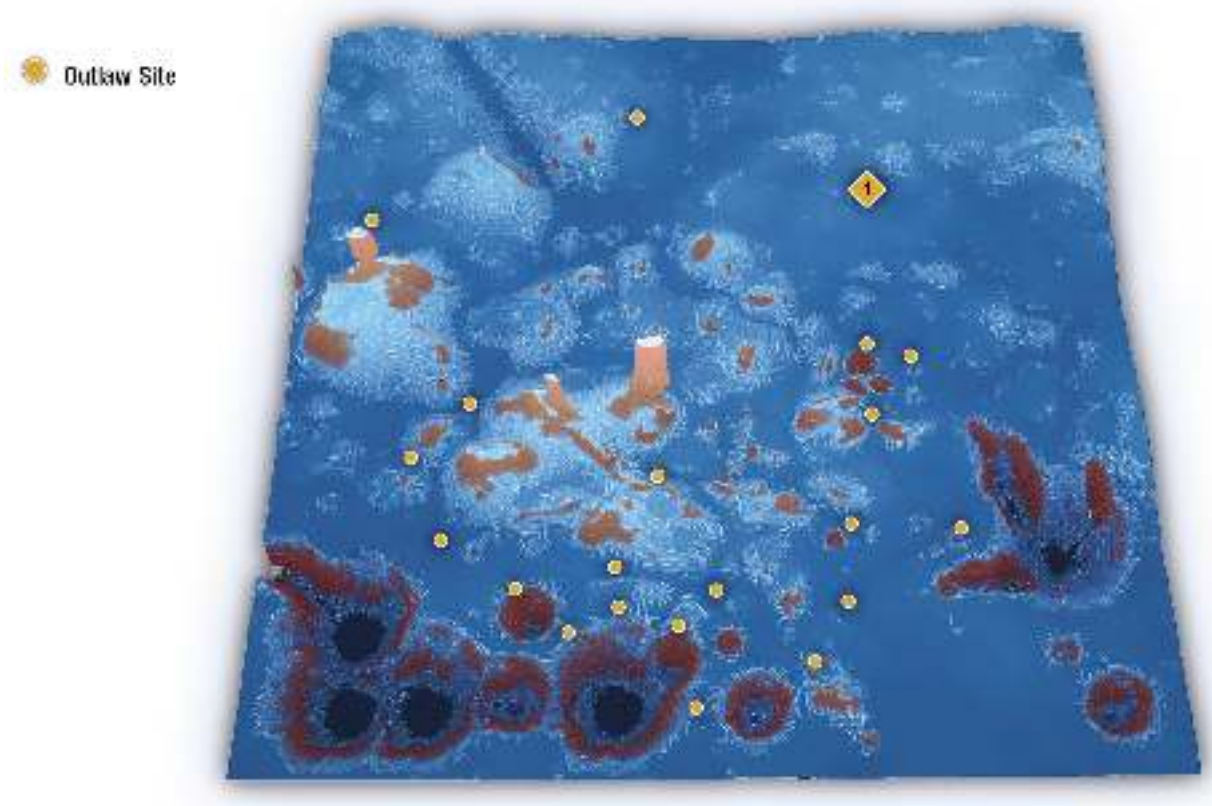
Mission Type: Additional Task

Prerequisite: Access to Elaaden

Start Location: Elaaden

Unlocking: Scan an infected scavenger body

SCAN THE SCAVENGERS' BODIES



ELAADEN

Infected scavenger corpses are randomly located at any of the Outlaw camps that we've marked on our map with dots. When you scan the first one, SAM comments that the Outlaw died from a highly infectious disease. When you scan the third corpse, SAM comments that the disease was transmitted through ingestion of animal tissue. The source is given in the form of a navpoint.

SEARCH FOR THE RADIATION SOURCE

SAM traces the source **(1)** of the scavenger disease to a single location. Decontaminating the source will prevent the disease from spreading to other colonists. The source is located at the north monolith.

MAKE THE RADIOACTIVE CANISTER INERT

Find the **broken containment canister** on the east side of the northern monolith, next to some boulders that form a ledge near one of the monolith pillars. Hack the canister to stop the spread of the disease and to complete the quest.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Investigating Embezzlement

Mission Type: Additional Task

Prerequisite: Unlock Kadara Port

Start Location: Nexus Commons

Unlocking: Speak to the dock manager

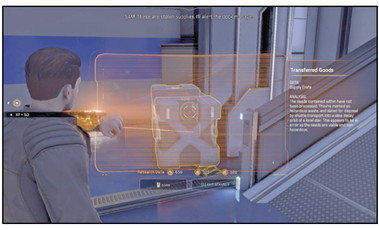
SPEAK TO THE DOCK MANAGER

NEXUS COMMONS: DOCKS

You likely see the dock manager **(1)** in the docks when you return from Kadara. When you talk to the reporter, Keri, in "Path of a Hero," you see this guy just behind her. Talk to him, and he speaks of unreleased supplies missing and possibly going to the exiles. You must search around the Nexus and Hyperion for them.

SEARCH THE COMMONS

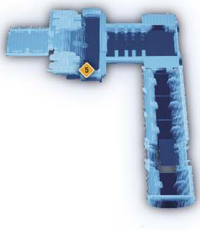
Don't leave the commons; instead, head for the navpoint indicating a crate **(2)** near the stairs to the second level in front of the Vortex. Scanning the stolen supplies alerts the dock manager. Take the tram **(3)** to the habitation deck.



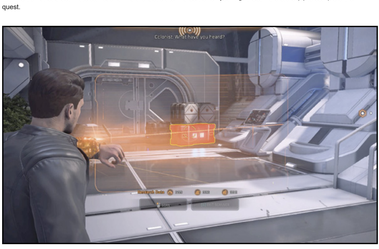
SEARCH THE HYPERION HABITATION DECK

Follow the navpoint to into the first room you reach after leaving the stairwell from the tram. Look in the right corner as you enter. Scan the crate **(4)** to send the info to the dock manager. Take the tram to the cryobay.

SEARCH THE HYPERION CRYOBAY



Exit the tram, head down the stairs, and find the last crate in a corner on your right. Scan the crate **(5)** to complete the quest.



MASS EFFECT ANDROMEDA

Secondary Ops

Task: Kadara's Ransom

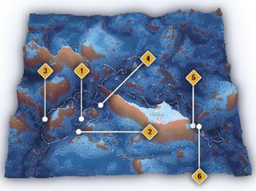
Mission Type: Additional Task

Prerequisite: Must have interrogated Vehn Terev in "Hunting the Archon"

Start Location: Kadara

Unlocking: Hit the Outcast outpost

ATTACK THE OUTCAST OUTPOST



KADARA

SULFUR SPRINGS OUTCASTS

When you happen upon this tall sniper's outpost **(1)**, defeat all the Adhi guarding the grounds and then take out the Collective Sharpshooters.

Examining the **datapad** on the crate at the base of the sniper's nest starts the quest. Apparently an Outlaw has pitted the Collective and Outcasts against each other to steal supply caches. To further the quest, you must find more datapads containing information about an Outcast member being held for ransom by the Collective.

THE DATAPAD LOCATIONS ARE RANDOM

A quest that asks you to find something without a navpoint usually means the search objective is spawning at a random location. These spawn at little wreck sites, little enemy camps, or Remnant sites. We mark where we've found them.

SEARCH FOR MORE DATAPADS

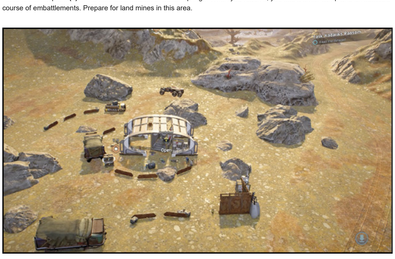
The little outposts or camps where these datapads show up are not random, but the datapad locations themselves are. They could be at any number of these camps, such as the one where you found the first datapad, and this little camp **(2)** down the road.

Defeat this outpost **(3)** on the westernmost road in Sulfur Springs. There's usually a **datapad** to examine here.

If you're still looking for datapads and they're not at the previously mentioned sites, try the wrecks and enemy camps on the other side of the map, around Spirit's Ledge locations **(5)(6)**.

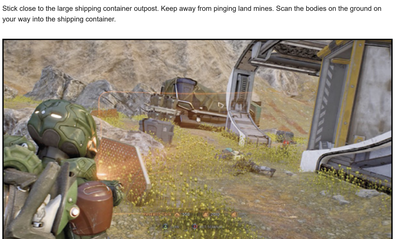
GO TO THE NAVPOINT

Head to the navpoint **(4)** in the northeast section of Sulfur Springs. When you reach it, you see a small camp and an obstacle course of embattlements. Prepare for land mines in this area.



INVESTIGATE THE BODIES

Stick close to the large shipping container outpost. Keep away from pinging land mines. Scan the bodies on the ground on your way into the shipping container.



READ THE DATAPAD

Open the **container** inside, and then explore the other side of the shipping container, where the navpoint leads to a body with a **datapad** lying beside it. Read the datapad. The letter is from Narisse. She admits to stealing the loot while everyone was distracted during a firefight. That completes the quest.

Secondary Ops

Task: Laws and Customs

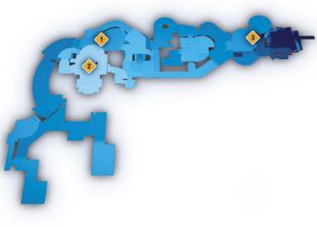
Mission Type: Additional Tasks

Prerequisite: Mission 3 or later

Start Location: Aya

Unlocking: The Moshae is rescued and Aya is open to visitors

SPEAK TO ARBITER RENAAV



AYA: MARKET

When you can wander free in Aya, head to the market and talk to Arbiter Renaav **(1)**, who's standing to the left just as you approach the market area. She educates you on the angaran rules of law and trade. Say, "I'm ready to know more." She directs you to the governor's office for more detailed information.

SPEAK TO ARBITER OHMDAAL

GOVERNOR'S OFFICE

From Renaav, pivot southward and take the stairs up to find the governor's office **(2)**. Speak to the angara behind the desk. Ohmdaal says he's been expecting you and has downloaded the laws and customs onto a datapad located on the desk right next to his console.

READ ARBITER OHMDAAL'S DATAPAD

After speaking with Ohmdaal, pick up the **datapad** that appears on the desk. It's an agreement contract to abide by all of Aya's weird rules. Naturally, you need more information before taking further action.

SPEAK TO ARBITER VRAAGEN

Now that you have the datapad info, exit the governor's office and head to the easternmost section of Aya, to the area just outside Resistance Headquarters **(3)**. Find Arbiter Vraagen among the consoles to the right of the headquarters' entryway. Speak to him. He's prepared a datapad with laws concerning war. The datapad appears on the crate beside him.

READ ARBITER VRAAGEN'S DATAPAD

Arbiter Vraagen's **datapad** states that morality will not be abandoned even when fighting an enemy that threatens their entire civilization. So no chicken-*poops* in this bunch. Sign us up. This concludes the mission, and you earn a medium amount of XP.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Little Mouse

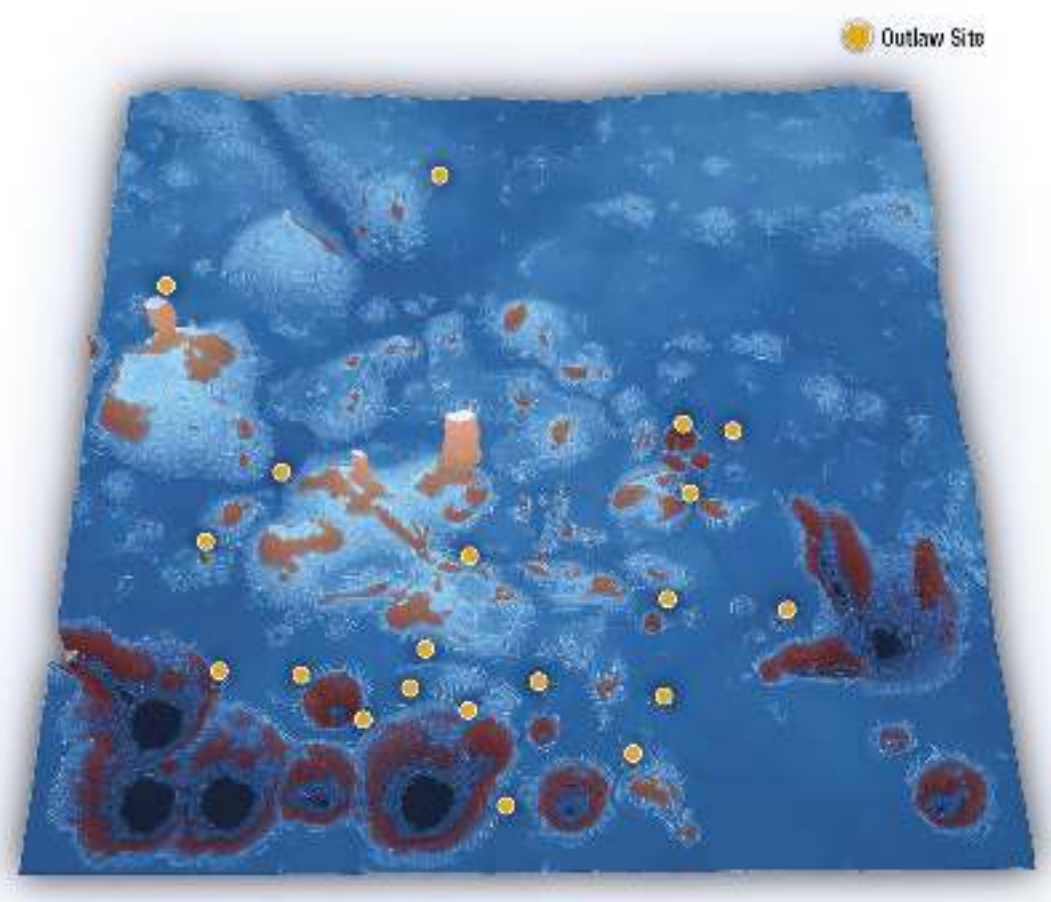
Mission Type: Additional Task

Prerequisite: Access to Elaaden

Start Location: Elaaden

Unlocking: Collect a Little Mouse datapad

LOCATE SIX DATAPADS



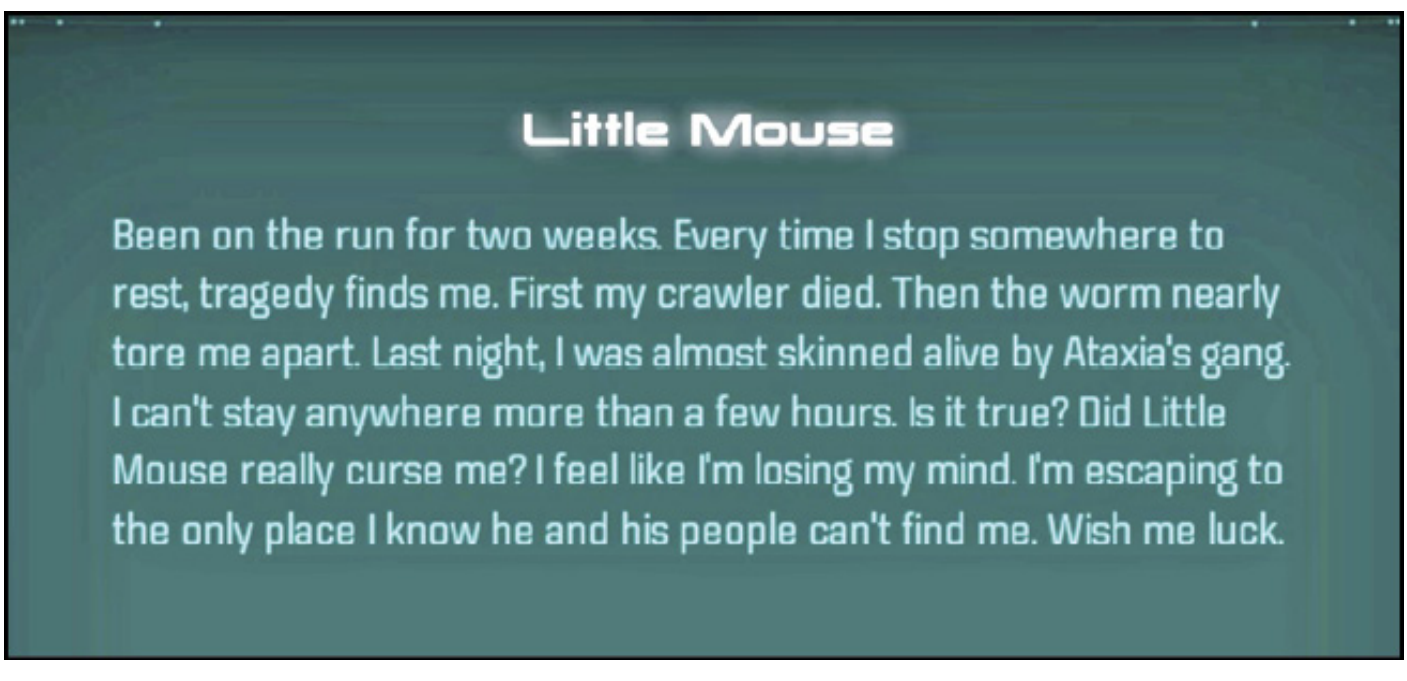
ELAADEN

Look for the datapads with the hand icon over them. They're only located at Outlaw sites. Little Mouse datapads spawn randomly at the static Outlaw sites we've marked with red dots on our map. Once you find one, SAM extracts a navpoint that leads to a large stash stolen from the gang leader named Little Mouse.

Follow the story in the datapad messages; there are six total. The last datapad is at the stash location. If you have difficulty finding them, do some fast traveling, or leave Elaaden and come back. After that, hit the same Outlaw sites you've hit before, and you might start getting datapads for each camp you visit.

TRACK DOWN THE STASH

The final navpoint for the stash is a random location at one of the Outlaw sites (marked as red dots on our map). One final datapad is found there. The scavenger writes about being on the run for two weeks, and about a curse following him: *Little Mouse*. Find the nearby **container** and loot the scavenger's treasure.



Little Mouse
Been on the run for two weeks. Every time I stop somewhere to rest, tragedy finds me. First my crawler died. Then the worm nearly tore me apart. Last night, I was almost skinned alive by Ataxia's gang. I can't stay anywhere more than a few hours. Is it true? Did Little Mouse really curse me? I feel like I'm losing my mind. I'm escaping to the only place I know he and his people can't find me. Wish me luck.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Local Cuisine

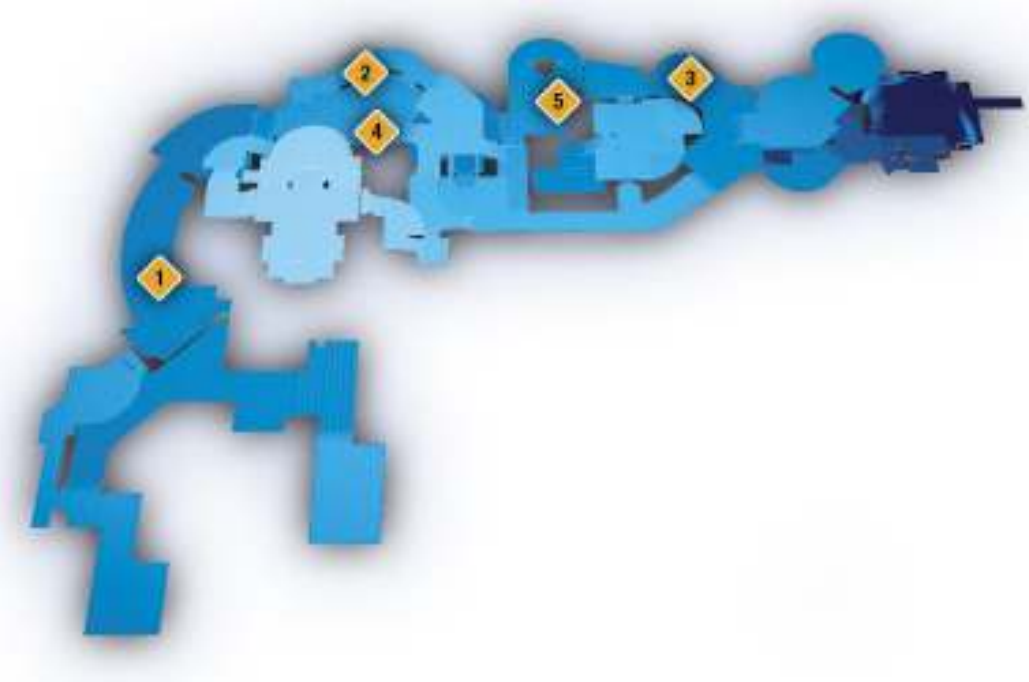
Mission Type: Additional Task

Prerequisite: Aya accepts human visitors

Start Location: Aya

Unlocking: Scan fruit

SCAN THREE FRUIT PLANT VARIETIES

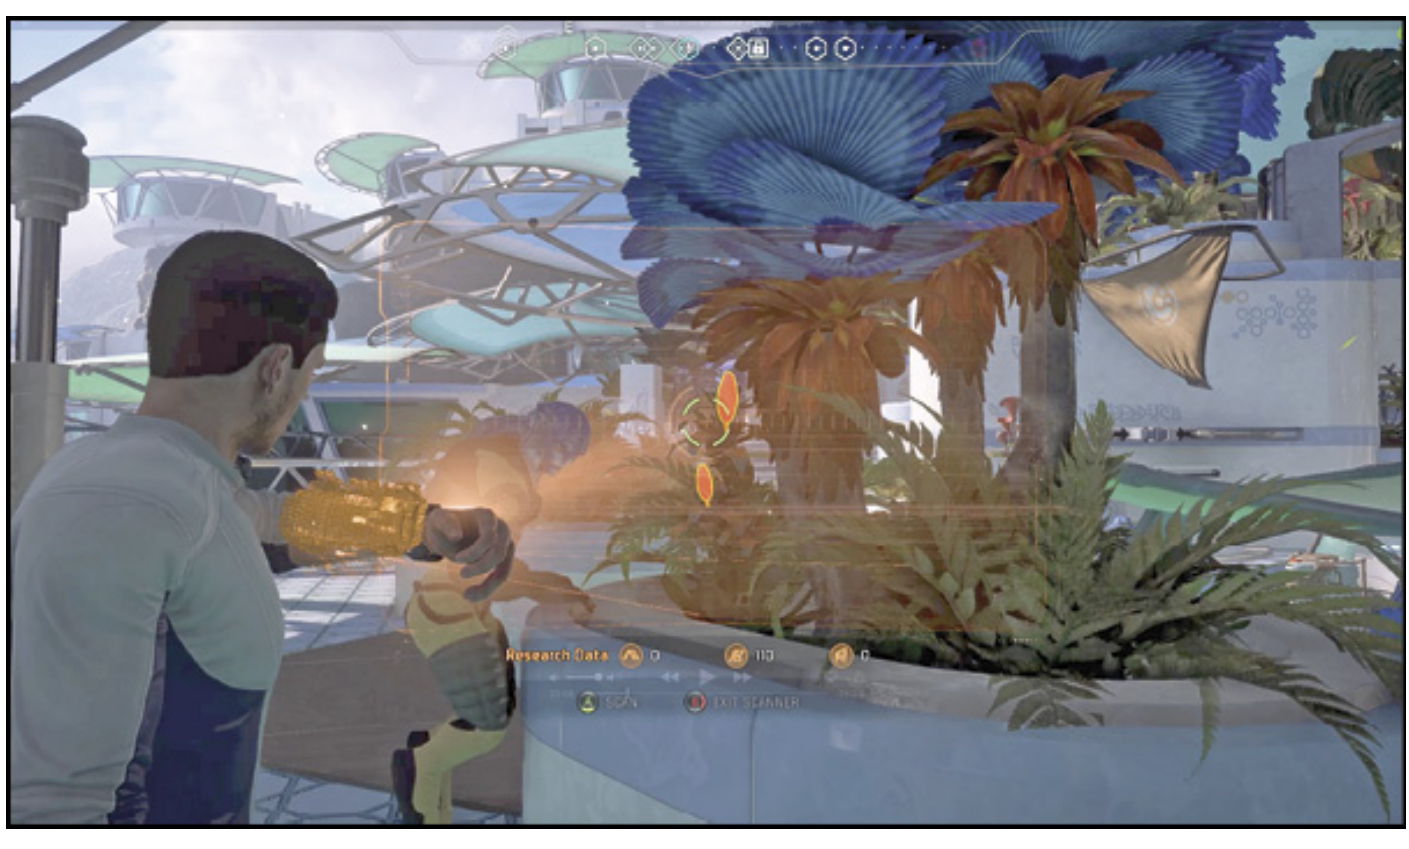


AYA

Lexi T'Perro thinks food on Aya may be safe for Milky Way species to eat. Collect food samples in the city and send them to Lexi.

Use your scanner in Memorial Gardens **(1)**. Scan up in the trees as you walk through. Here you find **Paripo Fruit**.

You find **Quilloa Fruit(2)** in the plants around the upper walkway of the market (too bad you have to buy it when you really need it).



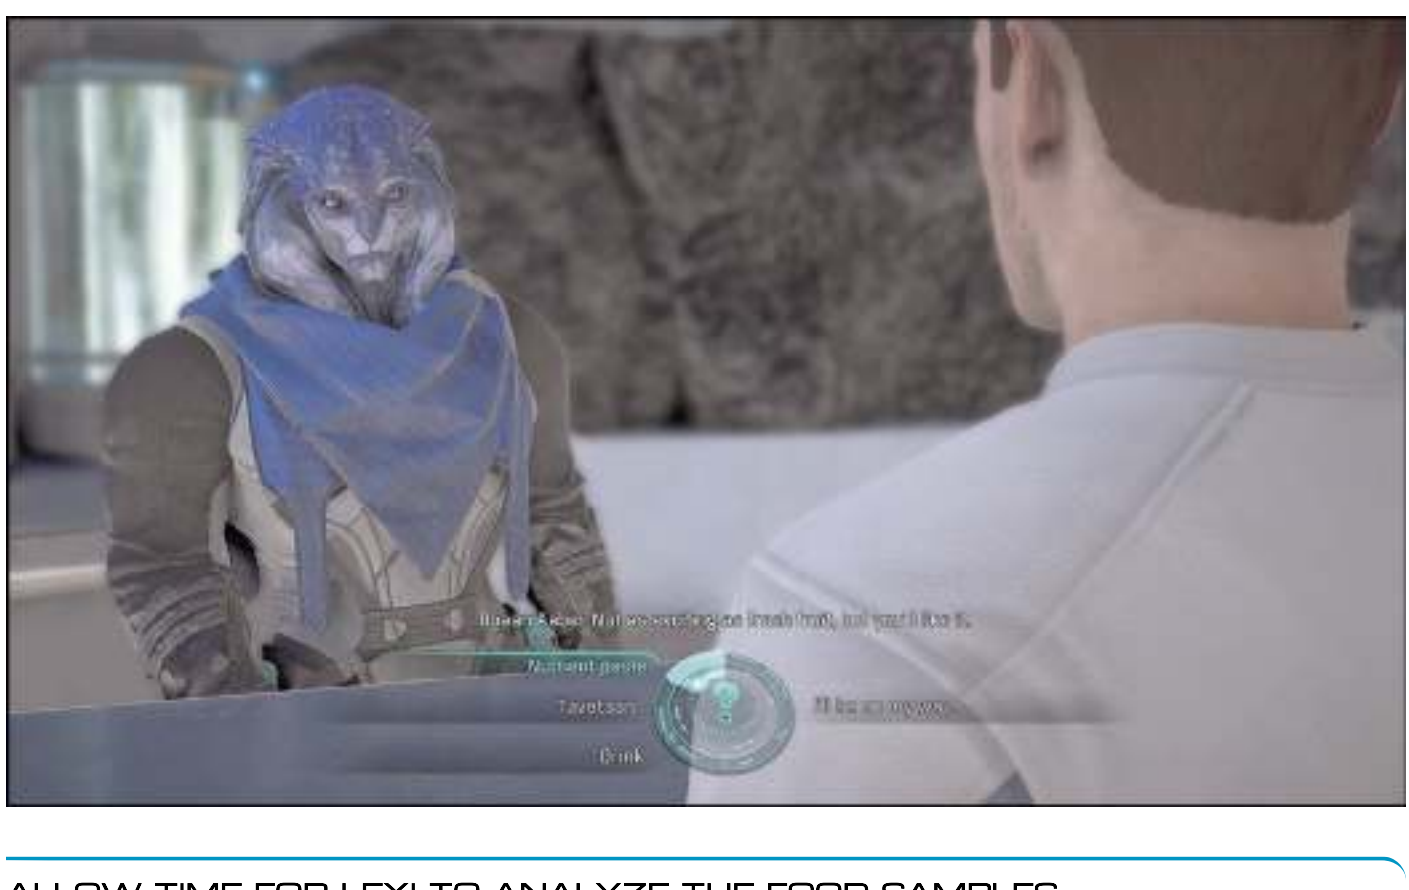
Find **Elmohk Fruit(3)** in the trees near Resistance Headquarters.

RETRIEVE A FRUIT SAMPLE FROM THE MARKET

Head to the market **(4)** and purchase the fruit sample from Felaan, the Fruit Merchant. Talk to her about **Nutrient Paste**.

INVESTIGATE NUTRIENT PASTE IN THE TAVETAAN

Go to the Tavetaan (the exterior bar) and speak with the bartender, Roaan Aabel **(5)**. Talk to him about Nutrient Paste and have a drink while you're there. You should never down multiple consecutive drinks just to see some slightly hidden drunken dream at this bar, or any bar in Heleus.



ALLOW TIME FOR LEXI TO ANALYZE THE FOOD SAMPLES

After you leave the Tavetaan, Lexi analyses the food, and within a minute or two, she comes through with the results. She says all the food is good to go. That completes the task. You earn a good amount of XP.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Lost Brother

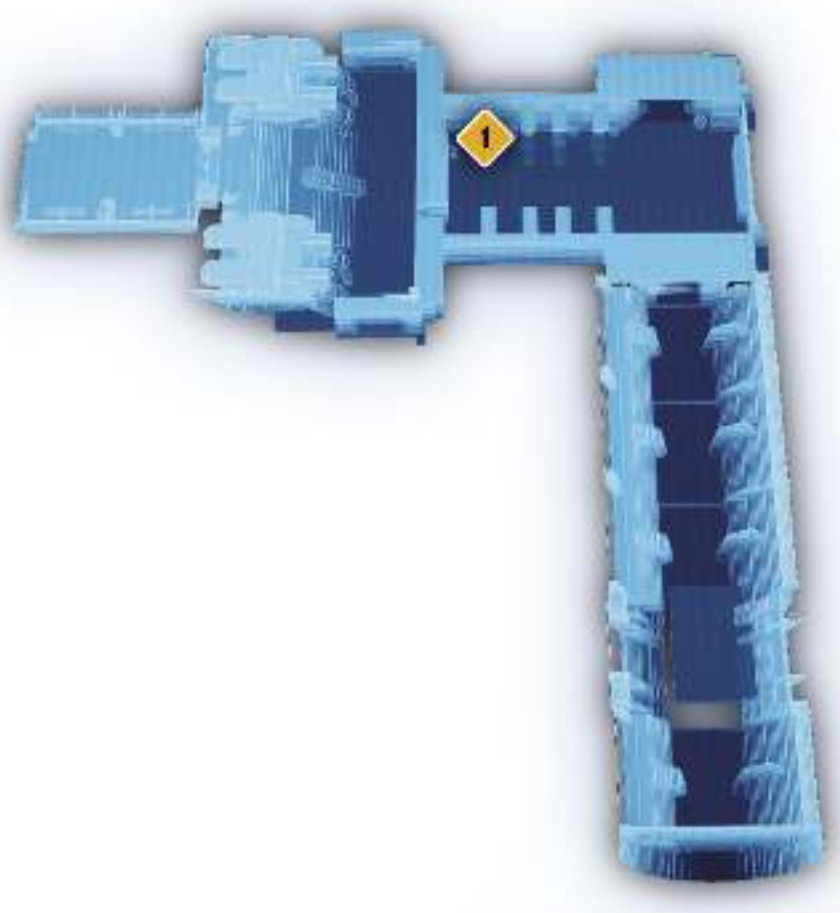
Mission Type: Additional Task

Prerequisite: Complete Mission 1

Start Location: Hyperion

Unlocking: Talk to Nigel McCoy

SPEAK TO NIGEL MCCOY



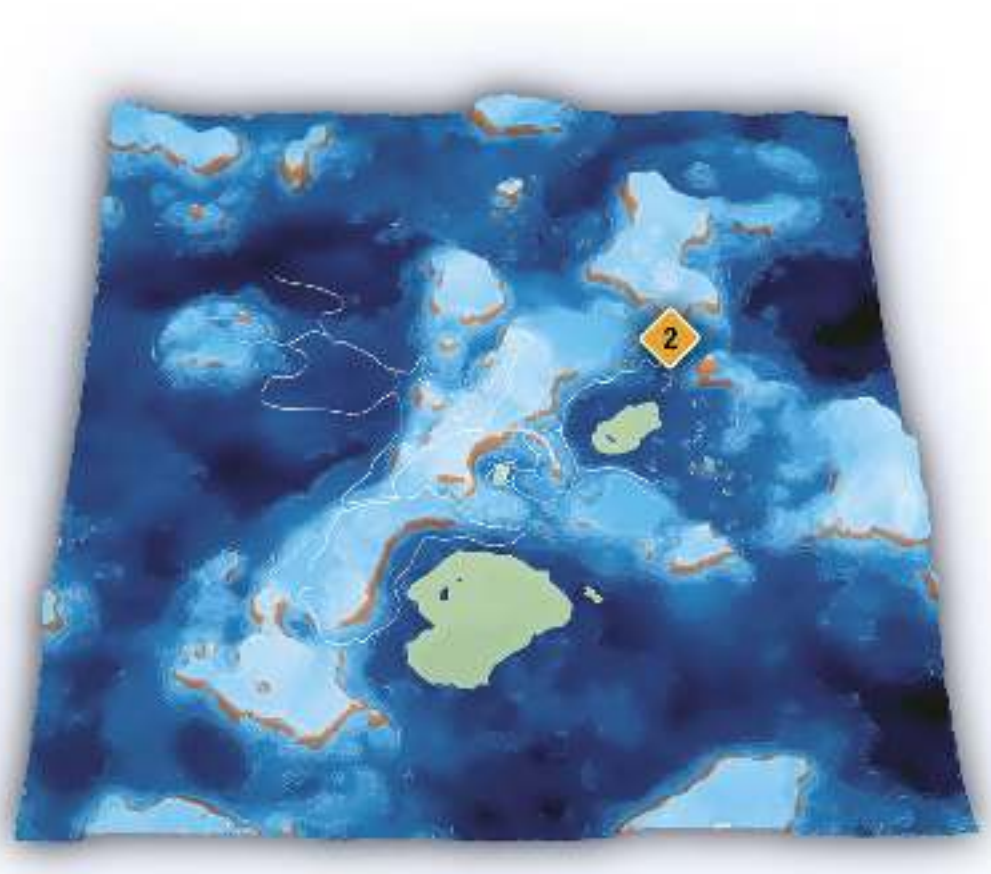
HYPERION: MEDBAY

While checking on your catatonic sibling, talk to the man **(1)** in the first bed on the left as you enter the cryobay. Fresh out of cryo, Nigel McCoy is very upset that his brother Dash died on Eos trying to start a settlement. He wants you to reunite their father's twin pendants that each of them wore. He marks a navpoint where his brother liked to stop and think on Eos.

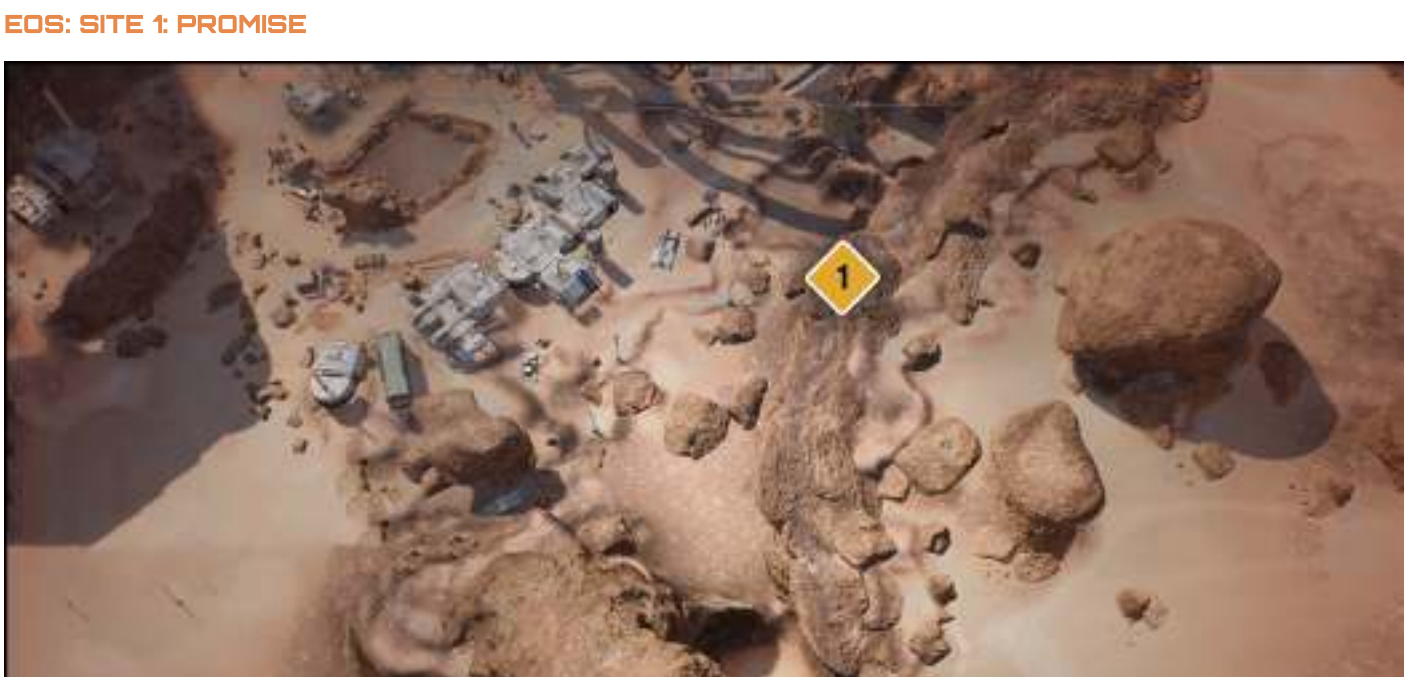
CHECK ON YOUR SIBLING

If you haven't done so already, talk to Dr. Carlyle to check on your unconscious sibling in the medbay. If you don't check on your sibling before he/she wakes up, he/she comments on your lack of concern later in the game.

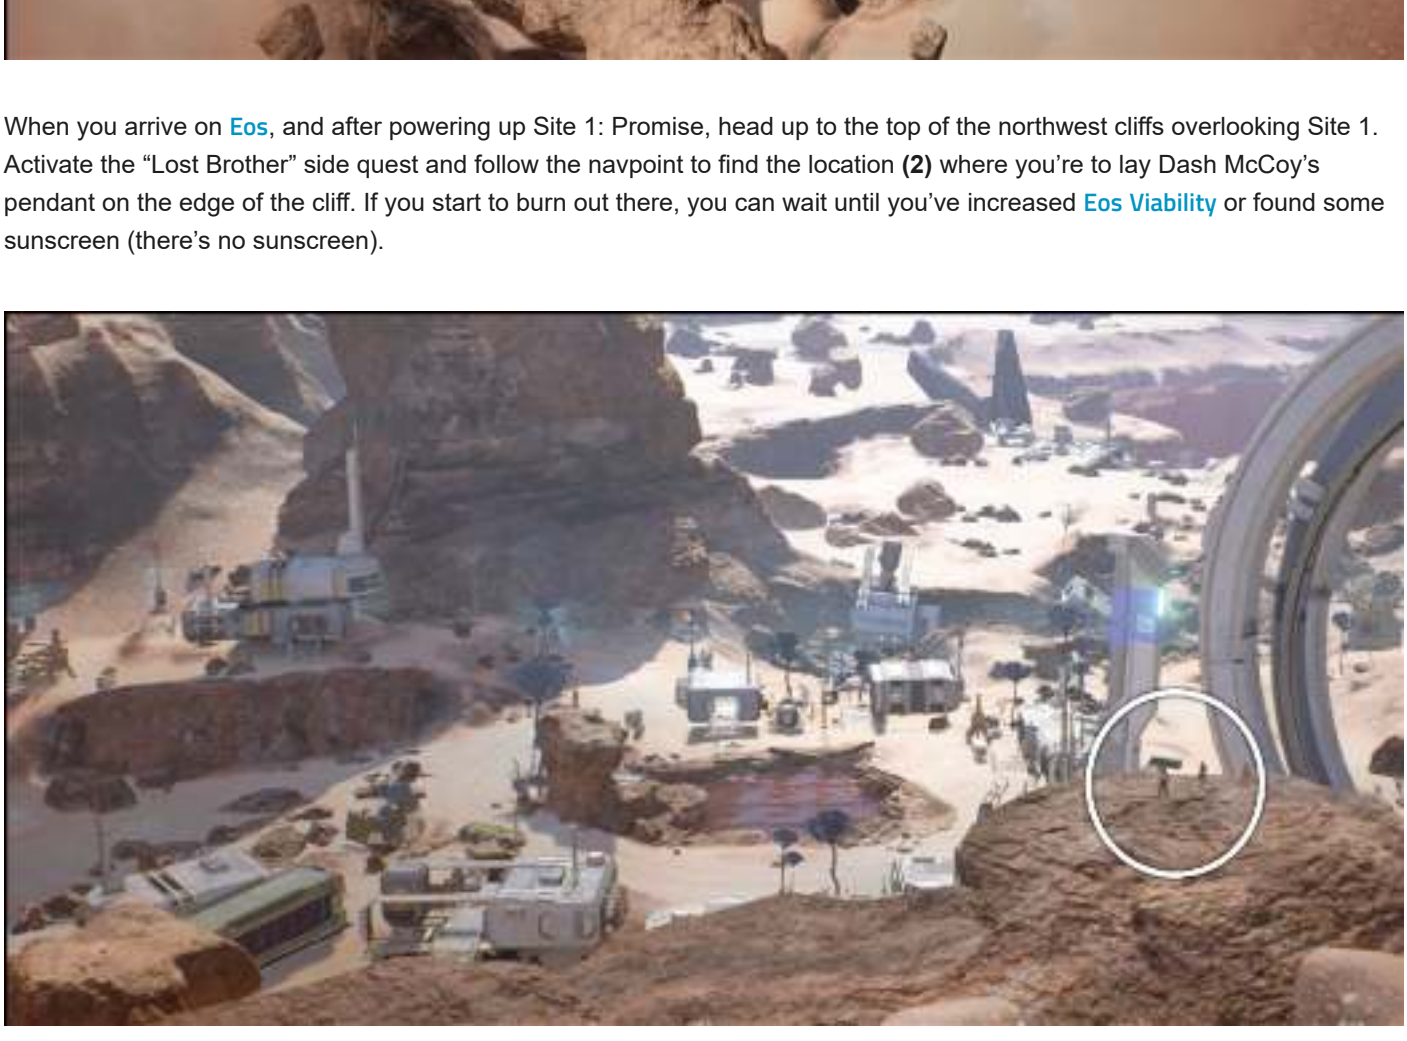
PLACE PENDANT AT THE LOCATION ON EOS



EOS: SITE 1: PROMISE



When you arrive on Eos, and after powering up Site 1: Promise, head up to the top of the northwest cliffs overlooking Site 1. Activate the "Lost Brother" side quest and follow the navpoint to find the location **(2)** where you're to lay Dash McCoy's pendant on the edge of the cliff. If you start to burn out there, you can wait until you've increased Eos Viability or found some sunscreen (there's no sunscreen).



Secondary Ops

Task: Messages to the Nexus

Mission Type: Additional Tasks

Prerequisite: Mission 3 or later

Start Location: Aya: Governor's Office

Unlocking: The Moshae is rescued and Aya is open to visitors

SPEAK TO ENROH BOSAAN

AYA: GOVERNOR'S OFFICE

Talk to the angara behind the security desk in the governor's office. Enroh Bosaan **(1)**, assistant to the governor, tells you about the concerns of the Aya inhabitants. They left messages of concern on communications terminals found all around Aya. These need to be collected and delivered to the Nexus.

COLLECT MESSAGES FROM THE DOCKS TERMINAL

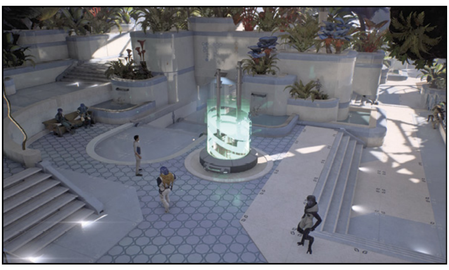
Exit the governor's office and head to the glowing green message terminal **(2)** near the docks doorway. Interact with it to receive the "Citizen Messages to the Nexus" message. Select the messages and choose to send them to the Nexus as is, or do an automatic editing job before you send. It doesn't matter which way you choose to send them; you complete the objective regardless. Make sure to scan the **angaran mural** nearby for Research Data.

COLLECT MESSAGES FROM THE MARKET TERMINAL

Head back along the beautiful walkway until you reach the market. Examine the holographic message terminal **(3)** and select "Citizen Messages to the Nexus" in the interface. Forward them all to the Nexus edited or unedited.

COLLECT MESSAGES FROM THE TAVETAAN TERMINAL

This holographic message terminal **(4)** is in the courtyard near the entrance to the dining area and the outdoor bar where Liam and Drack hang out. Interact with the terminal and forward the messages to the Nexus.



COLLECT MESSAGES FROM THE RESISTANCE HEADQUARTERS TERMINAL

As you approach the last holographic message terminal, a nearby angara crosses some privacy boundaries and scans you without your consent. This opens another task named "Test Subject." It would be wise to knock that quest out after forwarding the last messages to the Nexus from this terminal **(5)**. This completes the current task, and you receive a medium amount of XP. If you edit any of the messages, Tann comments on the edits in his next email to you, titled "Messages to the Nexus."

Send Messages to the Nexus
Upload messages from the Resistance Headquarters terminal
Upload messages from each of the terminals in Tann

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Missing Scientists

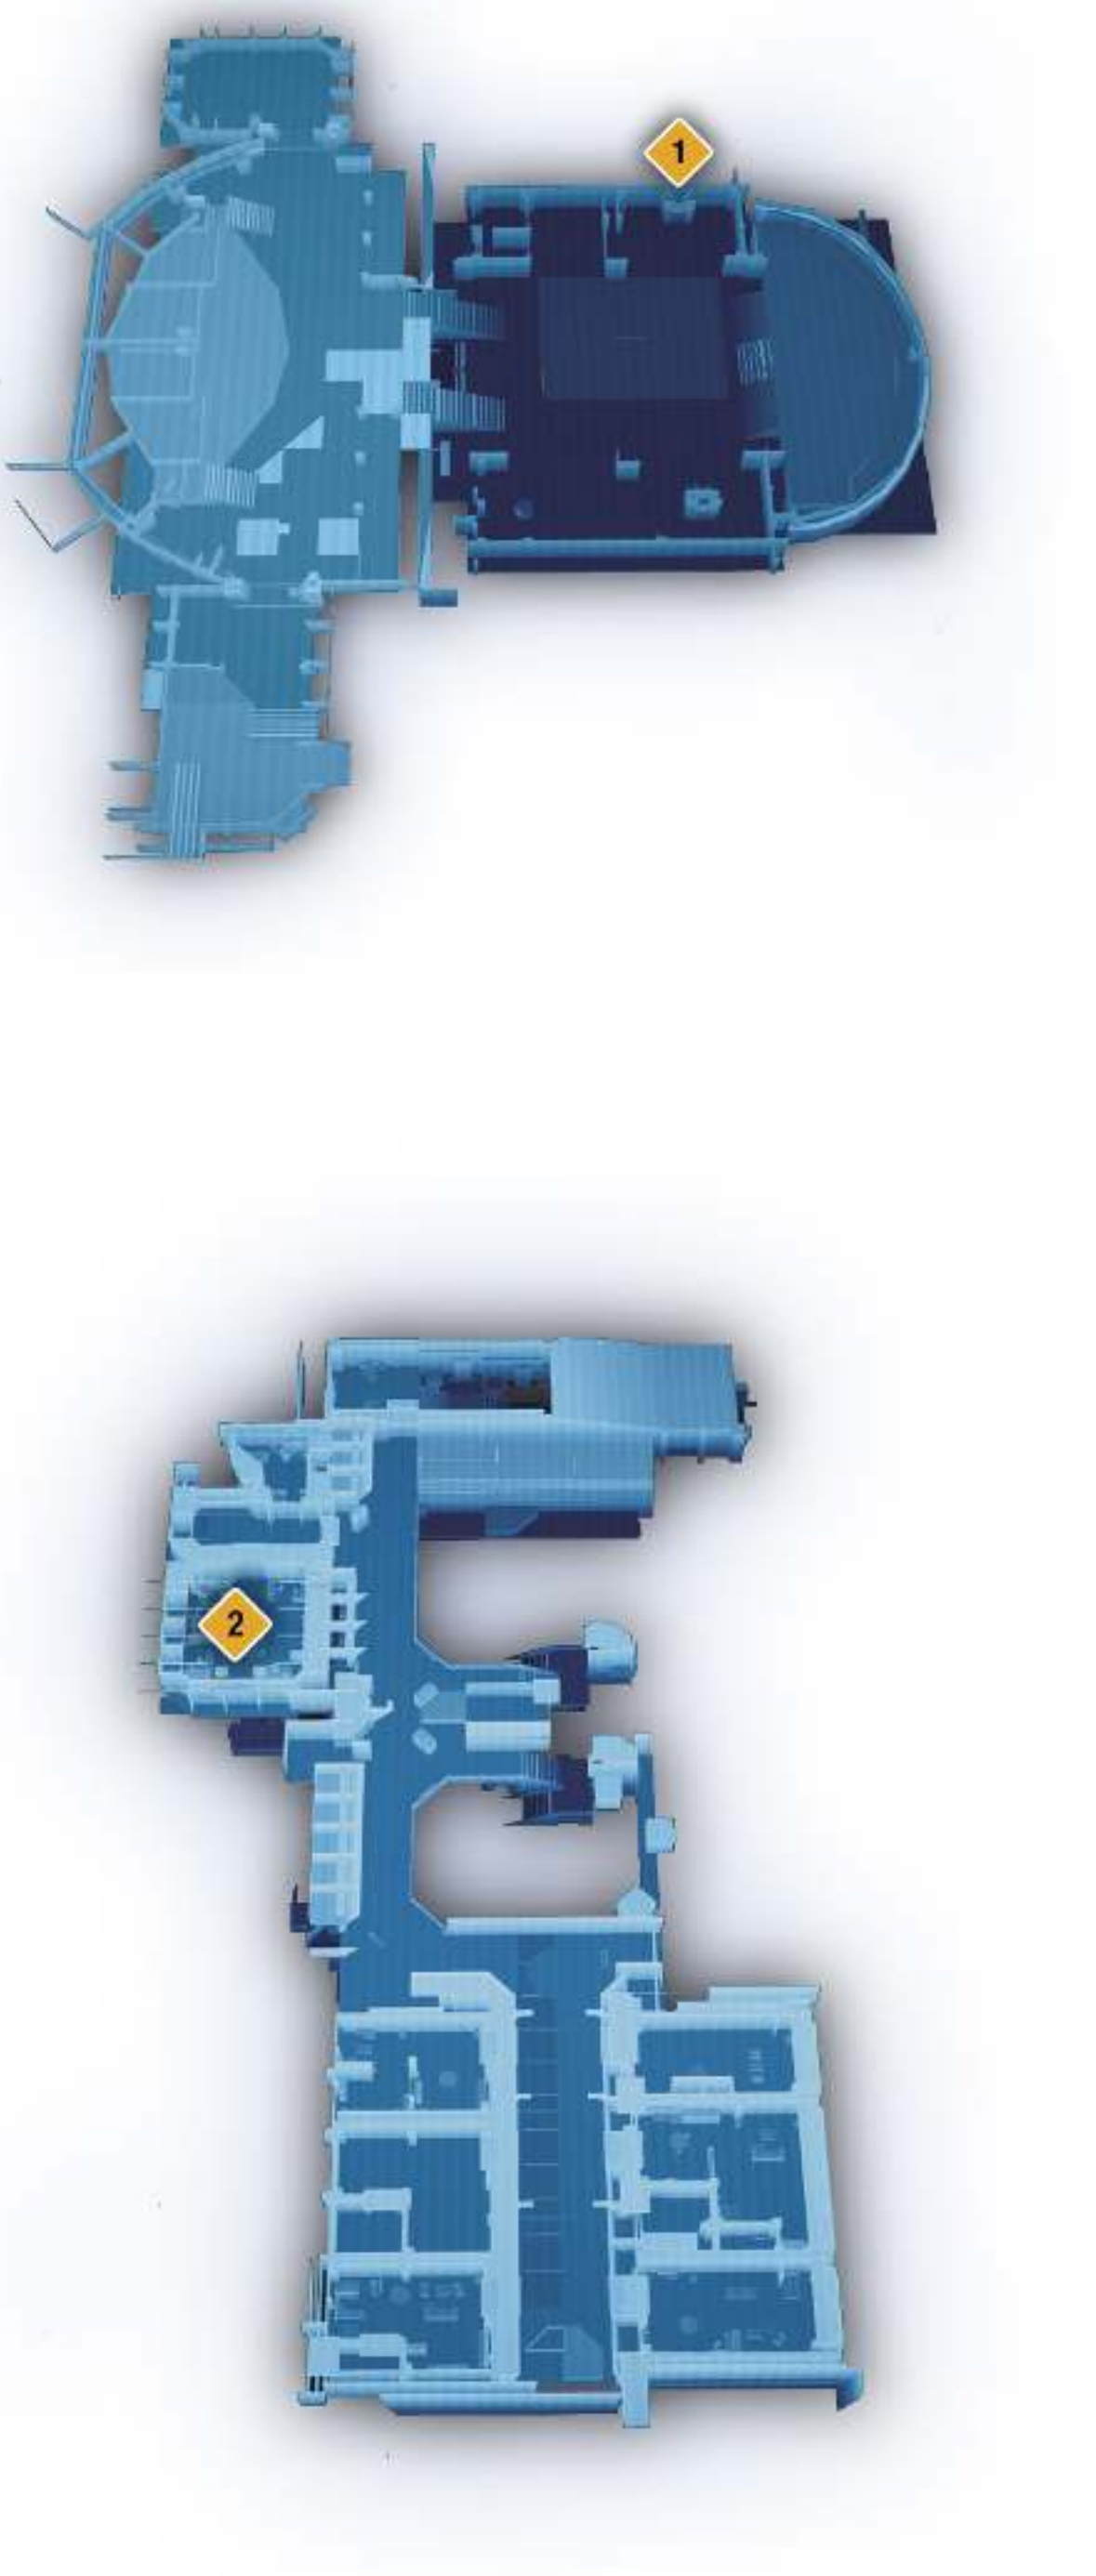
Mission Type: Additional Task

Prerequisite: Unlock the Tempest

Start Location: Nexus Operations or Tech Lab

Unlocking: Speak to Dr. Aridana

SPEAK TO DR. ARIDANA



NEXUS OPERATIONS OR TECH LAB

Initially, Dr. Aridana is in operations on the rear deck **(1)**. When the Common opens, you can find her in the Tech Lab **(2)**. Speak to her to unlock this mission. She tells you that she sent an away team to get readings of the Scourge, and sensors can't locate their shuttle. Use the nearby console to confirm this quest, just as you would any of the scientists' quests.

THE MODEL OF THE SPHERES

Speak to Dr. Aridana a second time (after accepting the "Missing Scientists" quest) to unlock the "Model of the Spheres" collection quest.

FIND THE MISSING SCIENCE VESSEL

TEMPEST BRIDGE

Travel to the Eriksson system and scan it for anomalies. You find the **starship wreckage** around the one-o'clock region of the orbital graph. Unfortunately, no one survived the Scourge. There's no need to report back to the doc.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Naming the Dead

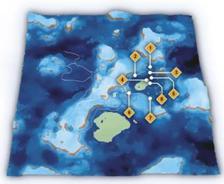
Mission Type: Additional Task

Prerequisite: Land on Eos

Start Location: Eos

Unlocking: Scan any unnamed colonist corpse

FIND AND SCAN COLONIST BODIES



EOS

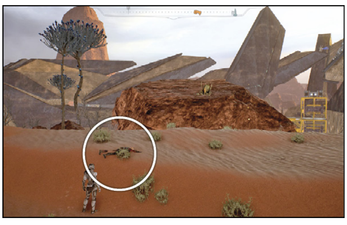
Seven bodies of fallen colonists have been left to rot on the hostile surface of Eos. Find and scan them all to bring closure for family, loved ones, and the Initiative.

SITE 1: PROMISE: THEO J. HARWELL

Theo J. Harwell's body **(1)** is lying on the ground near the **operational energy storage unit** that can be scanned for Research Data. Scanning the first body starts the quest.

REMNANT MONOLITH: TEGAN C. AVANTE

Tegan C. Avante's body **(2)** is lying on the ground in front of a large boulder next to the first Remnant monolith. This is also where you meet Peebee for the first time.



SITE 2: RESILIENCE: GORDANUS TRENITUS

Find the body of a turian named Gordanus Trenitus **(3)** lying between two kinetic barriers.

SITE 2: RESILIENCE: PORTER M. WEST

Find the body of Operational Mayor Porter M. West **(4)** lying in the sand in the gully northeast of Site 2: Resilience.

SITE 2: RESILIENCE: THYSA YLAR

Find the body of Thysa Ylar **(5)** lying on a catwalk leading to the second floor of a building. Scan her.

REMNANT MONOLITH: AMIRA S. PAVLOV

Amira S. Pavlov's **(6)** body is near the south Remnant monolith. Her body is lying beside one of the monolith pillars, among other bodies that have already been identified.

KETT RESEARCH CENTER: DARIN T. ANTON

Daron T. Anton is in the kett facility **(7)** where you meet Drack for the first time. An autopsy was performed on his body while he was still alive. Find him in a back room behind an audio console containing the "Necropsy" **audio log**. You can also find the final component for the mission "The Secret Project" in this same room.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Nomad Shield Crafting

Mission Type: Additional Task

Prerequisite: Land on Voeld

Start Location: Voeld

Unlocking: Talk to the angaran mechanic

TALK TO THE ANGARAN MECHANIC

VOELD: ANGARAN RESISTANCE BASE HANGAR

Enter the Resistance base. Just inside the hangar to the left is an angaran mechanic **(1)** standing next to a large snow vehicle. Talk to him. He's impressed with the Nomad and shares some blueprints with you to upgrade your shielding (once you have the right components).

CRAFT THE SHIELD REGENERATOR AT A RESEARCH CENTER

The mechanic has given you the **Improved Shield Regeneration blueprint**. You need to craft it for the Nomad. Go to a research center, find the blueprint in the Nomad's Mod list, and develop the Improved Shield Regeneration. If you don't have the resources, complete this quest a little later into your exploration, after touching everything that enters your view.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Outlaw Weapon Crafting

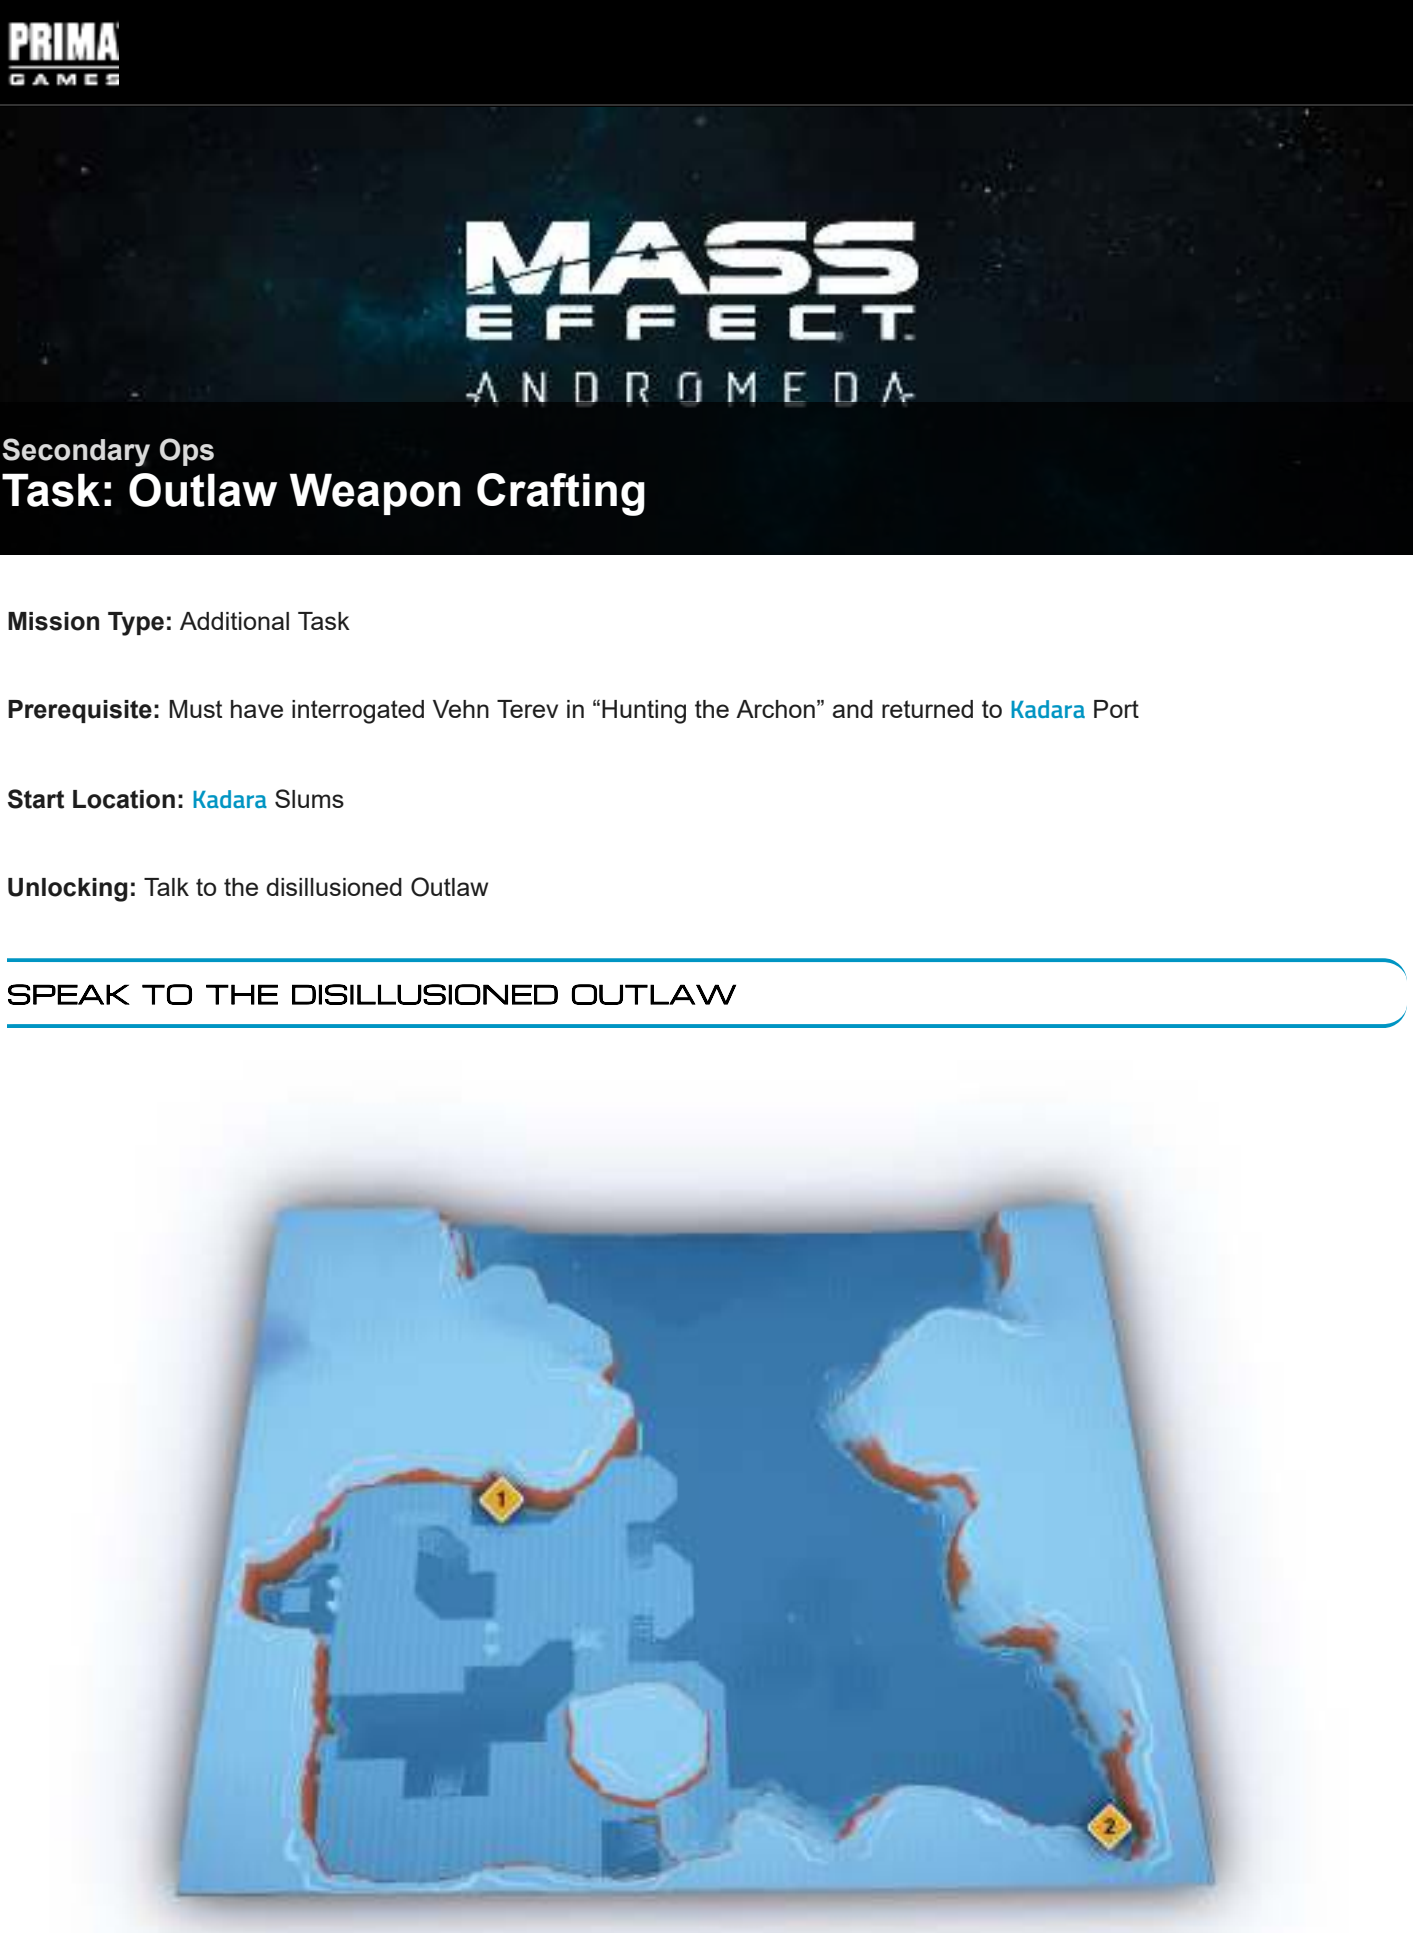
Mission Type: Additional Task

Prerequisite: Must have interrogated Vehn Terev in “Hunting the Archon” and returned to Kadara Port

Start Location: Kadara Slums

Unlocking: Talk to the disillusioned Outlaw

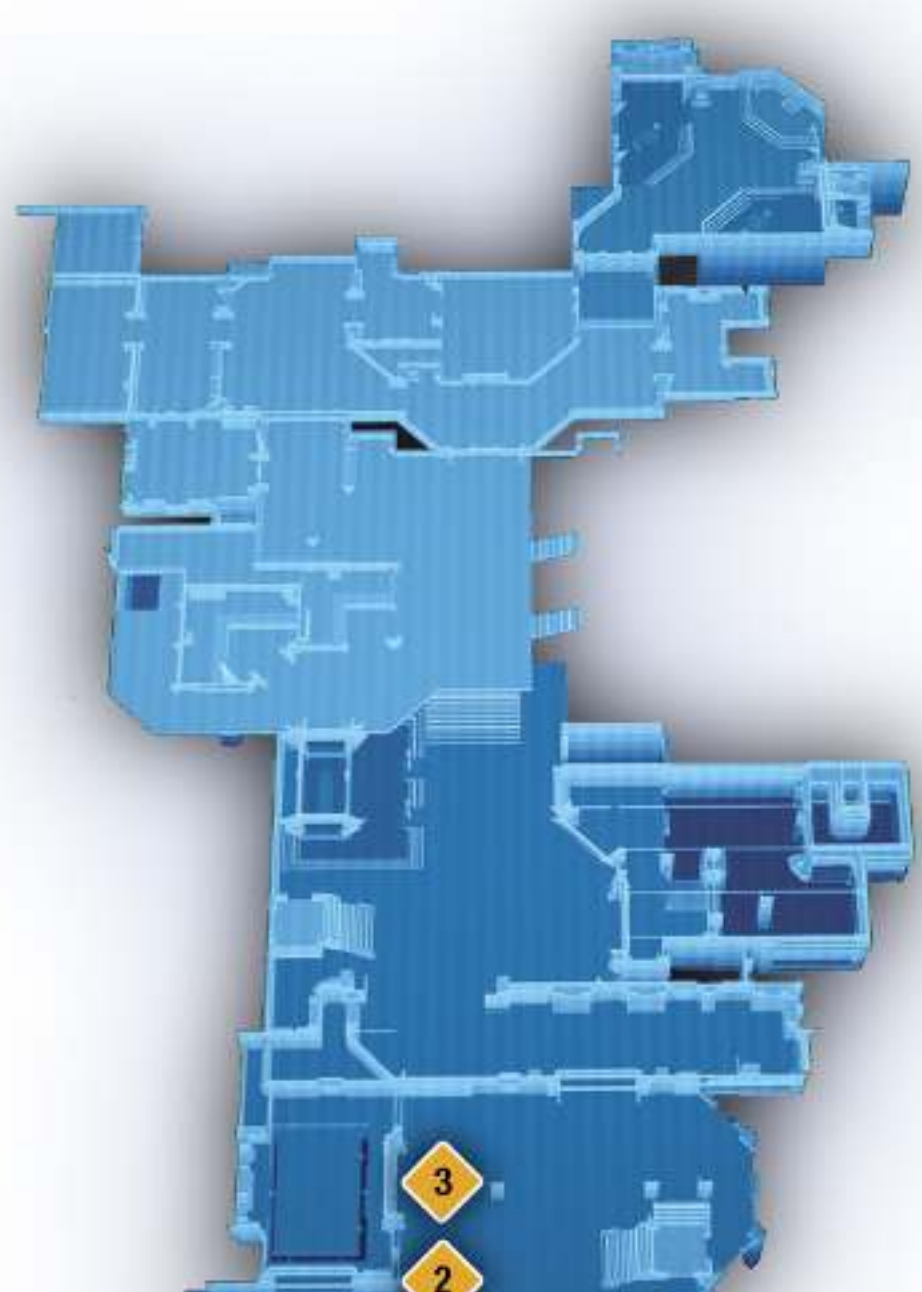
SPEAK TO THE DISILLUSIONED OUTLAW



KADARA SLUMS: TARTARUS BAR

Find the disillusioned Outlaw **(1)** leaning on the outside wall of the Kadara Slums bar, the Tartarus. She asks you to check out the Outlaw tech and materials. You need to craft one of the Outlaw weapons. Head to the transit controls **(2)** to get back to Kadara Port.

CRAFT THE WEAPON AT A RESEARCH CENTER



KADARA PORT

Don’t run off; as soon as you reach the port, a research center **(3)** can be found right in front of you. Craft either a **Sandstorm**, **Sidewinder**, or **Vanquisher** to complete the quest.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Outpost Supplies on Elaaden

Mission Type: Additional Task

Prerequisite: Aya is open to visitors; establish an outpost on Elaaden

Start Location: Aya

Unlocking: Talk to Merixus

TALK TO MERIXUS

AYA: DOCKS

Talk to Merixus **(1)** at the shuttle. He needs an angaran ionic filter to improve production of purified water on Elaaden. He isn't allowed into the city, and asks you to track down the filter for him.

You only need to talk to him once to start all of the **settled-planet collection quests**. So if you've already talked to him for "Task: Outpost Supplies on Eos," for instance, you don't need to speak to him again to start this quest.

ACQUIRE AN IONIC FILTER ON AYA

Talk to the aqueduct engineer **(2)** standing near the stairs behind the market.

In his inventory, purchase the **ionic water filters** for 350 credits.

DELIVER THE IONIC FILTER TO MERIXUS

Head back and give Merixus **(1)** the item, or wait until you have all his items for Eos, Voeld, and Kadara as well, and then deliver them all at once.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Outpost Supplies on Eos

Mission Type: Additional Task

Prerequisite: Establish the Prodromos outpost on Eos

Start Location: Aya

Unlocking: Talk to Merixus

TALK TO MERIXUS

AYA: DOCKS

Talk to Merixus **(1)** at the Aya shuttle dock after establishing an outpost on Eos. He wants Quilloa seeds.

ACQUIRE QUILLOA SEEDS ON AYA

Head to the market to visit the agricultural scientist **(2)** on the walkway facing one of the planters. Buy **Quilloa seeds** from his special inventory for 250 credits.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Outpost Supplies on Kadara

Mission Type: Additional Task

Prerequisite: Establish an outpost on Kadara

Start Location: Aya

Unlocking: Talk to Merixus

TALK TO MERIXUS

AYA: DOCKS

Talk to Merixus **(1)** at the shuttle. He needs angaran antibiotics for Kadara. He still hasn't been allowed into the city, and asks you to track down the antibiotics for him.

ACQUIRE ANGARAN ANTIBIOTICS ON AYA

INFIRMARY

Use the body scan outside the infirmary door to pass through security and enter, now sterilized. Talk to the assistant medic **(2)**. Purchase his **angaran antibiotics** for 450 credits.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Outpost Supplies on Voeld

Mission Type: Additional Task

Prerequisite: Establish an outpost on Voeld

Start Location: Aya

Unlocking: Talk to Merixus

TALK TO MERIXUS

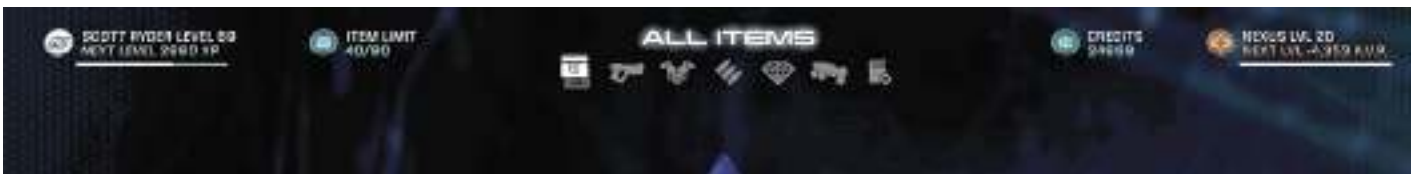
AYA: DOCKS

Talk to Merixus **(1)** at the shuttle. He needs a solar amplifier for Voeld. He still hasn't been allowed into the city, and asks you to track down the amplifier for him.

ACQUIRE A SOLAR AMPLIFIER ON AYA

Talk to the solar technician **(2)** standing on the outer walkway beside the market.

In his inventory, purchase the **solar amplifier** for 550 credits. This is getting expensive.



MASS EFFECT ANDROMEDA

Secondary Ops

Task: Past, Present, and Future

Mission Type: Additional Task

Prerequisite: Complete “Task: Forgotten History”

Start Location: Aya

Unlocking: Read email from Avela

READ AVELA'S EMAIL

TEMPEST

SPEAK TO AVELA

AYA

Avela sent you an email titled “I Found Something.” She says she discovered something from the relics you found and to meet her outside the Repository of History.

Find Avela **(1)** right where she said she’d be—outside the Repository of History. She appears relaxed as she leans on the walkway railing while gazing at the waterfalls. Talk to her. At every conversation option, there’s an opportunity to respond affectionately, which eventually leads to a kiss or two, but only if you decide you want Avela in your life—at least for the next few minutes.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Path of a Hero

FEELING ROMANTIC?

You can hit on Keri at every meeting, and by the end of the game you can get a date with her, even if you're exclusive with another. That kind of thing happens in real life too, but it's kind of frowned upon.

READ EMAIL FROM KERI

After settling Eos, you receive an email from Keri to come talk to her on the Nexus about the successful mission. Read the "Free for an Interview?" email to begin the mission.

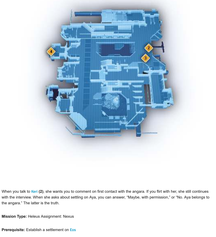
SPEAK WITH KERI ABOUT EVENTS ON EOS

NEXUS OPERATIONS: ROSSOV'S OFFICE

After Mission 2, an asari journalist named Keri T'Vessa (1) wants to interview you for her documentary about current events. If you refuse the offer, Keri interviews Director Tann instead. These Nexus News Service reports are heard throughout the Nexus over the public audio system. The mission starts after you settle Eos. Find Keri at the front window of Nexus operations. She interviews you also between missions. Here some fun with the interview, you can tell the truth or paint a rosy picture of how things are on each planet. Tann would rather you take a positive propaganda approach and it will pleased if you tell the truth.

SPEAK WITH KERI ABOUT THE ANGARA

After visiting Aya, you receive an email from Keri. She wants to do an interview with you on camera about the garden world of Aya. The email is titled "Can We Talk? (On Camera)."



Can we talk? (on camera)
To Ryder
From Keri T'Vessa
Hello, Ryder,
I'm trying to hunt down some proof if a photo was posed or if you can talk on the record about these photos to find out
Keri
Read Email
Delete
Reply

NEXUS COMMON

When you talk to Keri (2), she wants you to comment on first contact with the angara. If you flirt with her, she still continues with the interview. When she asks about settling on Aya, you can answer, "Maybe, with permission," or "No. Aya belongs to the angara." The latter is the truth.

Mission Type: Helious Assignment: Nexus

Prerequisite: Establish a settlement on Eos

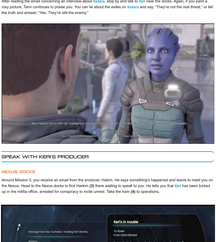
Start Location: Nexus Operations

Unlocking: Read email from Keri after returning from Eos

If you hit on her, the camera goes off, and she talks about a possible relationship after the documentary is done. You can ask if she's still interested if you're romancing someone else. She admits she would neither interfere nor settle.

SPEAK WITH KERI ABOUT KADARA

After "Hunting the Archon" takes you to Kadara and you interrogate the prisoner, you receive an email from Keri. She wants some info on the exiles of Kadara. She has good sources.



Another Interview?
To Ryder
From Keri T'Vessa
Hello, Ryder,
They're saying you got very close to Archon Kid. Care to tell me all about it? And more to the point, do you plan to clear our reputation?
Keri
Read Email
Delete
Reply

NEXUS COMMON

After reading the email concerning an interview about Kadara, stop by and talk to Keri near the docks. Again, if you paint a rosy picture, Tann continues to praise you. You can lie about the exiles on Kadara and say, "They're not the real threat," or tell the truth and answer, "Yes. They're still the enemy."

SPEAK WITH KERI'S PRODUCER

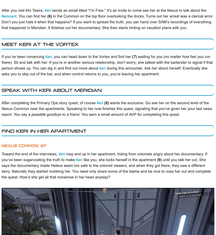
NEXUS: DOCKS

Around Mission 5, you receive an email from the producer, Hakim. He says something's happened and wants to meet you on the Nexus. Head to the Nexus docks to find Hakim (3) there waiting to speak to you. He tells you that Keri has been locked up in the militia office, arrested for conspiracy to incite unrest. Take the bum rap (4) to operations.

FIND KERI IN THE MILITIA CELLS

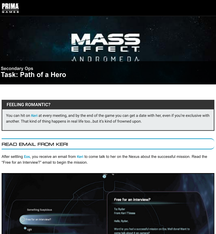
NEXUS OPERATIONS

Head to the cells in operations to find Keri (5). Speak to her. She stands strong, yet you get a chance to cheer her up through conversation. She currently remains in jail but tells you that she'll contact you again if something comes up. This mission goes on hold until Keri's next interview slot.



SPEAK WITH KERI ABOUT THE REMNANT CITY

NEXUS COMMON: EP



After you visit Kid Tavos, Keri sends an email titled "I'm Free." It's an invite to come see her at the Nexus to talk about the Remnant. You can find her (6) in the Common on the top floor overlooking the docks. Turns out her arrest was a clerical error. Don't you just hate it when that happens? If you want to spread the truth, you can hand over SAM's recordings of everything that happened in Meridian. It finishes out her documentary. She then starts hinting on vacation plans with you.

MEET KERI AT THE VORTEX

If you've been romancing Keri, you can head down to the Vortex and find her (7) waiting for you (no matter how fast you run there). Sit and talk with her. If you're in another serious relationship, don't worry; she talked with the bartender to signal if that person shows up. You can dig in and find out more about Keri during the encounter. And her shoot herself. Eventually she asks you to step out of the bar, and when control returns to you, you're leaving her apartment.

SPEAK WITH KERI ABOUT MERIDIAN

After completing the Primary Ops story quest, of course Keri (8) wants the exclusive. Go see her on the second level of the Nexus. Director Tann used her apartment, so head to the Tann's apartment. Keri is ignoring that you've given her your last news report. You say a possible goodbye to a friend. You earn a small amount of AUR for completing this quest.

FIND KERI IN HER APARTMENT

NEXUS COMMON: EP

Toward the end of the interviews, Keri may end up in her apartment, hiding from colonists angry about her documentary. If you've been sugarcoating the truth to make Keri like you, she looks herself in the apartment (9) until you talk her out. She says the documentary's ruined her career. You have the option to answer honestly, and when they get there, they save a different story. Naturally they started mobbing her. You need only share some of the blame and be nice to coax her out and complete the quest. Heard she got all that romance in her head anyway?

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Pathfinder Armor Crafting

Mission Type: Additional Tasks

Prerequisite: Establish an Outpost on Eos

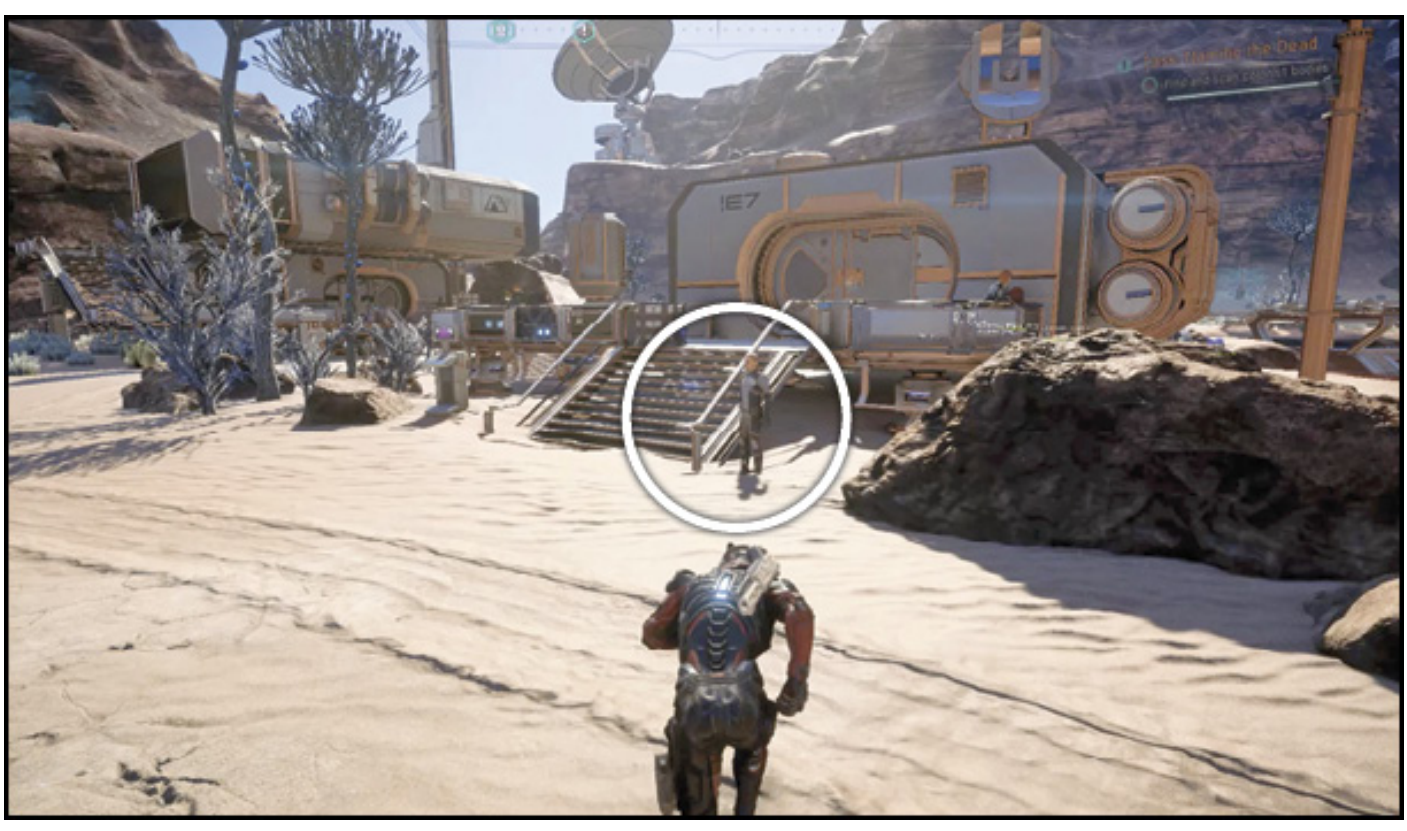
Start Location: Eos

Unlocking: Speak to Jacob Mittney

TALK TO JACOB MITTNEY

EOS: PRODROMOS

After settling Eos with Prodromos, talk to Jacob Mittney **(1)**, who's standing outside the nearest building facing the Tempest. He introduces himself as working for Research and Development. They've made a discovery for armor plating augmentation. He gives you the **Pathfinder Chest I blueprint**. All you must do is develop it.

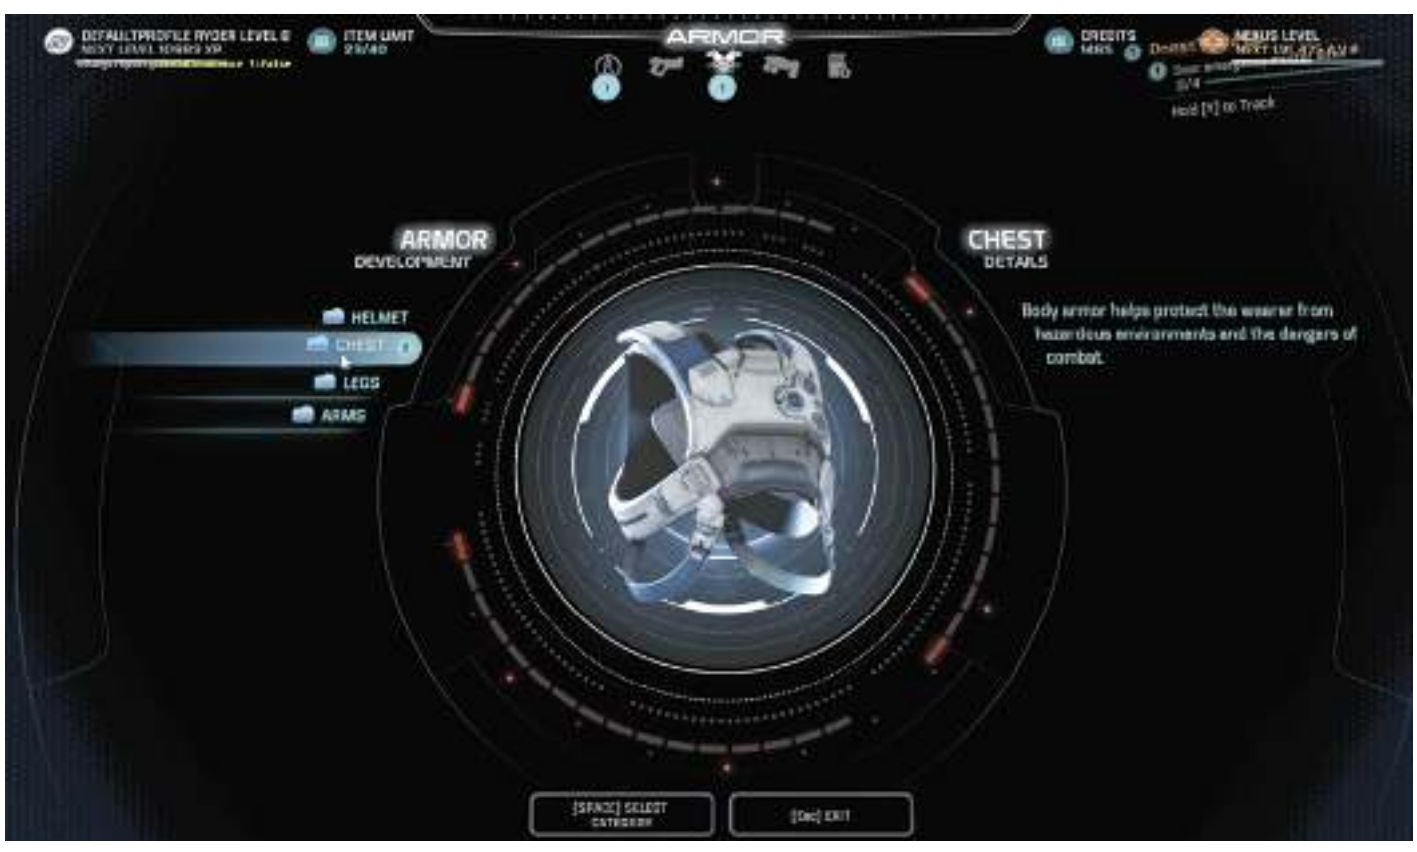


CRAFT THE PATHFINDER CHEST PIECE

You need to gather the necessary materials to craft a chest piece at a research center. Head into the Research Center **(2)** in Prodromos to see if you have what you need to develop it. This building is the one closest to the end of the Tempest.

Use the Research and Development terminal inside the building and access the Development interface. Select the Armor category and scroll down to "Chest." It costs you 40 xxx, 170 fluorite, 80 cadmium, and 20 platinum. If you don't have enough to cover the costs, return once you collect more of the required minerals.

In the Chest category, find Pathfinder Chest II. Select it. Choose augmentations for it if you can afford to. This is optional. Now select "Craft it." Confirm your choice and rename the piece if you wish. It's added to your inventory, and you complete this task as soon as you back out of the interface.



MASS EFFECT ANDROMEDA

Task: Programming a Pathfinder

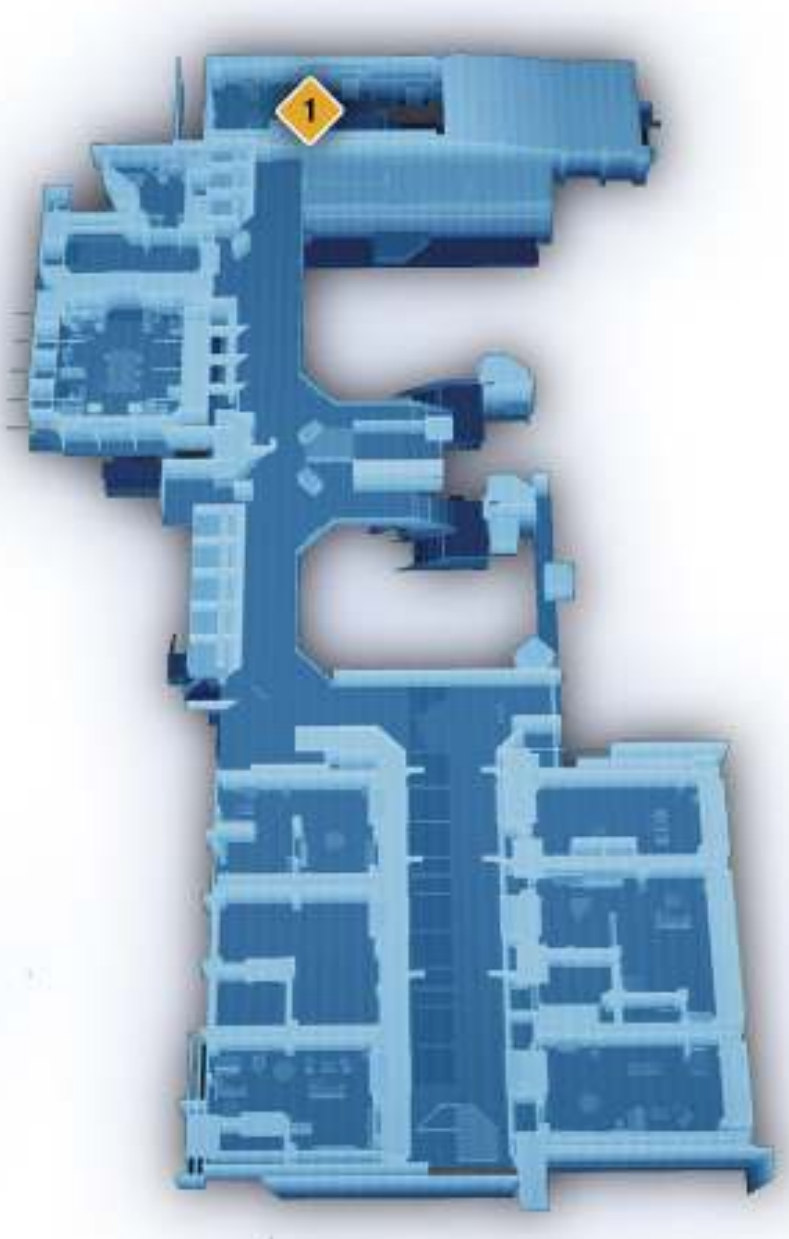
Mission Type: Additional Task

Prerequisite: Nexus Phase 2

Start Location: Nexus

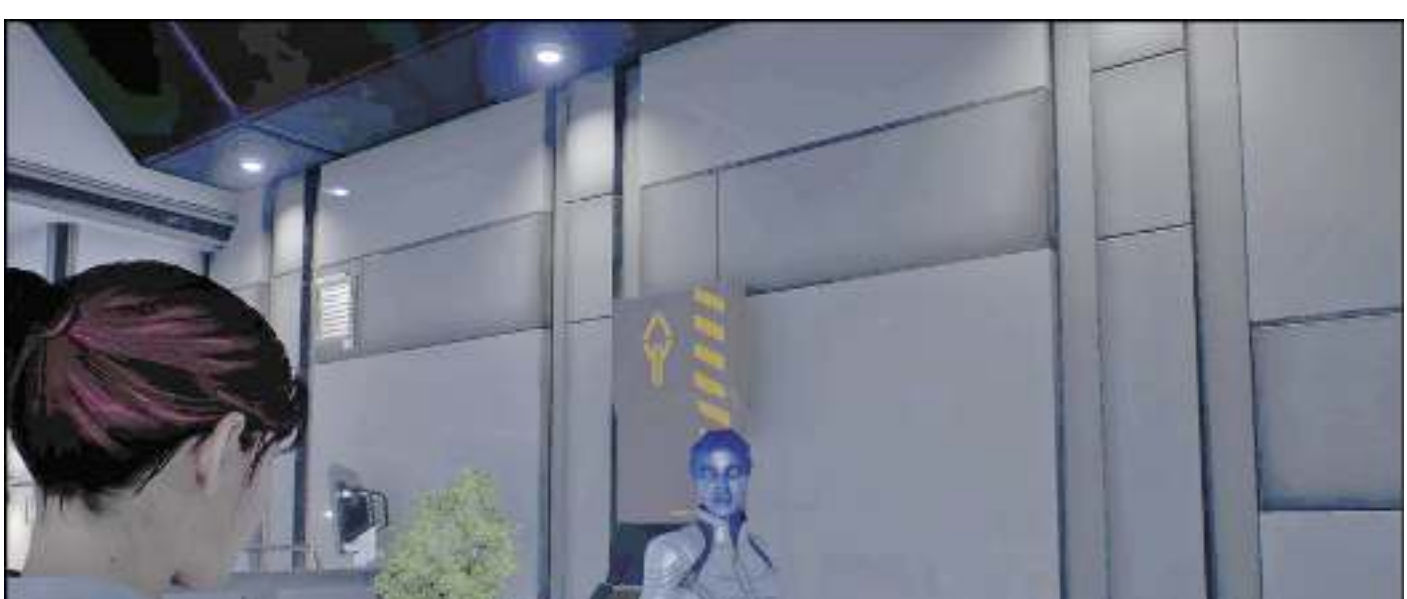
Unlocking: Talk to the cultural center liaison after settling Eos

SPEAK TO THE CULTURAL CENTER LIAISON



NEXUS: DOCKING AREA: CULTURAL CENTER

The Cultural Exchange's informational VI about Pathfinders is out of date. Talk to the cultural center liaison **(1)** at the top of the stairs on the second level. She tells you the new VI is meant to describe the role of a Pathfinder, and she would love for you to program it.



SPEAK WITH THE PATHFINDER VI

Speak with the Pathfinder VI **(2)** to reset it. You can choose a female or male voice, the Pathfinder's role, and whether to highlight your partner AI or your team (crew). Lastly, the focus of the message can be set to "Former Pathfinders" or "Career Advice." Confirm your settings and then talk to the VI to check out your program.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Remnant Data Cores

Mission Type: Additional Task

Prerequisite: Activate the Vault on Eos

Start Location: Any of the Remnant data core locations

Unlocking: Pick up a Remnant data core

EOS

ACTIVATE THE VAULT

The task begins once you leave the purification vault on Eos. Peebee will find the first data core, which will automatically be added to your quest inventory.

DEFEAT THE ARCHITECT ON EOS

You receive the second data core from the Remnant Architect on Eos. In order to defeat the Architect on Eos you will first need to access the secondary operation Making An Impression. Go and talk to Hainly Abrams to access this operation which requires the placement of three seismic hammers to disrupt the seismic activity on Eos. The placement of the the third and final hammer will begin the fight with the Remnant Architect. For more details see the Eos Architect Details section. All the Remnant Architects you defeat will provide one data core. Although you won't see the actual data core, it will automatically be added to your inventory.

VOELD

ACTIVATE THE VAULT

The next data core is in the Voeld purification vault. Note that you can only acquire it the first time you enter the vault. Interact with the remnant consoles to get it.

KETT OUTPUT DEVICES

The fourth data core is part of Task: Subjugation. You don't necessarily have to perform the task; you can go here at any time.

DEFEAT THE ARCHITECT ON VOELD

The fifth data core is part of the Voeld Remnant Architect. Get the Task: Missing Scientists from Priya Blake at the Voeld AI outpost. Follow the trail of evidence to discover what happened to the missing scientists. As you uncover clues about their disappearance you will also follow the path of their untimely deaths leading to an encounter with the Architect on Voeld. Defeat the architect to get this data core. For more details see the Voeld Architect Details section.

KADARA

ACTIVATE THE VAULT

The next data core is in the Kadara purification vault. This one is in the north section of the vault.

DEFEAT THE ARCHITECT ON KADARA

The seventh data core involves defeating the Remnant Architect is Kadara. The Architect is located in the far western portion of the map. For more details see the Kadara Architect Details section.

ELAADEN

ACTIVATE THE VAULT

The eighth data core is in the Elaaden purification vault. From the starting location, go to the room to the east. Just solve the remnant console puzzle to get the data core.

LOCATE THE OPTIONAL VAULT

The ninth data core is part of the Elaaden optional vault, located in the southwest portion of the map.

DEFEAT THE ARCHITECT ON ELAADEN

The tenth data core involves the Remnant Architect on Elaaden. To trigger this, you must find the remnant drive core and give it to Morda. After doing so, she will let you create an outpost on the planet. Defeat the Remnant Architect to get this data core. For more details see the Elaaden Architect Details section.

KHI TASIRA

The last data core is in Khi Tasira. Visit the research tower and interact with the console. After the blue walls drop, look to the right of the console to see another one on a different platform. Interact with it to open the door.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Research Center Development

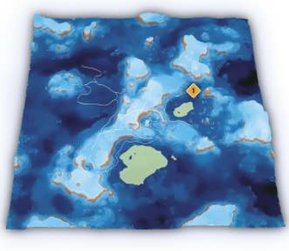
Mission Type: Additional Task

Prerequisite: Unlock Site 1: Promise Outpost research center

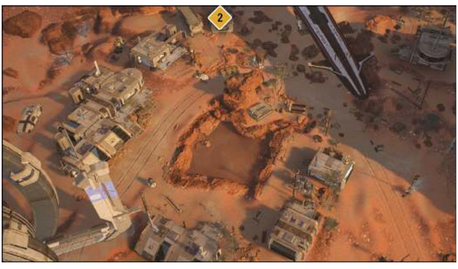
Start Location: Eos

Unlocking: During the Priority Ops mission "A Better Beginning," enter the research center at Site 1 on Eos

ACTIVATE THE TERMINAL



EOS: SITE 1: PROMISE



At Site 1 **(1)**, after returning power to the outpost during the Priority Ops mission "A Better Beginning," enter the research center **(2)**, which is the building closest to the parked Tempest. Activate the back-right corner terminal to power the research center.

COLLECT AREA RESOURCES AND CRAFT A WEAPON

If you've been scanning the many objects around Site 1, you should have enough Research Data to research a weapon. If not, get back out there, roam around with your scanner, and capture all the highlight-able objects the scanner finds. For example, **Initiative power pylons**, **hydro-evaluation station**, **habitat door**, and two **operational energy storages**. There's plenty of Research Data available to let you research a weapon without leaving Promise.

CRAFT A WEAPON

Next to the power terminal **(2)** is a research center device hanging from the ceiling. Use the Research interface to unlock weapon, armor, and augmentation blueprints from Milky Way, alien, and Remnant technology; and then use the Development interface to craft that item or upgrade using minerals you've collected. You need Research Data from scans to create blueprints, and minerals for crafting. To complete this task, simply create any weapon.

READY TO DEVELOP

When using the Research Center for the first time, you may find that you have very little Research Data for blueprinting. Luckily the objective is to simply create a weapon, and you should already have some ready-to-develop blueprints available. Switch over from Research to Development to find these ready-to-develop items.

Scroll through the many different weapon blueprints and check that you have the required number of minerals to craft the weapon you've selected. Use the Select Blueprint command and confirm your choice to start development. Rename the weapon if you'd like it to stand out more in your inventory. Make sure you have room for it to be added. This mission is complete when you back out of the menu and the weapon is added to your inventory. Completing this task earns you a new weapon and a fair amount of XP.

START DEVELOPMENT
Are you sure you want to develop the INCISOR I project?
It will be added to your inventory and available to equip via Loadout terminals.
INCISOR I
Confirm your choices [Enter] before continuing. To cancel, press [Esc]

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Roekaar Manifestos

Mission Type: Additional Task

Prerequisite: Unlock Havarl

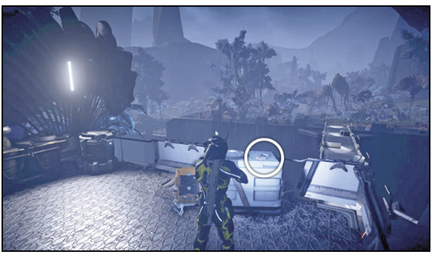
Start Location: Roekaar camp north of the Chasm of the Builders

Unlocking: Examine the Roekaar datapad on the top platform on the north side of the chasm bridge

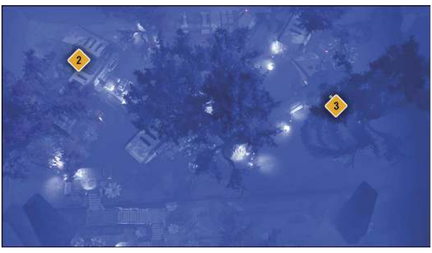
FIND SIX ROEKAAR MANIFESTOS ON HAVARL

ROEKAAR CAMP

Learn more about the Roekaar by collecting and examining their manifestos. Find the first one titled "Fire" on the top of the north bridge platform **(1)**, which is accessible after you find Zorai's heirloom during "A Dying Planet."



OLD PELAAV



In Old Pelaav, in the Roekaar encampment, find a **datapad** titled "Invasion" in one building **(2)**, and another **datapad** titled "Hope" in another building **(3)**.

CHASM OF THE BUILDERS

On your way to meet Taavos during "A Dying Planet," look for this cave on the left side at the end of the Chasm of the Builders. Inside you find a Galorn and the "Invasion" Roekaar **datapad(4)**.

ROEKAAR OVERGROWN CAMP

While you're finishing up "Overgrown" in the northeast Roekaar camp, find the "Conquerors" manifesto **(5)** on a crate in the middle of the camp.

THALDYR'S HOME

Grab this one during or after visiting Thaldyr during "Friend or Foe?" to unlock the building. The manifesto is on a table inside her house **(6)**. Take it to complete the quest

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Running a Fever

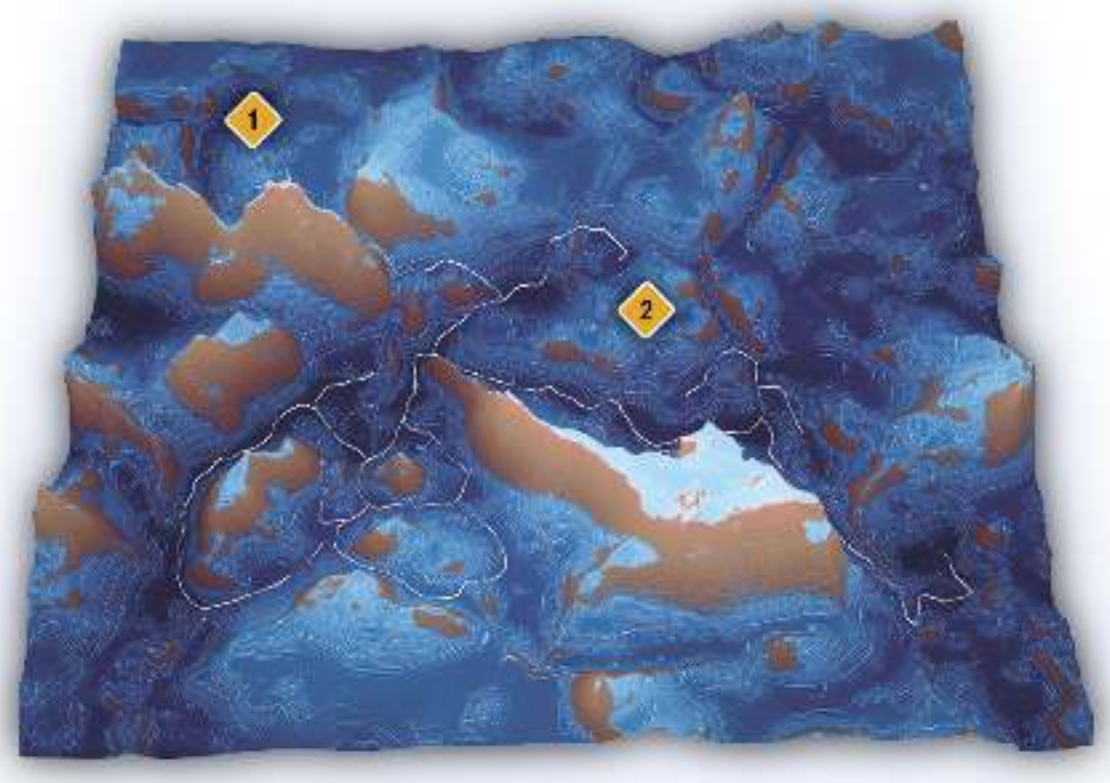
Mission Type: Additional Task

Prerequisite: Complete "Task: Herbal Entrepreneurs"

Start Location: Kadara

Unlocking: Examine the unknown plant

EXAMINE THE UNKNOWN PLANT



KADARA

At the end of "Task: Herbal Entrepreneurs," your buddies offer you some plants to take with you. Head to the inside garden behind the Outlaws and examine the unknown plant.

You discovered a plant that has antibiotic properties. It could heal the sick patient you met at the encampment of Nexus refugees hiding in the hills.

TAKE THE PLANT TO THE NEXUS REFUGEES

KADARA

This objective can be confusing if you're not already familiar with the "Task: Broken Family" crowd. When you get this objective, it's a knee-jerk reaction to head to the Nexus. Don't. The Nexus refugees are right here on Kadara; they're the refugees with "Broken Family" issues. Fast travel back to Haarfel using the nearby forward station, and enter the refugee hut **(2)**. Talk to the turian refugee who's helping the sick one in bed. Give him the medicine to save his life.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Save Dr. Okeer's Krogan Research

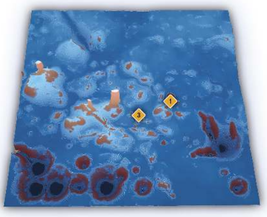
Mission Type: Additional Task

Prerequisite: Mission 3, unlock Elaaden and find the kett transponder on Kadara

Start Location: Elaaden

Unlocking: Talk to the krogan geneticist

TALK TO THE KROGAN GENETICIST



ELAADEN: NEW TUCHANKR

When Drack is with you, he—being a krogan and all—can help you make it past the main-entry gate guards **(1)** on the south side of the krogan colony, New Tuchanka. If Drack is not with you, he'll meet you at the door to talk the guards into letting you in. That's the benefit of having a krogan friend like Drack.

Once you're through the main gate, head left and talk to the krogan geneticist **(2)** behind the counter. She tells you that a terminal holding important krogan research from the famous Dr. Okeer was accidentally sold to a junker, Dr. Ganar doesn't need the terminal but insists that the data is important to the future of the krogan species. Agree to help, and he gives you the navpoint, the name of the scavenger he accidently sold it to, and the terminal identification.

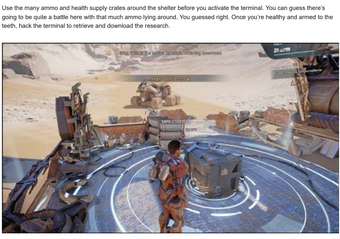
GO TO THE NAVPOINT PROVIDED BY DR. GANAR

LANGUISH

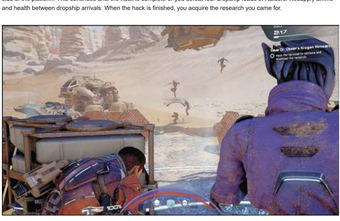
West of the Languish Forward Station is a gully where a research shelter sits in the middle of nowhere. Follow the navpoint **(3)** to this shelter and exit the Nomad.

HACK THE TERMINAL

Use the many ammo and health supply crates around the shelter before you activate the terminal. You can guess there's going to be quite a battle here with that much ammo lying around. You guessed right. Once you're healthy and armed to the teeth, hack the terminal to retrieve and download the research.



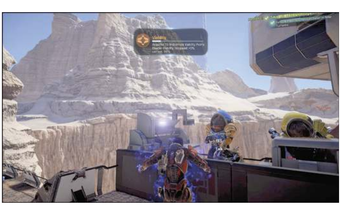
You're given 2:29 to hack the terminal. The longer you remain in the lit target zone around the terminal, the sooner the hack completes. Leave the target zone, and the hack goes on hold. One dropship flies into the area and drops four Raiders. Defeat them from cover within the hacking zone, and another dropship arrives shortly after and drops more Raiders on the opposite side of the platform. This continues until the hack is complete or you defeat four dropship-loads of Raiders. Resupply ammo and health between dropship arrivals. When the hack is finished, you acquire the research you came for.



RETURN THE RESEARCH TO DR. GANAR

NEW TUCHANKR

Next time you're back at the krogan colony, stop by and see the krogan geneticist to return the research. He can now continue Dr. Okeer's work.



MASS EFFECT ANDROMEDA

Secondary Ops

Task: Safe Journeys

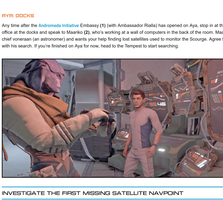
Mission Type: Helios Assignment: Aya

Prerequisite: Andromeda Initiative Embassy opened on Aya

Start Location: Aya: Docks

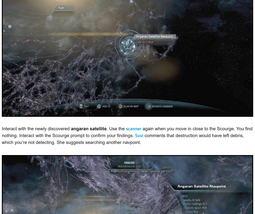
Unlocking: Speak to Maariko

SPEAK TO MAARIKO IN THE DOCK CAPTAIN'S OFFICE



AYA: DOCKS

Any time after the Andromeda Initiative Embassy (1) (with Ambassador Rialto) has opened on Aya, stop in at the captain's office at the docks and speak to Maariko (2), who's working at a wall of computers in the back of the room. Maariko Darviq is a chief vorrasan (an astronomer) and wants your help finding lost satellites used to monitor the Scourge. Agree to help him with his search. If you're finished on Aya for now, head to the Tempest to start searching.

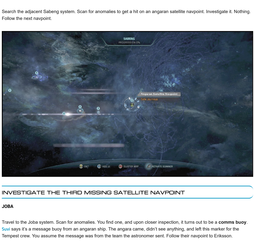


INVESTIGATE THE FIRST MISSING SATELLITE NAVPOINT

TEMPEST

ONAXIN

Remain in the Onaxin system and perform a scan. Ignore the asteroid anomaly and scan the anomaly in the lower-right section beyond the outermost orbital ring. Zero in on the anomaly until you receive a green reticle. Shoot a probe at the targeted area in the Scourge.

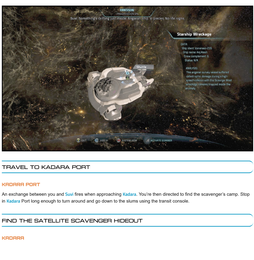


Interact with the newly discovered **angaran satellite**. Use the scanner again when you move in close to the Scourge. You find nothing. Interact with the Scourge prompt to confirm your findings. Suvi comments that destruction would have left debris, which you're not detecting. She suggests searching another navpoint.

INVESTIGATE THE SECOND MISSING SATELLITE NAVPOINT

SABENG

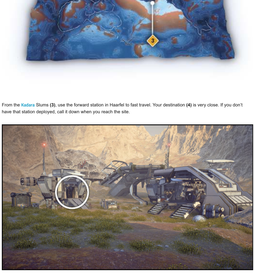
Search the adjacent Sabeng system. Scan for anomalies to get a hit on an angaran satellite navpoint. Investigate it. Nothing. Follow the next navpoint.

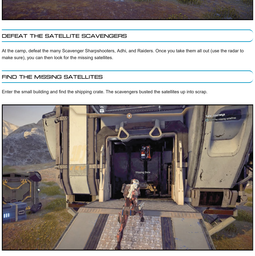


INVESTIGATE THE THIRD MISSING SATELLITE NAVPOINT

JOBA

Travel to the Joba system. Scan for anomalies. You find one, and upon closer inspection, it turns out to be a **comm buoy**. Suvi says it's a message buoy from an angaran ship. The angara came, didn't see anything, and left this marker for the Tempest crew. You assume the message was from the team the astronomer sent. Follow their navpoint to Eriksson.

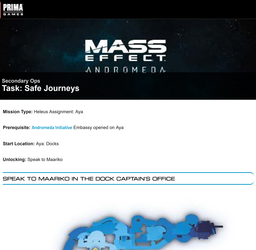




TRAVEL TO THE ANGARAN VESSEL'S NAVPOINT

ERIKSSON

Enter the Eriksson system and do a scan. You find **starship wreckage**. Inspect it closely—it's an empty ship. No one inside is alive. Suvi downloads and analyzes the logs. Scavengers got caught stealing satellites. The scavengers fought back, and the angara collided with the Scourge.



TRAVEL TO KADARA PORT

KHORAR PORT

An exchange between you and Suvi fires when approaching Kadara. You're then directed to find the scavenger's camp. Stop in Kadara Port long enough to turn around and go down to the slums using the transit console.

FIND THE SATELLITE SCAVENGER HIDEOUT

KHORAR

From the Kadara Slums (3), use the forward station in Haarfel to fast travel. Your destination (4) is very close. If you don't have that station deployed, call it down when you reach the site.

DEFEAT THE SATELLITE SCAVENGERS

At the camp, defeat the many Scavenger Sharpshooters, Adhi, and Raiders. Once you take them all out (use the radar to make sure), you can then look for the missing satellites.

FIND THE MISSING SATELLITES

Enter the small building and find the shipping crate. The scavengers busted the satellites up into scrap.

RETURN TO MAARIKO

You can choose to tell Maariko the truth by admitting the exiles stole the satellites, or lie and tell him that angara were responsible for the theft. No matter how you answer, the outcome is the same for you. You receive XP, a small amount of AVP, and Aya Viability +2%.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Searching for Morga

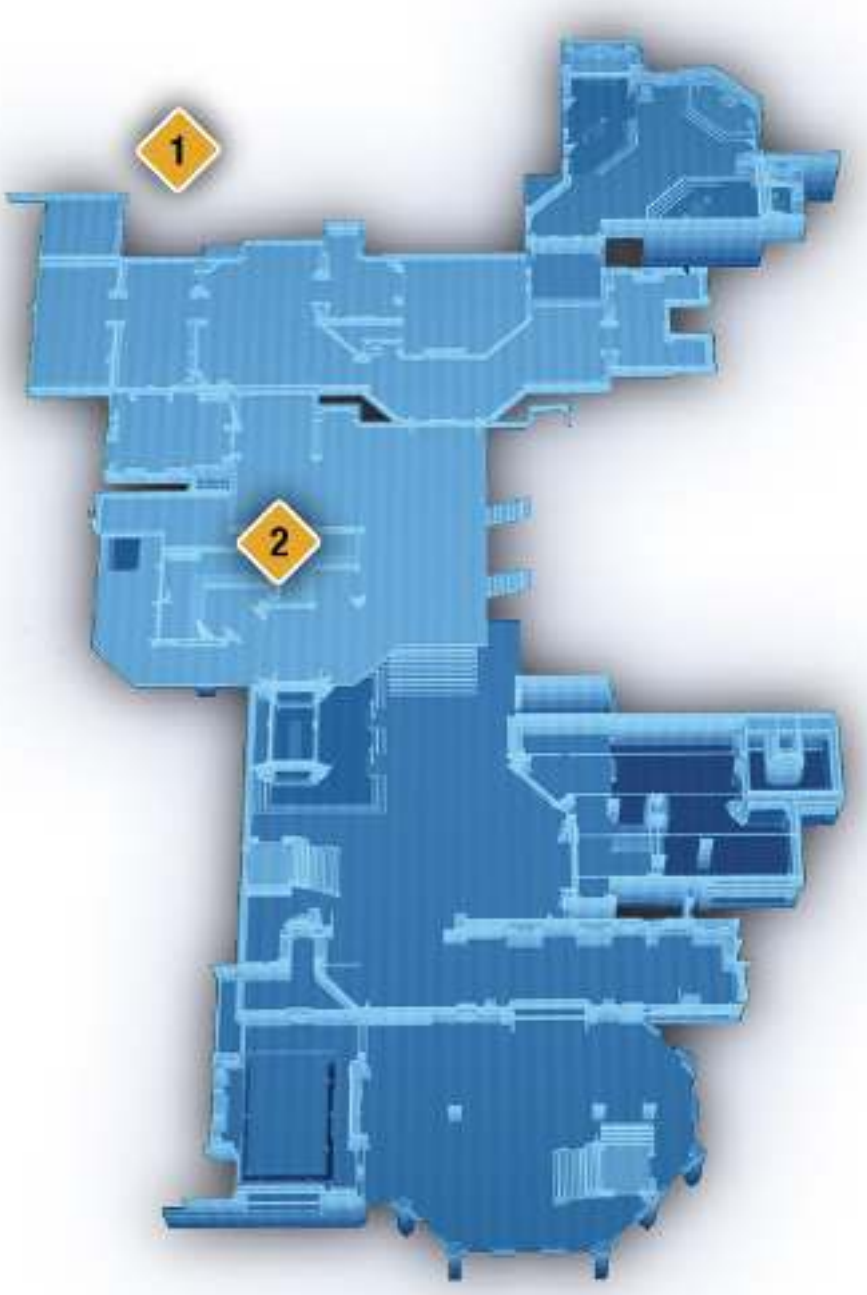
Mission Type: Additional Task

Prerequisite: Must have interrogated Vehn Terev in “Hunting the Archon”

Start Location: Kadara Port

Unlocking: Speak to Jataa

SCAN FOR SIGNS OF MORGA

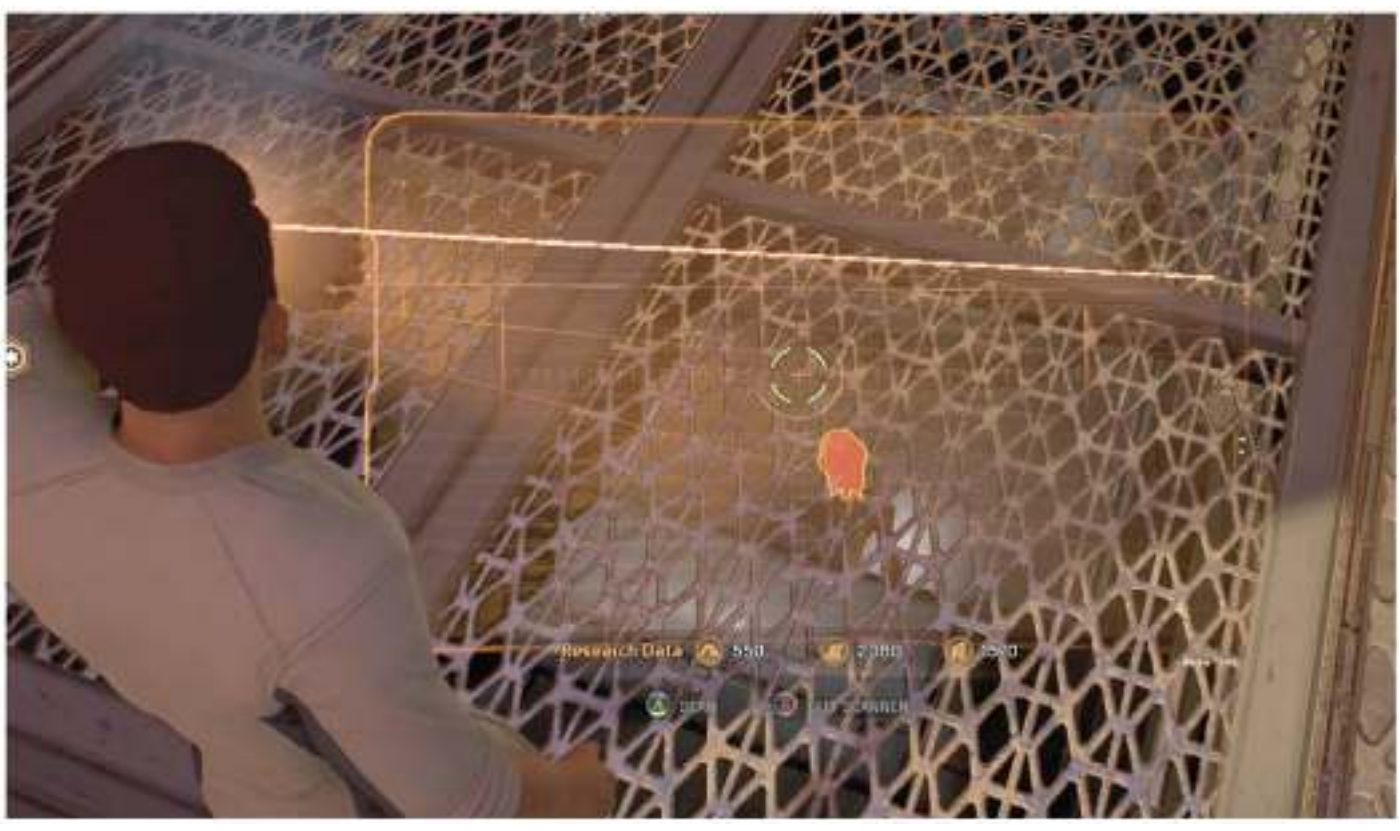


KADARA PORT

Speak to the distraught angara, Jataa **(1)**, to learn about her missing sister, Morga. Jataa to the left of the Outcast Headquarters’ guarded entry. Agree to help look for her sister, who’s been missing for three days.

SCAN FOR SIGNS OF MORGA

Head back toward the bar, pull up the scanner, and start scanning down at the ground—where one would look for someone who is missing. Walk over the grates **(2)** in the middle of the walkway in front of the bar to find Morga. In the sewage. Dead. She’s right next to the other Kadara murder victim. Kadara is not a great vacation destination.



RETURN TO JATAA

Return to Jataa **(1)** and deliver the bad news about her sister.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Subjugation

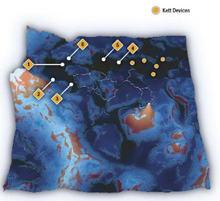
Mission Type: Additional Task

Prerequisite: Mission 2; must have traveled to Aya

Start Location: Voeld

Unlocking: Destroy one of the kett devices

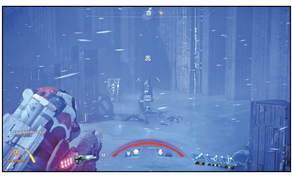
DESTROY FIVE KETT DEVICES



VOELD

The kett have attempted to weaponize the Remnant, with little success. To put a stop to their research, you need to destroy the kett's output devices. There are five total. Destroying any one of them begins this task. Find them as they randomly spawn at Remnant sites. Each device has a skull icon above it. Shoot the devices to destroy them. Expect various Remnant enemies at these locations.

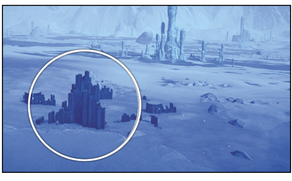
The devices spawn randomly at any number of static Remnant sites. You can often find them at the following locations: **(1)**, **(2)**, **(3)**, **(4)**, **(5)**. If you don't find them at the locations we've listed, keep searching the similar sites around Voeld. When you destroy the fifth kett device, SAM says the devices were transmitting data to a location on Voeld, and a nanpoint is set on a secret Remnant vault **(6)**.



KETT DEVICE 1

We found this Remnant site **(1)** consistently holds a kett device.

KETT DEVICE 2

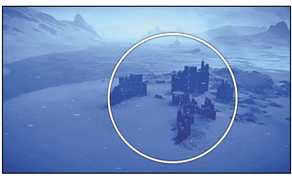


This Remnant site **(2)** is the closest to the angaran Resistance base, and we found it regularly holds a kett device.

KETT DEVICE 3

This Remnant site **(3)** with crashed ship parts sometimes holds a kett device.

KETT DEVICE 4



This Remnant site **(4)** near the north holding site has a high probability of containing a kett device.

KETT DEVICE 5

This small Remnant site **(5)** usually holds a kett device.

OTHER REMNANT SITES

If you're not having any luck finding the kett devices at the sites we've called out previously, check our map for other Remnant sites where the devices might spawn (see the orange dots on the map).

ENTER THE REMNANT FACILITY

Once you've destroyed five kett devices, the Remnant vault **(6)** hidden deep in an ice gully north of the Hjara station becomes accessible. Enter the vault and use the Gravity Well to get to the first chamber below.

ELIMINATE THE KETT

Eliminate the Chosen in the Gravity Well.

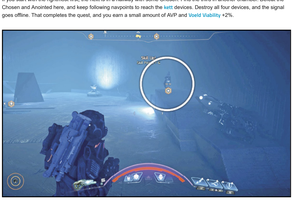
INVESTIGATE THE CONSOLE

Climb the back platform in the Gravity Well and use the kett console that sits next to an inactive Remnant console.

DESTROY ALL FOUR OUTPUT DEVICES

Follow the bent tunnel to the next chamber. Destroy the Destined and Chosen along the way. When you enter the large chamber, notice the four nanpoints going off in three directions. Each leads to a kett device you need to shoot and destroy (just like the ones outside).

If you start with the rightmost first, the next is in a hallway with some Chosen. Find the third in another chamber. Defeat the Chosen and Anointed here, and keep following nanpoints to reach the kett devices. Destroy all four devices, and the signal goes offline. That completes the quest, and you earn a small amount of AVP and Ivard Viability +2%.



MASS EFFECT ANDROMEDA

Secondary Ops

Task: Supply Loss and Recovery

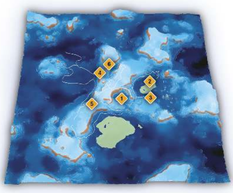
Mission Type: Additional Task

Prerequisite: Establish a settlement on Eos

Start Location: Eos

Unlocking: Interact with the terminal on the first floor of a two-story building in Prodromos

INTERACT WITH THE TERMINAL



EOS: PRODROMOS

MERCHANT

The woman standing at the end of this room is a merchant. You can purchase some weapons, mods, and armor from her.

In Prodromos, enter the first floor of the two-story building **(1)** closest to the Tempest. There are two terminals side by side; one starts this quest, and the other opens the quest "Waking up to the Future." On the first terminal is a **Prodromos supplies report** indicating that supplies headed for Prodromos have gone missing. Check the supply drop sites to uncover some information about what's happening. Acknowledge the report to start this task.

INVESTIGATE SUPPLY DROP SITES-SITE 2: RESILIENCE

SUPPLY DROP

Kill the Shemrys on the small peninsula near Site 2: Resilience, then scan the supplies **(2)** on the ground. SAM determines that local fauna or the Shemrys could have caused the crates to open. If you stop here and return to the terminal **(1)** where you picked up the mission, you can potentially end the mission early. However, there is more to this story. If you continue to search for more clues, you can find out who really broke open the supply crates.

FOUR GIANTS

SUPPLY DROP

Kill any Kaerkyn around this supply drop **(3)** in Four Giants, which is right beside the forward station. Scan the items in the sand to discover more evidence of robberies. You also find that bait is being placed to attract the bugs. More data is needed to discover who's doing this.

TWO POSSIBLE OUTCOMES: DON'T REPORT THE WILDLIFE

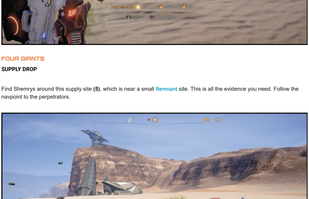
After the first supply scan, you have the option to report the wildlife as the culprit destroying the supply drops. However, for a second possible outcome, continue searching the supply drops without reporting back. You can discover something beyond the obvious.

OPTIONAL: INVESTIGATE OTHER SITES

THE SHERTOP

SUPPLY DROP

Find a supply drop near this forward station **(4)** not far from a buried monolith. Defeat the Shemrys and scan the supply remains in the dirt.



FOUR GIANTS

SUPPLY DROP

Find Shemrys around this supply site **(5)**, which is near a small Remnant site. This is all the evidence you need. Follow the navpoint to the perpetrators.

INVESTIGATE THE HIDEOUT

Follow the last navpoint **(6)** close to the forward station near the kett base. Drive inside the nearby basin containing the Remnant site. This way you can use some six-wheel-drive action to easily reach the high ledge.

Talk to Chase Gagnon. Outlaws from the Nexus want a second chance. Give them the second chance they ask for.

REPORT THE SMUGGLERS

Reports are part of all investigative work. Head back to the terminal **(1)** where you started this quest, but this time use it to end the task by sending the "Prodromos Supplies Report."

MASS EFFECT ANDROMEDA

Secondary Ops
Task: Test Subject

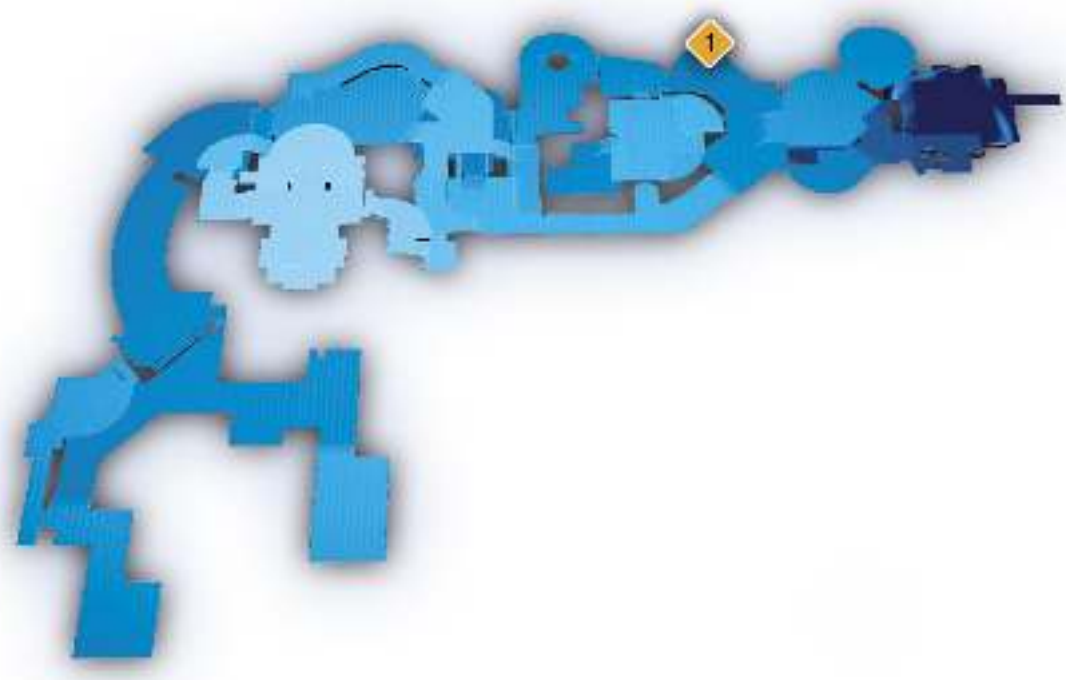
Mission Type: Additional Tasks

Prerequisite: Mission 3 or later

Start Location: Aya

Unlocking: The Moshae is rescued and Aya is open to visitors

SPEAK TO THE ANGARA WHO SCANNED YOU



AYA: RESISTANCE HEADQUARTERS AREA

The first time you pass through this area (where Jaal hangs out while gazing at the Aya landscape), an angara near the holographic message terminal invades your privacy by getting an unapproved scan of you. This *must* be against angaran laws and customs. Speak to Daanfre **(1)**, the one creepin' on you.

When you confront her, she admits to being extremely curious about you, being the alien species on *their* home world. She asks if you'd submit to a full-spectrum analysis of your biology. You can answer with "Let me scan you first" or "Who are you?" or "Go right ahead" or "What do you hope to find?" All answers lead to a scan and an invitation to more information. The task ends successfully after the initial conversation, and you earn a very small amount of XP. You can approach her again to get more information out of her. Talk to her about her job, your scan results, angaran survival, and her agenda.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: The Angaran Initiative

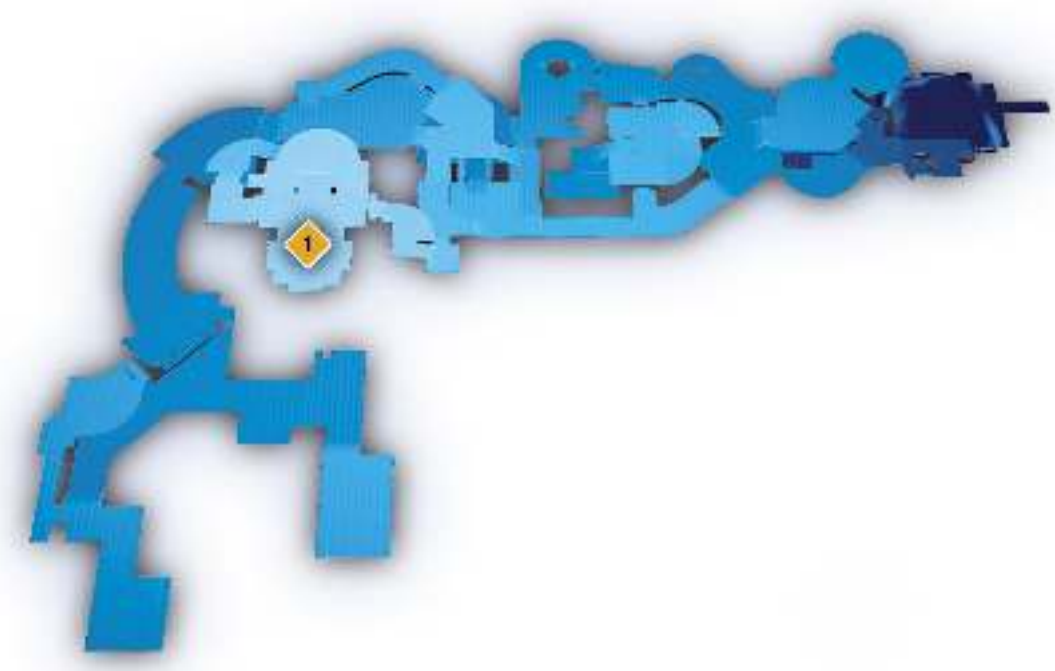
Mission Type: Additional Task

Prerequisite: Mission 4

Start Location: Aya

Unlocking: Talk to Ambassador Rialla

VISIT THE ANDROMEDA INITIATIVE EMBASSY ON AYA



AYA: ANDROMEDA INITIATIVE EMBASSY

Director Tann reports that the angara opened an embassy on Aya. Check in with the Initiative's representatives there to make sure things go smoothly. Talk to Ambassador Rialla **(1)** in the newly unlocked room off the governor's office on Aya. Speak to her enough, and she gives you the quest "The Vesaal."

MASS EFFECT ANDROMEDA

Secondary Ops

Task: The Ghost of Promise

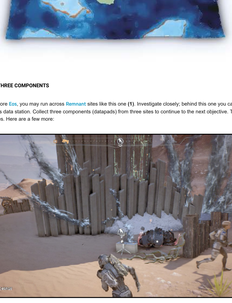
Mission Type: Additional Task

Prerequisite: Mission 2, land on Eos

Start Location: Eos

Unlocking: Find one of the researcher's stations

LOCATE THE RESEARCHERS STATIONS

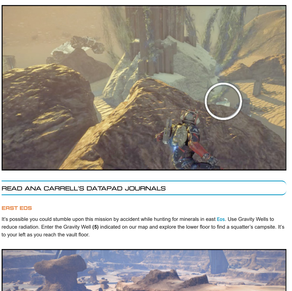


EOS

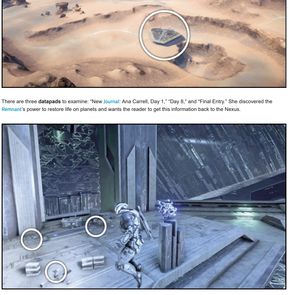
RECOVER THREE COMPONENTS

As you explore Eos, you may run across Remnant sites like this one **(1)**. Investigate closely; behind this one you can find a researcher's data station. Collect three components (datapads) from three sites to continue to the next objective. There are multiple sites. Here are a few more:

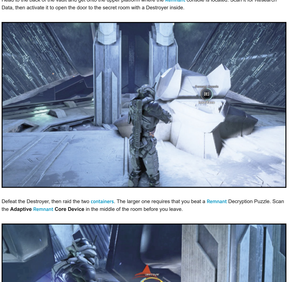
There's a station **(2)** near the forward station south of Site 2: Resilience.



There's a datapad **(3)** in a location by the side of a mountain road just northeast of the kett base. You see kett battling Remnant. Help them defeat each other and find the **datapad** on a crate. It's the researcher's notes.



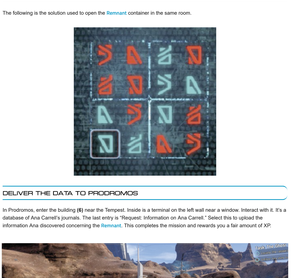
There's a **datapad(4)** south of the Remnant monolith lake (where Peebee finds rem-tech). It's at a Remnant site covered in Scourge energy pockets.



READ ANA CARRELL'S DATAPAD JOURNALS

ERIST EOS

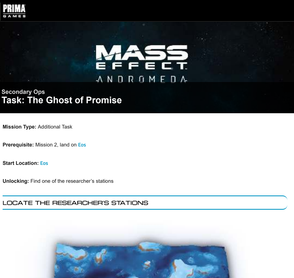
It's possible you could stumble upon this mission by accident while hunting for minerals in east Eos. Use Gravity Wells to reduce radiation. Enter the Gravity Well **(5)** indicated on our map and explore the lower floor to find a squatter's campsite. It's to your left as you reach the vault floor.



There are three **datapads** to examine; "New Journal: Ana Carrell, Day 1," "Day 8," and "Final Entry." She discovered the Remnant's power to restore life on planets and wants the reader to get this information back to the Nexus.

WHILE IN THE VAULT...

Head to the back of the vault and get onto the upper platform where the Remnant console is located. Scan it for Research Data, then activate it to open the door to the secret room with a Destroyer inside.



Defeat the Destroyer, then raid the two containers. The larger one requires that you beat a Remnant Decryption Puzzle. Scan the **Adaptive** Remnant **Core Device** in the middle of the room before you leave.

The following is the solution used to open the Remnant container in the same room.

DELIVER THE DATA TO PRODROMOS

In Prodromos, enter the building **(6)** near the Tempest. Inside is a terminal on the left wall near a window. Interact with it. It's a database of Ana Carrell's journals. The last entry is "Request: Information on Ana Carrell." Select this to upload the information Ana discovered concerning the Remnant. This completes the mission and rewards you a fair amount of XP.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: The Model of the Spheres

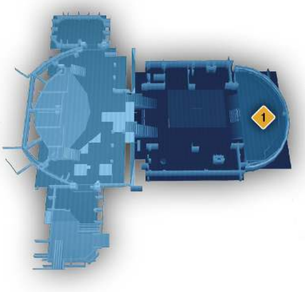
Mission Type: Additional Task

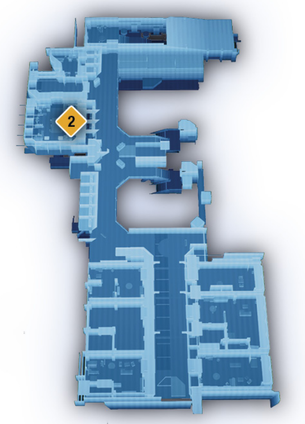
Prerequisite: Unlock the Tempest

Start Location: Nexus Operations or tech lab

Unlocking: Speak to Dr. Aridana

SPEAK TO DR. ARIDANA





NEXUS OPERATIONS

Initially, all the scientists are together in operations on the rear deck **(1)**. When the Common opens, you can find the scientists in the tech lab **(2)**. Speak to the scientists to open a collection task from each.

Speak to Dr. Adriana once to unlock "Missing Scientists," then again to unlock this challenge, "The Model of the Spheres." She says there are plans for a school underway, to inspire a new generation of young minds. For that, she wants to craft a model of the Heleus Cluster from the data you scan. She'll share her educational budget with you as payment.

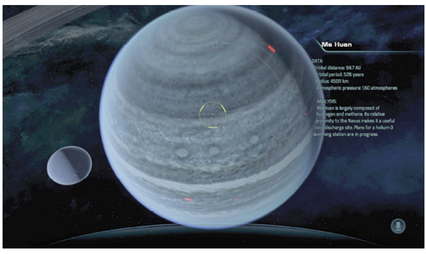
ACCESS THE TERMINAL

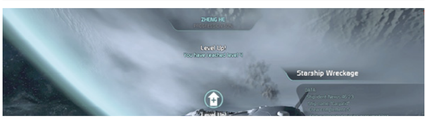
After speaking to each scientist, you must access the terminal **(1)** on the same operations deck where you first find the scientists. Here you confirm the quest from each. In this case, accept the challenge to scan planets by selecting "Cluster Model: Dr. Leynomi Aridana." This challenge involves the scanning of 50 planets across Heleus.

Final Proposal: Prof. N. Hawk et al
Geophysics VI: Beta Build
Cluster Model: Dr. Leynomi Aridana
Cluster Model: Dr. Leynomi Aridana
- The three initial system models will be complete by next week. We shall see our place in the world.
- Orbital variance for the Nexus: it must be corrected as construction corrects our orientation.
- A reminder:
Our daughters will not know steals
The six hundred years sleeping.
They will be born of Andromeda
And whatever is unfolding.
This cluster in its chaos
Was not welcoming.
But it matters less what we suffer here.

SCAN PLANETS ACROSS HELEUS

The best plan of action for this mission is to scan each planet in each solar system as you first visit that system. It only takes a few minutes, and you earn lots of XP and find some goodies to boot. This mission spans a good portion of the game but doesn't take as long as you might think. There are at least five spheres in each system. You can easily hit the 50-scan goal after visiting fewer than a dozen solar systems. You'll also be surprised how quickly you can level up by performing planet scans. Plus you can find some great items.





MASS EFFECT ANDROMEDA

Secondary Ops

Task: The Nexus Exchange

Mission Type: Additional Task

Prerequisite: The Andromeda Initiative Embassy must be open

Start Location: Aya

Unlocking: Speak to Ambassador Rialla

SPEAK TO RIALLA

AYA: ANDROMEDA INITIATIVE EMBASSY

Director Tann has suggested strengthening ties between the Initiative and Aya by allowing angaran volunteers to live on the Nexus. Several angara have expressed interest, and Ambassador Rialla **(1)** has tasked you with interviewing each candidate.

SPEAK TO YURAALT ABOUT MOVING TO THE NEXUS

REPOSITORY OF HISTORY

Talk to Yuraalt **(2)** in the museum. Try to convince him to move to the Nexus. You don't have much luck with that one. Try the next.

SPEAK TO HELRUUL ABOUT MOVING TO THE NEXUS

MARKETPLACE

Run over to the marketplace to find Helruul **(3)** on a bench on the sightseeing ledge. Try to convince him to move…to no avail.

SPEAK TO SAALRO ABOUT MOVING TO THE NEXUS

DOCKS

Head to the docks, continue all the way to the last shuttle dock, and speak to Saalro **(4)**. Try to get him to move to the Nexus. You got one! The mission is a success.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: The Witnesses

Mission Type: Additional Task

Prerequisite: Complete Mission 5

Start Location: Tempest

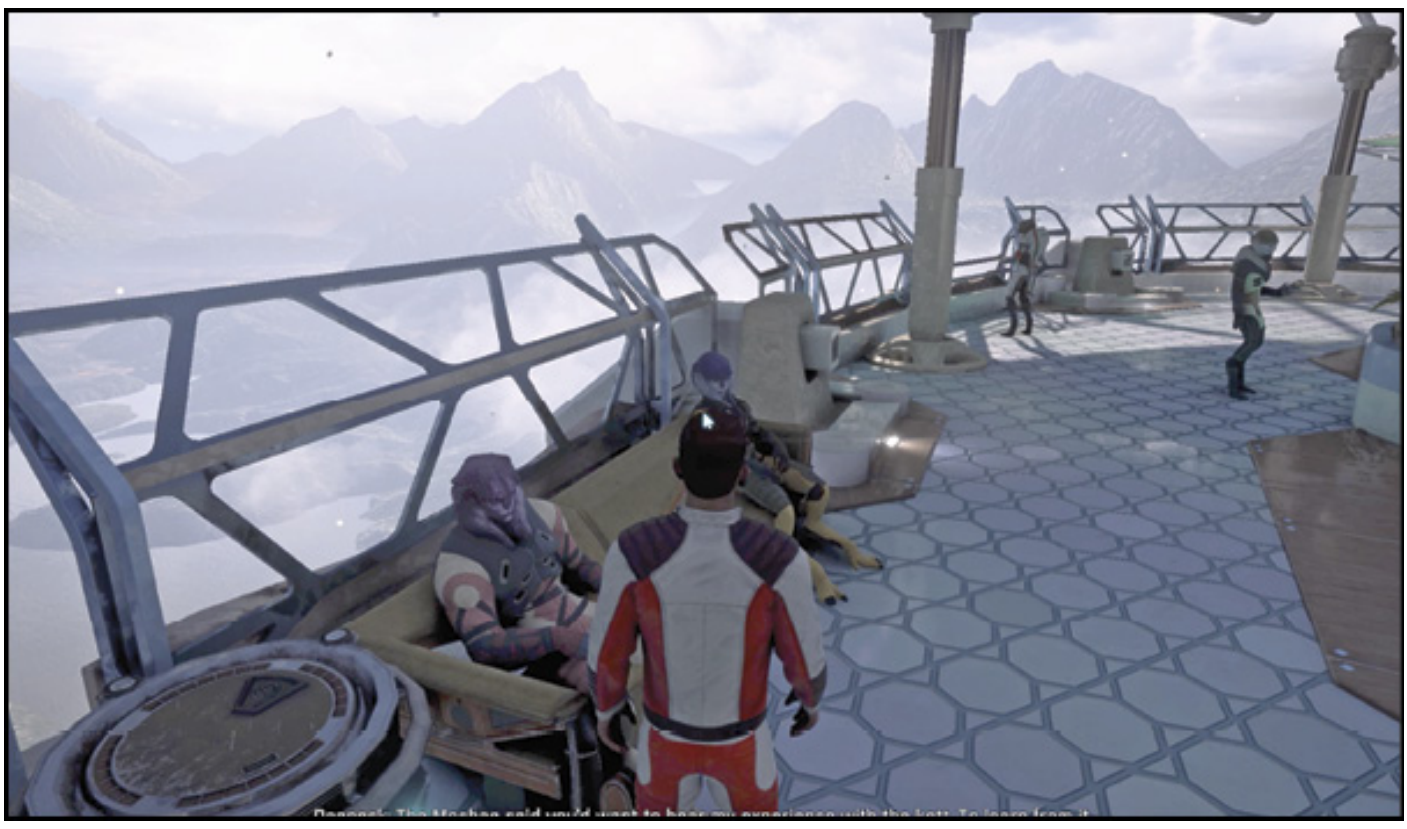
Unlocking: Read email from the Moshae

READ EMAIL

Read the email from Moshae Sjefa titled “Wisdom.” Moshae Sjefa urges you to speak with the few remaining angara on Aya who remember how the kett conquered their people. The Moshae believes these elders’ insights can aid the Initiative’s struggle against the kett.

SPEAK TO DAANESK ON AYA

Find Daanesk **(3)**, who’s also sitting on a bench on the higher walkway with the nice view. Talk to him.



SPEAK TO ANARET ON AYA

From the dock **(1)**, find Anaret **(2)** on a bench with a friend in the Memorial Gardens. Talk to her.

SPEAK TO VUHLREN ON AYA

Lastly, find Vuhlren **(4)** near Resistance Headquarters, also sitting on a bench. He’s alone. Speak to him to complete the quest. You earn a small amount of XP.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Traitor or Victim?

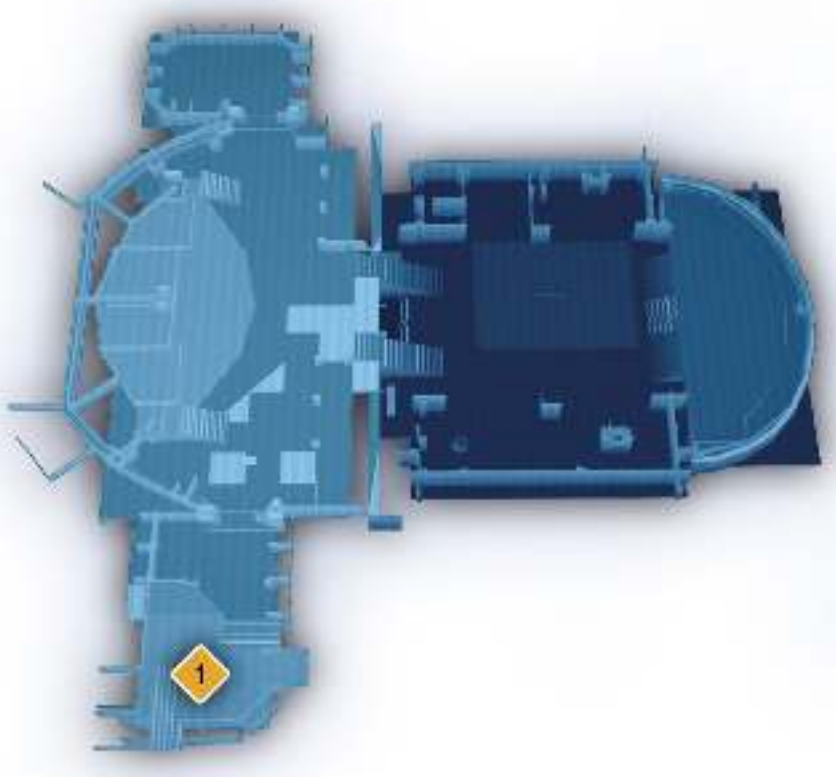
Mission Type: Additional Task

Prerequisite: Must have visited Kadara during “Hunting the Archon”

Start Location: Nexus Operations

Unlocking: Talk to Sellers

SPEAK TO SELLERS



NEXUS OPERATIONS: TANN'S OFFICE

Find Sellers **(1)** standing on the entertainment landing between the lower and upper floors in Tann’s office. He tells you his best friend has been missing since the revolts. The missing friend was involved with a woman who was exiled, and Sellers thinks she kidnapped him. His name is Sanjiv Clement, and the woman is Delaney Roos and is believed to be on Kadara.

FINISHED BEFORE YOU STARTED

If you happened upon the **datapad** on Kadara that’s linked to this quest—before you even had a chance to talk to Sellers to get this quest started—then when you talk to Sellers now, the quest completes, all without any serious investigation on your part.

FIND OUT WHAT HAPPENED TO CLEMENT ON KADARA

KADARA SLUMS

Sanjiv Clement has been labeled a traitor, but his friend is sure he was taken against his will by exiles. Sellers has asked for proof to help clear Sanjiv’s name. Now that you’ve made it to the Kadara Slums, look in the small nook **(2)** to the right of the slums bar to find the body of Sanjiv—dead in an alley.

To complete the mission, pick up the **datapad** titled “Sanjiv Clement: Last Words” next to the body. It’s a letter about his girlfriend, Delaney Roos. She took him from the Nexus against his will, and she and her exile friends beat him and left him there to die. This completes the quest.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Turian Salvage

Mission Type: Additional Task

Prerequisite: Mission 2, complete "Helping Havarl's Scientists" and "Turian Ark: Not Dead Yet"

Start Location: Havarl's turian encampment

Unlocking: Talk to Drusa after clearing the Roekaar from her camp

TALK TO DRUSA

HAVARL, TURIAN ENCAMPMENT

After saving Drusa and Avitus Rix from the Roekaar attack at their encampment during "Turian Ark: Not Dead Yet," find Drusa (1) standing near a cryo pod on the west side of camp. Speak to her to learn she needs you to find and tag bits of debris from Ark Natanus to prevent the Roekaar from getting their hands on new tech.

NOT DEAD YET WAITING

The mission "Turian Ark: Not Dead Yet" ends, and eventually the story continues in "Turian Ark: Lost but Not Forgotten." That story thread is not tied to the current task involving finding the debris on Havarl, but to advancing the Priority Ops story in "Hunting the Archon," where you interrogate a prisoner on Kadara. Leave Kadara and look for an email from Avitus, who points you to wreckage on Elaaden.

TAG NATANUS DEBRIS FOR REMOVAL ON HAVARL

See our map to find all nine hidden Ark Natanus debris locations. Scan the ground in these locations to find the glowing materials.

NATANUS DEBRIS 1

This debris (**1**) is the closest to the landing zone. Find it in the ground near a wall northwest of the central forward station. Raid the **container**.

NATANUS DEBRIS 2

Be prepared to fight some Roekaar Raiders when you approach the area where this debris (**3**) is found. It is at the top of a short hill near a large city wall.

NATANUS DEBRIS 3

Find this debris (**4**) below the forward station in the Chasm of the Builders. Be ready to face many Remnants in this area.

NATANUS DEBRIS 4

This debris (**5**) is located on the south side of a narrow stream on the side of a hill next to some boulders. Raid the **container** found among the debris.

NATANUS DEBRIS 5

This debris (**6**) is next to a wall southwest of the central forward station.

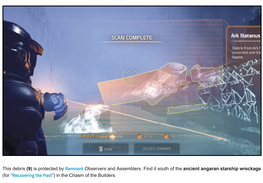
NATANUS DEBRIS 6

Find this turian ark debris (**7**) next to a small cave with a **container** inside. The debris is just southeast of the central forward station.

NATANUS DEBRIS 7

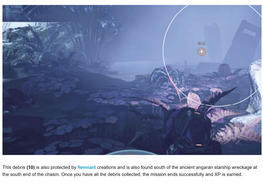
Find this debris (**8**) on a hill of purple flowers in the corner of two city walls.

NATANUS DEBRIS 8



This debris (**9**) is protected by Remnant Observers and Assemblers. Find it south of the **ancient angaran starship wreckage** (for "Recovering the Pod") in the Chasm of the Builders.

NATANUS DEBRIS 9



This debris (**10**) is also protected by Remnant creations and is also found south of the ancient angaran starship wreckage at the south end of the chasm. Once you have all the debris collected, the mission ends successfully and XP is earned.

Secondary Ops

Task: Unearthed

Mission Type: Additional Task

Prerequisite: Complete "Helping Havarl's Scientists"

Start Location: Havarl

Unlocking: Speak to Fleera at Mithrava Sanctuary

TALK TO FLEERA

HAVARL, MITHRAVA SANCTUARY

See "A Dying Planet" for information on how to reach the top of Mithrava Tower. Sage Fleera **(A)** in Mithrava Sanctuary tells you that upheaval in the jungles of Havarl often unearths Remnant devices that would otherwise remain buried. Studying these devices could reveal more information about Remnant technology. She wants you to find these devices.

COLLECT UNEARTHED REMNANT DEVICES ON HAVARL

You only need to collect eight of the many unearthed Remnant devices to complete the quest. Accordingly, we point you to eight of them. All the devices sit in glowing, tangled, leafless branches. When you find the first one, remember what it looks like. All the devices can be identified this way. You also get a bleeping on the radar when you get close to one without the scanner drawn.

UNEARTHED REMNANT DEVICE 1

This device **(1)** is under the Remnant vault rooftop—not inside the vault, but at the back cave wall. Find the device on the rocks at the back.

UNEARTHED REMNANT DEVICE 2

This device **(2)** is on some rocks near the wall and the sloped Remnant support column in north Central Wilds.

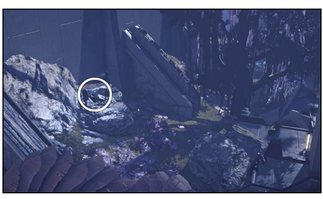
UNEARTHED REMNANT DEVICE 3

This device **(3)** is on the ground near some rocks just east of the Pelaav Research Center's Forward Station.

UNEARTHED REMNANT DEVICE 4

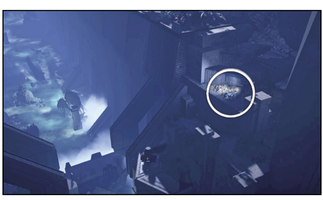
This device **(4)** is in some rocks near the landing zone.

UNEARTHED REMNANT DEVICE 5



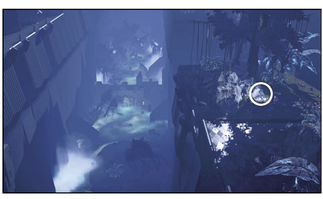
This device **(5)** is up high on a rock climb on the left wall of this north Central Wilds pathway.

UNEARTHED REMNANT DEVICE 6



This device **(6)** is on a lower platform (steps) on the west chasm wall.

UNEARTHED REMNANT DEVICE 7



This device **(7)** is on some rocks near a large tree on the west side of the chasm, very close to the edge.

UNEARTHED REMNANT DEVICE 8

This device **(8)** is on the Remnant ledge in the southwest corner of the ancient courtyard. Again, collect eight devices to complete the quest.

MASS EFFECT ANDROMEDA

Secondary Ops
Task: Volatile

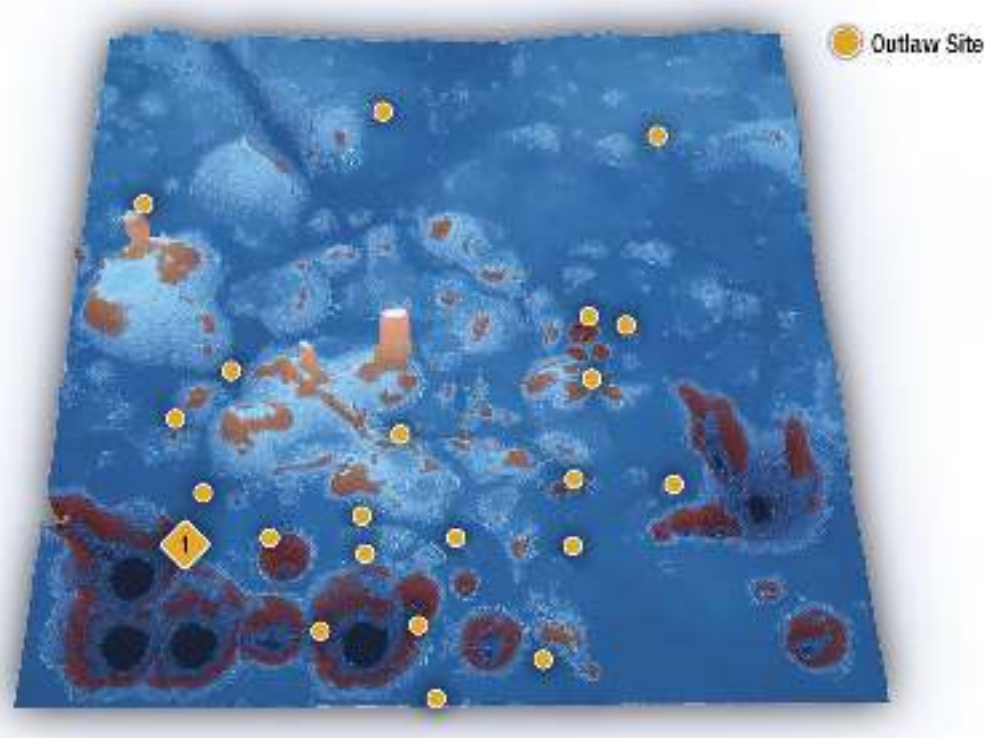
Mission Type: Additional Task

Prerequisite: Access to Elaaden

Start Location: Elaaden

Unlocking: Destroy a volatile canister

DESTROY THE VOLATILE CANISTERS

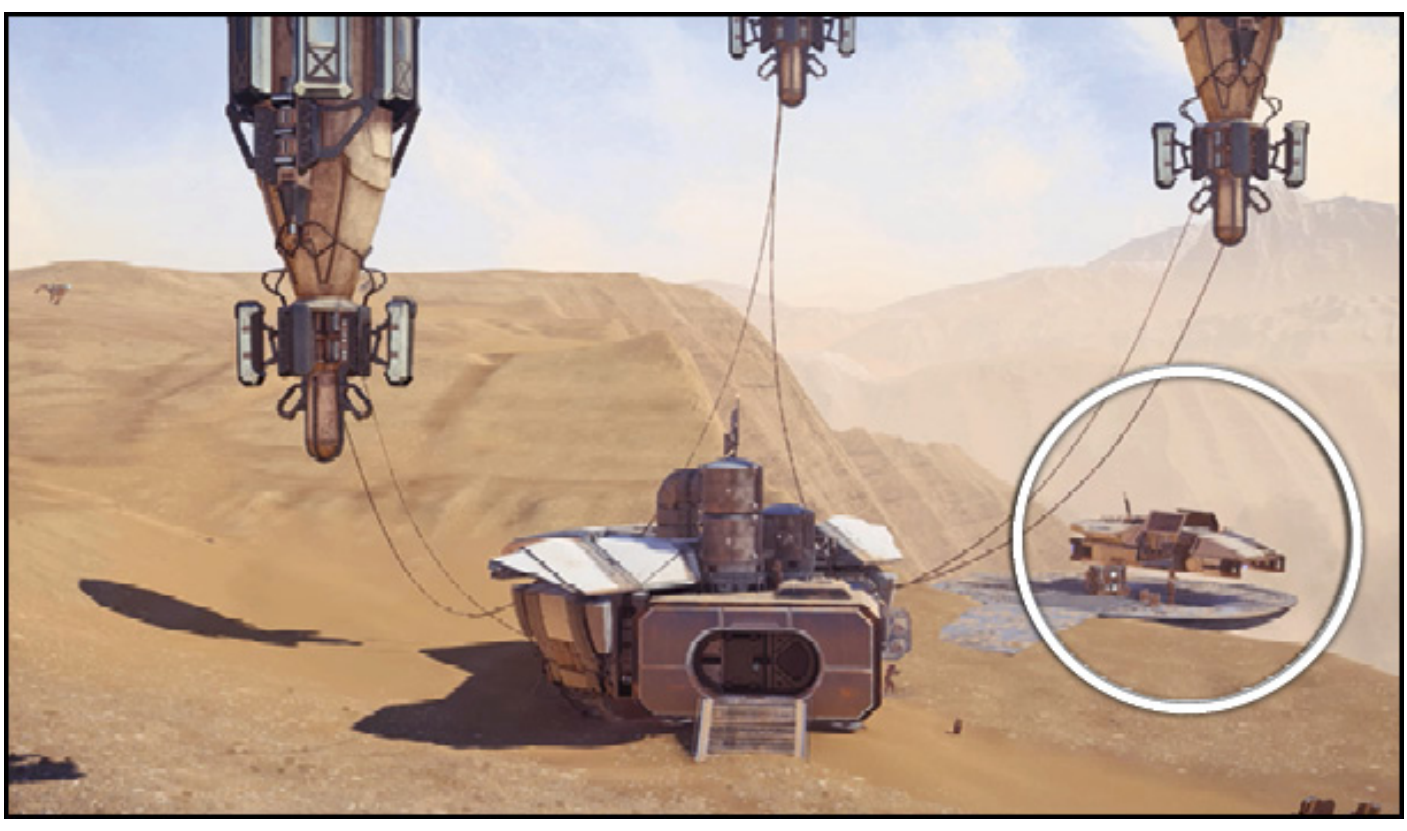


ELAADEN

The volatile canisters appear randomly at any of numerous Outlaw camps. We've marked most of the potential locations on our map. Visit them all until you find four volatile canisters. They have skull icons above them. Shoot them to destroy them. After the fourth volatile canister is destroyed, SAM tracks all of them to a single location in the southwest.

FOLLOW THE NAVPOINT

SAM extracts a navpoint **(1)** from the tracking signals placed on explosive canisters. Following it could enable you to determine what the scavengers are planning.



DESTROY THEEXPLOSIVE STOCKPILE

When you reach the Outlaw outpost **(1)**, don't run into the building. Instead, run up to the landing pad and shoot the explosive canisters near the shuttle. Destroying the canisters destroys the shuttle and completes the quest.

MASS EFFECT ANDROMEDA

Secondary Ops

Task: Waking Up to the Future

Mission Type: Additional Tasks

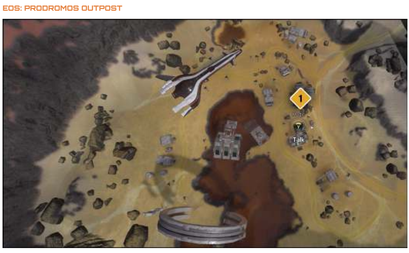
Prerequisite: Establish an outpost on Eos; must have visited Aya

Start Location: Eos

Unlocking: Interact with the terminal on the first floor of a two-story building in Prodromos

INTERACT WITH THE TERMINAL

EOS: PRODROMOS OUTPOST



In Prodromos, enter the first floor of the two-story building **(1)** closest to the Tempest. There are two terminals side by side; one opens another task, and the other opens this one. Read the message on the second terminal. The family of Darket Tiervian, a turian still in cryo, are asking that she be allowed to join them instead of waiting for a future cryo block deployment.

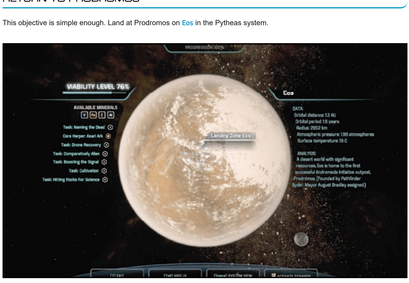
SPEAK WITH ADDISON'S ASSISTANT

NEXUS OPERATIONS

Find Vladimir Brecka **(2)** aboard the Nexus in operations; he's standing next to the cryo pod console. Talk to him about getting Darket Tiervian out of stasis. He says the deployment begins shortly.

RETURN TO PRODROMOS

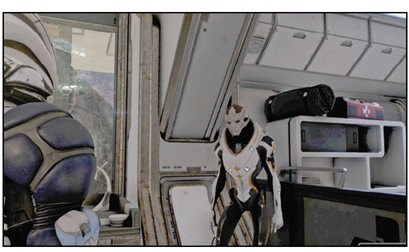
This objective is simple enough. Land at Prodromos on Eos in the Pytheas system.



VIABILITY LEVEL 75%
AVAILABLE BOUNDS
Task: Naming the Dead
Core Hunger: Asari Ark
Task: Drone Recovery
Task: Comparatively Alien
Task: Boosting the Signal
Task: Cultivation
Task: Hitting Rocks for Science
Core
DATA
Orbital distance 13 AU
Orbital period 18 years
Radius 2922 km
Atmospheric pressure 180 atmospheres
Surface temperature 18 C
ANALYSIS
A desert world with significant resources. Eos is home to the first successful Andromeda Initiative outpost, Prodromos. [Founded by Pathfinder Ryder (Bryan Augusti Bradley assigned)]

TALK TO DARKET TIERVIAN

Head back to the same building where you started this job and talk to Darket Tiervian **(1)**; she's in the same room on the first floor. She wants to reward you for waking her from stasis early. She says in a past life she was an expert in tactics. She suggests the kett are drifting supplies in orbits around planets. She gives you some navpoints to some anomalies.



FIND KETT CACHES IN SPACE

TEMPEST

Secondary Ops
Task: Watchers

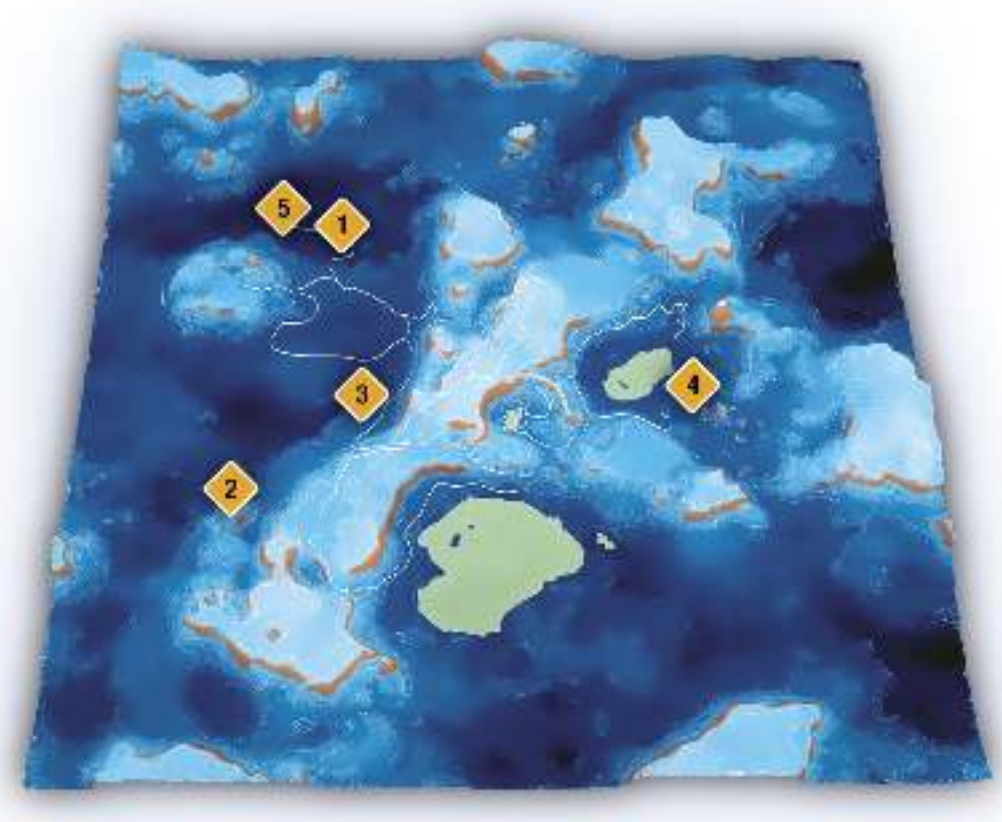
Mission Type: Additional Tasks

Prerequisite: Land on Eos

Start Location: Eos

Unlocking: Destroy a kett surveillance device

FIND AND DESTROY KETT SURVEILLANCE DEVICES



EOS: PRESSON DUNES

You run across small kett camps and outposts like this one **(1)** on the road in Presson Dunes. Defeat the kett and the Wraiths in the camp, making use of the many explosive materials in and around the area. When all is clear, investigate the middle of the camp to find the surveillance device. It's marked with a white skull icon hovering above it. Destroy it by shooting it or using explosives or a special power.

The surveillance devices appear randomly and are generated at kett camps. We've marked the locations on our map that most consistently produced the devices. Try near the crashed kett ship **(2)** in Presson Dunes. Defeat the kett around this burning, smoking ship. Expect major pushback from Chosen and a Destined. Destroy the device too. You earn a fair amount of XP from this battle.

Another surveillance device **(3)** may be located at this kett drill site in a large ravine to the south of the generator fields.

Another surveillance device **(4)** could be in Presson Dunes just south of the "First Murderer" crime scene. It's at a smoking, crashed kett ship. Defeat the kett around it and then shoot the device.

Once you've located and destroyed all the devices, SAM contacts you and gives you a navpoint to an outpost **(5)** in Presson Dunes. You should investigate.

ELIMINATE THE KETT

SAM extracts a feed location for the surveillance devices that leads to the central processing site for all surveillance data **(5)**. Destroy the Chosen and Destined around the outpost, then enter and defeat the Anointed, Wraiths, and two Chosen.

USE THE DATA CONSOLE

Use the console inside the building and fend off the next wave of attacks.

LET SAM SCRAMBLE THE SIGNAL

Give SAM enough time to scramble the signal. Defeat the next wave of kett attacks.

DESTROY THE CONSOLE

When SAM is done scrambling, destroy the console to complete the quest.

Secondary Ops

Task: What He Would Have Wanted

Mission Type: Additional Task

Prerequisite: Mission 2, land on Eos

Start Location: Eos

Unlocking: Interact with the outpost field comms terminal

FIND AND ACTIVATE FIELD COMMS TERMINAL

EOS: NEAR SITE 2: RESILIENCE

Find the small work outpost (parked trucks and scattered equipment) near Four Giants southeast of Site 2: Resilience. Defeat the kett and wildlife in the camp. Scan the Pack/Rack and then look behind it for a small field comms terminal **(1)**. Interact with it to find the "Work Detail: Outpost Survey Beacons" report. When the report comes into view, select it. You've found a survey job started by Initiative technician Eric Camber. He was apparently interrupted by kett and may have died. Completing his beacon run will help make Eos more viable.

PLACE BEACONS

BEACON 1

This beacon is the nearest to the comms terminal where you started the mission. Climb the boulders in the little island of rock spires to find the exact location for setting up the beacon **(2)**.

BEACON 2

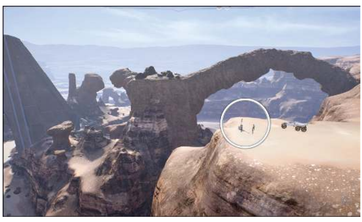
Place this beacon **(3)** in the east hills of Eos near the Gravity Well where you find the side quest "Ghost of Promise."

BEACON 3

Place this beacon **(4)** on the mountaintop west of the lake at Site 2: Resilience. To reach the desired location, you may have to defeat a small squad of kett camped out at the same spot. Expect a Chosen, Anointed, and two Destined.

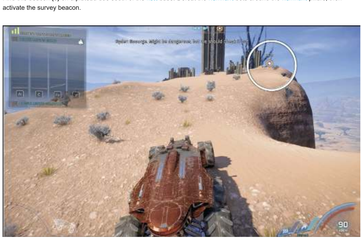
BEACON 4

Find this beacon **(5)** up high on the ledge overlooking the large lake on south Eos. Activate it.



BEACON 5

Find this beacon **(6)** on a plateau due south of the kett base. Defeat the Remnant bots around the Remnant pillars, then activate the survey beacon.



MASS EFFECT ANDROMEDA

Secondary Ops

The Baryte Rush

Mission Type: Heleus Assignment: Kadara

Prerequisite: Must have interrogated Vehn Terev in "Hunting the Archon"

Start Location: Kadara

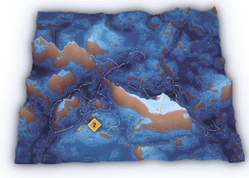
Unlocking: Speak to Derc

SPEAK TO DERC

KADARA: SLUMS BAR

Enter the first floor of the bar in the Kadara Slums and find the salarian Derc chillin' in a corner seat with a couple asari babes. Talk to Derc (**1**), and he asks if you want to make some extra money. He informs you that Kadara's most valuable trade is scrap and resources stolen from the Nexus, but that welll is running dry. His focus is now resources native to Andromeda. He wants you to check in on a missing surveyor who was collecting baryte samples in Draullir.

TRAVEL TO THE SURVEYOR'S LAST KNOWN LOCATION IN DRAULLIR



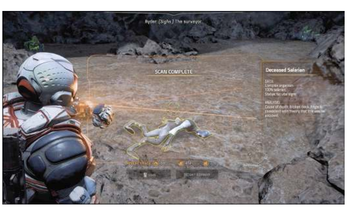
KADARA

Head to Sulfur Springs and look on the mountain for this hut on stilts, next to Draullir's cave entrance (**2**).

SCAN THE SURVEYOR'S CORPSE

DRAULLIR

The underground lair that is Draullir is a pretty big cave system. Spend some time checking out every nook for scannable objects.

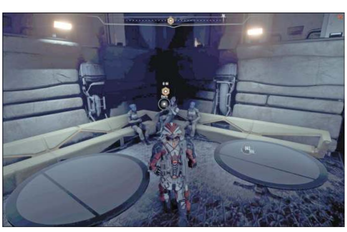


The quest takes you from the entrance (**2**) to the surveyor's corpse (**3**) to a Rylkor battle. Beyond that, go to the door below (**4**) to start the quest "The Collective Base."

RETURN TO DERC

KADARA SLUMS

Return to the Kadara Slums bar and tell Derc (**1**) you found the surveyor; he broke his neck while trying to get baryte samples. Derc thanks you and pays you. You earn a small amount of AVP and Kadara Viability +2%.



MASS EFFECT ANDROMEDA

Secondary Ops
The Charlatan's Charlatan

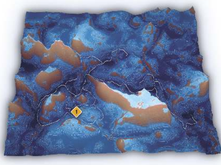
Mission Type: Helleus Assignment: Kadara

Prerequisite: Complete "The Collective Base"

Start Location: Kadara

Unlocking: Speak to Crux in the mission "The Collective Base"

SPEAK TO CRUX



KADARA: DRAULLIR: COLLECTIVE BASE

Inside the Collective base (1) (during the quest "The Collective Base"), head to the top floor of the multi-story structure to speak to Crux. If the name Crux made you expect some kind of hulking monster, you'll be as surprised as we were. Here in this dark cave you find a clean, attractive, human female.

Besides telling you that "Draullir" is angaran for "death caves," she informs you that someone's faking the Charlatan's orders —giving bad intel, getting Collective recruits killed. She speculates that only the representatives have access to such high-level information, meaning the imposter is probably someone operating out of her base.

She tells you there was a drop point in Sulfur Springs, so the imposter should have a good amount of sulfur in their clothes. She needs your help finding this person. Footprints match that of a human or an asari. That's all they have.

"THE COLLECTIVE BASE" ENDS AND "THE CHARLATAN'S CHARLATAN" BEGINS

After speaking to Crux, you finish "The Collective Base" quest, and in turn she gives you "The Charlatan's Charlatan" quest during the same conversation. That mission starts now.

SCAN FIVE SUSPECTS

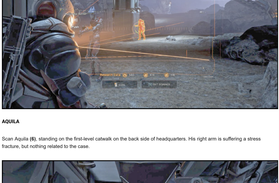
To weed out the imposter, Crux has asked you to scan those in her operation around the base in attempt to find someone covered in sulfur residue.

CARINA

Carina (**4**), working in the garden behind the base, is scannable. The scan comes up negative.

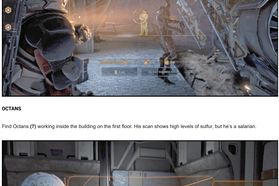
LYNX

Find Lynx (**5**) on the ground near a support beam under the Collective Headquarters building. Her scan shows sulfur at slightly higher levels than normal, and she has chemical burns on her fingers and forearms. Keep scanning people.



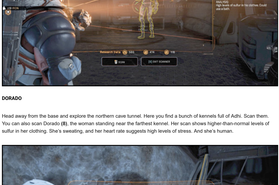
AQUILA

Scan Aquila (**6**), standing on the first-level catwalk on the back side of headquarters. His right arm is suffering a stress fracture, but nothing related to the case.



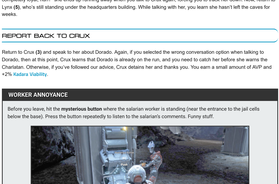
OCTANS

Find Octans (**7**) working inside the building on the first floor. His scan shows high levels of sulfur, but he's a salarian.



DORADO

Head away from the base and explore the northern cave tunnel. Here you find a bunch of kennels full of Adhi. Scan them. You can also scan Dorado (**8**), the woman standing near the farthest kennel. Her scan shows higher-than-normal levels of sulfur in her clothing. She's sweating, and her heart rate suggests high levels of stress. And she's human.



SPEAK TO LYNX AND DORADO

This is very important (unless you want to draw out this quest longer than needed): When you talk to Dorado, make sure to say, "Whoa. Relax," and then "Like the Sulfur Springs." This reinforces the evidence you found on her. If you answer, "You're completely loyal, huh?" she ends up running away when you talk to Crux again, forcing you to track her down. Now, return to Lynx (**5**), who's still standing under the headquarters building. While talking with her, you learn she hasn't left the caves for weeks.

REPORT BACK TO CRUX

Return to Crux (**3**) and speak to her about Dorado. Again, if you selected the wrong conversation option when talking to Dorado, then at this point, Crux learns that Dorado is already on the run, and you need to catch her before she warns the Charlatan. Otherwise, if you've followed our advice, Crux detains her and thanks you. You earn a small amount of AVP and +2% Kadara Viability.

WORKER ANNOYANCE

Before you leave, hit the **mysterious button** where the salarian worker is standing (near the entrance to the jail cells below the base). Press the button repeatedly to listen to the salarian's comments. Funny stuff.

MASS EFFECT ANDROMEDA

Secondary Ops

The Collective Base

Mission Type: Heleus Assignment: Kadara

Prerequisite: Must have interrogated Vehn Terev in “Hunting the Archon”

Start Location: Kadara

Unlocking: Speak to Crux

SPEAK TO LYNX

KADARA: SULFUR SPRINGS: DRAULLIR

You typically stumble across this quest while in the Draullir caves during “The Baryte Rush.” Enter through the high cave opening **(1)**, then explore as deep into the Draullir caves as you can get to find a door **(2)** below. Open the door to meet Lynx. She’s an asari who works for Crux, the female in charge of the Collective. She has her orders: to keep you alive. So you live to walk deeper into the caves. Follow the navpoint toward the Collective’s subterranean headquarters **(3)**.

SPEAK TO CRUX

Head to the top floor of the multi-story structure and speak to Crux. Besides telling you that “Draullir” is angaran for “death caves,” she informs you that someone’s faking the Charlatan’s orders—giving bad intel, getting Collective recruits killed.

She speculates that only the representatives have access to such high-level information, meaning the imposter is probably someone operating out of her base. She tells you there was a drop point in Sulfur Springs, so the imposter should a good amount of sulfur in their clothes. She needs your help finding this person. Footprints match that of a human or an asari. That’s all they have.

at the first sign of suspicion. I need a subtle way to smoke them out.
Why impersonate the Charlatan?
What about me?
Good luck with that.

“THE COLLECTIVE BASE” ENDS AND “THE CHARLATAN’S CHARLATAN” BEGINS

After speaking to Crux, you finish “The Collective Base” quest, and in turn she gives you “The Charlatan’s Charlatan” quest in the same conversation. For additional help with this new quest, see “The Charlatan’s Charlatan.”

MASS EFFECT ANDROMEDA

Encounter Kit
The Forefathers

Mission Type: Story Encounter Heroic

Prerequisites: Mission 2 Complete Nexus Phase 2

Main Location: Nexus Outskirts

Unlocking: Kett, N7, Nomad,

INTRO TO DR. AMANDA

ENCLAVE TECH LAB

Enter the Tech Lab on the Nexus and make it to the point in Dr. Amanda's office. Do not use the two cutoff corridors and a shortcut. Either cut scene. Then speak to the engineer that is found to the left of the map. Scope the mission.

PLOT THE SOLUTION

CYTOKINETIC SPIKE AMMO

Near the new Ops & Operations Validator. Enter the Shift Mode and interact with the Shift. Select Threat equipment to unlock Cytokinetic Spike Ammo. You can also purchase this ammo from the Vendor in the Nexus Outskirts. Cytokinetic Spike Ammo is effective against Kett Shielded enemies. You can also purchase this ammo in Eos Outskirts.

SCAN THE SOUTH AS DESTRUCTION TAR WRECKS

Search and reconstruct all of the Tech. The Kinetograph guide title. The Kinetic tracks through communications and speaks. Search the surrounding area. Then, head to the Kinetograph and scan the Kinetic Tracks there. Look at your ship and scan the Kinetic Tracks there.

Kett activities tasks and Kett. PRIME quest. Go to Loft Outskirts' Kinetic Tracks. Scan the Kinetic. Kinetic Tracks there. Search the Kinetic Kinetograph Kinetic. Kinetic. Then, head to the Kinetic Kinetograph Kinetic. Kinetic Kinetograph. Kinetic. Kinetic Kinetograph. Kinetic. Kinetic Kinetograph.

MASS EFFECT ANDROMEDA

Secondary Ops
The Flophouse

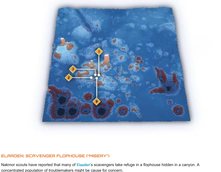
Mission Type: Helius Assignment. Elsadon.

Prerequisite: Land on Elsadon

Start Location: Elsadon

Unlocking: Talk to the injured krogan at Nea Tuchanka, or approach the flophouse.

INVESTIGATE THE FLOPHOUSE



ELIMINEN SCAVENGER FLOPHOUSE (THEORY?)

Nakmor scouts have reported that many of Elsadon's scavengers take refuge in a flophouse hidden in a canyon. A concentrated population of troublemakers might be cause for concern.

SEARCH FOR THE STOLEN REMNANT DRIVE CORE

If you haven't started the search for the stolen drive core yet, we suggest doing that before you head to the flophouse. Both quests lead here, making it convenient to finish both at the same time.

Approach the scavenger flophouse from either the narrow gully doorway (**1**) or the west plateau (**2**), where you have a wider view of the camp. Entering from the west places you close to the command center for the next objective.

ENTER THE COMMAND CENTER

When you try to enter the command center (**3**), you run into strong scavenger resistance, and they kick you out of the building. You face Raiders, Agents, and Anarchists, as well as Adhi. The alarm is triggered, and a big battle lies ahead. You're now tasked with shutting the alarm down to keep the enemies from deploying fresh troops.

OPTIONAL: DISABLE ALL THREE SECURITY TERMINALS

Before you challenge yourself to an even bigger battle than what you're dealing with right now—and since you're going in the same direction—clear out the building (**4**) in the back of the cavern and activate the security terminal inside. Look for the glowing green terminals to interact with. This is an optional objective; disabling all three security terminals allows access inside the currently locked storage room (**7**).

Leave the building, head south, and jump down to the ramp next land-ledge below. Enter the top floor of this building (**5**) and interact with the glowing green terminal to disable the second security terminal.

Jump up on the rooftop of this building and get back to the top cavern pathway. Head east and enter the second level of another building (**6**). Deactivate the security terminal inside. If this is the third terminal activated, the storage room (**7**) unlocks.

OPTIONAL: ACCESS THE SECURE STORAGE ROOM

Enter the storage room (**7**) after disabling all three security terminals (**4**)(**5**)(**6**). Inside is a plethora of loot containers and a couple large **pieces of equipment** to scan for data.

USE THE SECURITY CONSOLE TO DISABLE THE ALARM

On the cavern pathway level, enter the farthest building to the east (**8**) to begin the battle to disable the alarm. Hack the console behind the counter on the right as you enter.

HOLD YOUR GROUND UNTIL SECURITY IS HACKED

Hacking the console in the security building (**8**) starts a two minute clock and generates a hacking-battle target zone you must remain within to keep the clock moving. If you step out of the ring (which extends out onto the front porch), the clock pauses. Use the counters, the doorjambs, and the railing out on the porch for cover. There are a few ammo and health crates nearby to keep you loaded. Expect the same types of enemies you saw in the flophouse, with the addition of some Sharpshooters and a Berserker.

CLEAR OUT THE COMMAND CENTER

After the security hack is complete, return to the command center (**3**) and breach the entry points. Inside on the first floor are Raiders and an Anarchist.

Clear the room before heading up the stairs to the second level so they don't follow you and add to the resistance upstairs.

DEFEAT THE LEADER OF THE FLOPHOUSE

ELIMINATE DEFENDERS

Shotgoe Grog, the leader of the flophouse, is on the second floor of the command centre (**3**). He's a krogan Berserker, and Agents, Raiders, and Pariahs stand by to protect him. Since this is fight-quarters fighting, use explosives to soften your targets. Direct your team to target one enemy while you work on another. Avoid Shotgoe while you finish everyone else off, then work on him last. Scan the bodies of the fallen for Research Data.

CLEAR THE FLOPHOUSE OF SCAVENGERS

Use the console on the top-level balcony of the second floor to disable alarms and keep reinforcements from arriving. This clears the flophouse of scavengers. You earn massive AXP and +10% Elsadon Viability for completing this quest. Scour the flophouse area for containers.

CRISIS RESPONSE

Investigate the top floor of the research building (**9**) for a **datapad** that initiates the "Crisis Response" quest.

MASS EFFECT ANDROMEDA

Secondary Task
The Little Things That Matter

Mission Type: Alerts and Relationships

Prerequisite: Settle two planets (or one, plus a kroger-refusal on Exodent)

Start Location: Any planet where you've placed an Outpost

Unlocking: Detect the 69RS satellite anomaly that explodes in orbit

INVESTIGATE THE SATELLITE SIGNAL

LOCATION: ONY SYSTEM, WITH A PLACED SETTLEMENT

A strange signal source for Tempest is auto-mapped, suggesting someone knows a bit about Andromeda Initiative tech. Search the systems where you have settlements for the source. You find a ZK Resource Tracker—a spy satellite that tracks Initiative shipments and allocates exterminating drone without authorization.

The ZK Resource Tracker explodes upon discovery, but Suvi gets a serial that triggers an alert. SAM suggests contacting Addison.

SPEAK WITH ADDISON VIA TEMPEST VIDCOM

TEMPEST: MEETING ROOM

Call Addison on the Vidcon (5) in the meeting room. It turns out she already knows about the destroyed satellite. She tells you that Initiative Command (Tann, Jien Garson, and Director Helius Rem) is aware of the ZK Resource Trackers. They're concerned the entire map have a chance to steal from your outposts. Through conversation, you can get more information from Addison. She knows you with the task of searching for more ZK Resource Trackers to find a point of origin.

MISSION ON HOLD

You discover ZK Resource Tracker satellites in outpost systems. At this point, this mission can go on hold until you place more outposts to draw these satellites into orbit.

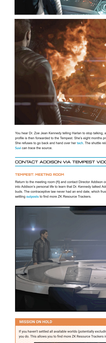
FIND ZK RESOURCE TRACKERS

TEMPEST: BRIDGE

From the bridge (6), travel to each system where you've established an outpost on one of its planets.

- Pythias System: Eos
- Nol System: Kadara
- Govorkam System: Kadara
- Zaurima System: Elaaden

Scan the system while in orbit to find anomalies, then send a probe at any anomalies discovered. If you have a settlement on one of the system's planets, one of the anomalies is revealed as a ZK Resource Tracker.



The first ZK Resource Tracker you investigate explodes, no matter what system you find it in—including Govorkam, if Meridia remains an objective in Kadara. The satellite emits up as a million pieces of space debris because of a bounty self-destruct mechanism. But, it's hardly its origin, which leads to the next objective (leaving the objective open until you discover all four ZK Resource Trackers).

FIND THE ORIGIN OF THE SIGNAL

You can engage this objective before you've discovered all the ZK Resource Trackers. Head to the Nexion system and scan for anomalies. You find the ZK Resource Tracker signal shuttle in the southwest edge of the system.

Upon closer inspection, a cutscene begins on the bridge of the Tempest. SAM informs you that this is the exact coordinate where the ZK Resource Trackers are coming from. Addison is contacted via Vidcom (5). She's not sure what to make of it, but she can patch into its feed. The crew of Hyrian Wells is heard over comms, he realizes he's been found. You can tell him you're the Pathfinder, or go the more professional route and tell him he has stolen property.

You hear Dr. Zoe Kenneally telling Hyrian to stop talking, and with that, she takes over comms. Dr. Kenneally's medical profile is then forwarded to the Tempest. She's eight months pregnant with the first human child to be born in Andromeda. She's also the doctor who had Lexi Hall and her son. The shuttle crew is suddenly dominant, breaking communications before Suvi can trace the source.

CONTACT ADDISON VIA TEMPEST VIDCOM

TEMPEST: MEETING ROOM

Return to the meeting room (5) and contact Director Addison on Vidcon. She's surprised by the news of the pregnancy. Pry into Addison's personal life to learn that Dr. Kenneally talked Addison into joining the Initiative back in college. They're old buds. The commonplace has never had an end date, which frustrated the doctor. Now the only way to trace her is to continue settling outposts to find more ZK Resource Trackers.

MISSION ON HOLD

If you haven't settled all available worlds (potentially excluding the outpost on Kadara), this mission goes on hold until you do. The shuttle uses its final three ZK Resource Trackers to throw someone, shortly, which leads to the Nomad location.

FOUR ZK RESOURCE TRACKERS

Suvi gets point of origin data from all four ZK Resource Trackers. The data points to Voeld.

LOCATE DR. KENNEDY

VOELD

Once you've scanned all the ZK Resource Trackers, Suvi gets a point of origin on Voeld. From the landing zone (3), fast travel

Secondary Ops

The Lost Scout

Mission Type: Heleus Assignment: Voeld

Prerequisite: Mission 2; must have traveled to Aya; complete "Meet the Resistance"

Start Location: Voeld

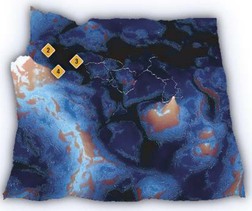
Unlocking: Talk to Haana or rescue Mashal

TALK TO HAANA

VOELD: ANGARAN RESISTANCE BASE

In the hangar entrance to the angaran Resistance base, you overhear a conversation where an angara, Haana **(1)**, is desperately asking for help in finding her friend who's been left behind at a kett ammo depot. Her friend, Mashal, is the explosives expert who destroyed the depot, and Haana is convinced Mashal is still alive. Agree to help find her.

INVESTIGATE THE RUINS



Exit the base **(2)** to travel to the Hjara Forward Station **(3)**. Enter the Nomad and head southwest to the navpoint **(4)**, which leads you to the snow-covered mountainside. As you approach, you see the glowing orange lights of many small fires.

SCAN THE AREA

KETT AMMO DEPOT RUINS

Exit the Nomad at the blazing depot and pull up the scanner. You can scan a lot in the area, including the large structural platform **(5)** that makes up most of the debris in the middle of the ruins, and multiple kett portable heating elements **(6)** that are like breadcrumbs leading you to an entrance platform that's still intact. Scan it all, and then get to the top of the ruins, where one more heating element marks the entrance **(7)** to the facility in the mountainside.

ENTER THE DESTROYED AMMO DEPOT

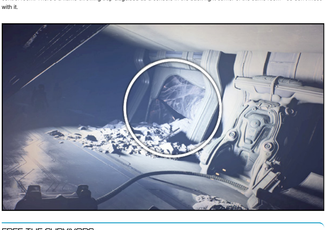
Inside the depot are two doors linked by an underground conduit you can only see with a scan. The door on the right is locked. The door in the back is not.

SEARCH FOR SURVIVORS

You can try to open the locked door; then listen for survivors on the other side. Head into the next room through the unlocked door.

RESTORE POWER

Continue forward to find a breakable wall on the left. Use your omni-blade to smash through. In this small room, hack the console that's revealed to restore power to the depot. This allows you to unlock the door in the first room. Exit the small control room. There's a flame-throwing trap disguised as a console in the back-right corner of the same room—so don't mess with it.

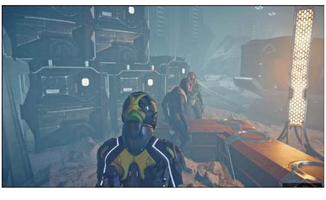


FREE THE SURVIVORS

Return to the first room and head through the now-unlocked doorway to find Mashal, still alive. In the room with her is a kett captive she's been joyfully torturing for revenge. You have a decision to make: Either leave her to her torture session, or choose to put the kett out of their misery. If you leave her, Haana will be very upset that Mashal did not return with you.

RETURN TO HAANA WITH UPDATES

Use the forward station **(2)** to fast travel back to the Resistance base, then head back through the base to the hangar and speak with Haana **(1)**. Tell her the news without the ugly details.



Secondary Ops

The Lost Song

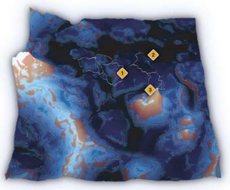
Mission Type: Heleus Assignment: Voeld

Prerequisite: Mission 2; complete "Return to the Tempest" after Aya during "A Trail of Hope"

Start Location: Voeld

Unlocking: Speak to the angaran biologist

SPEAK TO THE BIOLOGIST



VOELD: TECHIX

The biologist and behaviorist are standing on a platform in front of Techix near the sniper who gives you the "White Death" quest. Speak to the biologist (**1**). Outlaws are poaching the Yevara, a native species able to communicate through intricate songs cherished by the angara. Tracking down these poachers would win favor with the angara on Voeld.

TRACK THE POACHERS

To the northeast of Techix is the first sign of the poachers (**2**). Find and scan the empty shipping container.

READ THE POACHER DATAPAD

Enter the open end of the storage container and examine the **datapad** found inside. If Jaal is with you, you can discuss the findings with him. Jump back in the Nomad and drive south toward the kett mountain base, following the next navpoint for "The Lost Song."

FIND THE POACHER CAMP

Travel south toward the kett mountain base, following the lit pipeline that leads to the mountain. Look for a frozen river teeming with wildlife and poachers (**3**). This battle begins with a small camp below the pipeline.

We suggest driving upriver a bit and attacking the wildlife and poachers with ranged weapons and powers. The enormous Eiroch charge, and it's best to knock their health down substantially before they're in your face.

INVESTIGATE THE POACHER CAVE

If you're not in the mood for a drawn-out fight, the alternative solution is to bury the gas pedal and drive right into the cave entrance at the end of the river, bypassing the wildlife and poachers. An approach from the side of the mountain near the cave entrance is a good starting point. Drive deep into the cave until the Nomad no longer fits through the obstacles.

Exit the Nomad and defeat any enemies that venture in after you. Keep following the cave as it narrows, and eventually light can be seen through a doorway-sized crevice. Follow the narrow tunnel into a new clearing. This cave area branches off in a few directions; to find what you need, make sure the mission is selected in the journal and follow the navpoint.

When you see machinery, you're in the right place. This is where you find Dr. Lekaaret. Speak to him. He seems to forgive you for killing the people he hired to shoot at you. He confesses he's been performing tests. An enzyme in the Yevara's skin could treat the effects of kett weaponry, healing the wounded faster and allowing them to push back against the kett.

During the conversation, you can side with the biologist and his love for the beautiful singing Yevara, or with the doctor, taking interest in his discovery that may aid in the fight against the kett. There's no adverse reaction to either decision. The choice is yours. Let Dr. Lekaaret continue his research, or choose "This stops now." You earn the same XP and small amount of AVP no matter your choice.

MASS EFFECT ANDROMEDA

Secondary Ops
The Mind of an Exile

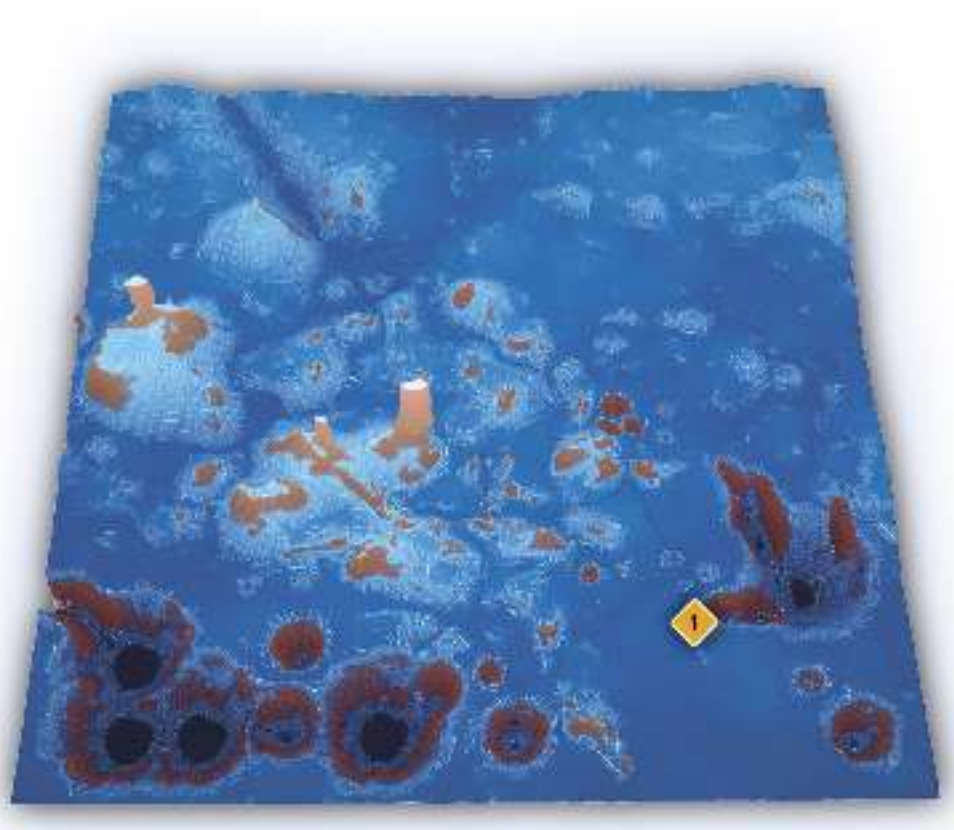
Mission Type: Heleus Assignment: Elaaden

Prerequisite: Unlock Elaaden

Start Location: Elaaden

Unlocking: Scan a scavenger around the Paradise

SCAN SCAVENGERS IN PARADISE AND PARADISE SANDS



ELAADEN: THE PARADISE

Lexi suspects the scavengers on Elaaden may have more problems than meet the eye. Scan scavengers in the Paradise and surrounding area so she can provide an analysis. Scanning any scavenger begins the quest. Try the scavenger **(1)** on the covered walkway that leads to the shuttle docks behind the Paradise. He's a pleasure to talk to.

After the first scan, two more navpoints direct you to two more scavengers. Find a couple of scavengers to scan on the top exterior balcony **(2)** of the Paradise.

Follow the navpoint to the group of krogan on the shuttle dock **(3)**. Scan them to acquire the navpoint to the final subject.

Follow the covered walkways in front of the Paradise to the end (opposite from the forward station). This is where you scan the last scavenger **(4)**. Lexi gets enough scans with this last subject to do her research. This mission unlocks "Gray Matter."

MASS EFFECT ANDROMEDA

Secondary Ops

The Rebel

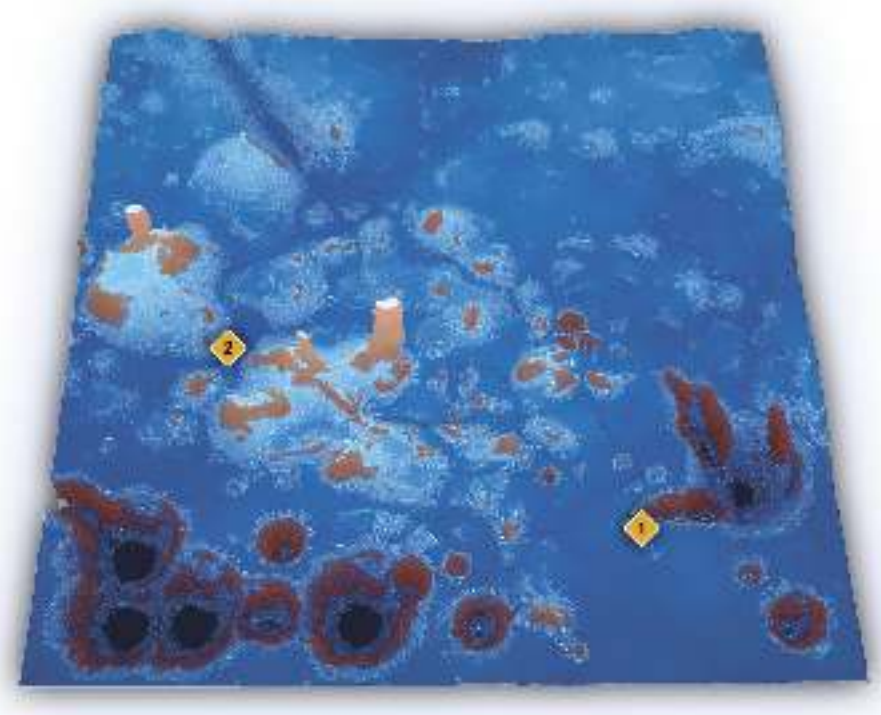
Mission Type: Heleus Assignment: Elaaden

Prerequisite: Unlock Elaaden

Start Location: Elaaden

Unlocking: Talk to Kent Halsey

SPEAK WITH KENT HALSEY



ELAADEN: PARADISE SANDS

Find Kent Halsey **(1)** with Nexus security, standing on the catwalk near the shuttle docks in Paradise Sands. He reports that no security issue brought him to Elaaden; rather he's searching for his missing sister, Isabel. Agree to help him find his sister to take the quest.

SPEAK WITH VELONIA

Enter the Paradise and speak to Velonia; she's standing in a corner near a window and a side exit to the right as you enter the front door. Among plenty of other information you can pull from her, she can tell you what she knows about Isabel Halsey. Velonia hasn't met her, but has heard scavengers mentioning her time being limited and something about a cave out on the dunes. She gives you a navpoint.

FIND ISABEL HALSEY

SEA OF ATARAXIA

You've uncovered information regarding Isabel Halsey's whereabouts. She was last seen in a cave on the dunes. In the Sea of Ataraxia, follow the next mission navpoint **(2)** to the cave in question. Leap out of the vehicle and defeat the outlaws and Adhi in the small camp in front of the cave.

You can scan **escape pods** and a **generator** (which you can deactivate). Enter the mouth of the cave (you can drive the Nomad in).

Speak to Isabel Halsey, who's standing in front of an outpost inside the cave. Convince her to leave, as her brother misses her. She's very happy being away from the Nexus, so it's a tough sell. If you want her to leave, don't select "Fine, stay here" in the first conversation. If reminded about "family" in the last conversation option, she decides to leave the Outlaws.

If you tell her, "This won't last," you head down a road that ends with her refusing to leave. Either way, you complete the mission here in this cave. No matter the outcome, the reward is the same: a little AVP and +2% Elaaden Viability. Raid the outpost before you leave; there's a **container** inside and another on the rooftop. You can talk to Kent about the mission later if you wish, next time you're at the Paradise.

MASS EFFECT ANDROMEDA

Secondary Ops

The Remnant Tiller

Mission Type: Helios Assignment: H-047C

Prerequisite: Complete "From the Dust"

Start Location: H-047C

Unlocking: Complete the mission "From the Dust"

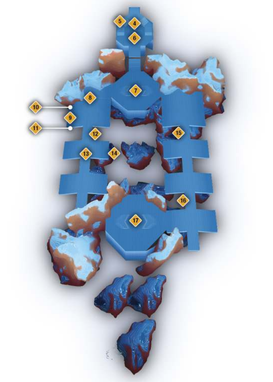
FIND THE REMNANT CONSERVATORY

H-047C

After completing "From the Dust," you discover the exiles' plans for really messing up the Initiative's objectives by doing harm to their settlements.

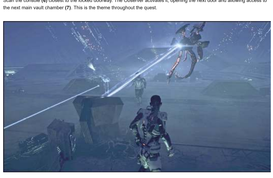
You can potentially start this mission without completing the last objective in "From the Dust." If you head to the Remnant conservatory at the end of "From the Dust," you leave the dome **(2)** to the northwest. If you're just arriving on the lunar surface again, you leave from the landing zone **(1)**.

EXPLORE THE REMNANT CONSERVATORY



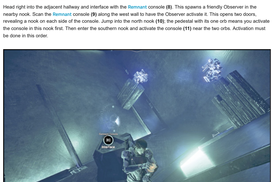
Drive into the dome **(3)** on the west side of the lunar surface and enter the Remnant conservatory (vault). Take the Gravity Well **(4)** down into the depths, defeat the Observers, and interface with the Remnant console **(5)** to release a glowing green friendly Observer. These Observers work for you if you point them in the right direction, meaning that you scan the console you need them to activate.

Scan the console **(6)** closest to the locked doorway. The Observer activates it, opening the next door and allowing access to the next main vault chamber **(7)**. This is the theme throughout the quest.

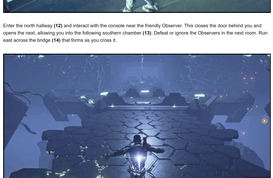


MAIN VAULT CHAMBER

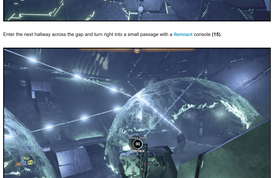
Head right into the adjacent hallway and interface with the Remnant console **(8)**. This spawns a friendly Observer in the nearby nook. Scan the Remnant console **(9)** along the west wall to have the Observer activate it. This opens two doors, revealing a nook on each side of the console. Jump into the north nook **(10)**; the pedestal with its one orb means you activate the console in this nook first. Then enter the southern nook and activate the console **(11)** near the two orbs. Activation must be done in this order.



Enter the north hallway **(12)** and interact with the console near the friendly Observer. This closes the door behind you and opens the next, allowing you into the following southern chamber **(13)**. Defeat or ignore the Observers in the next room. Run east across the bridge **(14)** that forms as you cross it.

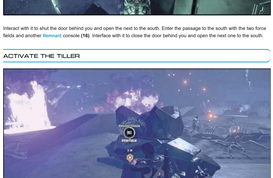


Enter the next hallway across the gap and turn right into a small passage with a Remnant console **(15)**.



Interact with it to shut the door behind you and open the next to the south. Enter the passage to the south with the two force fields and another Remnant console **(16)**. Interface with it to close the door behind you and open the next one to the south.

ACTIVATE THE TILLER



Defeat the Remnant baddies in the final, central chamber and interface with the large Remnant console in the middle of the floor. Solve the Remnant puzzle using the shot we've provided. AVP is earned and the quest is complete. Congratulations, the Initiative will have fuel for hundreds of years to come. As for the containers behind all the closed doors we skipped, all you need to do is use friendly Observers to help you open those doors.

MASS EFFECT ANDROMEDA

Secondary Ops

The Search for Ljeta

Mission Type: Helius Assignment: Elaaden

Prerequisite: Must have settled Kadara or taken the drive core away from Morda

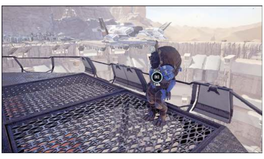
Start Location: Elaaden

Unlocking: Speak to Rorik

SPEAK TO RORIK

ELARDEN: NEW TUCHANKA, KROGRN COLONY

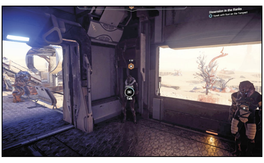
Head through the krogan colony (**1**) and find Rorik (**2**) on the platform near the merchants that overlooks the pit and has a great view of the new Initiative outpost. Rorik is concerned about his angaran friend Ljeta, who disappeared some time ago. Track Ljeta down and give her Rorik's cryo-bracelet gift.



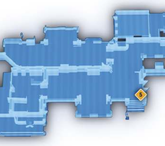
QUESTION VELONIA

THE PARADISE

Enter the Paradise (**1**) and talk to Velonia, who is still standing near the side exit. Ask her, "What happened to Ljeta?" That gets you nowhere, so ask about what Ljeta is going through, or tell Velonia that someone cares about her. She finally admits she flew Ljeta to Kadara, and that you should talk to Cott Dalton, the docks manager.



SPEAK WITH COLT DALTON



KRORRN PORT: DOCKS

When you land at the Kadara docks, don't go far. Colton (**4**) is near the research console. Tell him you're looking for Ljeta. He refuses to help in the beginning because someone paid him some hush money. Ask him to work something out, and you'll get somewhere. He tells you to look at his dock records and gives you the passcode.

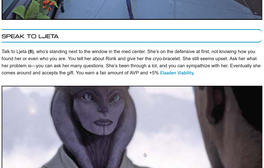
VIEW THE DOCK RECORDS

Head up the dock stairs and use the console (**5**) on the right wall as you reach the second floor. Input the passcode to discover that Ljeta went to Aya for recovery. Head to the terminal (**6**) at the docks and enter the Tempest.

SEARCH THE MED CENTER

AYA

When you land on Aya (**7**), check the map to find the navpoint (**8**) near Resistance Headquarters. Run through Aya or use a fast travel station to get there. As you close in, you find that the navpoint is in the med center. Decontaminate using the console at the med center door, and then enter. You can clearly see Ljeta looking out the med center windows, gazing at the beautiful Aya scenery.



SPEAK TO LJETA

Talk to Ljeta (**9**), who's standing next to the window in the med center. She's on the defensive at first, not knowing how you found her or even who you are. You tell her about Rorik and give her the cryo-bracelet. She still seems upset. Ask her what her problem is—you can ask her many questions. She's been through a lot, and you can sympathize with her. Eventually she comes around and accepts the gift. You earn a fair amount of AVP and +5% Elaaden Viability.

MASS EFFECT ANDROMEDA

Secondary Ops

The Secret Project

Mission Type: Hotbus Assignment: Eos

Prerequisite: Land on Eos, return pioneer to Site 1: Promise

Start Location: Eos

Unlocking: Examine the datapad at Site 1: Promise or enter within range of Site 2: Resilience.

INVESTIGATE PROMISE

EOS: SITE 1: PROMISE

There are two ways to start this mission. If you're a thorough explorer, it's likely you'll examine the datapad (1) at Site 1: Promise before heading to Site 2: Resilience. The **datapad** is on the lower level of the same building where you first meet Darrid Arcaid. You discover from the datapad that something very wrong happened at the second outpost. This unlocks the quest.

INVESTIGATE SITE 2: RESILIENCE

At Site 2: Resilience (2), you discover that the original team on Eos was trying to complete a research project that would help them fight the kett, but they were unable to finish before the kett attacked. Desperate to ensure the research did not fall into kett hands, some of the engineers disassembled the project and hid the parts. By finding the parts of the project and returning them to Site 2, you can gain Research Data to spend in crafting. This is the tutorial quest for Research.

Enter the unlocked door on the first floor of this structure (3). When you do, SAM informs you that the doors were locked from the outside—to keep something inside. The console in the first room grants no access to the locked room inside. Enter the next room and follow the navigator to the power terminal. Activate it to unlock the nearby door. Multiple doors open, releasing a Flamd from the building to run free outside.

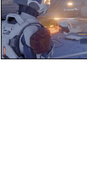
DEFEAT THE KETT

Besides releasing the Flamd, SAM informs you that whatever you did also alerted a new inbound kett squad. We suggest exiting the building, braking the creature, and getting a scan of it before it's destroyed (the Flamd disintegrates after it's defeated, making a scan afterward impossible). Jump up to the rooftops to achieve the advantage of higher ground. Use your radar to track down the kett soldiers (such as the multiple Cloaker) and a couple of Ancestor). Consider battling them first and avoiding the Flamd until the end, since the Flamd only spits acid within a limited range. Keep moving to avoid its attacks while eliminating the kett.

When you're ready to attack the Flamd, assign your teammates to both attack it while you select some special ammo and concentrate fire on the Flamd's head. Use Cryo ammo to freeze it, Incendiary ammo to set it on fire, or Shredder ammo to inflict Rupture effects. The creature goes down rather quickly with all three of you attacking it at once. Make sure all the enemies are gone by checking for red dots on your radar, and then start looking for the components.

SEARCH SITE 2 FOR THE SECRET RESEARCH PROJECT

Enter the second floor of this Site 2 building (4) and interact with the console on the right side of the room. You discover the **schematics for "Special Project Sigma,"** but the parts are missing. Now you must find the parts, and the closest one is in the next room, deeper inside the building.



RECOVER THE THREE COMPONENTS

FIRST COMPONENT

In the building (4), with the console containing the secret project's schematics, enter the back room and find the first component (5) on the floor.

SECOND COMPONENT

Find the second and next-closest component for the secret project on the south side of the lake beside Site 2: Resilience. The component (6) is between two broken pieces of a crashed shuttle beside the lake.

THIRD COMPONENT

KETT RESEARCH CENTER

The last component is in the kett research center (7) where you first meet Drack and hack a Remnant monolith in the Priority Cryo storyline. Find the **dead body** by "Alarming the Dead" in the same autopsy room that contains the final component, which must be picked up from a console near the open window.

SCAN THE RESEARCH PROJECT

SITE 2: RESILIENCE

Return to Site 2: Resilience (2) and head to the same group of buildings where you found the research and the first component. This time enter the first-floor building (8) to find the project you must scan.

Just through the entryway of this building, locate a tall contraption on the right side of the room. Scan it to receive its data. It's called the **Adapted Initiative Core** Tech. This completes the task and adds to the Viability of Eos.

MASS EFFECT ANDROMEDA

Secondary Ops

The Vanished

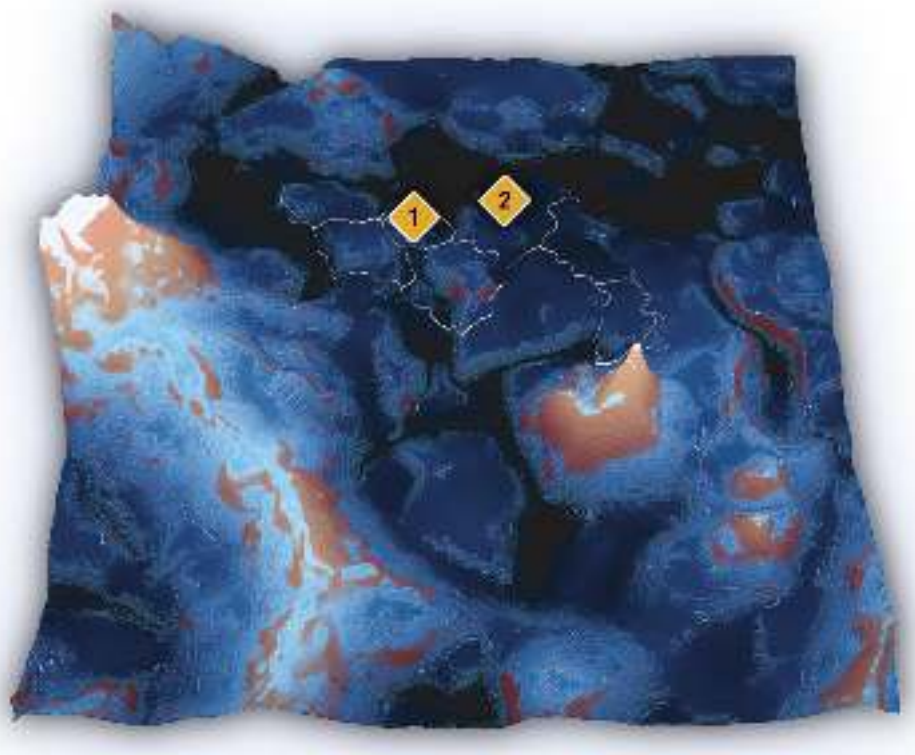
Mission Type: Heleus Assignment: Voeld

Prerequisite: Chapter 2; complete “Return to the Tempest” after Aya during “A Trail of Hope”

Start Location: Voeld

Unlocking: Find one of two family audio recordings.

FIND THE MISSING PARENTS AND DAUGHTER



VOELD

Missing parents have recorded an audio message for their daughter in hopes that she would find it. The missing daughter likewise recorded a message for her parents. This mission begins when you find either recording.

Find the parents’ audio recording **(1)** in a cave south of the north holding site. Be prepared to fight off three kett Wraiths that materialize around you as you finish listening to the recording in the cave.

The daughter’s recording **(2)** is located out in the open near a fire and a large ice spire. The discovery of what’s on the recordings is rather grim.

MASS EFFECT ANDROMEDA

Secondary Ops
The Vesaal

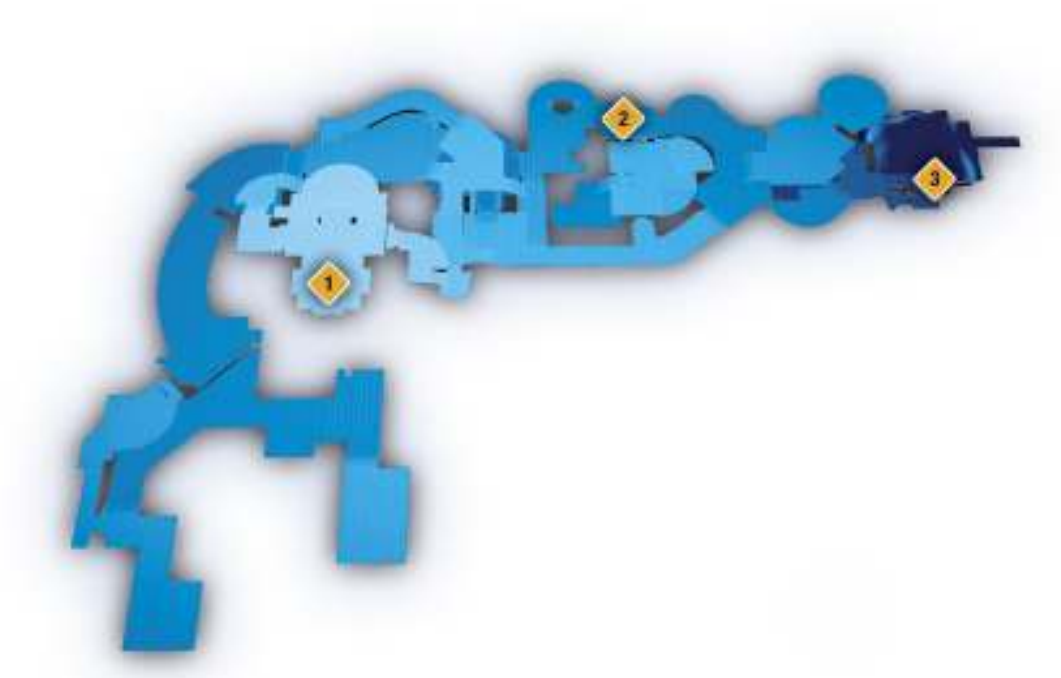
Mission Type: Heleus Assignment: Aya

Prerequisite: Complete "Task: The Angaran Initiative"

Start Location: Aya

Unlocking: Speak to Ambassador Rialla.

SPEAK TO AMBASSADOR RIALLA



AYA: ANDROMEDA INITIATIVE EMBASSY

An altercation between Sorvis Lenn and Jarryn Sjek is the result of a misunderstanding about a unique angaran cultural concept called "the Vesaal." Ambassador Rialla wants to know about this. Talk to the ambassador **(1)** in the Andromeda Initiative Embassy, accessed from inside the governor's office. She tells you that the salarian botanist, Sorvis Lenn, has been threatened by the angaran Resistance. Agree to go look into the incident.

SPEAK TO SORVIS LENN

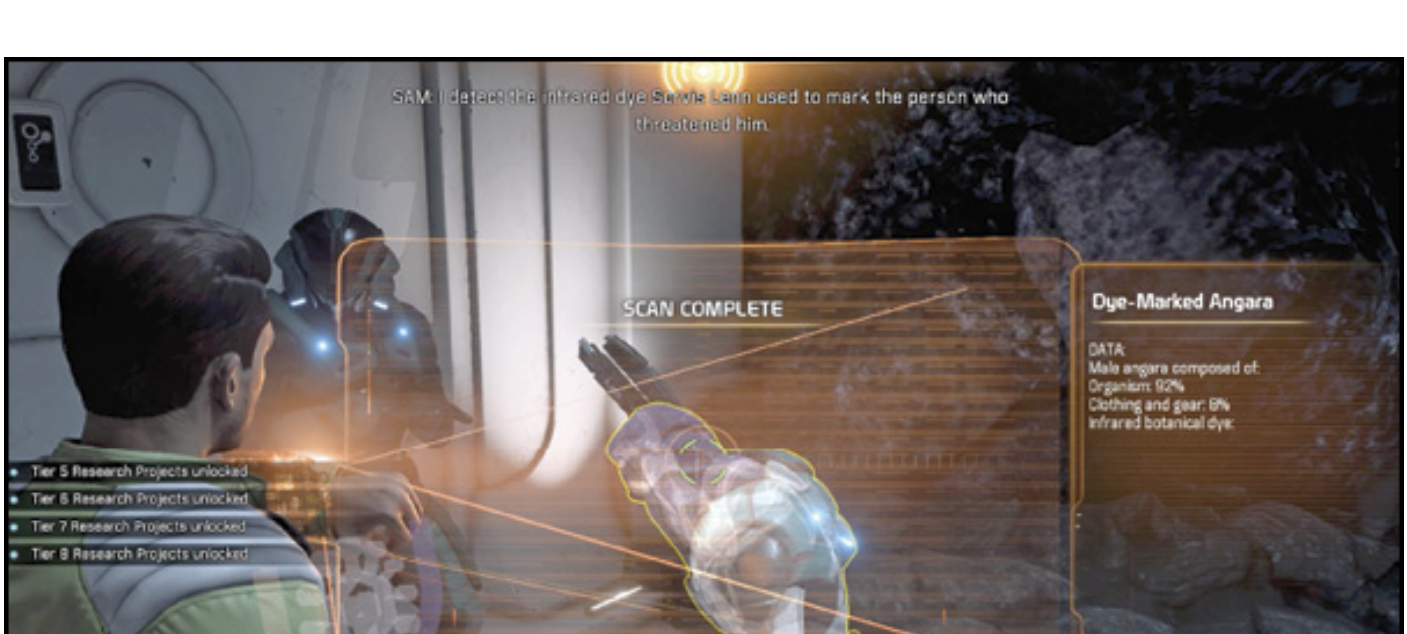
REPOSITORY OF HISTORY

Follow the navpoint through Aya to the walkway in front of the Repository of History. This is where you run into Sorvis **(2)**. Talk to him. He's being pushed around by Resistance members. He wants you to scan to find which civilians are actually Resistance fighters.

SCAN RESISTANCE MEMBERS

QUARTERMASTERS

Head to the infirmary area and then into the weapons training room, where you find Cora. Scan the slumped-over angara near the door in the back of the room **(3)**. The scan reveals infrared botanical dye. This is the guy who threatened Sorvis. Talk to him.



SPEAK TO JARRYN SJEK

In the weapons training room, speak to the angara you found to have dye on him **(3)**. You get to hear his side of the story, and you can have him try to make it right with Sorvis.

RETURN TO AMBASSADOR RIALLA

ANDROMEDA INITIATIVE EMBASSY

Head back to the ambassador **(1)** and review your options for the influx of people trying to get into Aya now because of the Vesaal lottery. You send them back to the Nexus, choose a payout option, tell the ambassador to figure it out herself, or have a talk with the angara. The mission concludes at the end of the conversation. Sorvis may still be upset.

Secondary Ops

The Visitor

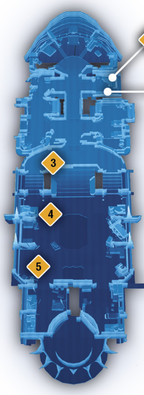
Mission Type: Heleus Assignment: Tempest

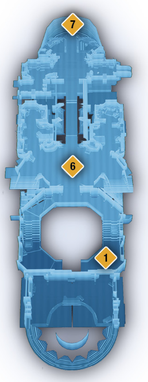
Prerequisite: After Chapter 4

Start Location: Tempest

Unlocking: Drack calls and requests to speak to you.

TALK TO DRACK





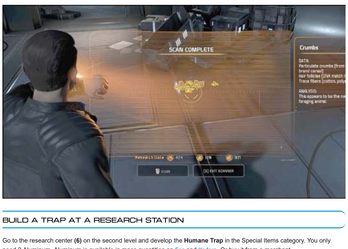
TEMPEST

Find Drack either in the galley **(1)** or the cargo bay **(1)**. Speak to him after he hails you on comms. He says he's been finding crumbs on the galley counter.

FOLLOW THE CRUMB TRAIL

You must scan all four piles of crumbs before developing a humane trap for the little critter. The controller vibrates when you get close to a pile of crumbs. Pull out the scanner and scan the mess. The locations are:

- **Galley Counter:** Crumbs on the counter in the galley (2)
- **Hallway Floor:** Crumbs on the floor just as you leave the crews' quarters/medbay section, heading into the cargo bay (3)
- **Cargo Bay:** Crumbs on the floor (4) near the corner of the Nomad
- **Cargo Bay:** Crumbs on the floor in front of Liam's storage room—this is also the creature's lair (5)



BUILD A TRAP AT A RESEARCH STATION

Go to the research center **(6)** on the second level and develop the **Humane Trap** in the Special Items category. You only need 2 Aluminum. Aluminum is available in mass quantities on Eos and Kadara. Or buy it from a merchant.

PLACE THE TRAP AT THE CREATURE'S LAIR

Return to the first-level cargo bay and place the trap at the creature's lair **(5)**.

WAIT FOR THE TRAP TO SPRING

The trap doesn't spring until you leave **(7)** and then return to the Tempest.

CHECK THE TRAP

Go to the cargo bay when you return to the Tempest. Suvi alerts you over comms that the trap has sprung. Interact with the trap **(5)**. You can choose to keep the pet or release the creature on a suitable planet. If kept as a pet, the rodent can be found in the Pathfinder's quarters. You earn a small amount of AVP for completing this quest.

MASS EFFECT ANDROMEDA

Secondary Ops
Trading Favors

Mission Type: Heleus Assignment: Aya

Prerequisite: Chapter 2; land at Aya hub; after speaking with Evfra

Start Location: Aya

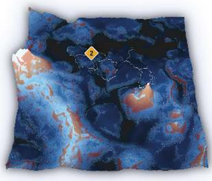
Unlocking: Talk to Sohkaa Esof.

SPEAK WITH SOHKAA ESOF

AYA: DOCKS

Speak to Sohkaa Esof **(1)**, the angara near the docking area. He tells you he runs cargo between Aya and other worlds, and one of his suppliers stopped checking in. Sohkaa is afraid something bad might've happened and wants you to check. Agree to help. He sends you a navpoint and tells you the man's name is Keldo.

INVESTIGATE THE SUPPLY CAMP



VOELD

Just east of Hjara, on the beaten path toward the next forward station, is the location Sohkaa sent you. It's a small supply camp **(2)**. Use your scanner to locate scorch marks on debris consistent with kett technology. You find supply crates and, most important, a dead angara lying in the snow. A kett dropship zips onto the scene after you scan the angaran corpse.

DEFEAT THE KETT AMBUSH

Use the supply crates as cover if you need to and defeat the kett arriving via dropship from the north. The deployment consists of four Chosen, so it's a pretty easy battle. Start by lobbing an explosive at their extraction point to weaken the lot.

RECOVER THE SUPPLIES

Head back to the supply camp **(2)** and open the **container** next to the large cargo container. Take all the angaran items from inside.

DELIVER THE WEAPONS TO SOHKAA ESOF ON AYA

When you return to Aya and speak to Sohkaa **(3)** near the docking area, you share the bad news that the kett got his supplier. When he asks if you have the supplies, you can respond with a note of concern. Apparently Sohkaa knew Keldo's fate before he sent you on the quest. He also tells you that he will relay to Evfra that you are trustworthy. You can now purchase items from Sohkaa.

Requirements: Ryder
Truth and Trespass

Priority Type: Main and Related Quest

Prerequisite: Mission 17

Rank Available: Pathfinder

Unlocking: Tier 3 Cipher

SPREAD: MATTIS'S BALLOT

PRESIDENT MATTIS'S BALLOT

The operation cannot differ any report to a spot that is not in the Tempest bridge in Tempest 3. Kett units if you cannot be found in the Nexus. Kett units if you cannot be found in the Nexus. MASS EFFECT ANDROMEDA

Secondary Ops

Turian Ark: Lost But Not Forgotten

Mission Type: Allies and Relationships

Prerequisite: Must have gone to Kadara during "Hunting the Archon"

Start Location: Elsaden

Unlocking: Kill the Raiders around the anomaly.

CONTINUING FROM "TURIAN ARK: NOT DEAD YET"

This quest picks up where "Turian Ark: Not Dead Yet" left off. Now that you've traveled to Kadara and interrogated the prisoner during "Hunting the Archon," you can continue the "Turian Ark" quest on Elsaden.

CHECK YOUR EMAIL

After visiting Kadara during "Hunting the Archon," check your email on the Tempest for a message from Avitus Rix. Avitus states he's hearing rumors that scavengers found pieces of an ark on Elsaden.

Got a Lead on Ark Nataruza
To Nyrik
Subject: Ark
Nyrik,
I'm hearing rumors that scavengers found pieces of an ark on a glacial valley there. Get to the bottom of it and report back.
Avitus

INVESTIGATE THE ANOMALY

ELARADON: SEA OF ATTRITION

Follow the waypoint to a crash site (1) in the zone known as the Sea of Alaraxea, and on approach you spot a squad of Raiders. Pull up and defeat the Raiders, then investigate the scene.

SCAN STASIS PODS FOR THE TURIAN PATHFINDER

Scan the nearby cryogenic stasis pods scattered around the scene. SAM detects no lifeforms. Scan them until a waypoint appears near a stasis pod you've already scanned that you can now open.

INVESTIGATE THE POWERED STASIS POD

The scan results on the powered stasis pod say the occupant's name is Creatia Libules. Open the pod. You discover it's empty. SAM deduces the pod was ejected long after the Nataruza was reported missing. This means the ark may not be destroyed and their might be survivors.

CONTACT AVITUS VIA TEMPEST COMMS

TEMPEST: MEETING ROOM

Avitus Rix believes that Maven Baris, the turian Pathfinder, is still alive. He thinks he's received an S.O.S. from Maven. You encourage him by telling him you found evidence that the ark may be intact—the stasis pods were jettisoned from the Nataruza after the ark hit the Scourge. He sends you waypoints to meet him so you can find answers together.

MEET AVITUS AT THE NAVPOINT

Follow the waypoint to the Remian system. Find the ARK Nataruza in the top-left quadrant of the solar system screen. Travel to the ark. Search for the docking bay, then confirm to disembark the Tempest. Choose your gear and your crew.

SPEAK TO AVITUS

ARK NATTHALIS

As soon as you board the ark (2), you're greeted by Avitus Rix. He says life support's busted and he's surprised there's any gravity at all.

EXPLORE THE NATANUS

Climb the stairs to the locked door (3), and scan the walls behind it and to your left to find a yellow conduit. Follow it back to the floor and to the Ark Nataruza console (4). This opens the door (5) that allows access to the atrium.

INVESTIGATE THE CONSOLE

Head through the newly opened door, and in the next left corner near a closed door, you can find an Ark Nataruza console (6). Use it to unlock the next door.

Avitus Rix comes up behind you and asks if you think your SAM can help you fix the console. You tell him you've found a log that might help you figure it out. Avitus tells you to play the log while he works on the console. You play the log (7) and listen. You hear the voice of Dea Fredrice saying, "Something is tearing the Nataruza apart." Dea and Maven are trying to get anyone awake to the escape pods. At the end, it sounds like Dea bailed on the plan. It's possible he and Maven found each other and made it to the escape pods as well. To play more of the corrupt footage, you need to find the SAM Node.

Push through the next door (7) and enter the stairwell on the left. Open the door (8) and scan the debris behind it. Scan the wall to the right of the door. Follow the yellow conduit down the railing and to the console in the previous room (9). Activate the control to open the right door (10).

MASS EFFECT ANDROMEDA

Secondary Ops

Turian Ark: Not Dead Yet

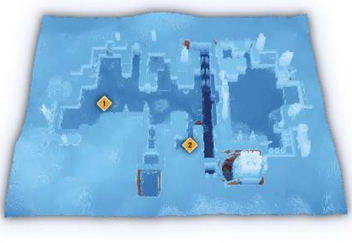
Mission Type: Allies and Relationships

Prerequisite: Chapter 3; land on Havarl; complete "Helping Havarl's Scientists"

Start Location: Havarl

Unlocking: Talk to Kiiran Dals after saving her scientists from Remnant stasis, or find the turian encampment.

SPEAK TO KIIRAN DALS



HAVARL: ANGARAN HQ

Talk to Kirran Dals **(1)** after "Helping Havarl's Scientists." At the end of the conversation, she asks you to speak to Tovar about the turians. The turian ark has been missing since its arrival in Heleus. Turians wearing Ark Natanus uniforms have been spotted on Havarl. Find them to gain information about what happened to the ark.

FIND THE TURIAN ENCAMPMENT

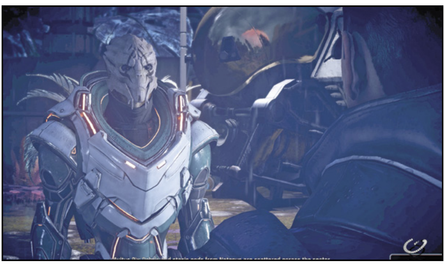
Follow the navpoint to a southern Havarl alleyway leading to the turian encampment **(2)**, where you discover inhabitants in Natanus uniforms battling Roekaar Raiders and wildlife—namely, many Adhi, large lizard-like creatures.

DEFEND THE TURIANS FROM THE ROEKAAR

When you've eliminated all the wildlife, a Roekaar ship arrives behind you at the alley entrance. Replenish lost ammo, pivot, find cover, position your team behind cover, and defeat this assault, starting with their Sharpshooter. Watch the radar to make sure all enemies are eliminated, and then go speak with the turian leader.

SPEAK WITH THE TURIAN LEADER

Head back into the camp **(2)** and speak with the Spectre, Avitus Rix, special tactics and reconnaissance. He thanks you for your help with the Roekaar, explains what happened to the turian ark, and informs you that their Pathfinder, Macen, is still missing, along with most of their population. He knows the Pathfinder is alive since Macen's SAM has not transferred to him. He gives you his info so you can call him when you hear anything regarding the whereabouts of his people or the Pathfinder.



MISSION ON HOLD—BUT IT REALLY JUST ENDED

Like other B-stories that say they're going on hold, this mission ends while the story continues under a different name. The story of the turian ark continues as "Turian Ark: Lost but Not Forgotten," which starts when you receive information regarding the Ark Natanus survivors or debris. This happens after you visit Kadara and receive an email from Avitus Rix about rumors of Natanus debris on Elaaden.

MASS EFFECT ANDROMEDA

Secondary Ops

Uncovering the Past

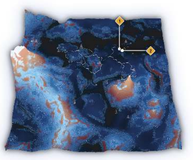
Mission Type: Helios Assignment: Voeld

Prerequisite: Chapter 2; complete "Remove the Heart"

Start Location: Voeld

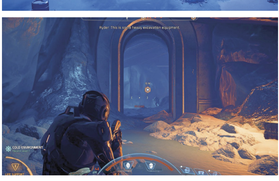
Unlocking: Complete the mission "Remove the Heart."

INVESTIGATE THE ICE CAVE



VOELD: JI NIHK, FROZEN DIG SITE

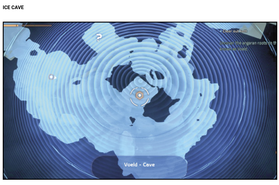
After bringing down Ja Nihk's shields (by completing "Remove the Heart"), you gain access to the interior of the smaller kett base (**1**). Find the entrance to the ice caves by following the heat lamps that line the gorge pathway. Take out Chosen as you advance. The Anointed at the end of the ravine poses the biggest threat.



Continue chasing the navpoint to eventually arrive at the tunnel cave entrance (**2**), which has a steel-reinforced doorway. Prepare to fend off Chosen and another Anointed on the other side.

CLEAR OUT THE KETT

ICE CAVE



Soon you reach a high ledge (**3**) overlooking a large chamber with kett scrambling along the floor below. Destroy these four Chosen before jumping down into the chamber.

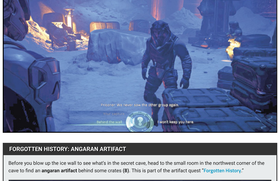
There's a new navpoint (**4**) in the middle of the cave system that (when you look at your map) emits a field engulfing the entire map. You don't need to travel to this navpoint; the map field merely indicating you should clear all the kett out of the cave. Jump off the ledge and work your way through the cave, keeping to the rightmost pathway until you spot an angara in a cage (**5**).

RESCUE THE CAPTURED ANGARA

Find caged angara in the southeast (**5**) and northeast (**6**) corners. Rescue them (**5**). Continue northward, following the heat lamps, to battle more kett and open two more angaran cages (**6**)(**7**). Kill the kett and free the prisoners.

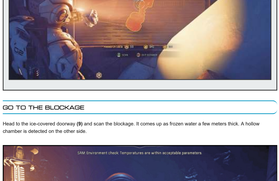
TALK TO THE RESCUED ANGARA

Now that you've rescued all the angara, talk to the angaran former captive who stands between the two cages. He leads the others safely back to Techlo. When pressed, he also tells you the kett are trying to get into a room behind a nearby wall (**8**). He hints that you could use explosives to punch through the ice. As for what's behind the wall, all he knows is it's some sort of old machine that may still be functional.



FORGOTTEN HISTORY: ANGARAN ARTIFACT

Before you blow up the ice wall to see what's in the secret cave, head to the small room in the northwest corner of the cave to find an **angaran artifact** behind some crates (**9**). This is part of the artifact quest "Forgotten History."



GO TO THE BLOCKAGE

Head to the ice-covered doorway (**9**) and scan the blockage. It comes up as frozen water a few meters thick. A hollow chamber is detected on the other side.

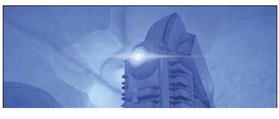
CLEAR THE BLAST ZONE

Head back the way you came and duck behind the barrier (**10**). The ice blockage explodes from the doorway.

ENTER THE CHAMBER

Enter the now-accessible north cave (**11**). Follow the short tunnel to a large, open ice cave housing a strange machine (**12**). Approach this apparatus to interact with it.

During your conversation with the mysterious and ominous ancient AI, you have potentially two important decisions to make. The first: Choose to kill the AI when it attacks the angaran captive who's followed you into the cave, or allow the AI to live. If you allow it to live, then decide to either work with it by choosing "Keep AI to work with SAM," or give it away by selecting "Give AI to the angara." If you choose to kill the AI, you shoot it, destroying it immediately.



MASS EFFECT ANDROMEDA

Secondary Ops

Vetra Nyx: A Moment Planetside

Mission Type: Allies and Relationships

Prerequisite: Complete Vetra's Loyalty Mission "Means and Ends"

Start Location: Tempest

Unlocking: Read email from Vetra.

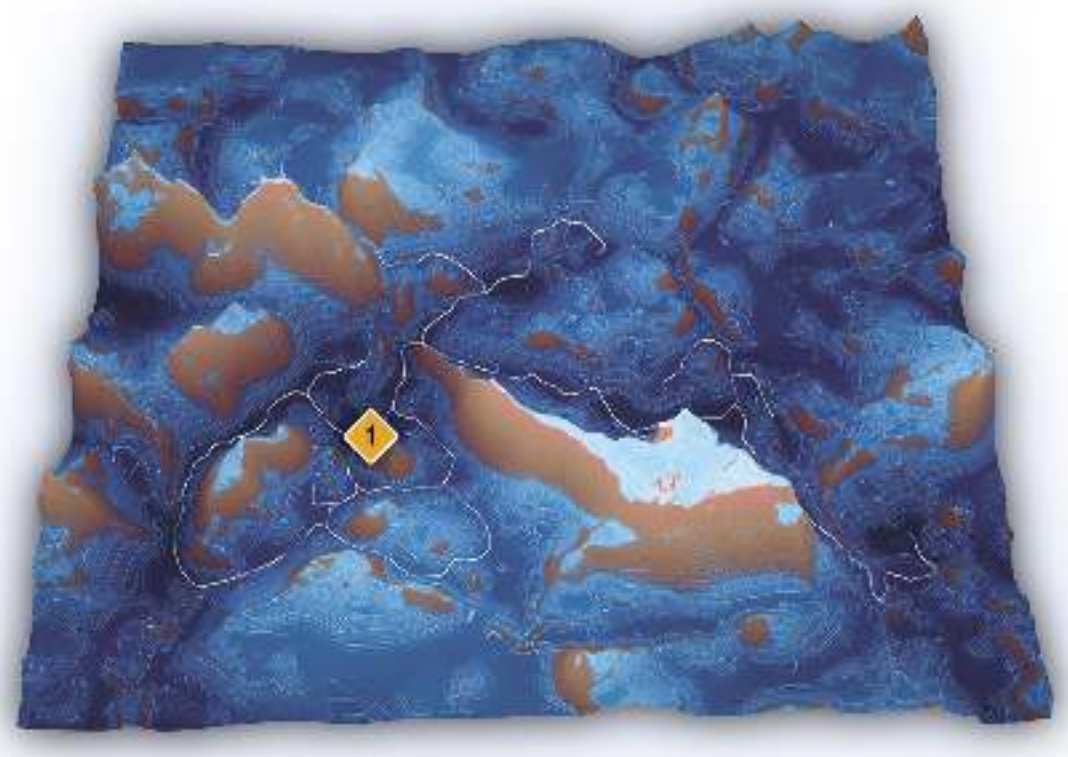
READ EMAIL FROM VETRA

TEMPEST

Read the email titled "Kadara" from Vetra. She says she's found something on Kadara that she wants to show you.

Kadara
Garden
Just checking in
One more try...
You okay?
Kadara
To: Ryder
From: Vetra
Ryder,
Don't worry. Sid didn't do something reckless. This time. As far as I know.
I've just found something cool on Kadara. Wanna meet me there? I'll send the navpoint as an attachment.
-V

GO WITH VETRA TO SULFUR SPRINGS ON KADARA



In Kadara, use the Sulfur Springs Forward Station for fast travel, head northeast on the road, and look for the navpoint **(1)** on top of a boulder overlooking the acid pools. Talk to Vetra, and the two of you go on a rock-climbing adventure…race. During the climbing sequence, watch the lower-right corner for the Jump-Jet command prompt. If you feel you need to win—by cheating—hit that button. It's probably better to let her win.

Noveria: Main Base and Docks

Mass Effect 1 Walkthrough

Prerequisite: Chapter 2 - Find a way to enter and explore the Normandy's Engineering Deck and Cortex. Locate and activate the Mako. Locate and activate the Hammerhead. Locate and activate the Normandy's Elevator.

Main Quest: Chapter 3 - Noveria

Unlocking: Noveria Docks Side Quests

ENGAGE ACTIVITIES OVERVIEW

Overview

Noveria's Main Base is a large area located on the Citadel. The area has access to the Normandy, the Docks and the Mako. Upon arriving at the Main Base, you will be greeted by Ambassador Udina. Speak to him to receive the Side Quest: Ambassador Udina. Next, head to the Normandy's Elevator and ride it down to the Docks.

SIDE QUEST: AMBASSADOR UDINA

Ambassador Udina's Side Quest is available from the start of the Main Base. Speak to him to receive the Side Quest: Ambassador Udina. Next, head to the Normandy's Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

SIDE QUEST: FIND AMBASSADOR UDINA'S AIDE

Ambassador Udina's Aide is located in the Docks. Head to the Docks Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

Upon arriving at the Docks, you will be greeted by Ambassador Udina's Aide. Speak to him to receive the Side Quest: Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

FIND THE AMBASSADOR UDINA'S AIDE

LOCATE

The Docks is the first area you will visit on the Citadel. It is a large, open area with a number of buildings and vehicles. The Docks is also home to a number of NPCs, including Ambassador Udina and his Aide.

BOOK CORE TO ACTIVATE

Ambassador Udina's Aide is located in the Docks. Head to the Docks Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

ENTER THE ELEVATOR

Ambassador Udina's Aide is located in the Docks. Head to the Docks Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

PHASE 1: WAIT TO CONNECT THE ANIMATION TO THE DOOR

Ambassador Udina's Aide is located in the Docks. Head to the Docks Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

PHASE 2: WAIT TO CONNECT THE ANIMATION TO THE DOOR

Ambassador Udina's Aide is located in the Docks. Head to the Docks Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

PHASE 3: WAIT TO CONNECT THE ANIMATION TO THE DOOR

Ambassador Udina's Aide is located in the Docks. Head to the Docks Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

ACTIVATE THE DOOR

Ambassador Udina's Aide is located in the Docks. Head to the Docks Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

AMBASSADOR: THE DELIVERIES TO THE SPYGRAM ROOM

Ambassador Udina's Aide is located in the Docks. Head to the Docks Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

CODES: THE ARCHIVIST'S PASSCODE

Ambassador Udina's Aide is located in the Docks. Head to the Docks Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

ARRIVE TO DELIVERY

Ambassador Udina's Aide is located in the Docks. Head to the Docks Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

CHECK TO SEE WHERE HALL

Ambassador Udina's Aide is located in the Docks. Head to the Docks Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

LINK THE ARCHIVIST'S CHAMBER TO PASS HIS ASSOCIATIONS

Ambassador Udina's Aide is located in the Docks. Head to the Docks Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

ARRIVE TO DELIVERY

Ambassador Udina's Aide is located in the Docks. Head to the Docks Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

PANEL: WITH THE OUTLANDER THE HANDS CELL

Ambassador Udina's Aide is located in the Docks. Head to the Docks Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

SEC: TO THE AMBASSADOR

Ambassador Udina's Aide is located in the Docks. Head to the Docks Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

LINK THE AMBASSADOR'S SECURITY CHAMBER

Ambassador Udina's Aide is located in the Docks. Head to the Docks Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

PULL THE PANEL

Ambassador Udina's Aide is located in the Docks. Head to the Docks Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

LINK THE AMBASSADOR'S SECURITY CHAMBER

Ambassador Udina's Aide is located in the Docks. Head to the Docks Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

PANEL: WITH THE OUTLANDER THE HANDS CELL

Ambassador Udina's Aide is located in the Docks. Head to the Docks Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

MAKE TOWARDS TURBINE THE DEBT OF THE FACILITY

Ambassador Udina's Aide is located in the Docks. Head to the Docks Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

PANEL: WITH ARCHIVIST AND ALLIANCE

Ambassador Udina's Aide is located in the Docks. Head to the Docks Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

OPTIONAL: PANEL ON THE TURRETS

Ambassador Udina's Aide is located in the Docks. Head to the Docks Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

SEC: TO SEC

Ambassador Udina's Aide is located in the Docks. Head to the Docks Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

ALL: APPROACH AND USE THE ELEVATOR

Once the Docks is accessible, take the elevator to the Normandy's Engineering Deck. Speak to Joker to receive the Side Quest: Joker's Mission. Next, head to the Normandy's Cortex and speak to Kaidan to receive the Side Quest: Kaidan's Mission. Finally, head to the Normandy's Elevator and ride it down to the Docks.

PHASE 1: USE

Ambassador Udina's Aide is located in the Docks. Head to the Docks Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

SEC: TO THE AMBASSADOR

Ambassador Udina's Aide is located in the Docks. Head to the Docks Elevator and ride it down to the Docks. Exit the Elevator and head to the Docks Terminal. Interact with the Terminal to receive the Side Quest: Find Ambassador Udina's Aide. Next, head to the Docks Elevator and ride it down to the Docks.

Secondary Ops
Water Supply

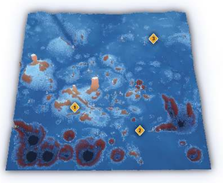
Mission Type: Heleus Assignment: Elaaden

Prerequisite: Land on Elaaden

Start Location: Elaaden

Unlocking: Interact with the console in the guard tower.

LISTEN TO THE MESSAGE ON THE CONSOLE



ELAADEN: SCAVENGER FLOPHOUSE ("MISERY")

While in the scavenger flophouse compound for "Search for the Stolen Remnant Drive Core" or "The Flophouse," or even "Crisis Response," climb the guard tower **(1)** and listen to the audio on the console. The scavenger on the audio mentions Annea (the merchant at the Paradise), her water source at the office, and the amount of security she has. It sounds like someone is planning an attack on her water source. Agree to help, and a navpoint pops up on the map at the Paradise **(2)**.

GO TO THE PARADISE

Use the forward station at the Paradise **(2)** to get there quickly from wherever you are on Elaaden. Once you approach the walkway, this objective is met.

FIND ANNEA'S OFFICE

Jump up or use the exterior stairs to get to the second level on top of the Paradise. The locked door **(3)** leads to Annea's office.

SCAN FOR A NETWORK CONSOLE

SAM suggests you scan the area to see if you can discover a way in. You can see a yellow conduit on the floor inside. Jump down to the ground and follow the conduit away from the building.

HACK THE NETWORK CONSOLE TO ACCESS ANNEA'S OFFICE

The conduit leads to a small computer console **(4)** on the far side of the metal walkway where the crazy scavenger stands. The console faces the pit. Hack the console to unlock Annea's office door.

ENTER ANNEA'S OFFICE

Return to the second level of the Paradise **(3)** and enter her office. Look beyond all the illegal mushrooms she's growing in here to find the **datapad** on a table to the left. It's evidence that her water supply is coming from an underground lake. Scan her **angaran computer** before you leave the office—Research Data.

SEARCH FOR CLUES ABOUT THE LOCATION OF THE WATER SOURCE

SEA OF ATARAXIA

Find a small cave **(5)** entrance at a small oasis (where you can also find **fluorite** for "Hitting Rocks for Science") in the Sea of Ataraxia.

GO TO THE WATER SOURCE

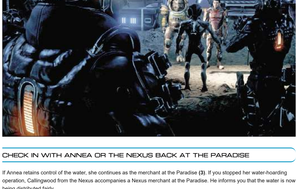
Enter the door (which is unlocked now that this mission is active) and follow the dark cave as far back as you can go to find a dock on a small underground pond.

SCAN FOR INFORMATION

Stand on the end of the dock and scan the **water supply pond** (Remnant device) out in the water.

Annea and a small band of scavengers sneak up behind you at the dock. The situation remains civil and a conversation begins. You have choices to make here.

If you choose to let Annea keep the water under her control, your next step is to check in with her at the Paradise. If you choose not to let her keep control of the water, you must defeat her Raiders there in the cave after the conversation ends. Annea escapes. If this happens, check in with Nexus officials at the Paradise. In the latter scenario, Annea will no longer be the merchant at the Paradise.



CHECK IN WITH ANNEA OR THE NEXUS BACK AT THE PARADISE

If Annea retains control of the water, she continues as the merchant at the Paradise **(3)**. If you stopped her water-hoarding operation, Cathigwood from the Nexus accompanies a Nexus merchant at the Paradise. He informs you that the water is now being distributed fairly.

MASS EFFECT ANDROMEDA

Secondary Ops
White Death

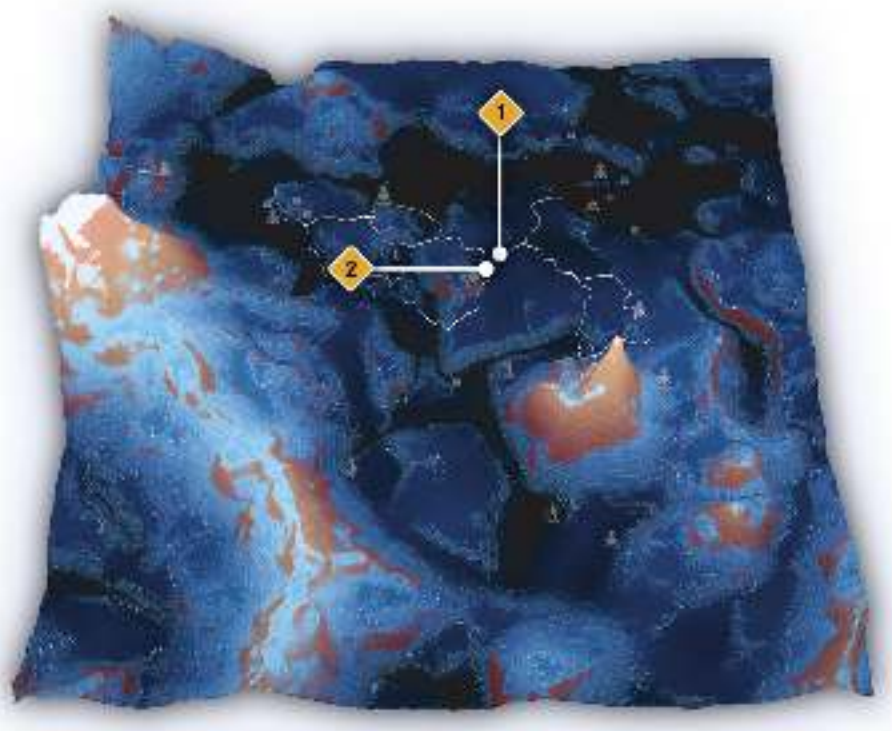
Mission Type: Heleus Assignment: Voeld

Prerequisite: Chapter 2; complete “Return to the Tempest” after Aya during “A Trail of Hope”

Start Location: Voeld

Unlocking: Scan the Wraith near Techiix.

SCAN FOR THE WRAITH



VOELD: TECHIIX

When you first visit Techiix, look for the sniper out on the platform on the ice lake in front of the daar. He’s not very talkative until you help him out. Drive a little northeast of his position, remaining on the ice lake. Check out the map and drive to the navpoint just north of Techiix **(1)**, where the tire tracks first appear in the snow on the lake.

Exit the Nomad and, for kicks, look down through the ice for a chance to see the Architect swimming beneath the surface. Pull up the scanner and search for the cloaked Wraith in the area indicated on your map. As soon as you find it and execute a good scan, the distant sniper takes it out. Now you can go speak to Orev **(2)**, the mystery sniper on the platform, if you wish. You can brag about defeating an Architect, if you’ve done so by this point.

Changelog
Updates

MARCH 28, 2017

- Updated Multiplayer Enemies section to include fighting tactics for each of the enemy types.

MARCH 29, 2017

- Updated Secondary Ops quest table to include starting locations for improved quest navigation.

MARCH 31, 2017

- Added expanded strategy to the Waves and Objectives section in the Multiplayer chapter.
- Updated maps to include container locations in the following sections:
  - Mission 1: Planetside
  - Mission 2: A Better Beginning
  - Mission 3: A Trail of Hope.

APRIL 10, 2017

- Updated the requirements needed for Cora Harper's relationship.

APRIL 11, 2017

- Updated The Firefighters Secondary Ops quest.

APRIL 14, 2017

- Updated the Multiplayer Characters section to include the Salarian Architect.

APRIL 19, 2017

- Updated the Task: Remnant Data Cores.
- Updated the Tempest Trophies in the Game Mechanics chapter.

APRIL 27, 2017

- Updated the Multiplayer Characters section.
- Added a section covering the Strike Team & APEX Missions.

MAY 12, 2017

- Updated section covering the Strike Team & APEX Missions with recent updates to the mission playlist.

MAY 13, 2017

- Updated Assault Rifles section to include the X5 Ghost Assault Rifle added by game patch 1.06

JUNE 14, 2017

- Updated Jaal's relationship information.

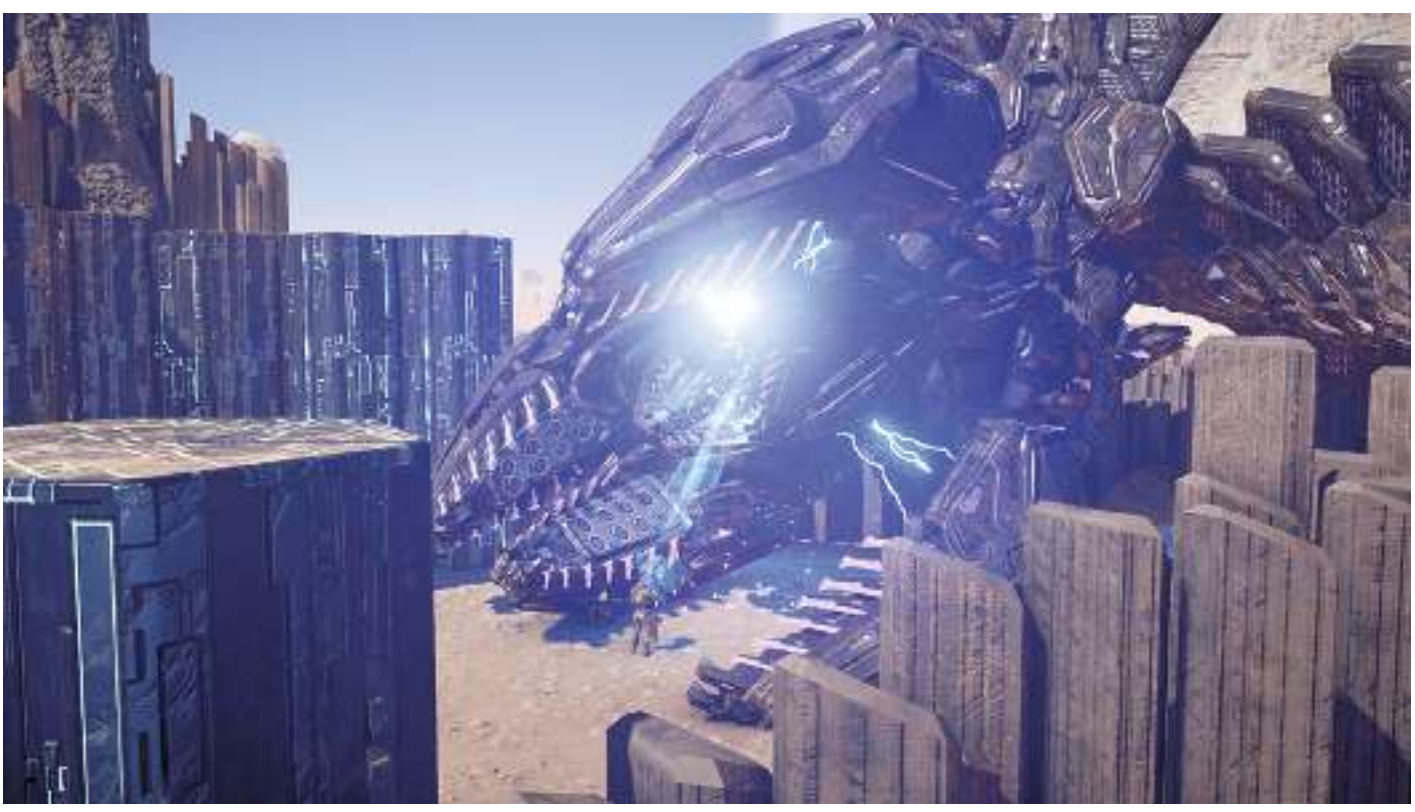
MASS EFFECT ANDROMEDA

Architect Encounters

Overview

This section outlines strategies for overcoming the epic Architect battles found on Eos, Voeld, Kadara, and Elaaden. These encounters are comparable to epic, large-scale dragon battles in other games, like the high dragon encounters in *Dragon Age: Inquisition*.

While there are multiple strategies and approaches you can take to defeat an Architect, the following guide revolves mainly **around assault and sniper rifle usage**, **amplifying weak-point damage**, **Tactical Cloak disengagement**, **EMP Overload**, **and Sticky Omni Grenade burst damage**.



This strategy is geared toward the Insanity difficulty, for Pathfinders around Level 35 and above. For details on unlocking associated quests, see the Secondary Ops chapter.

WHAT INCREASES HEADSHOT/WEAK-POINT BONUS?

Infiltrator profile (invest in combat and tech powers)

Maverick armor (craft or purchase from Kadara Port)

MASS EFFECT ANDROMEDA

Architect Encounters

General Phase Flowchart

GENERAL COMBAT GUIDELINES

Actively direct your squadmates to focus on targets using the *Order Squadmate* commands. This is vital for taking out the waves of Remnant in these encounters and for doing burst damage to the leg conduits.

Consider taking *Vetra* and *Peebee* with you for these encounters, specifically for Vetra's Turian Smuggler Rank 6 upgrade, *Focus Fire*. This upgrade amplifies all damage done to the target Vetra fires at with her rifle, up to a 100% increase. Peebee's Invasion also applies a defense debuff, effective against conduits. Not only that, but Peebee is hands down the best in the squad at crowd control, so she's doubly effective when considering Remnant wave phases.

Avoid biotic powers. Aside from their debilitating properties, they aren't nearly as strong as tech powers against synthetic enemies, particularly the Architect.

Dash behind cover if you see or hear the Architect winding up one of its deadly weapons, and use a peek-and-fire technique to dish out damage to conduits. Better safe than sorry!

Keep incendiary ammo or disruptor ammo active at all times. Incendiary ammo deals the most damage overall (against conduits), while disruptor ammo is effective at destroying smaller Remnant. You can keep both ammo types active by applying one per weapon, if you have two guns.

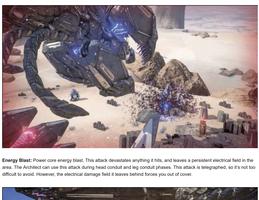
Instead of using powers to prime combos, use your fire- and electricity-based ammo. For instance, with the Shatter Defenses upgrade in assault rifles, you can unload an incendiary-augmented clip into a conduit, then, while the conduit is debuffed, detonate the fire combo with one of your detonators.

Destroy the **head conduit** to bring down the Architect's interface (your "win condition"). Its head conduit is exposed when **one of its leg conduits becomes wounded**. Wounding a leg means bringing that leg's conduit health down to 50%. When the head conduit is exposed, damage can be done to it. Most attacks into its major power core embedded in its nose count as **weak-point** hits, so enhancing your weak-point damage stat is extremely effective for these fights.

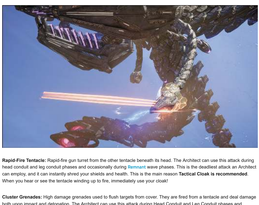
When a leg conduit is fully destroyed, the Architect **repositions** itself across the map. This occurs twice after the initial "wound," for a total of three battle positions around the area. This is one of the most important aspects of planning your Architect strategy, since each position may change your approach and what supplies you have access to. For specific mount locations, see the planet-specific sections following this general guideline. The Architect's location pattern is static, so it's predictable.

Also note that transitioning between phases in the battle revives knocked-out squadmates automatically.

WEAPONS AND ATTACKS

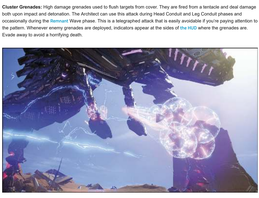


Energy Blast: Power core energy blast. This attack devastates anything it hits, and leaves a persistent electrical field in the area. The Architect can use this attack during head conduit and leg conduit phases. This attack is telegraphed, so it's not too difficult to avoid. However, the electrical damage field it leaves behind forces you out of cover.



Rapid-Fire Tentacle: Rapid-fire gun turret from the other tentacle beneath its head. The Architect can use this attack during head conduit and leg conduit phases and occasionally during Remnant wave phases. This is the deadliest attack an Architect can employ, and it can instantly shred your shields and health. This is the main reason **Tactical Cloak is recommended**. When you hear or see the tentacle winding up to fire, immediately use your cloak!

Cluster Grenades: High damage grenades used to flush targets from cover. They are fired from a tentacle and deal damage both upon impact and detonation. The Architect can use this attack during Head Conduit and Leg Conduit phases and occasionally during the Remnant Wave phase. This is a telegraphed attack that is easily avoidable if you're paying attention to the pattern. Whenever enemy grenades are deployed, indicators appear at the sides of the HUD where the grenades are. Evade away to avoid a horrifying death.



Electrical Cage: An electrical field deployed between the Architect's "legs" to prevent any aggressors from attacking beneath it. This defense is always active while mounted on the ground. It basically prevents you from getting too close. Because of this Charge isn't a particularly effective power against the Architect (as are most biotic powers).

LEG CONDUIT PHASE

"**Destroy conduits (x/3)**," where **x** equals how many leg conduits remain. This is always the phase the Architect begins with when it mounts at a new location.

DETAILS

Deplete the health of a leg conduit to either 50% (wounded) or 0% (destroyed). If this objective isn't fulfilled in under **30 seconds**, a "punishment" Remnant **wave phase** commences; this happens right after the Architect fires off several rounds of its electrical energy blast. Essentially, one of three potential outcomes occurs during the leg conduit phase.

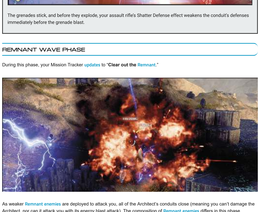
Wounding a leg reveals a vulnerability, opening the head conduit and transitioning the battle into the head conduit phase.

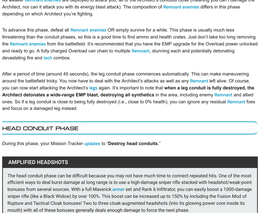
Completely destroying a leg causes the Architect to fly to its next location. Additionally, this triggers an EMP blast that destroys all hostile and friendly Remnant tech (like your Remnant VI and Assault Turret).

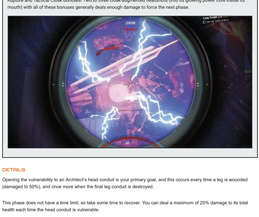
Leg conduit health values remain throughout the entire encounter. For instance, taking one conduit down to 60%, then switching to another leg conduit and wounding it at 50% means you only have to deal 10% to the other leg to wound it the next time the Architect enters the leg conduit phase. This advances the phase quickly without instigating its retreat mode (since you aren't fully destroying a conduit). This tactic is particularly effective for the Exo Architect, since its first location is near a forward station. However, it's not recommended for the other Architect battles.

WEAK AT THE KNEES

For the leg conduit phase, it's recommended that your strategy includes dealing high burst damage to avoid this "bonus" Remnant phase. For instance, throwing a couple of **Sticky Omni Grenades, followed by assault rifle fire with the Shatter Defenses upgrade** can absolutely devastate a leg conduit, potentially depleting its health from 100% to 50% instantly (even on the Insanity difficulty!).







The grenades stick, and before they explode, your assault rifle's Shatter Defense effect weakens the conduit's defenses immediately before the grenade blast.

REMNANT WAVE PHASE

During this phase, your Mission Tracker updates to "**Clear out the Remnant.**"

As weaker Remnant enemies are deployed to attack you, all of the Architect's conduits close (meaning you can't damage the Architect, nor can it attack you with its energy blast attack). The composition of Remnant enemies differs in this phase depending on which Architect you're fighting.

To advance this phase, defeat all Remnant enemies OR simply survive for a while. This phase is usually much less threatening than the conduit phases, so this is a good time to find ammo and health crates. Just don't take too long removing the Remnant enemies from the battlefield. It's recommended that you have the EMP upgrade for the Overload power unlocked and ready to go. A fully charged Overload can chain to multiple Remnant, stunning each and potentially detonating devastating fire and tech combos.

After a period of time (around 45 seconds), the leg conduit phase commences automatically. This can make maneuvering around the battlefield tricky. You now have to deal with the Architect's attacks as well as any Remnant left alive. Of course, you can now start attacking the Architect's legs again. It's important to note that **when a leg conduit is fully destroyed, the Architect detonates a wide-range EMP blast, destroying all synthetics** in the area, including enemy Remnant and allied ones. So if a leg conduit is close to being fully destroyed (i.e., close to 0% health), you can ignore any residual Remnant foes and focus on a damaged leg instead.

HEAD CONDUIT PHASE

During this phase, your Mission Tracker updates to "**Destroy head conduits.**"

AMPLIFIED HEADSHOTS

The head conduit phase can be difficult because you may not have much time to connect repeated hits. One of the most efficient ways to deal burst damage at long range is to use a high-damage sniper rifle stacked with headshot/weak-point bonuses from several sources. With a full Maverick armor set and Rank 6 Infiltrator, you can easily boost a 1000-damage sniper rifle (like a Black Widow) by over 100%. This boost can be increased up to 150% by including the Fusion Mod of Rupture and Tactical Cloak bonuses! Two to three cloak-augmented headshots (into its glowing power core inside its mouth!) with all of these bonuses generally deals enough damage to force the next phase.

DETAILS

Opening the vulnerability to an Architect's head conduit is your primary goal, and this occurs every time a leg is wounded (damaged to 50%), and once more when the final leg conduit is destroyed.

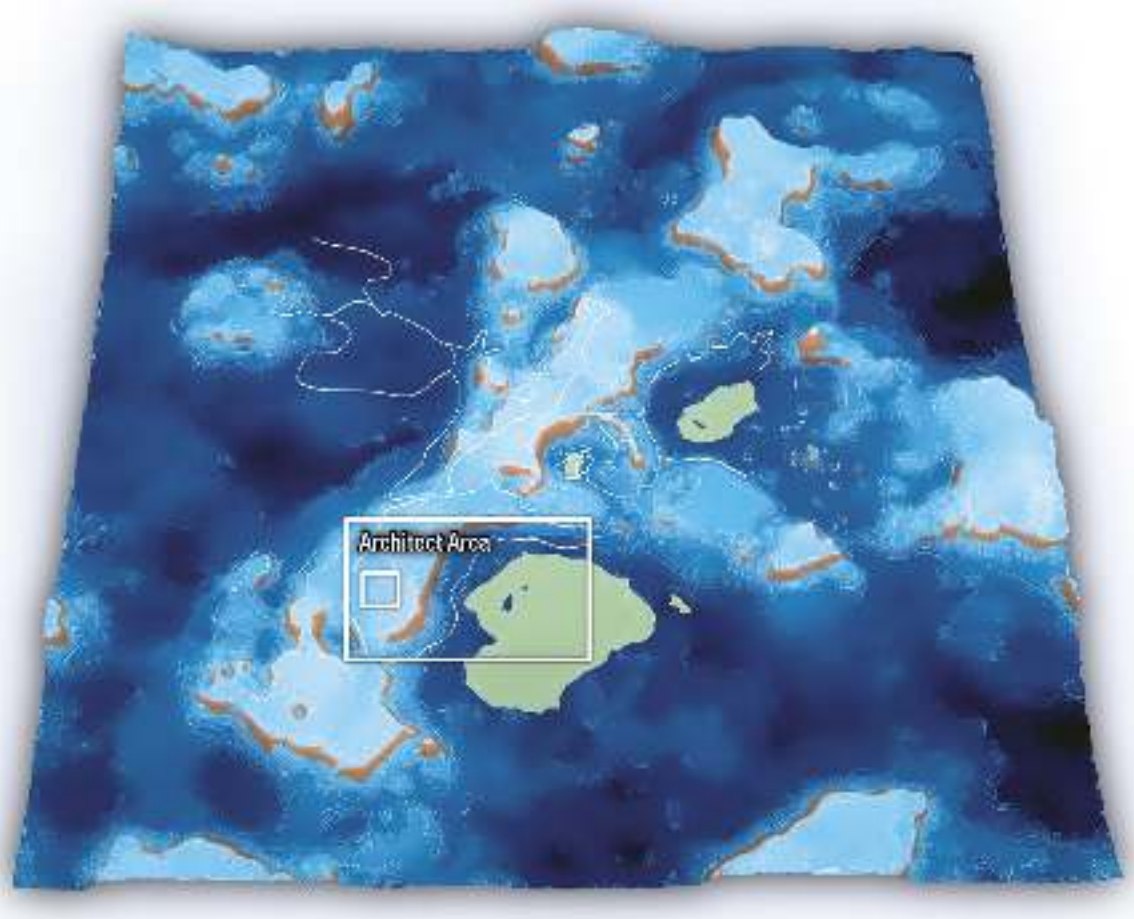
This phase does not have a time limit, so take some time to recover. You can deal a maximum of 25% damage to its total health each time the head conduit is vulnerable.

The Architect becomes relentless during this phase, using its powerful attacks one after another. Stay in or near cover so you can peek out to deliver weak-point- and incendiary-ammo-enhanced sniper rifle shots, followed by a fire combo detonator (like Overload). When the Architect is on its last wounded leg (under 50% health), it does not retreat into the sky. Destroying the final leg forces it into one last head conduit phase, with 25% health left.

MASS EFFECT ANDROMEDA

Architect Encounters

Eos Architect Details



The Eos Architect reveals itself during the mission "Making an Impression," accessible once the Priority Ops mission "**A Trail of Hope**" is completed.

ARCHITECT MOUNT LOCATIONS AND RECOMMENDED SQUAD POSITIONING

REMNANT WAVE COMPOSITION

Breacher

Nullifier

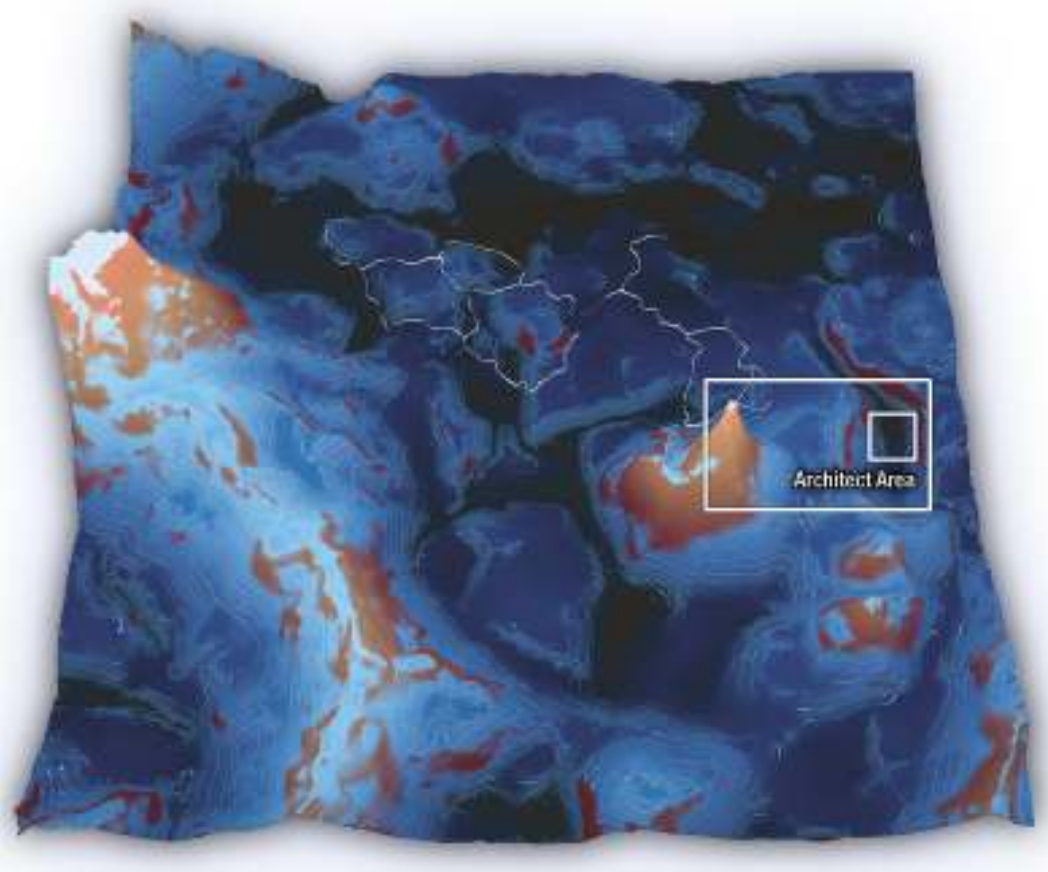
TIPS

You can use the forward station nearby to make the first part of this Architect battle a little easier. Hide around or behind the station for a quick and convenient method of refueling ammo and health, while dishing out damage to each of its legs. You can even refill power cells for an unlimited supply of Omni Grenades. A valid strategy for this Architect is to whittle each leg down to around 60% before wounding one. Then, when it cycles back to the leg conduit phase, take another leg down to 50%, and repeat. Since the Architect only retreats when a leg is completely destroyed, you have access to the forward station for the majority of the battle, making all subsequent leg conduit phases much easier.

MASS EFFECT ANDROMEDA

Architect Encounters

Voeld Architect Details



This Architect encounter is triggered from the mission "Missing Science Crew," initiated by establishing an outpost on Voeld and speaking to Priya Blake, a colonist there.

ARCHITECT MOUNT LOCATIONS AND RECOMMENDED SQUAD POSITIONING

REMNANT WAVE COMPOSITION

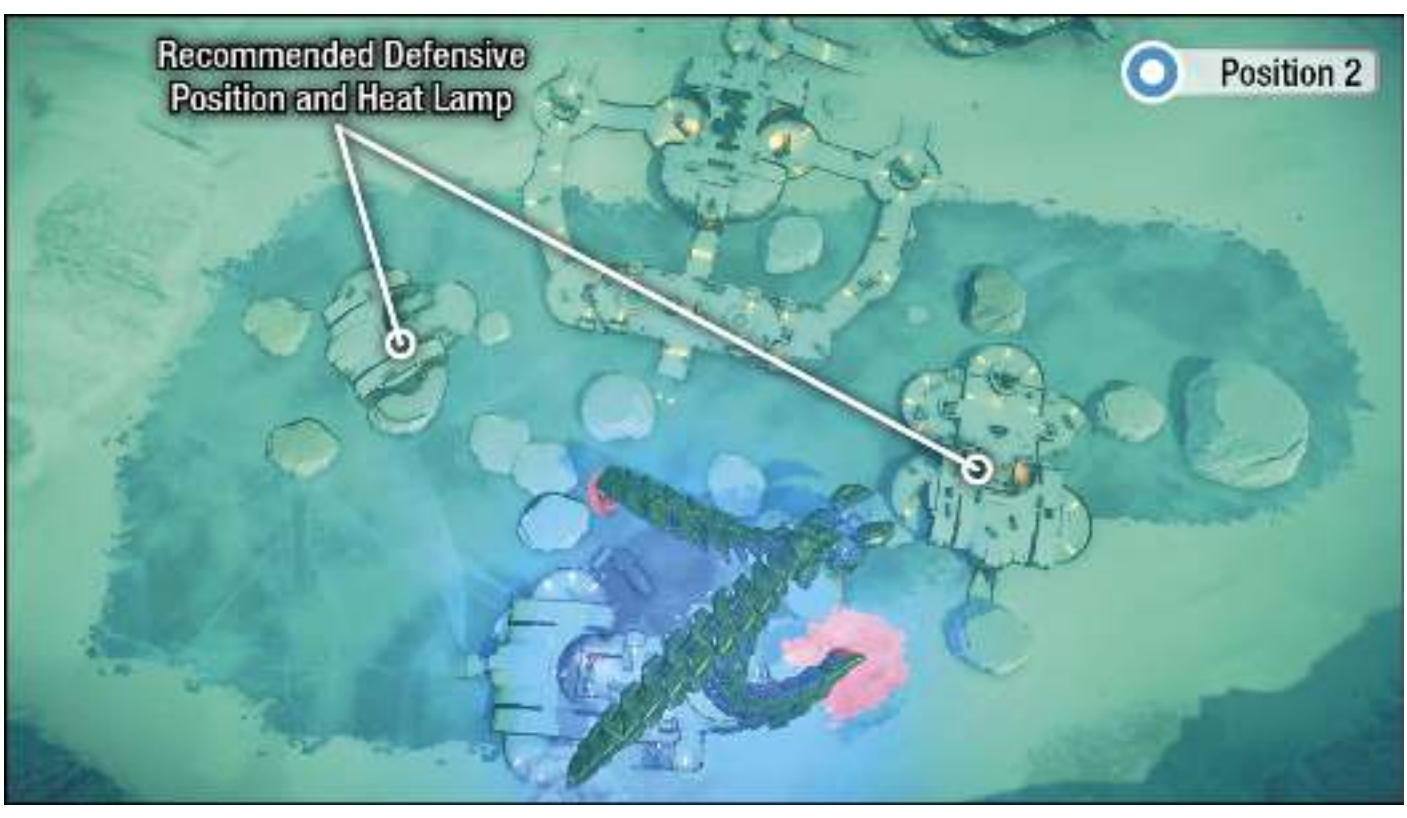
Breacher

Observer

TIPS

Use the Nomad to drive to buildings that provide warmth and cover against the Voeld Architect.

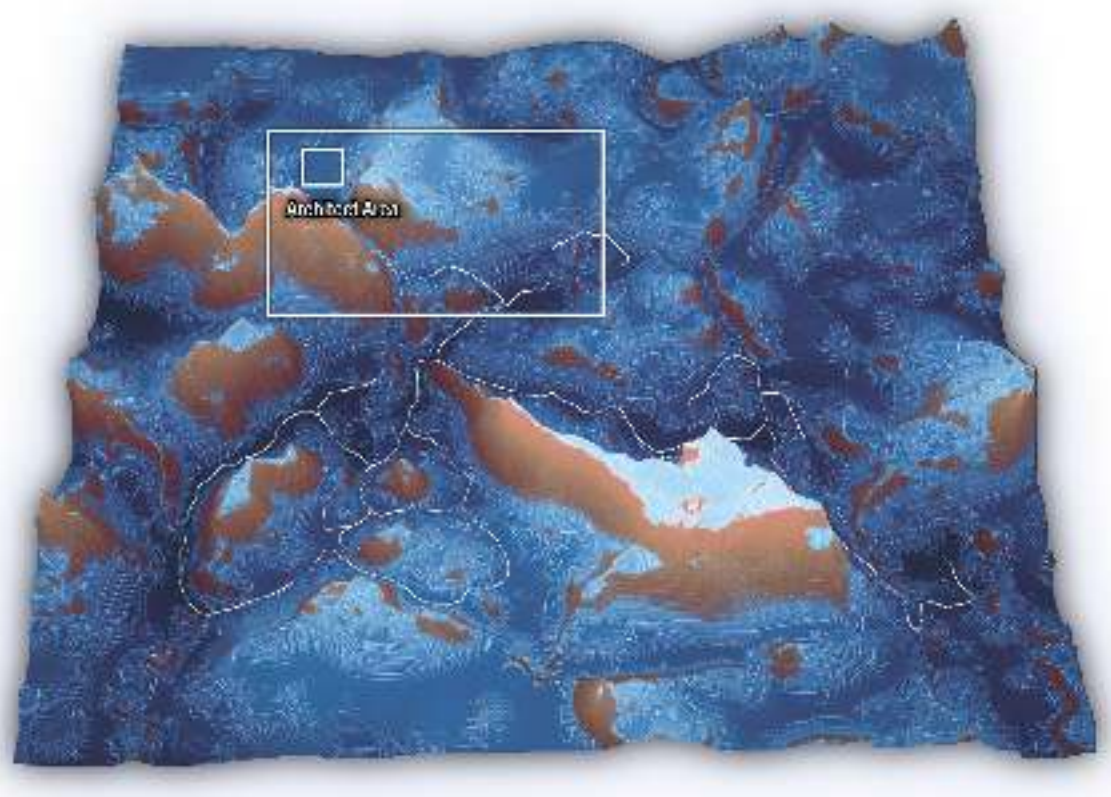
The Voeld Architect is arguably the **most difficult out of the four**, considering the harsh and mostly **unavoidable Level 2 cold hazard**. Not only do you have to manage surviving the Architect's powerful attacks, but you also have to keep your life-support gauge in check by staying warm (next to heat lamps). The best way to tackle this fight is to plan out your defensive positioning. Use the overhead diagrams provided to get an idea of the battlefield. Shore up in the best place so you can use cover, deal long-range damage, and still have access to a heat lamp. This battlefield is massive. Use your Nomad to get from building to building if necessary (just don't get caught out of position by its rapid-fire tentacle). Fortunately, the Remnant wave phases here are a lesser nuisance that feature Observers and Breachers. Keep yourself from being overwhelmed by multiple Observers at once while finding a heat source to restore your life support. Use one of the roofed buildings as cover for the final mount position. This allows you to peek out and snipe the head conduit.



MASS EFFECT ANDROMEDA

Architect Encounters

Kadara Architect Details



Speak to Christmas Tate in the Kadara outpost (Kadara can be settled after you complete the main quest chain involving the Collective and the Outcasts). He gives you the mission "Old Skinner." Follow your navpoints for this quest to find the Architect on Kadara.

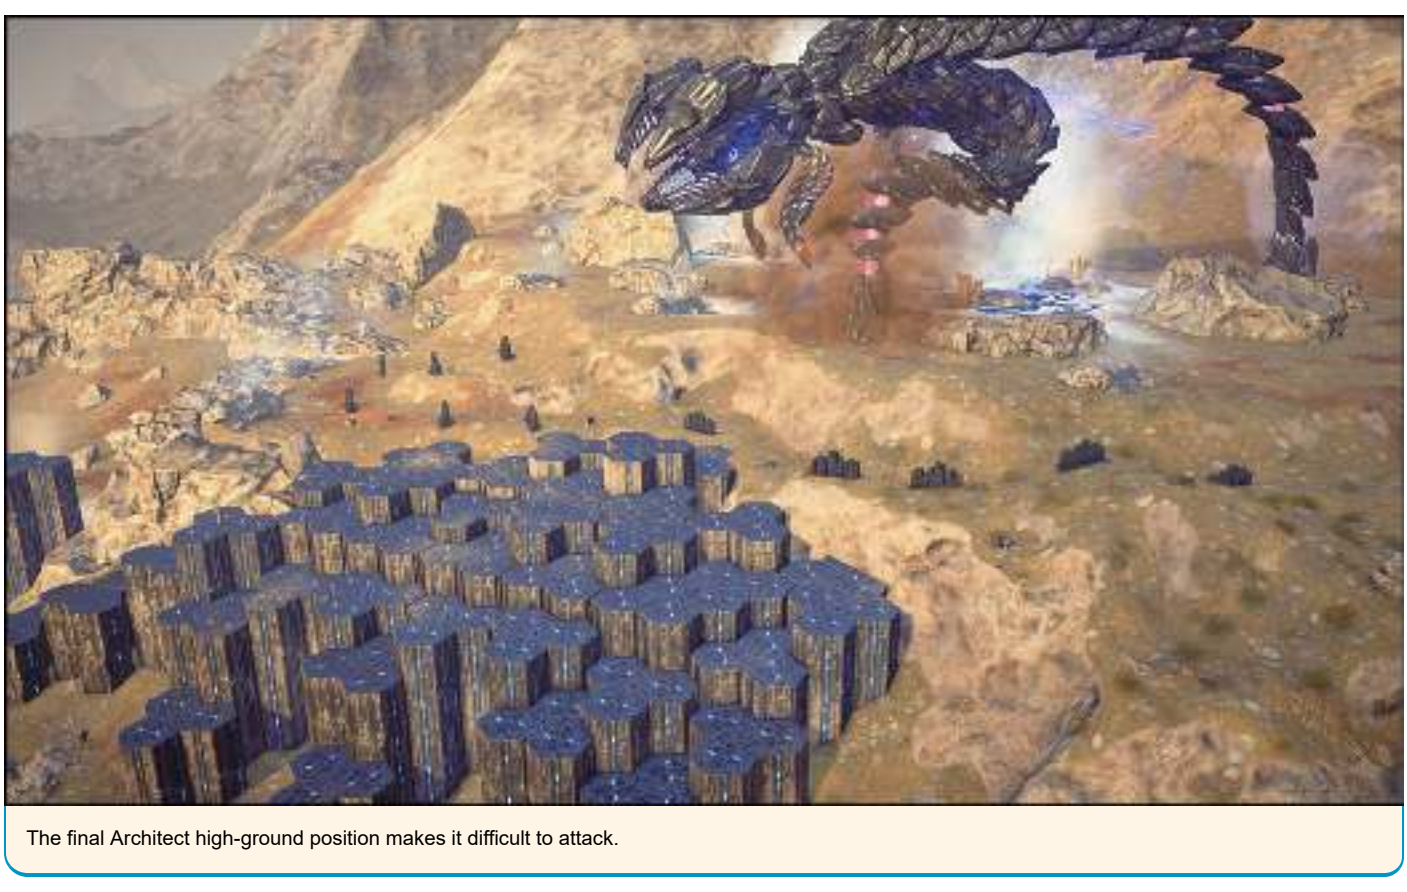
ARCHITECT MOUNT LOCATIONS AND RECOMMENDED SQUAD POSITIONING

REMNANT WAVE COMPOSITION

Breacher

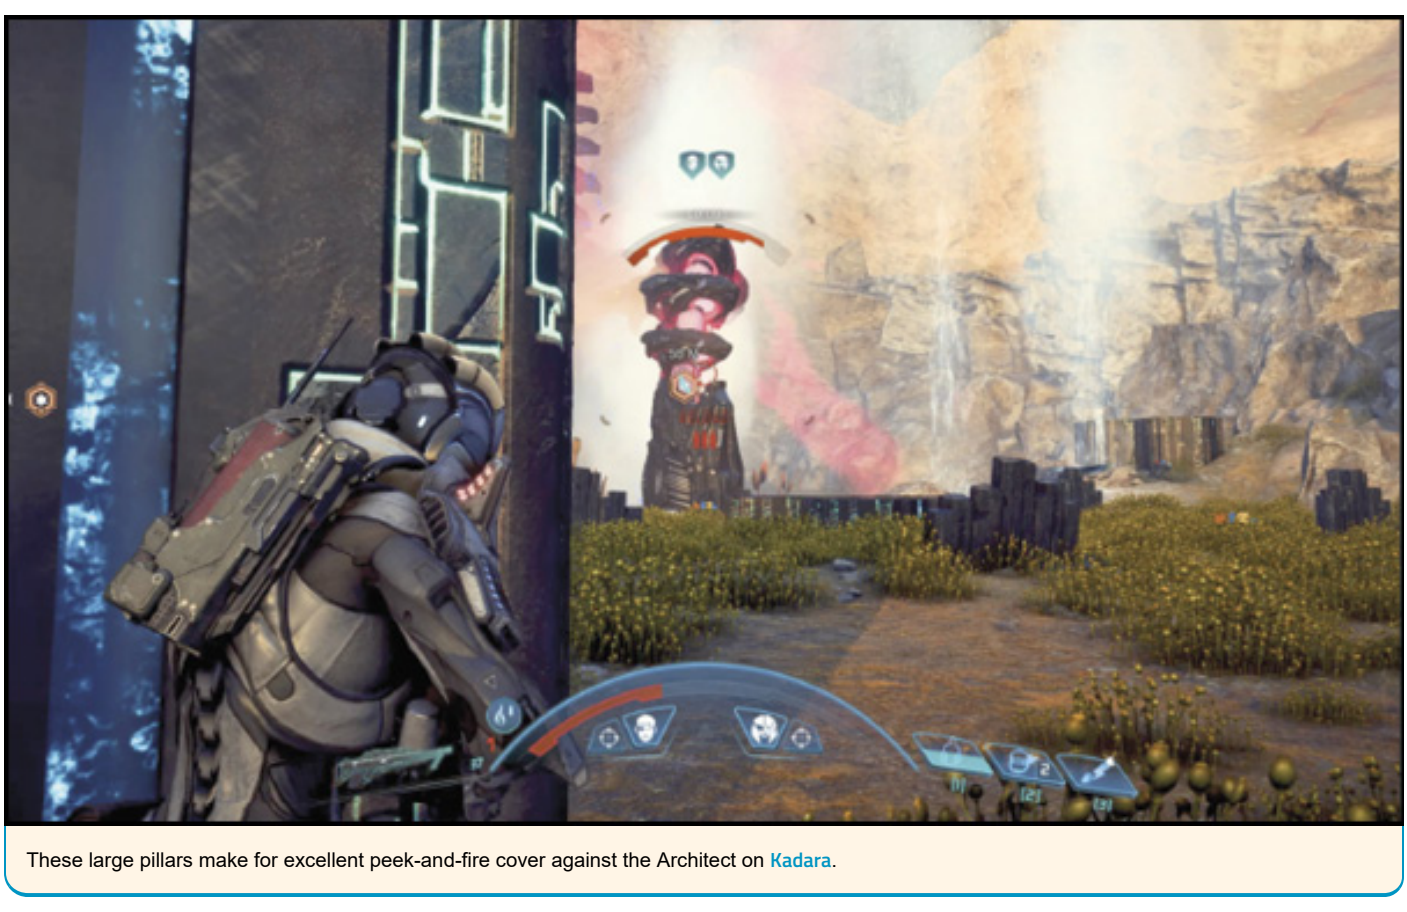
Nullifier

TIPS

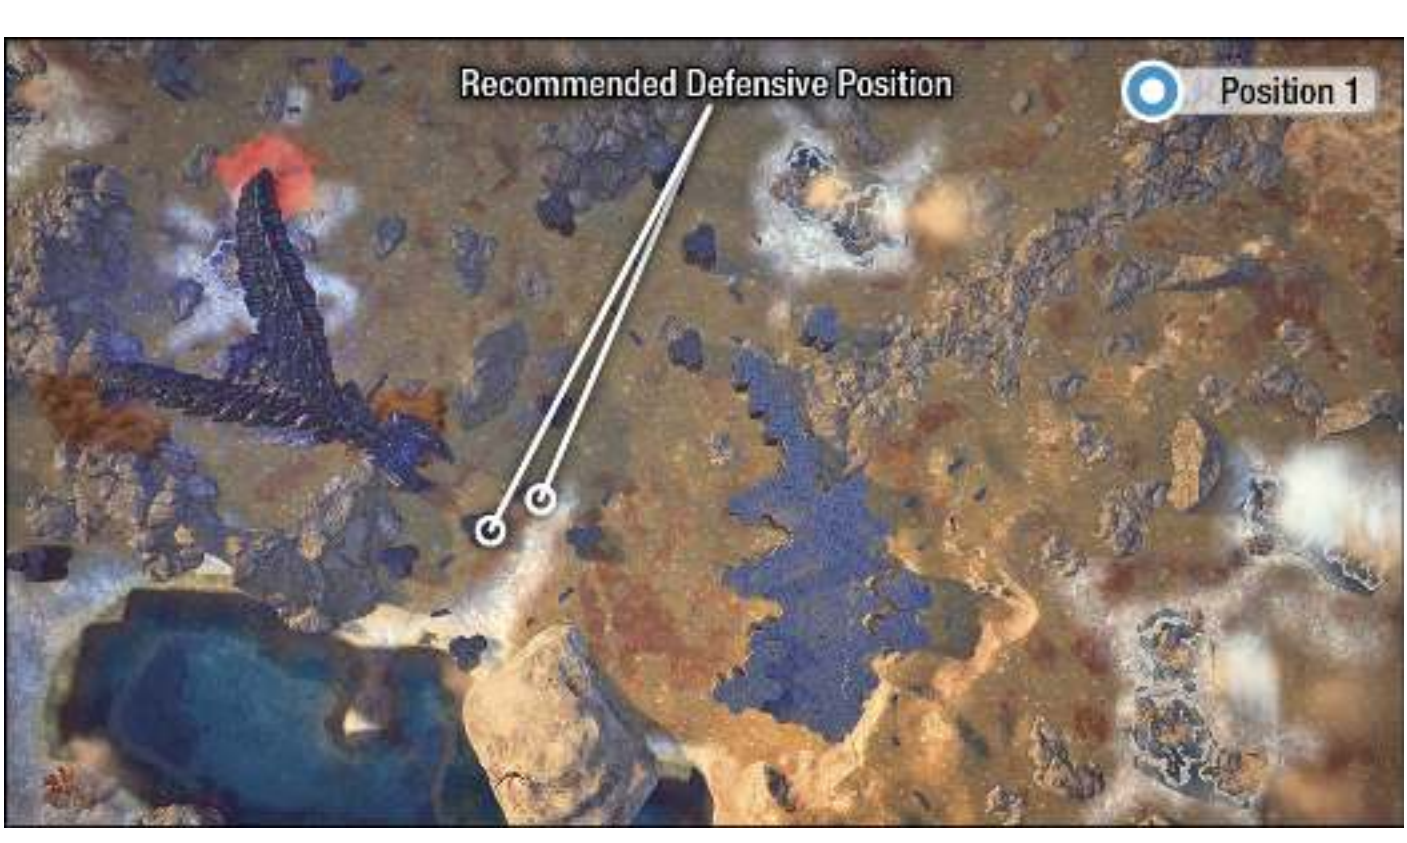


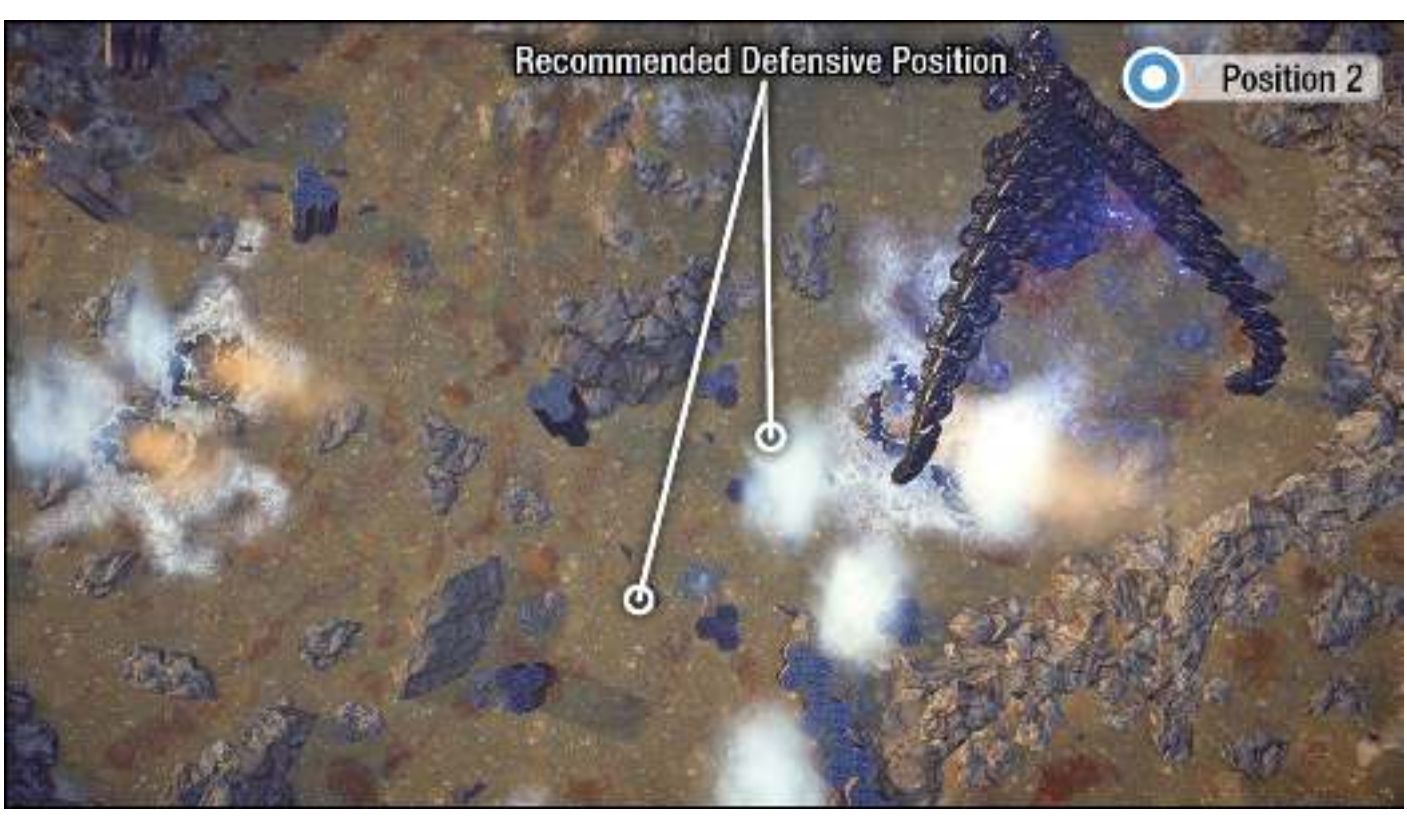
The final Architect high-ground position makes it difficult to attack.

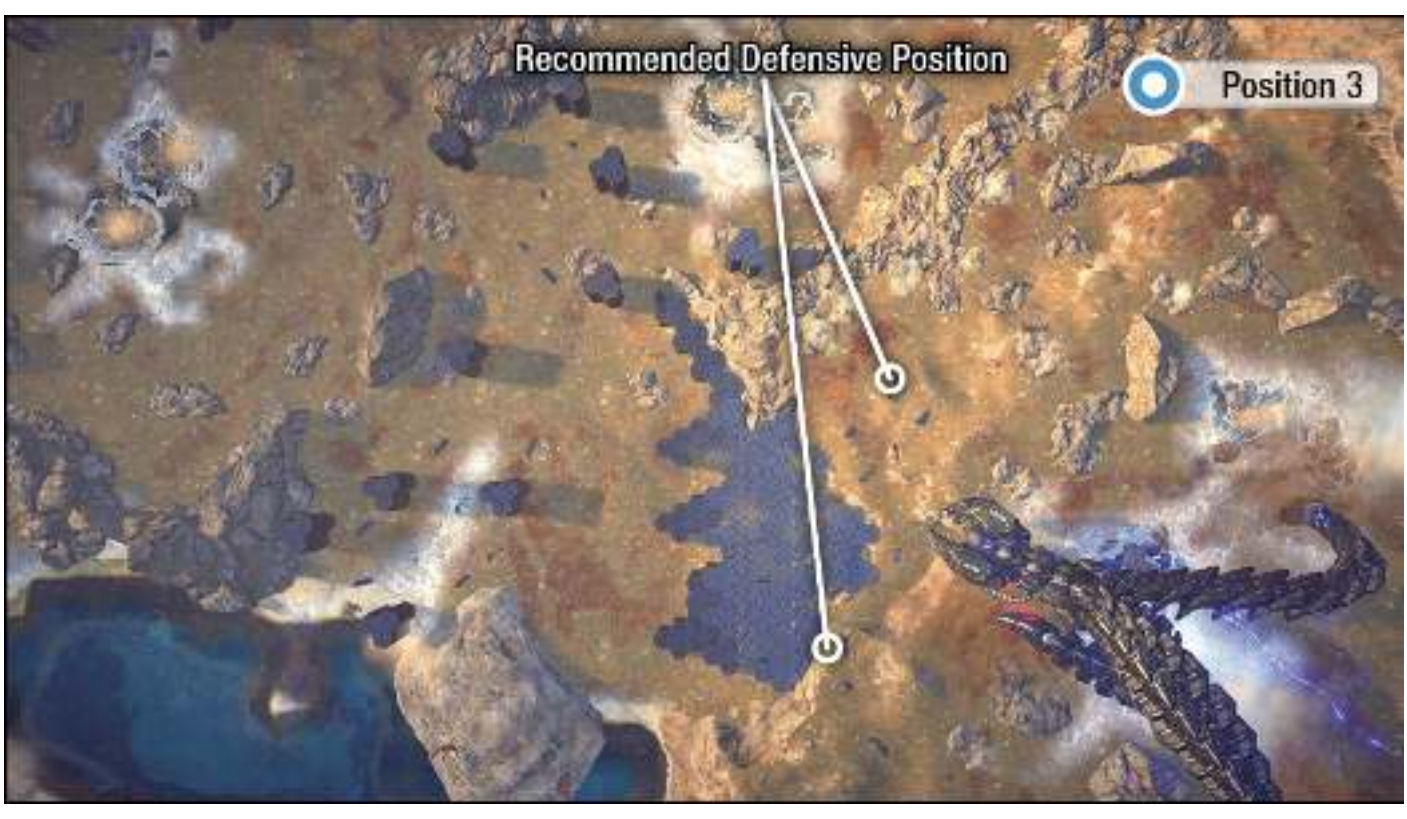
The main mechanical differences between this encounter and the other Architect encounters are the acidic water geyser hazards and the moving platforms. Compared to the other three encounters, there's much less cover here. Tactical Cloak is highly advised if there isn't sufficient cover and you need to lose target lock from the Architect's rapid-fire tentacle. This especially applies to the third mount location. The Architect is perched on high ground, so it's difficult to avoid the onslaught of attacks. You also need to deal with Nullifiers here during the Remnant phases, so the lack of cover becomes even more of an issue because of the Nullifier's cover-penetrating projectiles. This can be considered the second most difficult Architect encounter, right behind the one on Voeld.



These large pillars make for excellent peek-and-fire cover against the Architect on Kadara.



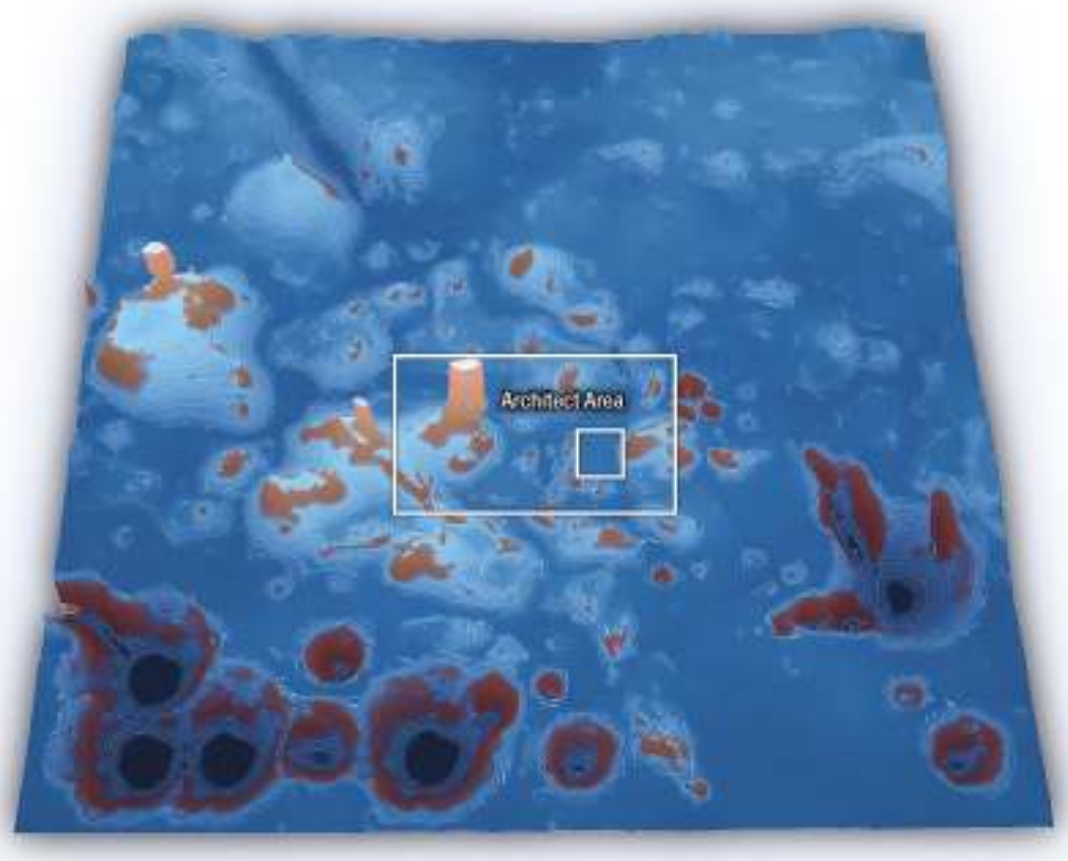




MASS EFFECT ANDROMEDA

Architect Encounters

Elaaden Architect Details



This Architect is available only if you give the drive core to Morda in the mission "**Search for the Stolen Remnant Drive Core,**" since you can't establish an outpost otherwise.

ARCHITECT MOUNT LOCATIONS AND RECOMMENDED SQUAD POSITIONING

REMNANT WAVE COMPOSITION

Breacher

Assembler

TIPS

When compared to the **Architect encounters** on **Voeld** and **Kadara**, this Architect may not be as difficult to deal with, but its **Remnant** wave phases can be a pain. Assemblers are extremely aggressive here, throwing "Breacher bombs" at you while Breachers harass you out of cover. Fortunately, there's plenty of cover—almost the entire battlefield is littered with something to hide behind. In terms of overall difficulty, the **Elaaden** Architect could rate as the easiest, relative to the others, thanks to the amount of cover provided and the fragility of Assemblers and Breachers.

MASS EFFECT ANDROMEDA

Priority Ops

Starting the Game

Welcome to the main story walkthrough. This chapter provides a tour through all of the Priority Ops missions, with notifications when certain side quests become available.

Overall, the main game is broken into several missions, with interludes in between major plot developments. The "middle" of the game is a wide-open area, affording you the freedom to go through side quests at your leisure. However, keep in mind that almost all side missions and optional tasks can be saved to be completed later, after more pressing matters are dealt with. For details on side quests see the Secondary Ops chapter.

CHARACTER CREATION (EFFECTS ON GAMEPLAY)

Starting a new game with the Customize Character option allows you to customize the main character's physical appearance, first name, training history (subsequently, starting powers), the appearance of the main character's twin, and whether or not Commander Shepard (the original *Mass Effect*'s protagonist) was male or female. Most customizations are aesthetic, but some affect gameplay.

The main difference in gameplay when selecting a gender involves your romance options. For a **spoiler-heavy** guide to romance, see **Romance** in the **Compendium at the back of this guide**.

CHOOSE TRAINING

Ryder's training history determines what powers he/she starts with. As you level up and obtain skill points to invest, you can branch off to other power groups so you aren't locked into any particular fighting specialty. Although Ryder's combat aptitudes aren't tied to a "class" system, training history lets you set a plan for what type of play style you want to emphasize in combat—one for each **profile** (see Profiles in Combat **Concepts Expanded** for details).

Even if you aren't interested in adjusting Ryder's appearance, it's recommended that you create a custom profile since starting abilities may affect how you want to fight—especially if you're planning to play on a higher difficulty setting like Hardcore or Insanity. For instance, you may find these difficulties more manageable with the Technician, Leader, or Operative background. The abilities these backgrounds start with lend to playing a safer style, giving you better odds at surviving the damage output from enemies. For details on individual powers see Powers in Combat **Concepts Expanded**.

Several starting powers listed normally require an investment into their power skill groups before they can be purchased. For instance, starting as an Operative gives you Tactical Cloak right off the bat. Starting with any other history would require you to invest a significant amount of skill points into tech before being able to unlock it.

TRAINING	DETAILS	PLAY STYLE	STARTING POWER	UNLOCKED SKILL 1	UNLOCKED SKILL 2
Security (Default)	During your Alliance military service, you focused on learning everything you could about weapons and tactics.	Firearms; aim-based, effective against single targets	Concussive Shot	Turbocharge	Combat Fitness
Biotic	You were effectively "designated biotic" during your Alliance military tenure, assisting your cohorts with your ability to control mass effect fields.	Crowd controller; effective against groups of grunts	Throw	Singularity	Barrier
Technician	As a technician in the Systems Alliance military, you learned to operate drones and hack enemy systems.	High-damage anti-defense "mage"; effective against armored and shielded enemies	Overload	Invasion	Team Support
Leader	You were a team player and a natural leader in the Alliance military, working closely with your cohorts for their safety and the safety of others.	Close-range "sentinel"; high survivability support	Energy Drain	Annihilation	Team Support
Scrapper	When a fight broke out, you were always the first soldier in the thick of it—mostly according to Alliance military protocol, and occasionally not.	Close-range crowd controller and "tank"; effective at drawing attention	Charge	Combat Fitness	Charge
Operative	In the Alliance military, you studied covert operations and tech used by special forces—knowledge you rarely found a use for until the Andromeda Initiative.	Sniper, assassin; effective at thinning out unsuspecting enemies quickly, high survivability	Tactical Cloak	Combat Fitness	Tactical Cloak

CHOOSE NAME

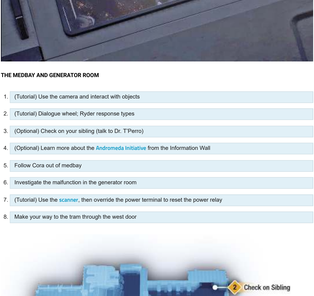
Characters in the game refer to you as Ryder and refer to your sibling as Scott or Sara, depending on which Ryder you choose. This also determines the name of the folder your saved-game files are saved in (when browsing your saves through the Load Game interface).

MASS EFFECT ANDROMEDA

Priority Ops

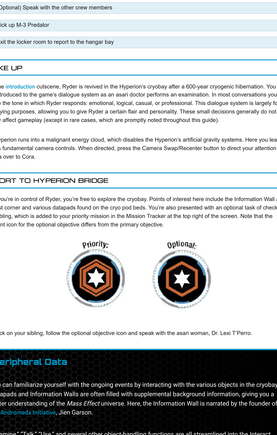
Prologue: Hyperion

The story begins in 2819, with passengers on board the Hyperion waking from a cryogenic stasis. The arrival of the human ark signals the beginning of a new phase for humanity in the Heleus Cluster system, over 600 years away from the Milky Way. However, the Andromeda Initiative isn't without its issues; separation during travel has caused a 14-month gap between the Hyperion and the other arks, with the Hyperion arriving last.



THE MEDBAY AND GENERATOR ROOM

1. (Tutorial) Use the camera and interact with objects
2. (Tutorial) Dialogue wheel; Ryder response types
3. (Optional) Check on your sibling (talk to Dr. T'Perro)
4. (Optional) Learn more about the Andromeda Initiative from the Information Wall
5. Follow Cora out of medbay
6. Investigate the malfunction in the generator room
7. (Tutorial) Use the scanner, then override the power terminal to reset the power relay
8. Make your way to the tram through the west door



HYPERION BRIDGE AND LOCKER ROOM

1. Pick up your helmet
2. (Optional) Scan and interact with miscellaneous objects (such as "Dad's Good Luck Rock")
3. (Optional) Speak with the other crew members
4. Pick up M-3 Predator
5. Exit the locker room to report to the hangar bay

WAKE UP

After the introduction cutscene, Ryder is revived in the Hyperion's cryobay after a 600-year cryogenic hibernation. You are then introduced to the game's dialogue system as an asari doctor performs an examination. In most conversations you can choose the tone in which Ryder responds: emotional, logical, casual, or professional. This dialogue system is largely for roleplaying purposes, allowing you to give Ryder a certain flair and personality. These small decisions generally do not majorly affect gameplay (except in rare cases, which are promptly noted throughout this guide).

The Hyperion runs into a malignant energy cloud, which disables the Hyperion's artificial gravity systems. Here you learn the game's fundamental camera controls. When directed, press the Camera Swap/Recenter button to direct your attention and camera over to Cora.

REPORT TO HYPERION BRIDGE

Once you're in control of Ryder, you're free to explore the cryobay. Points of interest here include the Information Wall along the east corner and various datapads found on the cryo pod beds. You're also presented with an optional task of checking on your sibling, which is added to your priority mission in the Mission Tracker at the top right of the screen. Note that the waypoint icon for the optional objective differs from the primary objective.

To check on your sibling, follow the optional objective icon and speak with the asari woman, Dr. Lexi T'Perro.

Peripheral Data

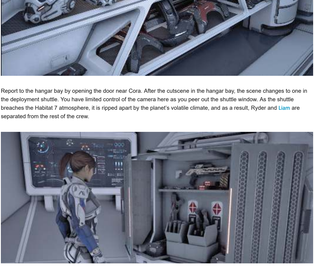
You can familiarize yourself with the ongoing events by interacting with the various objects in the cryobay Datapads and Information Walls are often filled with supplemental background information, giving you a better understanding of the *Mass Effect* universe. Here, the Information Wall is narrated by the founder of the Andromeda Initiative, Jien Garson.

"Examine," "Talk," "Use," and several other object-handling functions are all streamlined into the Interact command, displayed whenever you're near an interactable target. See **Game Basics** for details.

The Journal and Mission Tracker

Your journal organizes and keeps track of all outstanding missions you have available to you. The journal menu, along with several other menus, is accessed through the Pause screen. The journal organizes your missions into contextual subfolders and allows you to keep one mission active in the Mission Tracker. To activate an ongoing mission, highlight the mission in the journal interface and press the menu Confirmation button.

When you're ready to continue on to the generator area, open the door to the west. The collision with the energy cloud has caused a malfunction. You're tasked with scanning the generator in order to pinpoint the location of the fault. Power on your scanner, then highlight and scan the objects within the malfunctioning system using the button (or key) shown in the game's helpful tutorial text.



SCANNING OBJECTS

As a Pathfinder, Ryder is equipped with a proprietary scanner (developed using research gathered from the geth back in the Milky Way). The scanner can quickly parse and reveal an object's properties, such as its shape, weight, smell, and texture. Use of the scanner is often required in order to progress through mission objectives. Additionally, scanning various pieces of technology accumulates Research Data (like credits, It's denoted as a simple number), which is then spent to craft equipment. See the Inventory chapter for details and crafting tips.

Next, continue west into the tram. Activate the tram console to meet with Captain Dunn and Ryder's father, Alec, at the Hyperion bridge. After they discuss Habitat 7's Viability, Ryder and Cora begin making deployment preparations in a locker room.

When you're back in control of Ryder, your next objective is to pick up protection: a helmet and a weapon. You can also examine a **datapad** and laptop in the area if you're interested in reading supplemental background information. You can spark up a conversation with Kirkland and Greer to see how they're doing as well. If you want to get down to business, grab your helmet in the east section of the room, then pick up an M-3 Predator from the weapons cache to the southwest.

Report to the hangar bay by opening the door near Cora. After the cutscene in the hangar bay, the scene changes to one in the deployment shuttle. You have limited control of the camera here as you peer out the shuttle window. As the shuttle breaches the Habitat 7 atmosphere, it is ripped apart by the planet's volatile climate, and as a result, Ryder and Liam are separated from the rest of the crew.

Introduzione
Novità di Mass Effect 3

Classi
Adepto

Infiltratore
Guardiano
Sentinella
Soldato
Vanguard
Classi Multiplayer
Classi Cerberus
Classi Alleate
Classi Nemiche

Introduzione

Mass Effect 3 è il terzo capitolo della trilogia di Mass Effect, sviluppato da BioWare e pubblicato da Electronic Arts. Il gioco è stato rilasciato il 6 marzo 2012 per Xbox 360, PlayStation 3 e PC, e il 9 marzo 2012 per Wii U. Mass Effect 3 è un gioco di ruolo d'azione in terza persona, che permette al giocatore di controllare il comandante Shepard e di influenzare la storia attraverso le sue scelte.

Novità di Mass Effect 3

Mass Effect 3 introduce molte novità rispetto ai suoi predecessori, tra cui:

- Un nuovo sistema di combattimento più dinamico e fluido
- Un nuovo sistema di crafting per creare armi e armature
- Un nuovo sistema di multiplayer cooperativo
- Un nuovo sistema di scelte che influenzano il finale della storia
- Un nuovo sistema di relazioni con i personaggi

Classi

Mass Effect 3 offre sei classi giocabili, ognuna con abilità e stili di gioco diversi. Le classi sono:

- Adepto
- Ingegnere
- Infiltratore
- Guardiano
- Sentinella
- Soldato
- Vanguard

Classi Multiplayer

Le classi multiplayer sono le stesse della modalità single-player, ma con alcune differenze. Ogni classe ha un set di abilità e un equipaggiamento predefinito, che può essere personalizzato con i punti esperienza guadagnati durante le partite.

Classi Cerberus

Le classi Cerberus sono le classi utilizzate dai nemici del gioco, che appartengono all'organizzazione Cerberus. Ogni classe ha un set di abilità e un equipaggiamento predefinito, che può essere personalizzato con i punti esperienza guadagnati durante le partite.

Classi Alleate

Le classi alleate sono le classi utilizzate dai compagni di squadra del giocatore, che possono essere reclutati durante la storia. Ogni classe ha un set di abilità e un equipaggiamento predefinito, che può essere personalizzato con i punti esperienza guadagnati durante le partite.

Classi Nemiche

Le classi nemiche sono le classi utilizzate dai nemici del gioco, che appartengono a diverse fazioni. Ogni classe ha un set di abilità e un equipaggiamento predefinito, che può essere personalizzato con i punti esperienza guadagnati durante le partite.

Adepto

L'Adepto è una classe che si concentra sull'uso delle abilità biotiche, che permettono di manipolare la materia e l'energia. L'Adepto è in grado di lanciare potenti attacchi a distanza, di creare barriere protettive e di immobilizzare i nemici.

Meridian: Into the Storm
Meridian: Into the Storm (Continued)

Meridian: Into the Storm

Meridian: Into the Storm is the fifth mission in Mass Effect: Andromeda. It is the first mission on the planet Eos.

Objectives

- Reach the Meridian Outpost
- Activate the Meridian Beacon

Meridian Outpost

Upon arriving on Eos, Ryder and the Pathfinder's team will be greeted by a massive storm. Ryder will be tasked with finding the Meridian Outpost and activating the Meridian Beacon.

Ryder will be tasked with finding the Meridian Outpost and activating the Meridian Beacon.

Meridian Beacon

The Meridian Beacon is a massive structure that is visible from the Meridian Outpost. It is the first of many Meridian Beacons that Ryder will activate on Eos.

The Meridian Beacon is a massive structure that is visible from the Meridian Outpost.

Meridian Outpost (Continued)

Upon activating the Meridian Beacon, Ryder will be tasked with finding the Meridian Outpost and activating the Meridian Beacon.

Priority Ops

Summary of Key Choices

The following data is a compilation of most of the key choices you can make throughout the game. Some have immediate consequences (such as who comes to your aid in the final mission), while others may drastically impact the future of your timeline (i.e., in a potential *Mass Effect: Andromeda* sequel).

Several choices and decisions are logged into your Codex as well. For instance, major decisions related to the main story are logged in the Codex category "Finding a Home," while relationship updates are found in "A Crew Like No Other."

PRIORITY OPS-RELATED CHOICES

KEY DECISION	PATHS	CONSEQUENCE
Prologue: Did Ryder explore Habitat 7?	Ryder made a detailed exploration of the surface.	During the rendezvous on Habitat 7, Alec Ryder commends the Pathfinder Ryder for their work ethic.
Hunting the Archon: Did Ryder take Sloane Kelly's data?	Accepted Sloane Kelly's deal and its consequences.	Vetra Nyx is executed. Sloane and Reyes have a heated verbal dialogue referencing this choice.
A Trail of Hope: What did Ryder decide to do with the exaltation facility?	Destroyed the facility, including the Cardinal and all the angara inside.	—
	Left the facility operational and spared the Cardinal.	Ryder receives aid from the angaran Resistance during the final mission on Meridian.
Hunting the Archon: Who did Ryder save from the Archon's flagship?	Krogan scouts.	Krogan scouts appear to help Ryder during the main mission.
Meridian: The Way Home: Did Ryder use the "Tank code" given by the Primus in the optional mission, "Dissension in the Ranks"?	Yes.	Kett forces are encountered during the final assault on Meridian. May have consequences in the future.
	No, but received code from the Primus.	—
Meridian: The Way Home: Did Captain Dunn survive?	Yes. Requires completion of "Turian Ark: Last But Not Forgotten" with Jurlus convinced to become turian Pathfinder, and completion of "Angara Ark: Last But Not Least" with the other Pathfinders by the final mission. Salarian: RaekaHeyger, Turian: Jurlus, Asari: SarissaVederia	Captain Dunn survives the kett reinforcement crash landing.
	No. Captain Dunn dies if the above requirements are not met.	Captain Dunn is killed in the opening saving her crew.
Epilogue: Who did Ryder back as Ambassador to the Nexus?	Moshae Sjefa	—
	August Braddy	—
	Director Tann	—
	Director Addison	—
	Elvra	—

ALLIES AND RELATIONSHIPS-RELATED CHOICES

KEY DECISION	PATHS	CONSEQUENCE
Who Did Ryder Romance?	None	—
	Liam Kosta (females only)	—
	Cora Harper (males only)	—
	Peebee (either male or female)	—
	Vetra Nyx (either male or female)	—
	Jaal Ama Darav (females only)	—
	Gil Brodie (males only)	—
	Suvi Anwar (females only)	—
	Reyes Vidal	—
	Kerr T'Vessa (either male or female)	Causes differing dialogue in her interviews for "Task: Path of a Hero."
Liam Loyalty Mission: Did you confess Veranz at the end?	Yes.	Reactivity in Liam's follow-up conversation. May lead to relationship cut off.
	No.	—
Cora Loyalty Mission: What happened to Sarissa, the asari Pathfinder?	Cora and Ryder kept Sarissa's secret.	Sarissa remains the asari Pathfinder and makes an appearance in the final mission.
	Sarissa was disgraced, and replaced as Pathfinder by Vederia.	Vederia takes her place.
	Sarissa was disgraced, but allowed to stay on as Pathfinder.	Altered dialogue, but Sarissa retains her duties.
Jaal Loyalty Mission: How did Jaal and Ryder deal with the extremist faction?	Killed Akksul.	Jaal becomes upset with Ryder. Increases amount of Roekaar hostiles on relevant UNCs. Jaal's family helps Ryder in the final mission.
	Listened to Jaal and did not kill Akksul. Akksul shoots Jaal, scarring his beautiful face.	Less Roekaar activity on UNCs. Jaal's family helps Ryder in the final mission.
Peebee Loyalty Mission: What was the fate of the mysterious device?	Ryder chose the mysterious device over Kalinda.	—
	Ryder let Peebee save Kalinda, but the device was lost forever.	Kalinda sends over Remnant tech and makes an appearance in the final mission.
Drack Loyalty Mission: What happened to Arcane?	Drack kept him alive for information.	Vorn arrives in the final mission.
	Drack let him fall.	Vorn arrives in the final mission.
Gil: Did Ryder cheat in the poker game?	Accepted SAM's help and cheated.	Alters dialogue.
	Refused SAM's help and played fair.	Alters dialogue.
Gil: Did romantic Ryder agree to co-father Jill's baby with Gil?	Decided that Gil should father a child with Jill.	Alters dialogue.
	Decided that Gil should not father a child with Jill.	Alters dialogue.
Kallo: Did Ryder side with Kallo or Gil Brodie?	Ryder was more sympathetic to Kallo.	—
	Ryder preferred Gil's point of view.	—

B-STORIES

KEY DECISION	PATHS	CONSEQUENCE
Krogan Exodus: What happened to Spender?	Spender was exiled.	—
	Spender was demoted.	—
Salarian Ark: Did Ryder arrest Dr. Aden during the mission "Theft and Ransom"?	Yes.	Saelen helps in the final mission.
	No.	—
Turian Ark: Did Jurlus Rix become the turian Pathfinder?	Yes.	Avitus becomes Pathfinder and helps Ryder, as well as contributes to Captain Dunn's survival.
	No.	The turians are searching for a replacement Pathfinder. Avitus becomes a drunken mercenary on Kadara.
Ryder Family: Did Ryder recover all the memory fragments?	Did not complete quest.	—
	Found every memory trigger and viewed all of Alec's hidden memories.	Alters dialogue with sibling. Ryder recalls Alec's memory and figures out the Scourge.

HUBS AND UNCS-RELATED CHOICES

KEY DECISION	PATHS	CONSEQUENCE
Nexus: How did Ryder and the Nexus leadership deal with the protesting families?	Ignored the crisis, and the protestors were forcibly removed. (Also happens if Ryder ignored the quest).	—
	Arrested the protestors to restore order.	—
	Agreed to the protestors' terms and ended the crisis.	—
Nexus: What happened to Director Tann, the documentary, "Flash of a Hero"?	Interviewed Director Tann for the documentary (happens if Ryder ignored the quest).	Tann appears in the documentary instead of Ryder
	With Ryder's help, Kerr produced a hard-hitting truthful piece.	—
	With Ryder's help, Kerr's documentary focused on the achievements of the Initiative.	—
	Kerr quit her documentary.	She leaves the Nexus.
Nexus: What happened to the Nexus saboteur?	Turned over to the Nexus leadership.	—
	Exiled to Kadara Port.	—
	Didn't investigate the saboteur.	—
Nexus: Did Ryder allow Sid to make public the Nexus's involvement with the Three Sabers mercenary crew?	Yes.	The news can be heard over the Helvos News Service.
	No.	—
Nexus: Did Ryder exile or execute Nilken in the murder plot?	Exile.	Re-meet Nilken on Kadara later on and find out what's become of him and his wife, Marielle.
	Release.	Re-meet Nilken in Hyperion, where he's about to be placed back in stasis.
Nexus: What happened to Knight, leader of the anti-AI movement?	Ryder managed to talk Knight down peacefully.	Knight's son, Alain, joins the Nexus scientists.
	Knight was shot by a sniper.	—
Kadara: What did Ryder do with the Oblivion formula?	Let Aremna Farenth keep it.	Oblivion continues to be sold on Kadara. Ryota is angry with the Pathfinder for not believing him and does not become the doctor for the Kadara outpost, if settled.
	Returned it to Dr. Nakamoto.	Oblivion is no longer sold on Kadara. Ryota becomes the doctor at the Kadara outpost, if settled.
	Never retrieved the formula.	Nothing changes—Oblivion is sold on Kadara. Outpost can't be placed without completing this quest.
Kadara: Did Ryder solve the Port Authority murders in Kadara Port?	Yes.	Ryder and Reyes Vidal take out the Roekaar cell responsible for the killings in Kadara Port.
	No (if never got involved).	The murders continue.
Kadara: Which faction came out on top?	The Outcasts.	Reyes Vidal is on the run. The Collective loses their foothold on Kadara.
	The Collective.	After Sloane Kelly is killed, the Outcasts scatter and the Collective becomes the new power in Kadara Port. Rather than rule himself, Reyes uses Keema Dohrgun as a front.
	Ryder didn't get involved in the clash between factions.	Sloane remains in charge. Tensions remain between the two factions.
	—	During the final mission, Sloane shows up to help (by default). If Reyes is in charge of Kadara Port, he shows up instead.
Aya: Did Ryder tell the angaran the truth that the kett followed them?	Yes.	—
	No.	—
Aya: Did Ryder romance Aeos Kjer?	Yes.	Adds post-ending dialogue on Aya.
	No.	—
Aya: Did Ryder find the ancient Aya vault plans?	Yes.	—
	No.	—
Eos: Did Ryder create a research/science outpost, or a defense/military outpost?	Science.	Minor variance in the deployment scene from Addison.
	Military.	In the final mission, a Prodromos security team appears to help.
Elaaden: Did Ryder give the Remnant drive core to the krogan colony?	Yes.	The krogan allow the MWS to join their settlement and put down an outpost.
	No.	For keeping the Remnant drive core, the Pathfinder receives 1000 Remnant research data and 2000 credits. However, the Elaaden outpost cannot be established. Thus, the Architect encounter on Elaaden is also forfeit. The krogan colony remains independent.
Elaaden: Did Ryder find the secret water source on Elaaden?	Yes, and allowed Annea the water trader to continue her business.	Ryder gets a regular tribe from Annea. There's a crate in her office that Ryder can check for stuff. She also helps in the final mission.
	Yes, but ousted Annea and established Annea as a Nexus representative.	Annea and her gang attack Ryder. A Nexus representative is then sent to replace Annea at the Paradise.
	Didn't find the water source.	No change.
Voeld: Did Ryder tell Maarn the truth about her brother's exaltation?	Yes.	Maarel leaves for Havarl to put her brother to rest.
	No.	Maarel returns home.
	Did not do quest.	No change.
Voeld: Did Ryder kill the angaran AI (the Mind of Voeld)?	Yes.	—
	No.	The AI kill off the angaran hostages. Ryder can keep the AI.
Havarl: If the angaran AI survived, what happened to it?	Given to the angara Resistance. Moves to Aya.	The angara help out during the final mission, using advanced calculations provided by their new AI.
	Moved to Nexus to work with SAM, which she wants.	—

MASS EFFECT ANDROMEDA

Relationship Guide

Romance Options

The ability to romance characters is a staple in BioWare games, and *Mass Effect: Andromeda* has its fair share of romance options. The following data is presented in a way that allows a reader to make sure they have the opportunity to court and romance a character of their choosing. Of course, it also contains **major spoilers**, so be warned.

Although both Ryder twins can attempt to flirt with all romance-able characters, these characters may not reciprocate. See the following notes for details.

SCOTT RYDER'S ROMANCE OPTIONS

The male Ryder twin can romance **Cora**, Peebee, Vetra, Gil, Avela, Reyes Vidal, **and** Keri.

SARA RYDER'S ROMANCE OPTIONS

The female Ryder twin can romance Liam, Peebee, Vetra, Jaal, Suvi, Reyes Vidal, **and** Keri.

FLIRT OPTIONS AND LOYALTY

Generally, romancing a character requires you to flirt with them at least three times. If applicable, the squadmate's Loyalty Mission must also be completed. Additionally, you can flirt with as many people as you'd like without affecting the courting of other characters. However, once you commit to exclusivity with a character, you can no longer flirt with anyone else (although you may have a fling with Keri while committed to another).

GENERAL ROMANCE TIPS

- Talk frequently to the character you want to romance
- Do everything they ask for, including Loyalty Missions
- Read all of their emails
- Select the flirt option every chance you get

Relationship Guide

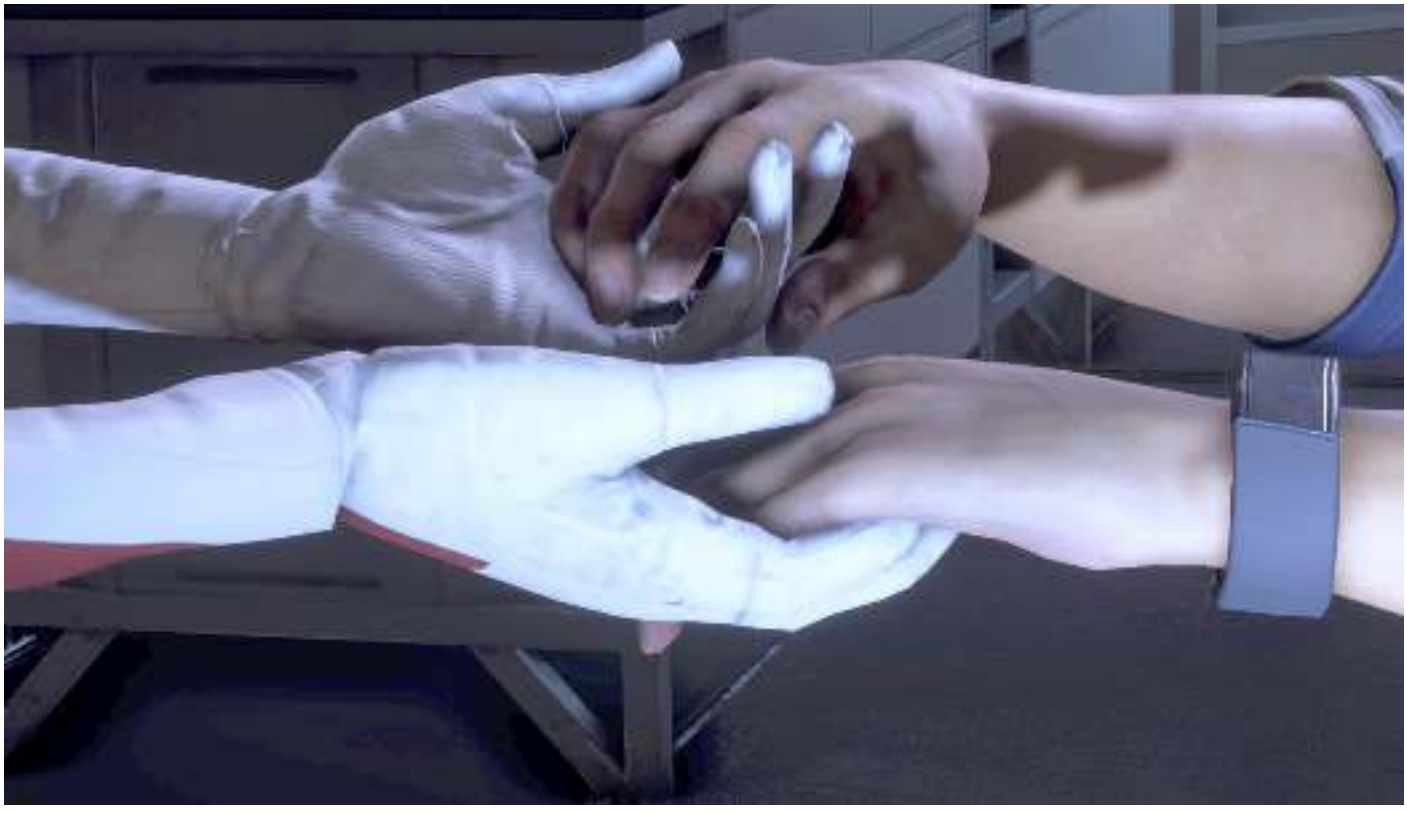
Keri

KERI

Begin “Path of a Hero” and flirt with her any chance you get. Make sure to check back with her after completing Priority Ops missions like “A Better Beginning,” “A Trail of Hope,” and “The Journey to Meridian.” After completing “The Journey to Meridian,” you can have a fling with Keri even if you’ve committed to an exclusive relationship.



Weapons

Research & Development

Mass Effect: Andromeda's comprehensive inventory system can be overwhelming, considering all the various technologies from which weapons and armor are derived. This chapter includes data tables covering all weapons, armor, consumables, and materials found throughout the Heleus Cluster.

For Research and Development purposes, it helps to understand how items are created—what kinds of materials a species uses in their tech, where to find minerals, what wildlife can be harvested for bio-materials, and so forth. For example, most Milky Way equipment requires omni-gel, an all-purpose material of alloys and synthetic polymers. Omni-gel can be found by defeating Milky Way exiles or purchased from vendors (such as those on the Nexus).

Furthermore, certain research blueprints aren't available for purchase until prerequisite conditions are met.

BLUEPRINT UNLOCK CONDITIONS

Angaran Equipment: Available after completing the trust mission for the angara, "A Trail of Hope."

Nomad **Upgrades:** Individual Nomad blueprints are available at certain player level thresholds.

MASS EFFECT ANDROMEDA

Weapons

Guns Overview

SCALED RATING SYSTEM

Gun damage, **rate of fire**, and **accuracy** displayed in these tables are based on a scaling system within the same weapon category (assault rifles, pistols, shotguns, and sniper rifles). For instance, the M-37 Falcon deals the most per projectile among assault rifles, while the Cyclone deals much less.

This scaling system is also applied for **damage** and **attack-speed** ratings for **melee** weapons.

Damage: The amount of damage a weapon deals with a **single shot**. For multi-pellet shotguns, damage is represented by the **sum of all pellets**.

Rate of Fire: How quickly the weapon discharges ammo. Alternatively, it can be thought of as the weapon's recharge speed between shots. Most automatic weapons fire as quickly as possible, while others require repeated triggers/inputs.

Accuracy: The higher a weapon's accuracy, the more precise it is, indicated by a smaller spread reticle.

Unique Properties: Guns aren't just about damage and rates of fire; several guns have unique properties worth noting. The kett-based shotgun, the Dhan, isn't really a shotgun—it fires a single projectile that deals a large amount of damage. However, all shotgun bonuses (from the combat skills tree, for example) apply to it.

The Talon pistol, with its unique shotgun spread property.

Type: The origin technology of the item. Usually an indicator of how it fires (automatic, semi-automatic, single shot), as well as whether it's beam-based or ammo-based.

Max Clip Size: How much a weapon can fire before requiring a reload. For energy-based weapons, max clip size indicates how much a weapon can fire before it overheats. Halting fire allows for energy-based weapons to cool down and "reload." This value can be affected by various augmentations and mods.

Weight: A weapon's weight affects your weapon-encumbrance penalty, thus affecting your power recharge speed **if you surpass your weapon-weight capacity** (indicated by a blue bar at the top of the Loadout interface). Weapon-weight capacity can be increased through upgrading certain skills, such as Rank 3 of Combat Fitness. The weight value shown here is for the first and fifth rank of the weapon. E.g., the N7 Valkyrie (20/16) has a weight of 20 for its first rank and 16 for its fifth rank.

Note that weight values displayed in the game's interface take into account any weight reduction effects (like rank 4 weapon upgrades in the Combat skill group).

Augmentation Slots: How many augmentations can be applied when crafting a weapon (requires at least Rank 2 schematics), through the Research and Development console. **Reminder:** Deconstructing an item that's been augmented refunds all augmentations on said item, so don't be afraid to experiment with unique augmentations!

A shotgun modified with a Seeking Plasma System augmentation.

Materials: These are the materials required to craft an item, as well as the materials the item breaks down into (and adds to your collection) when the item is **deconstructed**. For exact material costs for building the item, refer to the updated e-guide version of this book, or the in-game Research and Development menu.

Blueprint Cost: The amount of Research Data (RD) required of an item's technology type (MWS, angara/kett, Remnant) to purchase the blueprint of the first rank of the item. The value in parentheses is how much the cost increases per extra rank (e.g., Cyclone Rank 1 costs 100 MWS RD; Rank 2 costs 110).

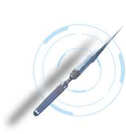
Melee Weapons

Type: There are four distinct types of melee weapons, each with its own strengths and weaknesses. Daggers are quick but deal less damage and have a shorter range, while swords have a longer start-up time but deal the most damage. Additionally, the Asari Sword infuses the user with biotic powers, allowing the wielder to blink forward before striking.

Damage: The amount of damage the weapon deals in one blow, using a scale rated against the highest-damage and lowest-damage melee weapons. Damage of the Kett Vakarsh includes its burn damage over time.

Attack Speed: The faster the weapon's attack speed, the less start-up time it takes to strike after the Melee Attack command is issued.

ANGARAN FIRAN



Type	Angaran Dagger
Unique Properties	Bonus damage to armor health
Materials	Omni-Gel Canister, Shell Filaments, Nickel, Vanadium
Blueprint Cost	100 (10)

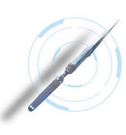
ASARI SWORD

Type	MWS Sword
Unique Properties	Wielder performs biotic blink forward before striking
Materials	Omni-Gel Canister, Beryllium, Fluorite, Vanadium
Blueprint Cost	150 (25)

BIOTIC AMPLIFIER

Type	MWS Fist
Unique Properties	Causes stagger
Materials	Omni-Gel Canister, Iron, Lithium, Element Zero
Blueprint Cost	—

ELECTRIC FIRAN



Type	Angaran Dagger
Unique Properties	Stuns enemies and primes them for a tech combo
Materials	Angaran Meditation Crystal, Shell Filaments, Lithium, Vanadium
Blueprint Cost	125 (15)

REMNANT CRYO GAUNTLET

Type	Remnant Fist
Unique Properties	Causes freeze effect and primes the target for a cryo combo
Materials	Omni-Gel Canister, Beryllium, Fluorite, Vanadium
Blueprint Cost	150 (25)

Armor

Overview

Name: Armor names vary within a set. For instance, the first Heleus helmet is named “Heleus Defender Helmet I,” the third rank is “Heleus Champion Helmet III,” and the fifth is “Helmet Champion Helmet V.” Name difference is accompanied with slightly altered aesthetics.

Stat Boosts: The armor system is a bit different from conventional armor systems found in other games. Armor does not inherently improve defense. Instead, each set provides unique bonuses catering to certain strengths and playstyles. The stat boost values listed in the following section show the value provided of the first rank of the item, followed by the value provided by the fifth and tenth rank. For example, the first rank of the angaran helmet boosts tech power damage (3/7/12%) by 3%, the fifth rank boosts it by 7%, and the tenth rank boosts it by 12%. Values of ranks in between progressively increase as expected.

Augmentation Slots: Number of augmentations that can be applied when crafting this weapon through the research-and-development console. **Unlike crafted** weapons, the first rank of armors **does have** augmentation slots.

Blueprint Cost: Amount of research data (RD) required of its technology type (MWS, angara/kett, Remnant) to purchase the blueprint of the first rank of the item. The value in parentheses is how much the cost increases per extra rank (e.g., Cyclone Rank 1 costs 100 MWS RD; Rank 2 costs 110).

MASS EFFECT ANDROMEDA

Augmentations and Resources

Augmentations

Augmentations are permanent mods applied to an item during its development through the research-and-development interface. This technology is exceptionally impactful, compared to the standard hot-swappable mod, and can drastically alter weapons and armor. Most generic augmentations can be purchased from vendors (the General Merchant in the Nexus Common Area offers a large selection), while others can be created through research and development.

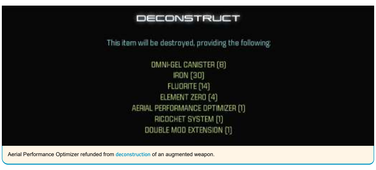
It's important to note that while the augmentation is "consumed" upon use, the augmentation is refunded when the augmented item is deconstructed. So even though researched augmentations are limited in supply, you can reuse the special augmentation as long as you deconstruct the item it's installed on.

RESEARCHED AUGMENTATIONS

Researched augmentations can only be purchased once. As mentioned, items augmented with these must be deconstructed if the augmentation is to be recycled/reused. Several of these are unique augmentations that drastically modify weapon behavior.

Type: Some augmentations can be applied to different sets of equipment with varying effects, while others can be applied to any crafted item.

Cost: Amount of research data (RD) of the specified tech it costs to purchase the augmentation.



Aerial Performance Optimizer refunded from deconstruction of an augmented weapon.

MILKY WAY TECH

NAME	TYPE	DESCRIPTION	COST
Aerial Lubricant	Gun, Arms	(Weapon) When hovering: +35% Rate of Fire (Arms) When hovering: +35% Tech Damage	50
Aerial Performance Optimizer	Gun, Arms	(Weapon) When hovering: +35% Weapon Damage (Arms) When hovering: +35% Combat Damage	50
Aerial Stabilizer	Gun, Arms	(Weapon) When hovering: +35% Weapon Accuracy (Arms) When hovering: +35% Biotic Damage	50
Electrical Conduits	Gun, Chest	(Gun) Streams of electricity (Chest) Stuns melee attackers with electrical damage	200
Equilibrium Regulator	Gun	5% damage bonus when moving slowly with a drawn weapon, +10% when moving faster	50
Grenade Launcher	Gun	(Non-shotgun weapon) Each projectile fired is now a grenade (Shotgun) Each pellet fired is now a grenade but with reduced damage	200
Sticky Grenade Launcher	Gun	(Non-shotgun weapon) Each projectile is now a sticky grenade (Shotgun) Each pellet is now a sticky grenade, with lower damage per pellet	200
Rebalanced Field Coils	Gun, Chest	(Gun) For the last 20% of the clip's ammo: +10% Damage (Chest) Increases weapon accuracy by 10% when standing still	50
Vintage Heat Sink	Gun	Ammo refills automatically after a delay; no longer uses traditional ammo clips	200

ALIEN TECH (ANGARA/KETT)

NAME	TYPE	DESCRIPTION	COST
Battlefield Assist Module	Gun, Chest	(Weapon) When health and shields are full: +20% Damage (Chest) When health is 20% or lower: +25% Resistance to All Damage	50
Bio-Converter	Gun	When the current ammo clip is empty, drains 5% of health and refills the clip	50
Concentration Module	Gun	When shields are 20% or lower: +10% Weapon Accuracy	50
Coolant Unit	Gun	Increases clip size by 20% when special ammo is active	50
Plasma Charge System	Gun	(Non-shotgun weapon) Fires direct-line explosive plasma bolts; charges weapon to fire a devastating blast (Shotgun) Fires direct-line explosive plasma bolts (each less damage than normal rounds), charges weapon for a more devastating blast	200
Ricochet System	Gun	Each projectile can bounce off flat surfaces	100
Seeking Plasma System	Gun	Changes weapon projectile to seeking plasma bolts	100

REMNANT TECH

NAME	TYPE	DESCRIPTION	COST
Beam Emitter	Gun	Changes weapon-fire type to an energy beam	200
Cryo Condenser	Gun, Legs	(Weapon) Cryo ammo freeze duration: +100% (Legs) On jump melee, Cryo Blast: +50% Cold Damage	50
Heat Inducer	Gun, Legs	(Weapon) Incendiary ammo: +25% Damage (Legs) On jump melee, Inferno Blast: +50% Heat Damage	50
Power Booster	Gun, Chest	(Weapon) When current clip is full: +20% Power Damage (Chest) When health is 30% or less: +25% Power Status Effect Duration	100
Shield Disruptor	Gun, Legs	(Weapon) Disruptor ammo: +25% Shield Damage (Legs) On jump melee, Shock Blast: +50% Electrical Damage	50
Shield Oscillator	Gun, Chest	(Weapon) When clip empties: Restores 25% shields (Chest) On enemy killed: Restores 25% shields	200
Shield Sensors	Gun, Chest	(Weapon) 25% chance to gain 50% clip ammo when shields are broken (Chest) 25% chance to recover 10% of health when shields are broken	50

GENERAL AUGMENTATIONS

Most of the following augmentations can be applied multiple times per weapon but only enhance stats in minor ways.

NAME	TYPE	DESCRIPTION
Anti-Armor Module	Any	(Weapon) +5% Power Damage Bonus to Armor (Gear) +2% Power Damage Bonus to Armor
Automatic Fire System	Gun	Changes weapon-fire type to automatic
Biotic Damage Booster	Any	(Weapon) +5% Biotic Power Damage (Gear) +2% Biotic Power Damage
Biotic Recharge Module	Any	(Weapon) +5% Biotic Recharge Speed (Gear) +2% Biotic Recharge Speed
Burst Fire System	Gun	Changes weapon-fire type to burst
Combat Power Module	Any	(Weapon) +5% Combat Power Damage (Gear) +2% Combat Power Damage
Combat Recharge Module	Any	(Weapon) +5% Combat Recharge Speed (Gear) +2% Combat Recharge Speed
Double Mod Extension	Gun	+2 Mod Slots
Duration Boost Module	Any	(Weapon) +5% to All Power Effect Durations (Gear) +2% to All Power Effect Durations
Kinetic Coil	Gun, Chest	(Weapon) +3% Weapon Damage (Chest) +5 Damage Resistance
Medi-Gel Regulator	Gear	(Gear) +2% Max Health
Mod Slot Extension	Gun	+1 Mod Slot
Newtonian Multiplier	Any	(Weapon) +5% Power Force (Gear) +2% Power Force
Reaction Displacer	Any	(Weapon) +5% All Combo Radiuses (Gear) +2% All Combo Radiuses
Reaction Optimizer	Any	(Weapon) +5% All Combo Damage (Gear) +2% All Combo Damage
Shield Accelerator	Gear	(Gear) +2% Health & Shield Regeneration Delay Reduction
Shield Booster	Gear	(Gear) +2% Max Shields
Shield Bypass Unit	Any	(Weapon) +5% Power Damage Bonus to Shields (Gear) +2% Power Damage Bonus to Shields
Shield Generator	Gear	(Gear) +2% Shield Regeneration
Single Fire System	Gun	Changes weapon-fire type to single shot
Support Power Module	Any	(Weapon) +5% Power Restoration & Defense (Gear) +2% Power Restoration & Defense
Tech Damage Module	Any	(Weapon) +5% Tech Power Damage (Gear) +2% Tech Power Damage
Tech Recharge Module	Any	(Weapon) +5% Tech Recharge Speed (Gear) +2% Tech Recharge Speed

MASS EFFECT ANDROMEDA

Augmentations and Resources

Consumables

Consumables are extra, limited resources that are highly impactful to your combat effectiveness. There are a variety of consumables, each with specific uses ranging from shield restoration to damage amplification.

NAME	DESCRIPTION	DETAILS
Backup Life Support	Boosts life-support capacity and allows a user to survive hazardous environments longer outside of the Nomad. No effect on combat.	Decreases hazard damage to life-support gauge
Cobra RPG	Capable of taking down most enemies with a single projectile.	Deals a large amount of damage over an area. Damage dealt is scaled based on type of enemy hit. Instantly destroys most standard infantry
Cryo Ammo	Shots slow enemies and deal moderate bonus damage to armor. Lasts for the next three clips of the currently equipped gun.	Adds freezing effect to ammo: 3 * Weapon Clip Size
Disruptor Ammo	Shots stun enemies and deal large bonus damage to shields. Lasts for the next three clips of the currently equipped gun.	Adds stun/electricity effect to ammo: 3 * Weapon Clip Size
Incendiary Ammo	Shots burn enemies and deal large bonus damage to armor. Lasts for the next three clips of the currently equipped gun.	Adds burn effect to ammo: 3 * Weapon Clip Size
Overdrive Pack	Immediately reloads all weapons, recharges all powers, and temporarily boosts accuracy and damage reduction.	Accuracy increased by 25%+25 Damage ResistanceRefills ammo, resets power recharges
Shield Capacitors	Boosts maximum shields. Restores current shielding to the new maximum. The boost lasts until shields are broken.	Increases Max Shields by 20%, which can be increased with Consumable Effectiveness upgrades. Lasts until shields are broken

MASS EFFECT ANDROMEDA

Augmentations and Resources

Resources

This section covers all of the foundations of all craftable items.

Minerals are metals and elements that can be found through naturally-occuring formations on planets. Going out of your way to explore is usually rewarded with bountiful amounts of minerals.

Tech **materials** are “species”-specific base materials that are almost always required in crafting an item. An item’s technological origin is easily identified by its base material.

Bio materials are anatomical parts of animal wildlife used in creating equipment, usually of the Heleus cluster kind (since the wildlife you encounter are native to the area).

MINERALS

Mined From: While on foot, Ryder can mine most types of minerals with his omni-tool from almost anywhere. The planets listed in this column possess an abundant supply that can be mined using a mining drone deployed from the Nomad’s mining interface.

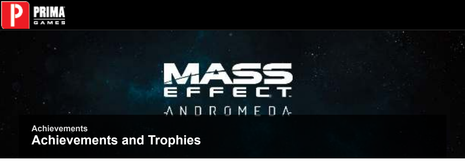
MINERAL	DESCRIPTION	MINED FROM
Aluminum (Al)	A valuable non-magnetic light metal, useful in construction and manufacturing despite its relatively low melting point.	Eos, Kadara
Beryllium (Be)	An ideal metal for lightweight construction in a variety of applications. Useful as an alloying element.	Voeld, Kadara
Cadmium (Cd)	A metal often used in constructing electronic components and in complex manufacturing.	—
Copper (Cu)	A noble metal with high conductivity that makes it useful for a variety of purposes.	Voeld, Kadara
Element Zero (Ez)	Electrically stimulated element zero creates “mass effect” fields. It’s the basis of much modern technology, including faster-than-light travel.	Voeld, Elaaden
Fluorite (F)	A mineral used for creating precision scientific lenses, among other applications.	—
Graphite (C)	The crystalline carbon mineral is an electrical conductor and a useful part of many manufacturing processes.	Eos, Elaaden
Iridium (Ir)	A hard, ultra-dense metallic element that is highly resistant to heat and corrosion.	—
Iron (Fe)	A common metallic element found in many planetary cores. Broadly useful for multiple engineering purposes.	Eos, Elaaden
Lithium (Li)	A useful light metal used in multiple engineering applications, including vehicle batteries, radiation shields, and high-quality steel production.	—
Magnesium (Mg)	A light and sturdy metal. Magnesium alloys are integral to many complex Initiative structures.	H-047c
Nickel (Ni)	A corrosion-resistant transition metal useful for manufacturing purposes.	Havarl
Platinum (Pt)	A malleable noble metal with multiple catalytic applications. Also possesses a degree of cultural cachet among humans.	Havarl, Voeld, H-047c
Silicon (Si)	A metalloid element useful in electronics manufacturing and the fabrication of ceramic compounds.	Elaaden, H-047c
Titanium (Ti)	An extremely strong transition metal vital for manufacturing starship components and other equipment.	Kadara, H-047c
Uranium (U)	A heavy, radioactive element valuable in nuclear technologies and, in its depleted state, for armor plating.	—
Vanadium (V)	A rare metal that can be used to produce various construction alloys.	Eos

TECH MATERIALS

TECH MATERIALS	DESCRIPTION	FOUND ON ENEMY
Angaran Meditation Crystal	An apparently delicate crystal incorporating angaran technology to produce an electromagnetic field. The field reacts soothingly with angaran biology but has other applications as well.	Angara/Roekaar
Kett **Alloy**	The kett utilize a number of unfamiliar alloys in their technology. At this time, the Initiative is unable to replicate most of them.	Kett
Omni-Gel Canister	A semi-molten mixture of alloys and synthetic polymers used in Milky Way technology for rapid fabrication.	Milky Way Exiles
Remnant **Polymer**	A synthetic polymer of incredible durability and conductive properties, fashioned by Remnant technology through unknown means.	Remnant

BIO MATERIALS

BIO MATERIALS	DESCRIPTION	DROPPED FROM
Eiroch Fluid Sac	Sacs inside eirochs contain a fluid used to suspend delicate electronic components. The standard synthetic alternative is in extremely short supply.	Eiroch, Fiend
Remnant **Core**	The compact core of Remnant circuitry and power cells has a limited self-repair capability. Properly stimulated, it might be able to “seed” similar tech into other devices.	Architect
Renderable Plates	The tissues of these animal plates can be rendered into a variety of adhesives and lubricants at a fraction of the cost of producing synthetic equivalents.	Adhi, Eiroch, Taurg, Galorn
Scale Fibers	These scales are layered with an unusual natural fiber similar to spider silk. It could be chemically modified to create a material with strength and elasticity.	Challyrion, Rylkor
Shell Filaments	A keratin-like structure forms the basis of shell plating on certain creatures. If replicated, this biopolymer could prove useful in kinetic padding.	Kaerkyn, Drall, Taurg, Echidna
Soft Chitin	The chitin of certain Heleus creatures is constantly strengthened and repaired by colonies of microorganisms. Study could lead to breakthroughs in materials technology.	Spitbug, Shemrys, Pallad



Achievements

Achievements and Trophies

Mass Effect: Andromeda features several Achievements and Trophies that you can unlock simply by playing through the game in various modes. The following table lists all of these unlocks, their requirements, and the gameplay mode required for each Achievement or Trophy.

NAME	DESCRIPTION	TYPE	UNLOCK REQUIREMENTS	PS4 TROPHY	XBOX ONE GAMERSCORE	ORIGIN POINTS
First Contact	Land on an alien planet	SP	Land on Habitat 7	Bronze	10	10
Data Mining	Scan 100 different objects	SP	—	Bronze	10	10
Terminator	Kill 2000 enemies	SP/MP	—	Bronze	15	15
Fireworks	Perform 100 power combos	SP/MP	—	Bronze	15	15
Death From Above	Kill 100 enemies while hovering	SP	—	Bronze	15	15
Close Combat Specialist	Kill 100 enemies with melee attacks	SP/MP	—	Bronze	15	15
With Our Powers Combined	Detonate 10 targets that were primed by another character	SP	—	Bronze	15	15
Pinpoint Shot	Hit 250 enemy weak points while using a scope (Single-Player)	SP	—	Bronze	15	15
Medic!	Perform 25 revivals on teammates	SP/MP	—	Bronze	15	15
Mastermind	Using constructs, kill 100 enemies	SP/MP	—	Bronze	10	10
Fastball	Hit an enemy with a thrown enemy 25 times	SP	—	Bronze	10	10
Trapshooter	Hit 25 floating enemies with Concussive Shot, Lance, or Incinerate	SP	—	Bronze	10	10
Sucker Punch	Hit 25 pulled enemies with a melee attack	SP	—	Bronze	10	10
Icebreaker	Shatter a frozen enemy with a jump melee attack	SP	—	Bronze	10	10
Rough Landing	Detonate a trip mine with a thrown enemy	SP	—	Bronze	10	10
Friendly Fire	Direct your Remnant VI to attack each type of Remnant enemy	SP	Required enemies: Breacher, Destroyer, Assembler, Observer, Nullifier, and Architect	Bronze	10	10
Pyrotechnics Expert	Light three enemies on fire with one continuous Flamethrower attack	SP	—	Bronze	10	10
Long-Distance Jump	Travel at least 30m in a single jump	SP	—	Bronze	10	10
Matchmaker	Romance three different characters (across all playthroughs)	SP	—	Bronze	20	20
Vanguard Surprise	Hit an enemy with a Charge attack out of Tactical Cloak	SP	—	Bronze	10	10
Hang Time	Keep the Nomad airborne for 35 seconds	SP	—	Bronze	10	10
Unwavering	Complete an "Insanity" Single-Player game, or "Gold" Multiplayer extractions from each firebase.	SP/MP	—	Gold	90	90
Veteran	Successfully complete a combined 25 strike team missions or APEX Multiplayer mode extractions	SP/MP	—	Silver	30	30
APEX	Complete the tutorial mission in Multiplayer	MP	—	Bronze	10	10
Explorer	Complete a combined 5 strike team missions or APEX Multiplayer mode extractions	SP/MP	—	Bronze	10	10
Mission Accomplished	Activate Meridian	SP	—	Silver	30	30
Activation	Activate the Remnant city	SP	Complete Mission 5	Bronze	20	20
Family Connections	Reboot the Pathfinder	SP	Complete sibling portion of Mission 7	Bronze	20	20
Liberation	Free the salarian ark	SP	Complete Mission 4	Bronze	20	20
Foothold	Establish an outpost	SP	Eos outpost creation in Mission 1.5	Bronze	15	15
Exaltation	Destroy the exaltation facility or save the angaran prisoners	SP	Mission 3 key plot choice	Bronze	15	15
First Steps	Meet the angara on Aya	SP	Mission 2.5	Bronze	15	15
Alliance	Ally with an Outlaw faction	SP	Kadara Hub "High Noon" side quest	Bronze	15	15
Pathfinder	Become the new Pathfinder	SP	Granted on Hyperion after Mission 1	Bronze	15	15
Initiated	Gain access to the Tempest	SP	Get the Tempest in Mission 1.5	Bronze	15	15
World-Shaper	Activate the first Remnant vault	SP	Complete Eos Vault Mission 2	Bronze	15	15
Buccaneer	Recover the krogan colony ship	SP	Drack Loyalty	Bronze	15	15
Building Bridges	Stop the Roekaar leader	SP	Jaal Loyalty	Bronze	15	15
United	Unite the outposts against a common threat	SP	Liam Loyalty	Bronze	15	15
Helping Hand	Lend a helping hand to Vetra's sister	SP	Vetra Loyalty	Bronze	15	15
Signal Tracking	Find the source of the strange signal Peebee discovered	SP	Peebee Loyalty	Bronze	15	15
Role Model	Rescue the asari ark	SP	Asari Ark B-Story / Cora Loyalty	Bronze	15	15
Full Roster	In Single-Player mode, recruit all six squadmates	SP	Granted after conversation on Tempest after Jaal joins team	Bronze	15	15
Peak Condition	Reach Level 40 in Single-Player or Level 20 in Multiplayer	SP/MP	—	Silver	30	30
Kitted Out	Kill a foe with a Rank 5 weapon in a Single-Player game or equip a Rank 10 weapon in Multiplayer	SP/MP	—	Silver	30	30
High Performance	Unlock Rank 6 for each Single-Player profile type, or obtain a Level 6 Multiplayer bonus stat	SP/MP	—	Silver	30	30
Full Power	Evolve one tech, combat, and biotic power to Rank 6	—	—	Bronze	20	20
Almost There	Reach Level 25 in Single-Player or Level 15 in Multiplayer	SP/MP	—	Bronze	20	20
Teamwork	Create six strike teams or earn 25 assist medals in Multiplayer mode	SP/MP	—	Bronze	20	20
Top Talent	Have a Level 20 strike team	SP/MP	—	Bronze	20	20
Jack Of All Trades	Equip three different types of profiles	SP	—	Bronze	10	10
All Clear	Increase all planets to 100% Viability (in a single playthrough)	SP	—	Gold	90	90
Terraformer	Increase a planet to 100% Viability	SP	—	Bronze	15	15
Craftsmanship	Craft a gun with three augments	SP	—	Bronze	10	10
Cryptographer	Complete 20 Remnant puzzles in a single playthrough	SP	—	Bronze	10	10
Andromeda's Finest (PS4 only)	Collect all trophies	—	—	Platinum	—	—

Multiplayer Basics

Overview

The Nexus began with a token security force, but when it encountered the **kett** and the other dangers of **the Heleus Cluster**, Tiran Kandros formed a militia to provide additional support. The militia is drawn from those with military training, ex-police and angara seeking revenge on the **kett**, and ordinary people determined to defend their new home. The militia polices and defends the Nexus and handles security and military issues.

In *Mass Effect: Andromeda*'s Multiplayer, you play as an APEX team, formed from the best of the best. These small squads are trusted with the most dangerous, exciting, and important missions. APEX defends colonies and their interests, pushes back the **kett**, handles unknown **Remnant** threats, and battles deadly **outlaws**. APEX teams are less like regular soldiers and more like an "A-Team" of talented individuals defending their homes and families.

This chapter breaks down the various elements that make up the Multiplayer experience of *Mass Effect: Andromeda*.

MASS EFFECT ANDROMEDA

Multiplayer Basics

The HUD

The HUD quickly feeds you information while you move around any map.

1. **Compass:**The compass not only tells you the direction you are currently facing, but displays the direction of enemies and objectives around you. Enemies above or below you are displayed as small arrows next to red dots that inform you to look up or down. These arrows are extremely useful when you take cover on high ground. For example, most enemies should appear as arrows pointing down when you're at the highest point of the map. An enemy with no arrow is on your level and needs to be dealt with immediately!

2. **Kill Feed:** The kill feed reveals your strike team's actions when you don't have line of sight on them. Via kill feed, you can see how a player kills an enemy and with what weapon. The kill feed also shows you when you've gained a medal.

3. **XP:** Just above the crosshair, XP gained from each kill or assist quickly appears and disappears. XP for kills and assists gained from turrets or other placed objects shows up here as well. This is a great way to check whether your grenades or other area-of-effect-based weapons have killed any enemies inside a room or other area you cannot see directly.

4. **Crosshair:** The crosshair shows where you're aiming, as well as whether you've hit a target in a standard or weak point. As you fire your weapon, hit markers show up around the reticle in the form of orange or white Xs. An orange X means you've scored a hit on an enemy's weak point; a white X dictates a standard hit. A larger red X appears when you land a killing blow on an enemy. When moving or firing from the hip, accuracy decreases. When you aim down the sights, the crosshair initially shrinks before expanding from rapid fire. The expanded crosshair is a visual indicator of your lowered accuracy, but it shrinks back down when you're not firing. If you have a skill recharging, a small bar appears on the respective side (left, right, or center) of the crosshair, showing you the amount of time left before it disappears upon recharge completion.

5. Consumables**:** There are four different consumables in Multiplayer. Consumables can be gained from packs and are available for one-time use. The amount of each available consumable is attached to the corresponding icon.

    - **(D-Pad Up) Cobra RPG:** The Cobra RPG is a one-shot missile launcher, useful for taking out tight groups of enemies or hardened targets.
    - **(D-Pad Left) First Aid Pack:** Immediately restores full health and shields.
    - **(D-Pad Right) Ammo Pack:** Immediately refills the ammunition of all your weapons, including your current clip. Also refills your power cells and eliminates any recharges in progress.
    - **(D-Pad Down) Revive Pack:** Allows you to revive yourself from the man-down state, but not death.

6. **Current Weapon and Ammo:** Your current weapon appears here, along with the amount of ammunition in your clip (the top number to the right). The bottom number represents the ammo you have available to reload the weapon.

7. Health and Shields**:** The large arc in the bottom center of the screen between your gun and skills shows your current armor and shield values. Damage is first absorbed by the shield, which decays from right to left until it's destroyed. Further damage is applied to your health—when the health bar empties, you're put into a "man-down" state. After a short period during which you don't take damage, your shield regenerates to its full value.>

8. **Wave and Current Time:** Under your health and armor status, the current wave of your mission and total amount of time played are displayed.

9. **Skills:** Your three currently equipped skills appear to the right of the health and armor bars. Skills with recharge speeds change to a lighter color that slowly scrolls down while the skill is unavailable. Skills like mines and grenades feature a number indicating how many uses you have until you need to visit an ammo stockpile for reloads.

10. **Objective Wave Timer and Progress:** When playing an objective wave, the current objective, amount of time remaining, and the time to complete the objective are displayed.

MASS EFFECT ANDROMEDA

Multiplayer Basics

Character Selection

Select a character who best fits your play style. Multiplayer characters can use any weapon, weapon mod, boost, and equipment that is equipped, but their skills are all predetermined and must be leveled independently from those of all other characters.

Weapon levels apply to each weapon independently, and each one remains at that level regardless of the character you choose.

MASS EFFECT ANDROMEDA

Multiplayer Basics

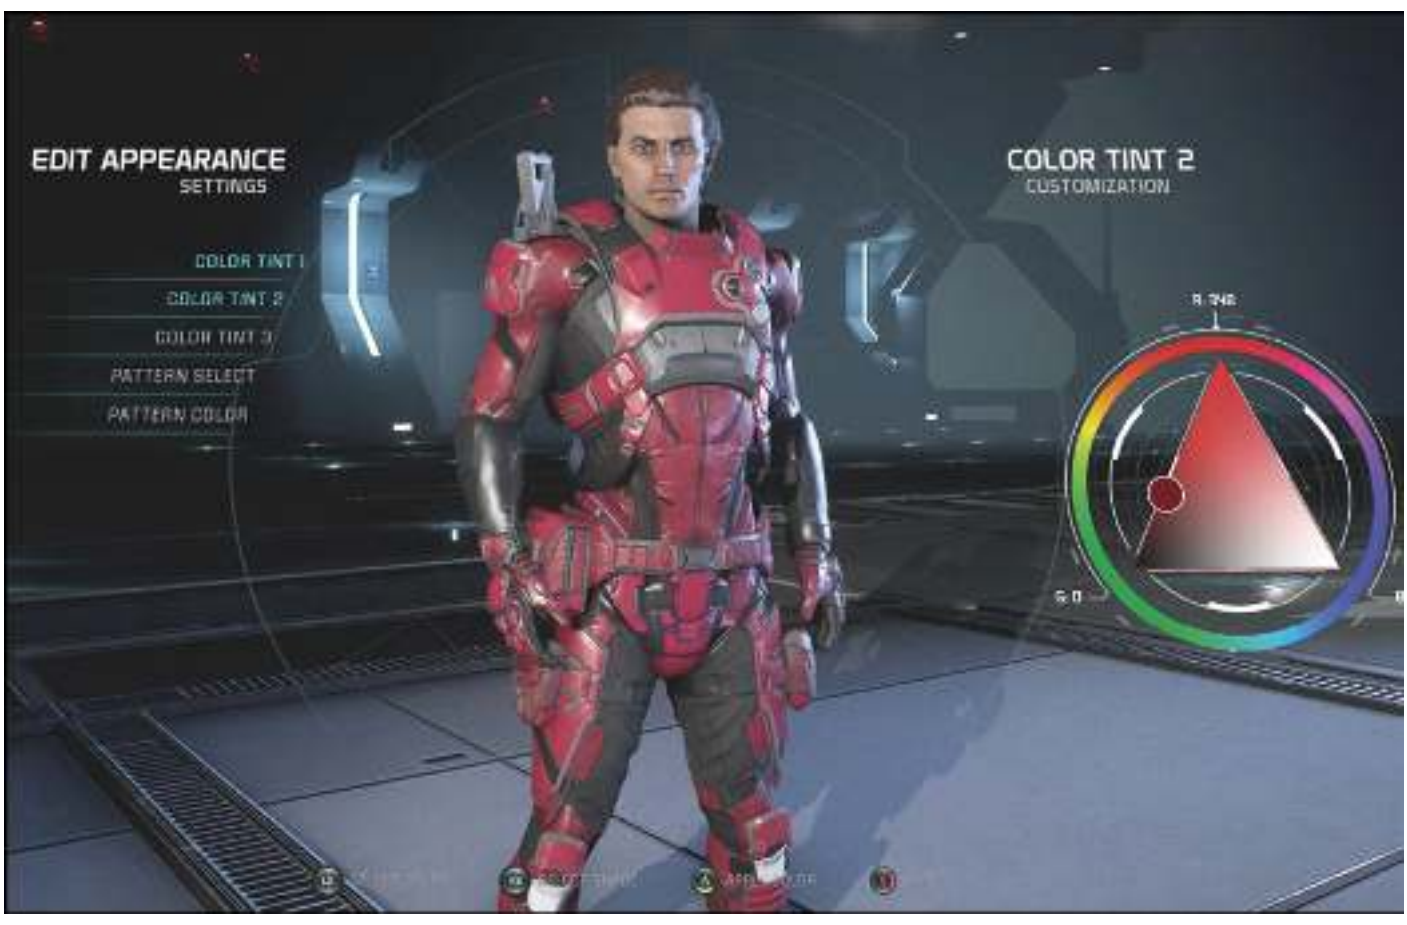
Leveling Your Character

Each character can be leveled up in two different ways.

RANKS

The first card you acquire for a character begins at Level 1. Character cards display the character's name, followed by a Roman numeral indicating its level. For example, a Level 5 Human Male Vanguard card appears as "Human Male Vanguard —V."

Each card level comes with a special bonus that grants the player additional cosmetic options, as well as a few bonus skill points. Cards can be leveled up 10 times.



RANK BONUSES

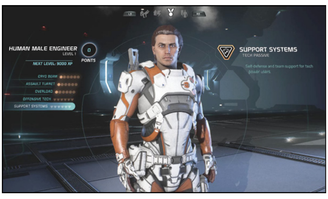
RANK	BONUS
1	+2 Tint Options
2	+1 Skill Point
3	+1 Tint
4	+1 Skill Point
5	+1 Stripe and Stripe Tint
6	+1 Skill Point
7	+1 Stripe and Stripe Tint
8	+1 Skill Point
9	+1 Pattern and Pattern Tint
10	+1 Skill Point, Lights and Lights Tint

CHARACTER EXPERIENCE LEVEL

When you use a character in a mission, any experience earned during that mission is applied to that specific character. Characters can reach a maximum of 20 in experience levels. While you gain no buffs directly from new levels, each time you level up, you gain an additional three skill points to use on power and skill upgrades. Even with a fully upgraded character card, you can't fully upgrade every skill tree to Level 20. This means you must plot out your character goals early in the game. If you find yourself not using too many of your powers during battle, try investing in passive skills. These benefit your character by providing different buffs that don't need to be activated and bonuses to things like damage, health, and shields. Using your powers often? Aim for the ends of the skill trees with your favorite skills. Rank 6 skills sometimes add new abilities, allowing you to prime or detonate enemies and increasing your overall combat effectiveness. Make it through all seven waves of a mission to be awarded the highest level of XP. To this end, do everything you can to survive and get a complete extraction with your team. During gameplay, increase the amount of XP earned by abusing enemy weak points to get kills and complete objectives. Additionally, you can earn badges. These are special rewards that grant XP based on your performance with different weapons and overall gameplay.

AMOUNT OF ACTIONS NEEDED			
NAME	BRONZE 250 XP	SILVER 500 XP	GOLD 1000 XP
Assault Rifle Kills	15	30	45
Assist Score	250	500	1000
Biotic **Kills**	15	30	45
Combat **Power Kills**	15	30	45
Extraction	Single Extraction	Partial Extraction	Full Extraction
Kills	20	40	60
Melee Kills	12	18	24
Objective Score	250	500	750
Pistol Kills	15	30	45
Revives	5	10	20
Shotgun Kills	15	30	45
Sniper Rifle Kills	15	30	45
Support Score	400	800	1200
Tech **Power Kills**	15	30	45
Weak Point Kills	10	20	30

Each Multiplayer character comes with a set of skills specific to that character and character type. Three active powers and two passive skills are pre-selected for each character.



Active Powers: These powers must be activated by the player and must recharge after each use. Some powers require only recharging before the player uses them again, while others require power cells that must be replenished from an ammo crate.

Passive Skills: These skills allow the player permanent buffs to things such as weapon damage, shield and health capacity, and modifiers for different powers. Skills require no resources for use and are always active while a character is in play. Investing in a character's skill tree gives an experienced player an edge against AI enemies.

Leveling your character or gaining additional cards allows you to invest in the skill tree for a particular character.

Each set of skills or powers breaks down into one of three skill groups.

Biotic: Control the battlefield! Biotics can push, pull, stop, and otherwise disable entire groups of enemies. These powers cannot only prime enemies, but leave them open to unimpeded attacks from you and your allies. Biotic powers also lend themselves to great area-of-effect damage, which is best for clearing out groups of weaker infantry-type enemies. Employ biotic powers often to make good use of their quick recharge speeds!

Biotic characters are best utilized while on the move. If you prefer a long-range role or excel at soaking damage, consider choosing a character with a different skill group.

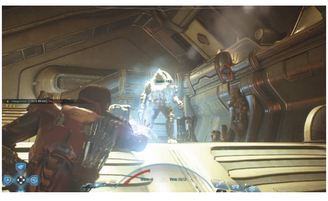
Shields and armor are a biotic character's worst nightmare. Enemies with shields are almost completely immune to the effects of biotic attacks, until the shield is broken.

Run your enemy's shield down before trying to push or pull them. Enemies with armor take damage but cannot be knocked down or thrown by biotic powers.

Combat: The combat skill group is great for dealing consistent, sustained damage, thanks to the available gun buffs that, for the most part, have no need to recharge beyond the time it takes to reload. Combat powers also increase player survivability, allowing you to stand up and take a few hits while you deal damage to your enemies.

Combat-based characters mostly deal physical damage, so you don't get help in the way of buffs against shields and armor unless you equip some special ammo.

Tech: Tech powers can strip down defenses, thanks to their ability to deal fire and electrical damage. In fact, tech powers deliver all types of damage, with the exception of damage to biotic powers.

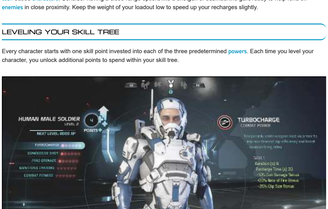


While there aren't too many skills in the tech tree that increase your survivability, the tech tree helps you put out support items. These support items, like the sentry turret, draw fire from enemies, allowing you to move freely and lure them out of cover.

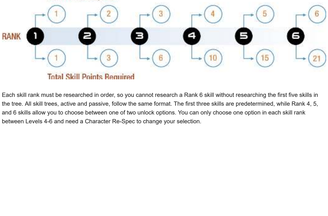
Long recharge times, low sustained damage, and the decreased ability to defeat enemies at close range are the downsides of tech-based characters. Consider having a close-range option, like a shotgun or submachine gun, ready to help fend off enemies in close proximity. Keep the weight of your loadout low to speed up your recharges slightly.

LEVELING YOUR SKILL TREE

Every character starts with one skill point invested into each of the three predetermined powers. Each time you level your character, you unlock additional points to spend within your skill tree.



For every rank of skill, the number of skill points required to unlock it differs.



Each skill rank must be researched in order, so you cannot research a Rank 6 skill without researching the first five skills in the tree. All skill trees, active and passive, follow the same format. The first three skills are predetermined, while Rank 4, 5, and 6 skills allow you to choose between one of two unlock options. You can only choose one option in each skill rank between Levels 4-6 and need a Character Re-Spec to change your selection.

MASS EFFECT ANDROMEDA

Multiplayer Basics

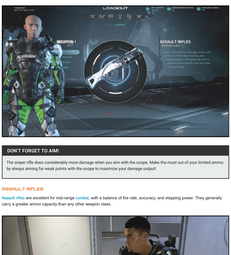
Character Customization

Once you've selected your character, it's time to customize!

WEAPONS

Choosing the right weapons to mesh with your play style and powers is key to surviving each wave in Multiplayer.

Each weapon bears a different amount of encumbrance that weighs down your character, affecting their ability to refresh powers. Biotic-based characters may find an advantage in equipping a single weapon or using lightweight weapons, like pistols and submachine guns, which lets them use their powers more frequently.

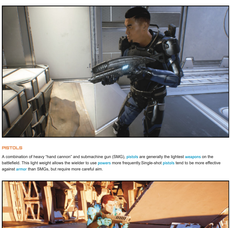


DON'T FORGET TO AIM!

The sniper rifle does considerably more damage when you aim with the scope. Make the most out of your limited ammo by always aiming for weak points until the scope to maximize your damage output!

ASSAULT RIFLES

Assault rifles are excellent for mid-range combat, with a balance of fire rate, accuracy, and stopping power. They generally carry a greater ammo capacity than any other weapon class.

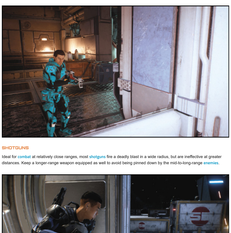


PISTOLS

A combination of heavy "hand cannon" and submachine gun (SMG), pistols are generally the lightest weapons on the battlefield. This light weight allows the wielder to use powers more frequently.Single-shot pistols tend to be more effective against armor than SMGs, but require more careful aim.

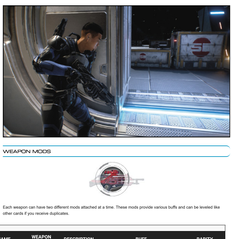
SNIPER RIFLES

Designed for long-range engagements, sniper rifles are, on average, the hardest-hitting and most precise weapons available. The sniper rifle's power comes at the cost of ammo capacity and reload rate.Sniper rifles often excel against armored foes.



SHOTGUNS

Ideal for combat at relatively close ranges, most shotguns fire a deadly blast in a wide radius, but are ineffective at greater distances. Keep a longer-range weapon equipped as well to avoid being pinned down by the mid-to-long-range enemies.



WEAPON MODS

Each weapon can have two different mods attached at a time. These mods provide various buffs and can be leveled like other cards if you receive duplicates.

NAME	WEAPON CLASS	DESCRIPTION	BUFF	RARITY
AR Stock	Assault Rifle	Distributes recoil with sliding system of counterweights compatible with Elaaris Assault Rifle stocks. Reduces weapon kickback.	Assault Rifle Stability	Common
AR Barrel	Assault Rifle	Enhances a weapon's barrel, creating greater projectile velocity and impact.	Assault Rifle Damage	Rare
AR Heavy Magazine	Assault Rifle	Increases magazine capacity, allowing more shots before reloading.	Assault Rifle Clip Size	Uncommon
AR Receiver	Assault Rifle	Capacitor boosts kinetic coil generators, increasing shot penetration through solid objects.	Assault Rifle Penetration Damage/Sniper Rifle Penetration Distance (m)	Uncommon
AR Scope	Assault Rifle	Simple optical scope enhances stability while zoomed. Also increases accuracy while character is moving.	Assault Rifle Accuracy	Common
Pistol Barrel	Pistol	Enhances a weapon's barrel, creating greater projectile velocity and impact.	Pistol Damage	Rare
Pistol Magazine	Pistol	Increases magazine capacity, allowing more shots before reloading.	Pistol Clip Size	Uncommon
Pistol Melee Optimizer	Pistol	Integrated VI improves synergy between melee weapon and Kwarm computer systems. Reduces weapon kickback.	Melee Damage	Common
Pistol Receiver	Pistol	Capacitor boosts kinetic coil generators, increasing shot penetration through solid objects.	Pistol Penetration Damage/Sniper Rifle Penetration Distance (m)	Uncommon
Pistol Scope	Pistol	Simple optical scope enhances stability while zoomed. Also increases accuracy while character is moving.	Pistol Accuracy	Common
SR Barrel	Sniper Rifle	Enhances a weapon's barrel, creating greater projectile velocity and impact.	Sniper Rifle Damage	Rare
SR Receiver	Sniper Rifle	Capacitor boosts kinetic coil generators, increasing shot penetration through solid objects.	Sniper Rifle Penetration Damage/Sniper Rifle Penetration Distance (m)	Uncommon
SR Scope	Sniper Rifle	Simple optical scope enhances stability while zoomed. Also increases accuracy while character is moving.	Sniper Rifle Accuracy	Common
SR Spare Thermal Clip	Sniper Rifle	Adds sockets to increase thermal clip capacity, increasing number of spare shots	Sniper Rifle Spare Ammo	Uncommon
SR Ultra-Light Materials	Sniper Rifle	Superior lightweight alloys replace weapon parts, making the weapon less obtrusive and easier to handle.	Sniper Rifle Weight	Common
Shotgun Barrel	Shotgun	Enhances a weapon's barrel, creating greater projectile velocity and impact.	Shotgun Damage	Rare
Shotgun Melee Optimizer	Shotgun	Integrated VI improves synergy between melee weapon and Kwarm computer systems, allowing increased melee damage.	Melee Damage	Common
Shotgun Receiver	Shotgun	Capacitor boosts kinetic coil generators, increasing shot penetration through solid objects.	Shotgun Penetration Damage/Sniper Rifle Penetration Distance (m)	Uncommon
Shotgun Spare Clip	Shotgun	Adjustable servo motors tighten or loosen spread for maximum accuracy	Shotgun Spread Reduction	Common
Shotgun Spare Clip	Shotgun	Adds sockets to increase thermal clip capacity, increasing number of spare shots	Shotgun Spare Ammo	Uncommon

EQUIPMENT

Equipment can be purchased from the store with mission funds. Only one piece of equipment can be used at a time. Each piece of equipment can be used by any character and provides a specific buff like shield regeneration or a biotic damage bonus. Equipment does not level like other items and cannot be acquired from packs.

CONSUMABLES

Consumables are one-time-use objects that can quickly turn the tides of battle in Multiplayer. Consumables are awarded from ref packs and can quickly be replenished by purchasing resupply packs. There are four different consumables, each with its own special abilities.

Ammo Pack: Instantly reloads all weapons and fills all reserves with thermal clips and power cells. Use this when you're almost out of ammo and at the end of your clip to save yourself the reload time!

Cobra RPG: An explosive projectile launched from an omni-tool that deals massive damage. Use this against heavily armored enemies and bosses to take them down quickly and save ammo. The Cobra RPG can also be used to quickly clear out groups of enemies if you find yourself surrounded.

First Aid Pack: Instantly and fully restores health and shield strength with a mix of medicine and machinery. Having a few of these on hand can save your life if you find yourself retreating from a swarm of enemies. For maximum efficiency, use the First Aid Pack just before you die—that way you get the full amount of health and shields possible!

Revive Pack: An emergency dose of medi-gel to revive you when you're down and out. The Revive Pack instantly picks you up from the downed state, allowing you to get back in the fight without the help of your teammates. This pack only revives you from the downed state, not from the Spectator screen, so decide quickly if you want to use it, or you might be too late!

MASS EFFECT ANDROMEDA

Multiplayer Basics

Enemy Groups

You face three different enemy groups in *Mass Effect: Andromeda*'s Multiplayer missions. Each species has its own set of strengths and weaknesses. If you know what species you'll be fighting against ahead of time, equipping the right weapons and picking the right characters makes the fight much easier. For full breakdowns of each enemy and its specific weaknesses, check out the Multiplayer Enemies chapter.

OUTLAW LEGION

The Outlaws are resourceful and gritty. They're not an organized military force, nor do they have the best gear, but their greed and desperation make them merciless. Unlike other enemy groups, the Outlaws are made up of multiple species: humans, turians, angara, salarians, asari, and krogan.

STRONG VS:

As is the case with other biological enemies, electric-based attacks are weak against the Outlaws. Long-range Sharpshooter units can knock you out of cover, forcing you to stand up and take damage from the oncoming wave of enemies. Make sure to have a few long-range weapons to quickly take out the Sharpshooter units.

WEAK VS:

Fire-based attacks are strong against the Outlaws. Most of them favor armor over shields, making them perfect targets for fire-based attacks.

REMNANT

"Remnant" is the umbrella term for the technological remains of an advanced species that abandoned the Heleus Cluster about 600 years before the events of *Mass Effect: Andromeda*. Remnant sentry bots, ranging from small Observers to gigantic Behemoths, keep vigil over devices capable of altering entire planets, maintaining and zealously defending their creators' work.

STRONG VS:

Fire-based attacks are a poor choice of tactic when facing the Remnant. Save your incendiary ammunition for biological-based enemies. The Remnant Assembler can construct Breachers—additional enemies that don't count against the enemy wave cap—to flush you out of cover. With the Assemblers' ability to each create at least one Breacher, a single player can quickly be overrun.

WEAK VS:

Electricity-based attacks are a must when facing the Remnant. Not only do electricity attacks quickly tear down their shields, but Remnant take bonus damage as a consequence of their synthetic makeup.

KETT

Many different species have been absorbed and genetically engineered to compose the kett. As a result, the kett have acquired and shared amongst themselves the powers gained from these various species.

STRONG VS:

Biological and heavily armored, the kett are resistant to electricity-based attacks.

WEAK VS:

Kett have the standard fire-based weakness, but they tend to attack from close range, compared to their enemies. Keep a shotgun or other close-range weapon on hand to combat them as they advance on you.

MASS EFFECT ANDROMEDA

Multiplayer Basics
Combat

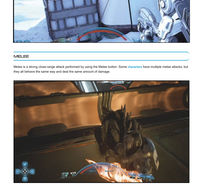
This section briefs you on the knowledge you need to defeat the seven waves of enemies coming your way.

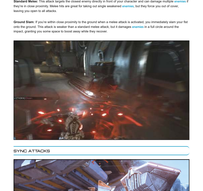
SENSITIVITY

Nonetheless determine how quickly the crosshair moves in the direction you push the analog stick or mouse. You can change your sensitivity in the options/controller menus. Adjusting the vertical sensitivity increases/decreases your up-and-down look speed, and adjusting the horizontal sensitivity affects your left-to-right look speed. Experiment with these settings, allowing you to acquire your targets and turn around quickly. Due to the PvE (player vs. environment) nature of the game, having the fastest turn speed is not as important as the ability to accurately aim at and kill enemies. It's good to turn up your sensitivity a bit from the default settings, but not so much that you overshoot your targets. Practice makes perfect in this area. Once you are accustomed to your sensitivity setting, consider turning it up another few notches and see if it excites you or aids!

CHOOSING THE CORRECT SHOULDER

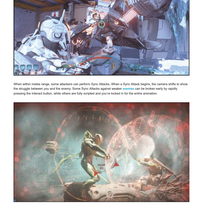
When locating cameras and fighting in general, always have the crosshair over the shoulder opposite the wall or cover points. This method allows you to easily see around corners before revealing yourself, and gives you the best look at the majority of the spaces in front of you. Having your cameras on the correct shoulder is even situation could mean the difference between life and death.



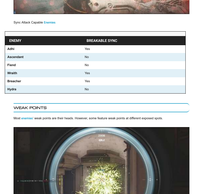


MELEE

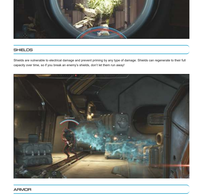
Melee is a strong close-range attack performed by using the Melee button. Some characters have multiple melee attacks, but they all behave the same way and deal the same amount of damage.



Standard Melee: This attack targets the closest enemy directly in front of your character and can damage multiple enemies if they're standing close together. This attack is a great for taking out single weakened enemies, but they force you out of cover, leaving you open to all attacks.



Ground Slam: If you're within close proximity to the ground when a melee attack is activated, you immediately slam your fist into the ground. This attack is weaker than a standard melee attack, but it damages enemies in a full circle around the impact, granting you some space to travel away while they recover.



SYNC ATTACKS

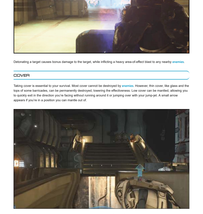
When within melee range, sync attackers can perform Sync Attacks. When a Sync Attack begins, the camera shifts to show the attacker and the enemy being attacked. Sync Attacks are performed by pressing the Melee button. Some can be rapidly pressing the Interact button. while others are fully scripted and you're locked in for the entire animation.

Sync Attack Capable Enemies

ENEMY	BREAKABLE SYNC
Adhi	Yes
Ascendant	No
Flood	No
Wraith	Yes
Breacher	Yes
Hydra	No

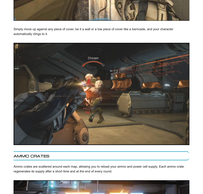
WEAK POINTS

Most enemies' weak points are their heads. However, some feature weak points at different exposed spots.



SHIELDS

Shields are vulnerable to electrical damage and prevent priming by any type of damage. Shields can regenerate to their full capacity over time, so if you break an enemy's shields, don't let them on cover!



ARMOR

Armored enemies feature yellow health bars. They can be primed and stunned, but cannot be knocked down or thrown back. Incendiary rounds and fire-based abilities work great against armored enemies.

PRIMING

Enemies can be primed by fire, ice, electricity, and some tactic powers. In most cases, priming does not happen instantly and requires sustained fire from your power of choice. For example, the Cryo Beam needs to remain fixed on a target for a short amount of time to fully freeze it, leaving it vulnerable to detonation. Use your priming skills before any detonation skills so you don't miss out on the bonus damage from detonations.

DETONATING

Primed targets can be detonated using any skill that creates detonation. Some players with a priming skill will also have a detonation skill. Work with may need to be coordinated with them to make sure you're not the one who activates the detonation before the small detonation burst next to the main and loss or the opposite true that adds the feature to your ability.

Detonating a target causes bonus damage to the target, while inflicting a heavy area-of-effect blast to any nearby enemies.

COVER

Taking cover is essential to your survival. Most cover cannot be destroyed by enemies. However, thin cover, like glass and the type of some barricades, can be permanently destroyed, lowering the effectiveness. Low cover can be mantled, allowing you to quickly exit in the direction you're facing without running around it or jumping over with your jump pack. A small arrow appears if you're in a position you can mantle out of.

Simply move up against any piece of cover. Go it at well at one piece of cover like a barricade, and your character automatically stings to it.

AMMO CRATES

Ammo crates are scattered around each map, allowing you to reload your ammo and power cell supply. Each ammo crate regenerates its supply after a short time and at the end of every round.

Weapon ammo and power cells are treated separately in an ammo crate. This means you can refill your ammo completely, using the ammo ammo supply while leaving power cells in the crate.

Resupply of your weapon ammo and power cells happens instantly and automatically. Simply move within close proximity of the crate.

RESTOCK OPTIM

Restock as often as you can. Ammo crates regenerate over time. It's always better to have a surplus of ammo than to worry about making it to an ammo crate when you're out of ammo!

The ammo crate supply is tied to each player independently, so picking up ammo doesn't take any away from your team.

JUMP JET

Your jump jet is your key to not only dodging and quickly escaping enemies, but gaining access to some of the best strategic positions on the maps.

The jump jet has two uses:

Jump and Hover: Pressing and holding the jump button causes you to jump the maximum height possible with the assistance of your jump jet. To hover for a limited time, hold the Jump button while airborne.

Multiplayer Basics

Strike Teams

Why do the work when you don’t have to? Command strike teams to go out on missions, which, upon completion, award you with mission funds. Some strike team missions can be completed with a team of players, allowing you to take the fate of the mission into your hands. A small orange symbol marks any mission that can be completed by the player. These missions can also be played by any of your teams. Each mission features the same three difficulty levels as standard missions. Strike teams level up as they perform missions, and can also be upgraded from the equipment menu to increase their chances at success. You can purchase more strike teams to have multiple missions in progress at once. All strike team-related purchases require mission funds, so the only way to upgrade strike teams is to complete more strikes!

MASS EFFECT ANDROMEDA

Multiplayer Basics

Waves and Objectives

Each Multiplayer game is broken down into seven waves that follow the same format. Waves 1, 2, 4, and 5 are survival waves. Waves 3 and 6 are each one of four possible objective waves, and the seventh and last wave is the extraction wave.

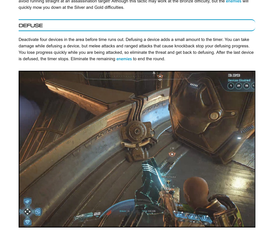
Strike team missions and other special missions contain different wave counts, modifiers, and wave structures. This stays consistent to the mission but doesn't match the standard Multiplayer format.

Objective waves award bonuses, depending on the speed of completion. These rewards are displayed with a three-star system on the screen: one star for bronze, two stars for silver, and three stars for gold, each with increasing XP bonuses.

Survival waves are completed by killing all enemies in the wave—each level increases the amount of enemies. Once you've killed all the enemies, the next wave begins.

ASSASSINATION

Eliminate four specific sequential enemies. Only one target is visible at a time. Once the fourth target has been eliminated, kill the remaining enemies to finish the round. Each kill adds time to the timer.



EXPANDED STRATEGY

Spotting up into teams of two is a great way to take down assassination targets. Try to sit at opposite corners of the map; this makes it a lot harder for the enemies to flank you. Also, if you're playing with a team that has a Vanguard, Sniper class, they are incredibly useful for taking down targets. The target can be any unit that spawns into the map with the exception of the larger units like Hydra, Fiend, and Destroyer.

The assassination target does not receive any bonuses or abilities, so standard tactics and weak points can be used. Also, assist cunning straight at an assassination target! Although this tactic may work at the Bronze difficulty, but the enemies will quickly move you down at the Silver and Gold difficulties.

DEFUSE

Deactivate four devices in the area before time runs out. Defusing a device adds a small amount to the timer. You can take damage while defusing a device, but melee attacks and ranged attacks that cause knockback stop your defusing progress. This now progress quickly when you are being attacked, so eliminate the threat and get back to defusing. After the last device is defused, the timer stops. Eliminate the remaining enemies to end the round.

EXPANDED STRATEGY

Only one device appears on the map at a time, so focus on either defusing the objective or defending the teammate who is defusing it. These objectives can spawn at more than four places on each map in a random order, thus making it very difficult to predict their points. Note that the objective will NOT spawn at a point where it has previously spawned.

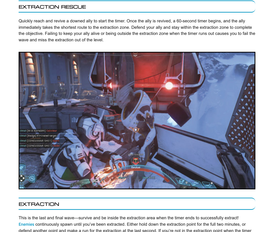
Let the teammate with the most health complete the objective as long as he/she doesn't get hit by an attack that causes knockback. If this teammate can avoid taking a big hit, he/she will likely defuse the objective for the team.

FORTIFY

Fortify is a great skill to use if when defusing the objective, since you won't have to move while defusing!

HACK

Hold down a specific area to complete the hack before the timer runs out—more players in the area increases the speed of the hack. Unlike Upload, only one area must be secured, and enemies entering the circle don't stop the progress. After you've completed the hack, tell the remaining enemies to move on to the next wave.



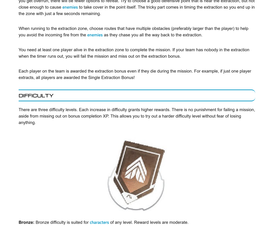
EXPANDED STRATEGY

Keeping your squad inside the objective circle is the fastest way to capture the circle, but this also causes all enemies to focus directly on the area. This results in all enemy units will attempt to interfere with the hack. If just a single enemy enters the circle, the hack will pause until the threat is removed. Position a couple of players sit in an area near the circle to pull some of the pressure from the main circle. This will help to prevent the enemy from entering the hack zone.

Large enemies should be easy to take down with a full crew, but a single player can choose to ball a large enemy away from the objective. By doing so, it will enable the rest of the team to take the objective with much less pressure, leaving the enemy to attack from a ranged position after the hack is complete.

UPLOAD

Hold three specific areas to complete the upload before the five-minute timer runs out. Enemies entering the area pause upload progress, and if a player abandons the circle, any progress slowly disappears. Once you've completed an upload, that area remains completed until the end of the round. No bonus time is awarded for completing an upload, so you must complete all uploads within the time provided. Each point takes 40 seconds to fully upload without any enemy interaction.



EXPANDED STRATEGY

When the objectives appear on the map, quickly look for any two objectives that are close to each other or share a sight line. This will allow you to split into teams of two and quickly capture two objectives with the full firepower of your team supporting each objective. After taking both objectives, move to the third and last objective and take over.

If you spot a single objective far away from the other objectives, you can scout over there. If you attempt this task alone, the majority of the enemies will likely focus on your teammates at the other objectives. This should provide enough time to take a single objective without too much of a fight.

Since objectives do not instantly lose progress, don't be afraid to temporarily step off the objective to give your teammates an edge in the fight against the enemy waves. Being proactive and taking them out before you get overrun will pay off in the long run and could make the difference between completing the objective or dying a quick death.

EXTRACTION RESCUE

Quickly reach and revive a downed ally to start the timer. Once the ally is revived, a 60-second timer begins, and the ally immediately takes the shortest route to the extraction zone. Defend your ally and stay within the extraction zone to complete the objective. Failing to keep your ally alive or being outside the extraction zone when the timer runs out causes you to fail the wave and miss the extraction out of the level.

EXTRACTION

This is the last and final wave—survive and be inside the extraction area when the timer ends to successfully extract! Enemies continuously spawn until you've been extracted. Either hold down the extraction point for the full two minutes, or defend another point and make a run for the extraction at the last second. If you're not in the extraction point when the timer runs out, you won't be extracted, and your team misses out on the full extraction bonus.

EXPANDED STRATEGY

The extraction zone is generally NOT the best place to defend, as they tend to be at the edge of a map. So if for some reason you get overrun, there will be fewer options to retreat. Try to choose a good defensive point that is near the extraction, but not close enough to cause enemies to take cover in the point itself. The tricky part comes in timing the extraction so you end up in the zone with just a few seconds remaining.

When running to the extraction zone, choose routes that have multiple obstacles (preferably larger than the player) to help you avoid the incoming fire from the enemies as they chase you all the way back to the extraction.

You need at least one player alive in the extraction zone to complete the mission. If your team has nobody in the extraction when the timer runs out, you will fail the mission and miss out on the extraction bonus.

Each player on the team is awarded the extraction bonus even if they die during the mission. For example, if just one player extracts, all players are awarded the Single Extraction Bonus!

DIFFICULTY

There are three difficulty levels. Each increase in difficulty grants higher rewards. There is no punishment for failing a mission, aside from missing out on bonus completion XP. This allows you to try out a harder difficulty level without fear of losing anything.

Bronze: Bronze difficulty is suited for characters of any level. Reward levels are moderate.

Silver: Silver is suited for medium-level characters. Reward levels are increased.

Gold: Gold difficulty is suited for high-level characters. Reward levels are maximized.

You gain XP faster by completing entire missions at the highest difficulty you can handle, so if you aren't ready for increased difficulty, back off and play a few more rounds at a lower difficulty to level up your character. Boosters help you get through harder difficulty levels earlier, allowing you to buff your weapon and power damage as well as your shield strength.

MASS EFFECT ANDROMEDA

Multiplayer Basics

Store

The store is your hub for unlocking weapons, weapon mods, consumables, characters, equipment, and boosters. Open packs to receive randomly awarded items, or buy equipment from the Item Store.

CURRENCY

There are three types of currency in *Mass Effect: Andromeda* Multiplayer.

MP Credits: These are earned when you complete challenges and missions. You receive more credits for performing well on a mission.

Andromeda Points: This is the premium currency that can be purchased with real money and exchanged for advanced or higher packs. Note that anything available for purchase with Andromeda points can also be purchased with an alternate form of game currency.

Mission Funds: Strike team missions completed by a group of players award mission funds that can be used to upgrade and unlock additional strike teams. Mission funds can also be used in the Item Store to purchase equipment.

CARD PACKS

Cards for weapons, characters, consumables, boosters, and weapon mods are all acquired from packs. Six types of purchasable packs provide different chances of containing rarer cards, some guaranteeing at least one card of a certain rarity. All packs can be purchased with currency earned during gameplay, and some packs allow purchase through the use of Andromeda points, which can be bought with real money.

Supply Pack: Includes the Cobra RPG, First Aid Pack, Ammo Pack, and Revive Pack, as well as a random booster.

Basic Pack: Includes five random items or characters, with a small chance for an uncommon class.

Advanced Pack: Includes five random items or characters, with at least one uncommon class and a small chance for a rare class.

Expert Pack: Includes five random items or characters, with at least one rare class and a small chance for an ultra-rare class.

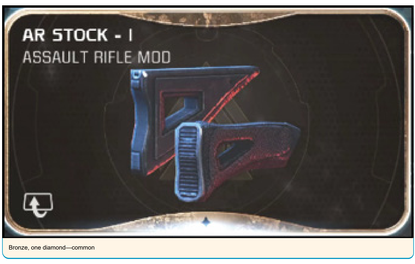
Premium Pack: Includes five random items or characters, with at least two rare classes and a greater chance for at least one ultra-rare class.

Free Reward Packs: Some are granted after finishing challenges.

CARD RARITY

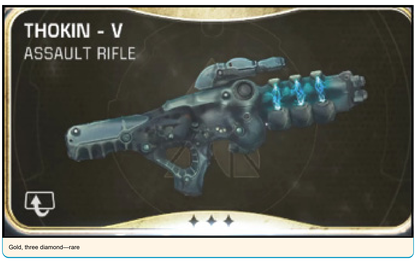
Each item acquired from card packs, with the exception of consumables, has a specific rarity rating that determines the likelihood of acquiring the card. Cards use a system of colors and diamonds. Each card displays a color and diamond count associated with the rarity. Booster rarity is determined by number and coin color.

Blue, no diamond—consumables and boosters



Bronze, one diamond—common

Silver, two diamonds—uncommon



Gold, three diamond—rare

N7 (white with red stripe), four diamonds—ultra-rare

ITEM STORE

Looking to up your game with some equipment? The Item Store is the place for you! The Item Store is the only place where you can get equipment. Each piece of equipment switches every week.

Mission funds, acquired from playing strike team missions, are the only currency accepted here. Save up to buy a piece of equipment suited for your play style. For example, if you prefer biotic powers, save up for the Adaptive War Amp, which increases damage dealt by biotic powers.

Consumables can be purchased one at a time in the Item Store, although it's recommended that you buy consumable packs to conserve your mission funds.

You can also purchase a Character Re-Spec in the Item Store, which allows you to reset your skill purchases for a specific character. You can then refocus their combat powers and skills in different ways.

REWARDS

Reward packs earned from completing challenges are available in the Rewards tab.

Multiplayer Characters

Overview

Each character in *Mass Effect: Andromeda* Multiplayer features different skills, looks, and motives for fighting. The human variants of the Engineer, Adept, Infiltrator, Sentinel, Soldier, and Vanguard are unlocked at the beginning of the game. All other characters must be drawn from packs.

Each character has two level types:

XP Level: A character's XP level can only be raised by playing as that character while performing missions. Leveling XP is the best and most reliable way to gain skill points that, in turn, level up your character's powers and skills.

Card Level: Upon receiving a character card for the first time, that character is unlocked as Rank I (1). This information is displayed as a Roman numeral I following the character name.

Each duplicate card received upgrades your character to a max of Level X (10). With every level comes a reward.

Character Card Level Bonus

BUILDING AN APEX TEAM

Building a great APEX team requires diversity. This means you don't want all players to have the same damage types, play styles, or roles when setting up a match.

These groups are broken down by their main damage type, which determines the general play style of that character.

BIOTIC CHARACTERS

Biotic characters are strong against single, unshielded, and unarmored enemies. They rely on quickly traversing the map from cover to cover, while using the environment and their biotic powers to kill and slow enemies.

Most biotic powers have a short range, meaning you need to keep yourself within a reasonable distance of your enemies to make the most of them.

Constantly moving around the map wreaks havoc on the enemy, forcing them to spawn alone in different sections and taking focus away from any teammates holding out in a safe position.

This play style sets you up perfectly for completing different objectives. Use your powers and movement to tie up enemies. Gain enough distance from them to grant you time to quickly complete or start an objective while the rest of your team moves into position to assist.

Biotic characters rely more on their powers than weapons, so equipping just one weapon cuts down on your encumbrance and increases the speed at which your powers recharge. All biotic powers only have recharge speeds—no need to visit an ammo crate unless you run out of ammo for your weapons!

COMBAT CHARACTERS

Combat characters focus on dealing out damage with their weapons and powers. They can also *take* a fair amount of damage! Combat characters are the easiest to play because of their survivability and weapon damage bonuses gained from their passive abilities. Focus on using weapons, leaving powers like the grenade for groups of enemies or a heavy enemy who threatens your position. Use an incendiary booster to make short work of armored enemies.

A combat player doesn't initially focus on priming and detonating. Your main goal is dealing out constant damage to enemies as they appear. Combat characters should carry a mid-range weapon, like an assault rifle, and then choose either a sniper rifle for long-range encounters or a shotgun for holding down a room or engaging in a more "in your face" approach.

Take advantage of your enemy's weak points. Landing hits on weak points deals out more damage per hit, which means fewer attacks and time spent on a kill. This allows you to stay in cover for as long as possible and leaves you with (hopefully) enough ammo to last until the safety of the round intermission.

When holding down a strategic position with a group, place yourself on the front line; your passive abilities let you take more damage than your teammates, assuming they're from other skill focus groups.

TECH CHARACTERS

Tech characters are a little fragile compared to other classes, featuring less armor and shields than their counterparts. They make up for this weakness with their ability to stun, prime, and detonate numerous enemies.

Some tech characters can use support equipment, like the assault turret, which draws enemy fire away from your group and allows you to attack an enemy's flank more easily. This is an excellent tactic to use against enemies like the Hydra, which features a weak point on its back. Enemies aren't drawn to support equipment once you begin to deal higher amounts of damage, so deal your damage in bursts, allowing them to return their attention to the support equipment before they close in on you!

Remember that an enemy with a shield cannot be primed until the shield is completely depleted.

The core responsibilities of a tech player include keeping enemies primed and performing combo detonations when possible. These tasks place tech characters in more of a support role. While a tech player may not be able to withstand damage like a standard combat player, the tech passives can increase the recharge rate of your shield and health after a period of taking no damage. This allows for quick regeneration between bursts of evasion.

The quick regenerations come in handy when priming enemies with a skill like the Cryo Beam. When using the beam, you're left open to attack, which can rapidly drain your shield. After detonating your primed target, there should be enough of a break in combat for you to completely regenerate your shields and begin regaining health.

Multiplayer Characters

Asari Multiplayer Characters

ASARI ADEPT

Rarity: Uncommon

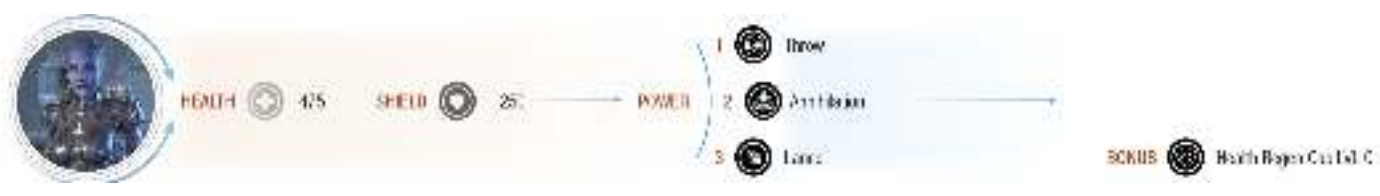
Species: Asari

Type: Biotic

A mighty biotic who compensates for light armor with crowd-control attacks and widespread damage.

An Alliance veteran, the Asari Adept has seen combat before and looks out for the younger members of the team. She enjoys crowd control and the sense of satisfaction when the team works well together.

ASARI ADEPT I



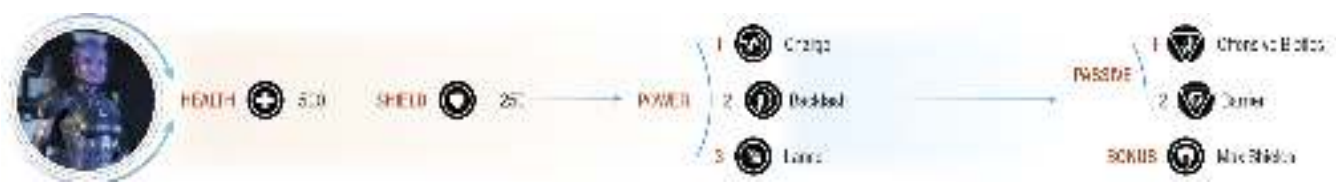
Rarity: Uncommon

Species: Asari

Type: Biotic

A mighty biotic who compensates for light armor with crowd-control attacks and widespread damage.

ASARI DUELIST



Rarity: Ultra-Rare

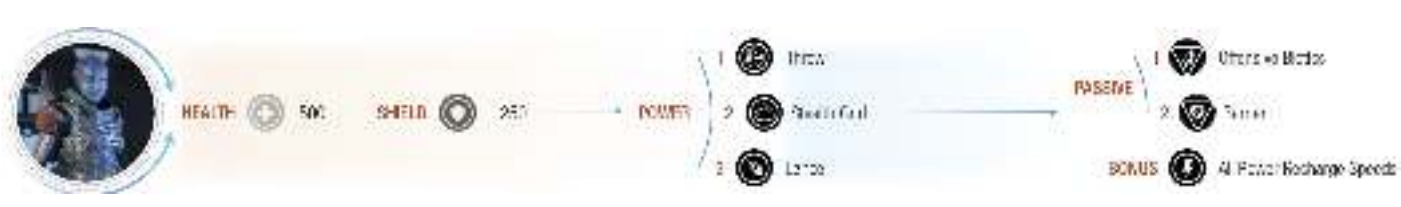
Species: Asari

Type: Biotic

Biotic warrior with a sword, high mobility, and both damage and defense powers.

The Asari Duelist is a former justicar. She keeps her distance from the other team members and harbors doubts about whether she made the right choice in coming to a new galaxy.

ASARI HUNTRESS



Rarity: Rare

Species: Asari

Type: Biotic

Mobile fighter with biotic powers who can cloak allies.

In the Milky Way, the Asari Huntress was a well-regarded bounty hunter until she took the wrong job and found herself on the most-wanted list. She joined the Andromeda Initiative to escape her enemies and begin the hunt anew.

ASARI HUNTRESS I

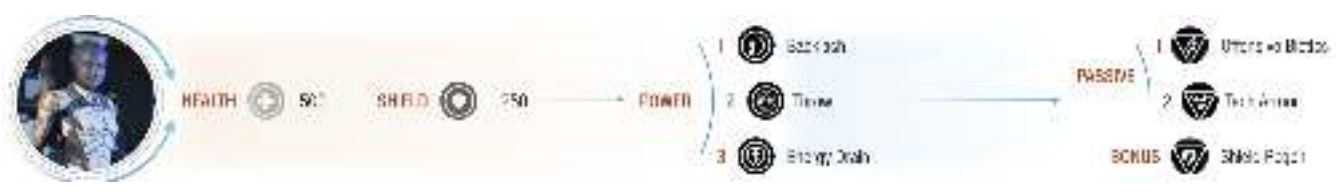
Rarity: Rare

Species: Asari

Type: Biotic

Mobile fighter with biotic powers who can cloak allies.

ASARI SENTINEL



Rarity: Uncommon

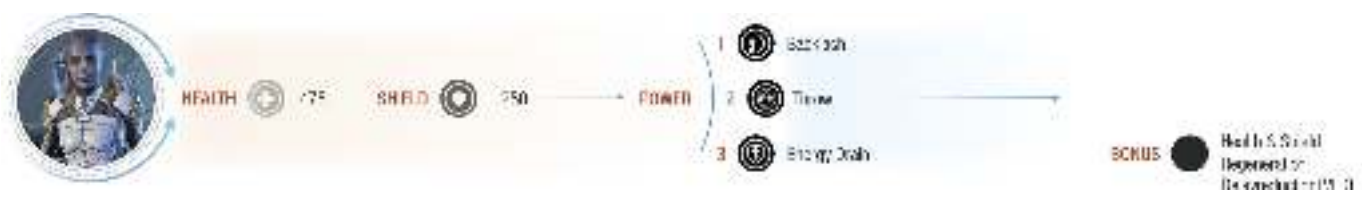
Species: Asari

Type: Biotic

Tactical defense expert with tech armor and a versatile power set.

A former asari commando, the Asari Sentinel joined APEX to escape some of the less pleasant things she experienced while serving in her commando unit.

ASARI SENTINEL I



Rarity: Uncommon

Species: Asari

Type: Biotic

Tactical defense expert with sturdy tech armor and a versatile power set.

HUMAN FEMALE ADEPT

Rarity: Common

Species: Human

Type: Tech

A powerful biotic with light armor who uses powers to control crowds and cause widespread damage.

The Human Adept doesn't much care about the romance of settling a new galaxy. What she sees here is a power vacuum—and she's down and going to fill it.

HUMAN FEMALE ADEPT I

Rarity: Common

Species: Human

Type: Tech

A powerful biotic with light armor who uses powers to control crowds and cause widespread damage.

HUMAN FEMALE ENGINEER

Rarity: Common

Species: Human

Type: Tech

Clever tech expert who distracts, limits, and locks down opponents on the battlefield.

HUMAN FEMALE ENGINEER I

Rarity: Common

Species: Human

Type: Tech

Clever tech expert who distracts, limits, and locks down opponents on the battlefield.

HUMAN FEMALE INFILTRATOR

Rarity: Common

Species: Human

Type: Tech

Stealth expert who moves unnoticed around the battlefield with tech powers, then picks off enemies with well-placed shots.

Elite training her husband and child in a trained military back in the Milky Way, the Human Infiltrator came to Andromeda for a fresh start. She proves APEX is to some good and to work through some anger and sadness.

HUMAN FEMALE INFILTRATOR I

Rarity: Common

Species: Human

Type: Tech

Stealth expert who moves unnoticed around the battlefield with tech powers, then picks off enemies with well-placed shots.

HUMAN FEMALE SENTINEL

Rarity: Common

Species: Human

Type: Combat

Tactical defense expert with sturdy tech armor and a versatile power set.

Excited to seek adventure, this is the Human Sentinel's first time tasting her combat skills in a real-life situation. She's very skilled, and what she lacks in experience, she makes up for in enthusiasm.

HUMAN FEMALE SENTINEL I

Rarity: Common

Species: Human

Type: Combat

The Human Sentinel worked private security in the Systems Alliance, but left to find adventure in Andromeda. She likes getting to know her new APEX colleagues, and they seem to get the job done well.

HUMAN FEMALE SOLDIER

Rarity: Common

Species: Human

Type: Combat

Weapons expert with heavy armor and a gun for all occasions. Effective at any range.

The Human Soldier worked private security in the Systems Alliance, but left to find adventure in Andromeda. She likes getting to know her new APEX colleagues, and they seem to get the job done well.

HUMAN FEMALE SOLDIER II

Rarity: Common

Species: Human

Type: Combat

Weapons expert with heavy armor and a gun for all occasions. Effective at any range.

HUMAN FEMALE VANGUARD

Rarity: Common

Species: Human

Type: Biotic

Biotic character who can move to enemies in the blink of an eye, then deal point-blank damage.

Human Vanguard was a respected leader within the Alliance military. As Andromeda Initiative recruited her to organize and establish security organizations in Andromeda, APEX is more than the "segue to eventual retirement" she'd anticipated, but she's good at her job and determined to be the best.

HUMAN FEMALE VANGUARD I

Rarity: Common

Species: Human

Type: Biotic

Biotic character that can travel to enemies in the blink of an eye, then deal point-blank range.

HUMAN KINETICIST

Rarity: Ultra-Rare

Species: Human

Type: Biotic

A biotic warrior who deals serious damage with telekinesis and the ability to enter a powered-up state, but has weak defenses.

A scientist through and through, the Human Kinetician can't wait to test her theories on real-life warriors and gets a lot annoyed if something disrupts her experiments. Yes, fine, less than scientious—but the sentence!

HUMAN MALE ADEPT

Rarity: Common

Species: Human

Type: Biotic

A powerful biotic with light armor who uses powers to control crowds and cause widespread damage.

The Human Adept doesn't really talk about why he joined the Initiative, in fact, he doesn't talk much at all. Given the quiet intensity with which he tore through enemies, none of the teammates are rushing to ask about his past.

HUMAN MALE ADEPT I

Rarity: Common

Species: Human

Type: Biotic

A powerful biotic with light armor who uses powers to control crowds and cause widespread damage.

HUMAN MALE ENGINEER

Rarity: Common

Species: Human

Type: Tech

Clever tech expert who distracts, limits, and locks down opponents on the battlefield.

The Human Engineer was always good at tinkering with machines, but he's found a new passion for working with people. Whether he's helping a fellow Initiative member or two aliens who've just met, he's always ready to lend a hand.

HUMAN MALE ENGINEER I

Rarity: Common

Species: Human

Type: Tech

Clever tech expert who distracts, limits, and locks down opponents on the battlefield.

HUMAN MALE INFILTRATOR

Rarity: Common

Species: Human

Type: Tech

Stealth expert who moves unnoticed around the battlefield with tech powers, then picks off enemies with well-placed shots.

Turian Multiplayer Characters

TURIAN AGENT

Rarity: Rare

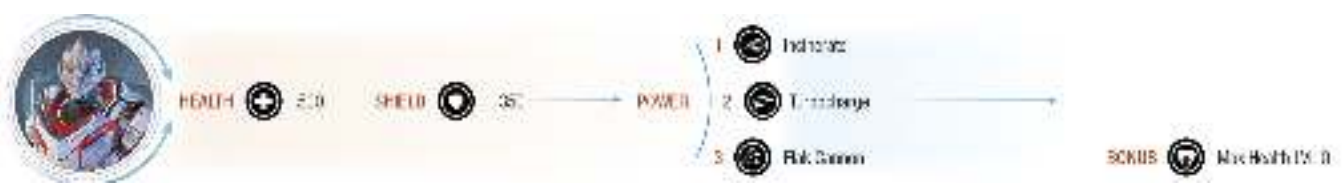
Species: Turian

Type: Tech

Reconnaissance expert who uses stealth to set up the perfect lethal shot.

The Turian Agent left a corporate security job in the Milky Way to find adventure with the Andromeda Initiative. Sure of his professionally honed skills, he can seem a bit snobbish, but he genuinely cares about the team.

TURIAN HAVOC TROOPER



Rarity: Rare

Species: Turian

Type: Combat

TURIAN SOLDIER

Rarity: Uncommon

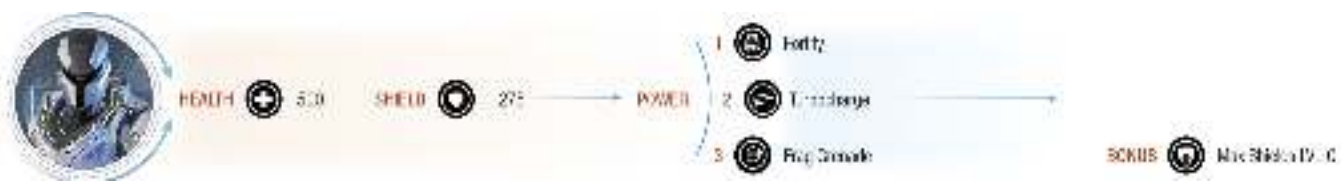
Species: Turian

Type: Combat

Weapons expert with heavy shields and armor.

To avoid a court-martial on Palaven for his role in a massacre, the Turian Soldier went on the lam and worked as a mercenary until he was able to buy his way into the Initiative.

TURIAN SOLDIER I



Rarity: Uncommon

Species: Turian

Type: Combat

Weapons expert with heavy armor and a gun for all occasions. Effective at any range.

Multiplayer Atlas

Overview

Looking for explosives, ammo, and good places to take cover in Multiplayer? Then this section is for you!

Regardless of which type of enemy you're fighting, you need to know the best places to defend and the safest places to run through. This chapter is devoted to giving you tips and strategies for every map.

Strategic points are called out throughout this chapter. The highlighted points are great for surveying the battlefield, or for stopping to kill enemies by yourself or with teammates. With the help of your teammates, some of these points can be held indefinitely. The need to restock ammo may pull you away, but ammo is usually located nearby. While playing, always have two or three defensive points in mind. Chances are, later waves will push you out of the safety of cover, forcing you to relocate or face certain death.

	Incendiary Explosive
	Cryo Explosive
	Electric Explosive
	Extraction
	Objective

Enterprising miners built this fragile outpost to mine an asteroid's element yield. As enemies hunted the ears bounty, the asteroid's instability increased. Evacuation of the element over-they could before they fled, resulting in a breathable atmosphere around the outpost's corridors.

STRATEGIC POINTS

Landing Pad: This is where your mission starts and ends. A few containers provide decent cover from enemies coming out of Rooms A and B. The location is not conducive to a long defense, but its its lack of line of sight in the bent walkway, which allows enemies to jump up and perform quick close-range attacks.

Cannons on the ship ground inside the control tower should be your priority targets if you plan to hold this position. With their higher elevation, enemies can attack you even if you're behind two cover.

Control Tower: The control tower's high elevation may make it look like a great spot to set up a defense, but it features only a few small points of cover. Unfortunately, the bulk of the southern side cover is also destructible.

Instead, use the control tower as a traverse point, quickly traveling up and running through before continuing on, putting as much distance as you can between you and your enemies while you climb stairs.

Pipe Platform: The platform between the two large pipes to the north of the control tower is a great spot to set up a quick defensive against enemies to the north or those currently occupying the control tower.

However, if activates to view of the tower walkway in the entrance to Room B. The lack of visibility allows exiles to travel up onto the platform and engage in melee attacks almost immediately.

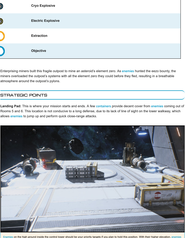
Lower Walkway: Low cover points fill the lower walkway, but it features no barriers to prevent enemies from attacking openly from the north or south.

North Corner: The north corner of the map, just outside Room F, is hands down the best place to set up a defense. Its few or two players can defend this area—one defends against enemies coming from the south, while the second defends against those coming from inside Room F.

Room F: Room F is a small room featuring two doors and one explosive barrel. The north door exits to the north corner. The south door, which exits into Room B, provides a good look at most of the room, while the northern door acts more as a blind corner.

Room G: Room G is a large room with plenty of cover points, great for taking on enemies who chase you inside.

However, holding Room G is problematic. As you kill enemies, more spawn and enter from one of three doors. While a few points offer protection from all angles, only one small cover point offers safety and a view of the entire room.



Room D: If you're looking to defend a room on this map, Room D is your best option.

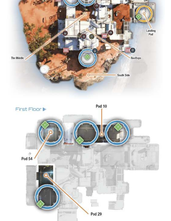
There is become multiple cover points protected against each of the three entrances/exits, allowing further players to engage enemies safely even if the enemy begins to take the room.

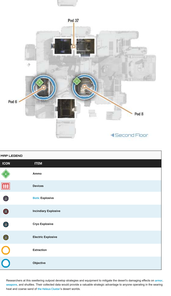
Room E: This room is a more shopping point to quickly defend against exalted enemies. It only has two entrances, one leading to Room D and the other leading to the outside.

If you're on the extraction zone, don't hold out in the room. Instead, begin to form up on the outside between you and the extraction point. Leaving units on stalwarts.

Multiplayer Atlas

Finbase Sandstorm





MAP LEGEND

Icon	ITEM
	Ammo
M	Devices
	Kett Explosive
	Incindiary Explosive
	Cryo Explosive
	Electric Explosive
	Extraction
	Objective

Researchers at this sweltering outpost develop strategies and equipment to mitigate the desert's damaging effects on armor, weapons, and gear. Their work has provided a significant tactical advantage to anyone operating in the roaming heat and planet-wide E3 Heliac Hazards (desert storms).

Finbase Sandstorm features a modular design with "pods" that each feature a number of one of three entrances, allowing for easy visual identification.

EXTRACTSEC POINTS

Landing Pad: The landing pad is your starting and extraction point on Finbase Sandstorm. This is the best defensive location, thanks to its two sets of cover and the nearby ammo crates (inside Pod 6 to the south and Pod 10 to the north).

Start out by making the initial memories closest to the pods as your main defense. Pull back to the large rock to the east when enemies get too close, and then push back out to the pods when the enemies have been dispatched. Be sure to keep an eye on the Heliac Hazard meter, and retreat to the pods at the first sign of trouble. Extraction is easy once all enemies are dispatched, so consolidate and run!

Remember to find and unlock beacons by sequencing the beacons on the high ground. Leave the ground-level beacons for the back-up team. Also, be sure to unlock the Vault Door Key Beacon (in the northeast corner of the landing pad) and the Vault Door Beacon (in the southwest corner) to open the vault door. Inside the vault, you can pick up loot and ammo for the team, as well as the Jetpack Upgrade.

Pod 10: There is an ammo crate just outside the east door of Pod 10, inside Pod 10, multiple cover points all just outside each of the four entrances. Each point is exposed to the closest entrance and leaves you blind to the other two entrances. Use the cover points to your advantage when you're inside the Pod, and as a "safe" spot in Pod 54.

Pod 54: Access this pod from the staircase that leads toward both the south exit and the walkway to Pod 37. A small diagonal barricade provides just enough cover to create a proper four-point defensive.

Use the corridors to your advantage when fighting enemies in this pod. Many Kett like to travel in the open. They usually attempt to run straight at you, which makes them easy targets. Use the corridors to funnel them into your line of fire, and then pick them off with your weapon of choice. Remember to use your Biotic Powers to your advantage!

Pod 29: This is a small room with an L-shaped desk that provides cover from both entrances.

Consider using a shotgun for close-quarters fun and gun-spacing. Do not turn your back on the single entrance from the balcony—listen out for the metal "clang" of enemy footsteps!

Take the ladder to the second floor and exit the pod. Use the cover to your left to avoid enemy fire from the balcony. Then head to the south door to Pod 6. Watch out for enemies coming from the north door to Pod 37.

Pod 37: This pod provides plenty of cover, including a kitchen area! The east and features a sturdy L-shaped kitchen counter that offers not only great lines of sight on the south and west entrances, but defensive positions as well.

The east and north entrances provide large open areas with numerous cubbyholes to use cover. These cubbyholes are all spread out, however, so be sure to stay together and help each teammate if someone is being overrun by the Kett.

Take some cheap shots from the kitchen cover. Run for cover if anything from the landing pad and the east doors of the map. Use these cubbyholes as your defensive position if you're overrun.

Pod 6: This pod is accessible from the north and south doors, leading in from the northern Pod 37 walkway and out toward the south exit. Quickly turn behind any of the two-room points to take out enemies chasing you, but be aware that these enemies are programmed to attack from the other side. Use this pod primarily as an exfil from the as you backtrack to the Pod 10 entrance.

Pod 29: L-shaped barricades are positioned just inside both the east and west entrances to Pod 29. The layout of the room is such that south and west entrances are mostly out of sight from doors on the same level, which creates a dangerous spot only found in first-run shooters, based on your cover.

An outdoor ramp is another counter Pod 29, leading the southwest-facing corridor. While it'll clearly isolate an entrance, you can access it easily from either entrance.

To reach Pod 8, head off to the eastern corner with the south-pointing exit entrance. Explosive scanning reveals a path to the second level. Head to the second floor and then turn around to face the entrance you just came from. Use the cover to your left to avoid enemy fire from the Pod 10 entrance.

Continue working through the west entrance area with a cover attempt to take cover in the room with you, or take cover in the doorway. Take them out before they arrive, and continue their entrance.

Northpoint: The northpoint is another area of the map that features multiple L-shaped cover points at the bases of large standing antenna-like objects. If you pick off enemies as they appear on the north. Throw melee-proof places to hold for a while.

Some standing cover points are more open than others, so be aware of your surroundings. Use the Jetpack Upgrade from the Vault Door Beacon to get to the second floor. Keep a sharp eye for any enemies. Use energy-based cover as they come through. Use an especially effective tactic: place a Cryo Explosive on the ground in front of you, and then take cover behind the Cryo Explosive. Enemies will run right into it!

The Middle: The middle is full of crates and objects that provide cover of various sizes and form a makeshift maze through the map. Multiple pods exit into the middle, and the walkways between them make enemy encounters from all angles an issue.

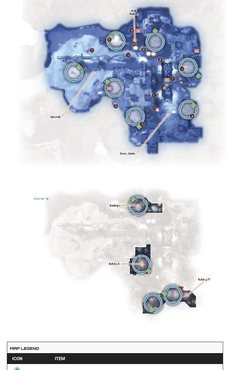
Watch for the ammo crates that are just outside the pod doors for easy re-up points. Use the cover in the middle to your advantage, though. Watch those large enemies as they progress. Use energy-based cover as they come through. As an especially effective tactic, place a Cryo Explosive on the ground in front of you, and then take cover behind the Cryo Explosive. Enemies will run right into it!

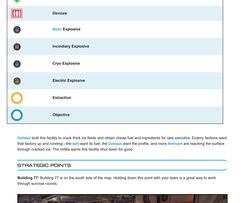
South Side: The south side of the map lacks cover and is quick to attack from almost all angles, with the exception of the large, central L-shape. Avoid spending prolonged periods of time in this area. Instead, hustle into the pods for cover and retreat to your defensive points.

MASS EFFECT ANDROMEDA

Multiplayer Atlas

Firebase Icebreaker



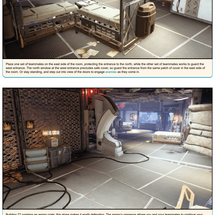


HMP LEGEND	
ICON	ITEM
	Ammo
	Devices
	Basic Explosive
	Incendiary Explosive
	Cryo Explosive
	Electric Explosive
	Extraction
	Objective

Outlaws built this facility to crack thick ice fields and obtain cheap fuel and ingredients for rare narcotics. Enemy factions want that factory up and running—the [loot](#) want its fuel, the Outlaws want the profits, and more [Remnant](#) are reactivating the surface through cracked ice. The militia wants this facility shut down for good.

STRATEGIC POINTS

Building T7: Building T7 is on the south side of the map. Holding down this point with your team is a great way to work through survival rounds.



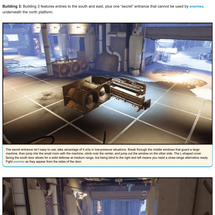
Place one set of teammates on the east side of the room, protecting the entrance to the north, while the other set of teammates works to guard the west entrance. The north window at the west entrance provides safe cover, as guard the entrance from the same point of cover in the east side of the room. Or stay standing, and step out one side of the doors to engage [enemies](#) as they come in.

Building T7 contains an ammo crate; this alone makes it worth defending. The ammo's presence allows you and your teammates to continue your fearless incursions.

Station a player up on the roof to slow the progression of the enemy. The player should equip a sniper rifle and shoot rifle. Use the sniper rifle to engage [enemies](#) on other rooftops and at the longer distances across the map; save the assault rifle for any [enemies](#) who get close enough to climb onto your rooftop. Communicate with your team below to determine enemy systems, and shift accordingly between the cover points on the east and west sides of the roof. Move the roof to a lowered position when the fighting is over, or to a point of increasing pressure when waiting for the extraction.

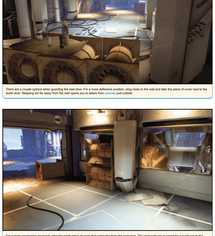
Building 4: Outside the west entrance to Building 4 lies a long walkway with lots of cover. One of these lids includes an ammo crate, situated in a great location at the top of a ramp, in a straight line from the west entrance.

Building 4 features two well-placed spots of cover that, when manned by multiple players, allow for a cross-range defense.



Two windows on the east side of the room offer a good view of the smokestacks. They also provide easy access to the room from the smokestacks. Consider placing a player here to cover your teammates who are fighting. Traverse from cover to cover over the long walkway to maintain your aggression and freedom of movement as you attack and evade.

Snowfall: The snowfield is your spawn point for Firebase Icebreaker. The field is on the west side of the map and littered with cover, making it a great position to hold a temporary defense.



On the downside, the enemy can take advantage of high flanks and high ground. Any long-term defense in the area becomes problematic when the enemy gains the high ground on the surrounding cliffs. Keep your head on a swivel during the fighting. Traverse from cover to cover over the large area to maintain your aggression and freedom of movement as you attack and evade.

Building 3: Building 3 features entries to the south and east, plus one "secret" entrance that cannot be used by [enemies](#), underneath the north platform.

The secret entrance isn't easy to use, take advantage of it only in low-pressure situations. Break through the middle windows that guard a large stairway, then jump into the small room with the machine, climb over the vents, and jump out the window on the other side. This L-shaped route is a great way to get behind [enemies](#) who are in cover range, but being third to the right and left means you need a close-range alternative ready. Fight [enemies](#) as they appear from the sides of the door.

There are a couple options when guarding the east door. For a more defensive position, stay close to the wall and take the piece of cover next to the south door. Mapping for far away from the wall opens you to attack from [enemies](#) on both sides.

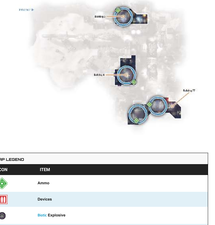
For a more aggressive approach, take the small piece of cover that protrudes from the east door. This spot puts you in range for a quick run to the ammo crate 20 meters away from the cover point. Watch for [enemies](#) coming from your blind side to the south; they can reach melee distance without [warning—especially if one of them is equipped with a shotgun!](#)

North Platform: Without a full team, the north platform merely provides a place to pick up ammo, get to high ground, and engage a few [enemies](#) before moving on. With a full team, the dynamic changes completely, and this area becomes a multi-leveled fortress where your team can openly attack [enemies](#) at almost any location on the map.

When defending this area with your team, send two players to the north. Meanwhile, the other two members should guard the ammo crate by holding the east ramp and monitoring down at the south. Lingering in cover across from the ammo crate. From there, they can defend against [enemies](#) from the north and the ramp below. [Enemies](#) on the east side do not get into considerable damage by using the ground-based beam as "bait" to force the enemy into the open. Deploy Overcharge here for a quick takedown!

Smokestacks: Two large pipe-like structures mark the area for the smokestacks. The lack of cover and openness to multiple angles of attack make defending this point a troubling task.

The east side of the smokestacks contains the extraction point for Wave 7, located just outside Building T7.



When the smokestacks lack in defensive capabilities, they make up for it in tactical cover. Use the smokestacks to easily move from the north platform walk to any roof on the map and vice versa. Doing so doesn't grant you any ammo, but it's a great way to get the enemy off your tail. When running through the ground-level of the smokestacks, be sure to cover the entrance located between the two large smokestacks.

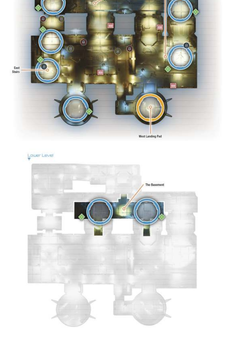
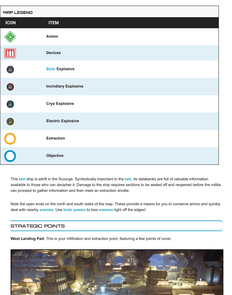
Multiplayer Atlas

Firebase Derelict





HHP LEGEND

ICON	
	Ammo
	Devices
	Basic Explosive
	Incindiary Explosive
	Cryo Explosive
	Electric Explosive
	Extraction
	Objective

This loot ship is adrift in the Scourge. Symbiotically important to the loot, its datadevins are full of valuable information available to those who can decipher it. Damage to the ship requires sections to be sealed off and reopened before the militia can proceed to gather information and then read an extraction shuttle.

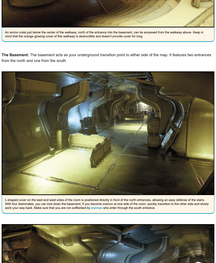
Note the open ends on the north and south sides of the map. These provide a means for you to conserve ammo and quickly deal with nearby enemies. Use Basic powers for free enemies right off the edges!

STRATEGIC POINTS

West Landing Pad: This is your infiltration and extraction point, featuring a few points of cover.

These canal ammo only provide protection from the south and leave you open to attacks from the east. An ammo crate is located nearby in the center portion of the map.

The Crates: Separated from the north center by a large wall, this section of the map contains several crates. This area also has multiple levels and allows access to the basement and upper walkway.



An ammo crate just outside the west landing pad allows easy access during a fight.

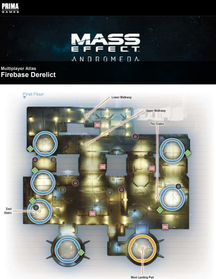
A stash of three can easily defend the upper platform at the bottom of the stairs leading to the upper walkway. Simultaneously watch the basement entrance, the upper walkway entrance, and the walkway between the two launch pads. Equip assault rifle to deal with primarily medium-range enemies.

East Stairs: East of the wall on the north side of the map is a mostly open area with two staircases allowing access to the basement and upper walkway.

The stairs leading into the walkway provide multiple cover points, most notably this L-shaped cover that sits at the first platform halfway up. When reached, keep up to the higher platform and head to the south side of the map, or jump down the staircase and head for safety in the basement.

An ammo crate just below the center of the walkway, north of the entrance into the basement, can be accessed from the walkway above. Keep in mind that the orange glowing cover of this walkway is destructible and doesn't provide cover for long.

The Basement: The basement acts as your underground transition point to either side of the map. It features two entrances from the north and one from the south.



L-shaped cover on the east and west sides of the room is positioned directly in front of the north entrances, allowing an easy defense of the stairs. With four teammates, you can lock down the basement. If you become overrun at one side of the room, quickly transition to the other side and shutly reform your new room. Make sure that you are not outflanked by the enemy who have through the south entrance.

There is no ammo crate in the basement, so run out to grab ammo between waves.

Upper Walkway: Use this area mainly for evading enemies quickly through the maze of low, medium, and high cover.

An ammo crate is located in the largest structure, close to the east side of the map. Cross through this point if you need ammo. Be careful—this walkway's low and lack of cover mean you're vulnerable to any trailing enemies. Keep moving!

A total of four crossover points exist between the north and south areas of the walkway, each room with the same shelterless—you must face enemies at close range and are vulnerable from both sides.

Lower Walkway: The only pathway in or out of the basement to the south leads to the lower walkway. An ammo crate is just around the corner from the basement opening.

The entire south-facing edge of the walkway features low cover. Use Basic powers to take enemies over the edge. Instant kill!

Be extra careful when traveling on the walkway. Falling off the map doesn't kill you, but it places you back into battle with no shield and only a small portion of health, making you an easy target for any enemies in the area.

MASS EFFECT ANDROMEDA

Multiplayer Enemies

Overview

Each Multiplayer match pits you against seven waves of enemies from one of the three factions in *Mass Effect: Andromeda*. Each enemy fights differently and possesses special behaviors and weaknesses that you can leverage to gain the upper hand.

MASS EFFECT ANDROMEDA

Multiplayer Enemies

Kett

The kett are composed of many different races that they've absorbed and genetically engineered.

Kett weaponry is generally plasma-burst-based. These weapons feature visible, often fast projectiles that differ from standard weapons.

Kett are weak against fire- and cryo-based attacks and gain effectiveness by attacking at close range.

CHOSEN

The core of the kett's frontline troops. Provides shape to battles by forming a front and using the available terrain for protection.

COMBAT BEHAVIOR

The main goal for the Chosen is to deal as much damage as possible and keep the player pinned down while maintaining cover. When multiple Chosen circle you from their cover positions, a few may begin to close in, moving from cover to cover to close the distance and come within range to throw a grenade. The Chosen are vulnerable to close-range attacks and mostly attempt to run for better cover as you advance, which leaves them open to attack. Get in too close, and they use a melee combo that not only damages you, but can disrupt your shield, causing it to regenerate at a slower-than-usual rate.

Area-of-effect attacks work well against the Chosen, especially if you catch a group of them as they run for cover.

SPECIAL BEHAVIOR

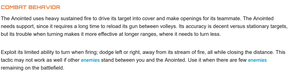
Frag Grenade: Occasionally one of the Chosen tosses a grenade to deal damage and flush you out of cover, opening you for attack. Keep the Chosen pinned down and at a medium distance to prevent these foes from throwing grenades.

FIGHTING TACTICS

If you can't take down a Chosen before they take cover, keep them pinned down with suppressive fire while you or your teammate attacks from the flank. When larger enemies begin to spawn, take down the Chosen; if not, they will quickly begin to populate the area and attack from the safety of cover.

WRAITH

Attack dogs of the kett. Causes disorder among their enemies, softening them up for a main assault or chasing down individuals.



COMBAT BEHAVIOR

The Wraith does its best to sneak up on your flank, leaping over cover and cloaking itself. Your best bet is to take the Wraith out at range so you're not forced to abandon your cover to engage it.

Despite that the bone covering the Wraith's head looks well-armored, the head is a weak point. After taking a good amount of damage, the bone breaks, briefly stunning the Wraith and leaving it open for attack without the risk of it leaping at you. Breaking through its weak point is the best way to stop it at close and medium range. Once the bone breaks, the Wraith can no longer cloak.

When in close proximity, the Wraith bites, scratches, and attacks with its tail.

SPECIAL BEHAVIOR

Camouflage: The Wraith becomes invisible while moving. It decloaks when attacking or upon taking a significant burst of damage.

FIGHTING TACTICS

Don't let the Wraith get in too close! Wraiths can perform sync attacks in close proximity, forcing you out of cover while attempting to fight them off. If you don't have a close-quarters weapon, try using melee attacks to eliminate them. Also, keeping your back up against a wall can provide much-needed defense against Wraiths sneaking up from behind!

ANOINTED

The heavy-weapon counterpart to the Chosen, the Anointed carries a heavy plasma cannon and primarily relies on its squad for protection.

COMBAT BEHAVIOR

The Anointed uses heavy sustained fire to drive its target into cover and make openings for its teammate. The Anointed needs support, since it requires a long time to reload its gun between volleys. Its accuracy is decent versus stationary targets, but its trouble when turning makes it more effective at longer ranges, where it needs to turn less.

Exploit its limited ability to turn when firing; dodge left or right, away from its stream of fire, all while closing the distance. This tactic may not work as well if other enemies stand between you and the Anointed. Use it when there are few enemies remaining on the battlefield.

The Heavy Pulse cannon must warm up before firing, allowing you time to drop the shield and quickly drain the health of the Anointed.

FIGHTING TACTICS

Anointed move slower than other units, allowing you to easily put distance between yourself and them. Try drawing them into a close-quarters fight in order to dodge their attacks.

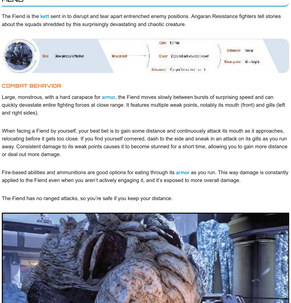
DESTINED

An Ancestral who leads troops from the front. A skilled battle commander who can assist its comrades while holding its own in battle. The Destined provides light shields to teammates, even those who don't normally have them, and obscures the battlefield with smoke exuded from its pores.

COMBAT BEHAVIOR

The Destined is lightly armored with a small but powerful weapon, making it a high-value target in groups but not a large threat when found alone.

Once you've drained the Destined's light shield, it can be thrown around with biotic attacks. Use this tactic to get it away from its allies and prevent it from cloaking them.



SPECIAL BEHAVIOR

While the Destined's strong shotgun makes it a threat even without abilities, the smoke exuded from its back adds an extra layer of difficulty. The Destined's purged smoke can cover a large area, cloaking any Chosen, Destined, or Anointed within its field.

Enemies within the cloak can still be killed, but attacks that can track enemies don't lock on to them.

FIGHTING TACTICS

Kill the Destined quickly to prevent them from deploying smoke from their backs. Keep your distance when attacking one to prevent it from unleashing large amounts of damage with its shotgun. The Destined doesn't have a lot of health; it gains its true power from the smoke it emits. Its low health makes it a great target for snipers, allowing it to be killed with a single shot to the head once its shield drops!

ASCENDANT

kett archetype. Proud master of the battlefield. The Ascendant stands tall, knowing its enemies should flee, and if they don't, it will lay waste to them. Although roughly human-scale, this kett uses an anti-gravity ability to float up into the air, physically raising it above the fray and helping it get a good shot at its enemies.

COMBAT BEHAVIOR

The Ascendant constantly creeps toward you while pestering you with its standard orb attack, which flings high-damage balls of energy.

If given the time, the Ascendant empowers its attack, locking the Ascendant's Orb in one place while it charges up an even stronger attack. This attack deals damage to a large area and leaves a trail of fire on the ground from the firing point to the point of contact, dealing damage over time if the player remains in the area.

The empowerment stage is a great time to deal damage to the Ascendant's Orb since it's locked in place. Don't position yourself directly in front of the orb, as this will leave you in the line of fire if you fail to interrupt the charged attack.

To damage the Ascendant, first take down its shield by destroying the Ascendant's Orb, which is the only point that can be damaged. You must damage the orb directly, meaning you cannot damage it when it's on the opposite side of the shield. Once the orb is destroyed, the Ascendant can be attacked with biotics and is open to taking damage. The Ascendant doesn't fully reel from force or knockback; instead it uses energy to quickly level itself out and begins regenerating the Ascendant's Orb to restore its shields.

SPECIAL BEHAVIOR

Force Recovery: Ascendants can recover from force or knockback while in the air.

Sync Attack: If the Ascendant gets within close range, it locks you in and surrounds you with a ball of energy, slowly compacting you until it slams you into the ground.

FIEND

The Fiend is the kett sent in to disrupt and tear apart entrenched enemy positions. Angaran Resistance fighters tell stories about the squads shredded by this surprisingly devastating and chaotic creature.

COMBAT BEHAVIOR

Large, monstrous, with a hard carapace for armor, the Fiend moves slowly between bursts of surprising speed and can quickly devastate entire fighting forces at close range. It features multiple weak points, notably its mouth (front) and gills (left and right sides).

When facing a Fiend by yourself, your best bet is to gain some distance and continuously attack its mouth as it approaches, relocating before it gets too close. If you find yourself cornered, dash to the side and sneak in an attack on its gills as you run away. Consistent damage to its weak points causes it to become stunned for a short time, allowing you to gain more distance or deal out more damage.

Fire-based abilities and ammunitions are good options for eating through its armor as you run. This way damage is constantly applied to the Fiend even when you aren't actively engaging it, and it's exposed to more overall damage.

The Fiend has no ranged attacks, so you're safe if you keep your distance.

SPECIAL BEHAVIOR

Sync Attack: The Fiend picks you up and repeatedly slams you around. Keep your distance and use your movement abilities (jump/dodge) to avoid falling victim to this devastating attack.

Multiplayer Enemies

Outlaws

The [Outlaws](#) consist of angara and [Milky Way species](#) who, for various reasons, have aided themselves against the Pathfinder and AFEX teams. Some of them are members of the angaran Resistance, who want all other species out of [the Heleus Cluster](#). Some are a splinter group from the exile who no longer have faith in their leaders. Most, however, are criminals and pirates looking for personal gain in the lawless Cluster.

With the help of the Shanjockeys, the Outlaws excel at maintaining suppressing fire at long distances. Take them down first to prevent the enemy from moving in and surrounding you.

As biological units, Outlaws are weak against cryo and take extra damage from fire-based attacks. Electrical attacks work well for taking down their shields.

ACHI

Fast-moving melee units that can quickly close the distance on their targets. These [enemies](#) can vault over low and medium cover. Their primary purpose is to flush the player into the open.

SPECIAL BEHAVIOR

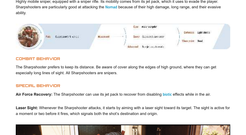
Sync Attack: The Achi latches on with its huge jaws, and the player must fight it off. This attack deals damage over time, so be faster the player wins in the Sync Attack, the less damage taken.

FIGHTING TRICTICS

Much like other rush-type units, the Achi will fearlessly attack your position. Prepare yourself with a shotgun or a backup plan! [Assault rifles](#) are recommended for dealing with the Achi's close-range attacks and can even shoot them down in midair, allowing for quick dispatch.

If you fail to dispatch the threat with one shot, you may find yourself in a close-quarters fight with an Achi closing in while attempting to bite you. To defend the weakened Achi with a melee attack, or jump and crouch to give yourself some extra time. Keep your back against a wall to prevent these units from sneaking up from behind, forcing them to come straight at you. This allows for the most amount of time to react and respond to their threat.

RAIDER



The Raider uses [armor](#) to protect itself, but it's generally weak. Its [weapons](#) are effective at medium-to-long range, and its equipped grenades may hurt players out of cover. The Raider is substantially weaker at short-to-melee range, so unless Raiders are supported by stronger short-range [enemies](#), your dominant strategy is to close in on them.

COMBAT BEHAVIOR

The Raider's behavior is standard for *Mass Effect: Andromeda*—it stays behind cover, popping up to take shots at the player.

SPECIAL BEHAVIOR

If you take cover and don't engage the Raider for a short time, it throws a grenade to flush you out.

EXTRA INFO

Raiders come from different species, and while they all wear the same [armor](#) and thus look the same, one key variation differentiates between the species—the weapon.

SPECIES	WEAPON
Human	Avenger
Angara	Sandstorm
Salarian	Sandstorm
Asari	Mattock
Turian	Revenant

FIGHTING TRICTICS

Dismantle the Raiders as quickly as possible to avoid their deadly grenades. These grenades will flush you from cover and open you up to attack from other nearby [enemies](#). A good sniper can make short work of a Raider with a well-placed headshot or body shots courtesy of the more powerful [sniper rifles](#) like the Vetinary. Although a single Raider isn't much of a threat, they can quickly stack up and begin throwing grenades if they are not eliminated right away.

SHARPSHOOTER

Highly mobile sniper, equipped with a sniper rifle. Its mobility comes from its jet pack, which it uses to evade the player. Sharpshooters are particularly good at attacking the [flanked](#) because of their high damage, long range, and their evasive ability.

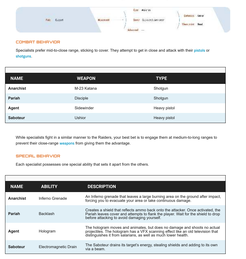
COMBAT BEHAVIOR

The Sharpshooter prefers to keep its distance. Be aware of cover along the edges of high ground, where they can get especially long lines of sight. All Sharpshooters are snipers.

SPECIAL BEHAVIOR

Air Force Recovery: The Sharpshooter can use its jet pack to recover from disabling [biotic](#) effects while in the air.

Laser Sight: Wherever the Sharpshooter, it starts by aiming with a laser sight toward its target. The sight is active for a moment or two before it fires, which signals both the shot's destination and origin.



EXTRA INFO

While Sharpshooters all look the same on the outside, each species of Sharpshooter uses a different weapon.

SPECIES	WEAPON
Human	Viper
Angara	Isharay
Salarian	Widow
Asari	Vanquisher
Turian	Raptor

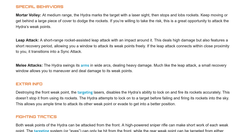
FIGHTING TRICTICS

Fight fire with fire! Use a sniper rifle to quickly take down enemy Sharpshooters. Critical hits to the head will deal a large amount of damage and momentarily stun them, allowing you to safely line up another shot. If your [weapons](#) and [powers](#) cannot effectively damage a Sharpshooter, move from one point of cover to another between the Sharpshooter's shots, using your Dash ability to evade their aim until you are within striking distance.

SPECIALIST

Species-specific [characters](#) within the Outlaw faction, each with special abilities and names. While the following characters are considered specialists, they're referenced by the display names given below.

SPECIALISTS

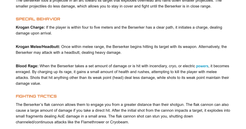


ANARCHIST

Display Name: Anarchist

Species: Turian

Description: The turians have developed a grenade that, once exploded, leaves a pool of fire on the ground, instantly abolishing the safety of your cover.



PARIAN

Display Name: Parian

Species: Asari

Description: Even without proper training, these asari have mastered a few [biotic](#) attacks.

AGENT

Display Name: Agent

Species: Salarian

Description: Salarians are master spies and have some of the best [tech](#) in the Milky Way. They prefer deception to straight-up fighting, so many bring holograms into battle.

SABOTEUR

Display Name: Saboteur

Species: Angara

Description: All angara can manipulate electromagnetic energy, which makes them dangerous versus shields.

COMBAT BEHAVIOR

Specialists prefer mid-to-close range, sticking to cover. They attempt to get in close and attack with their [pistols](#) or [shotguns](#).

NAME	WEAPON	TYPE
Anarchist	M-23 Katana	Shotgun
Parish	Disciple	Shotgun
Agent	Sidewinder	Heavy pistol
Saboteur	Lishior	Heavy pistol

While specialists fight in a similar manner to the Raiders, your best bet is to engage them at medium-to-long ranges to prevent their close-range [weapons](#) from going them the advantage.

SPECIAL BEHAVIOR

Each specialist possesses one special ability that sets it apart from the others.

NAME	ABILITY	DESCRIPTION
Anarchist	Inferno Grenade	An inferno grenade that leaves a large burning area on the ground after impact, forcing you to evacuate your area of take continuous damage.
Parish	Backlash	Creates a shield that reflects ammo back into the attacker. Once activated, the shield will remain in place for a short time or until it is destroyed. Wait for the shield to drop before attacking to avoid damaging yourself.
Agent	Hologram	The hologram moves and animates, but does no damage and shoots no actual projectiles. The hologram has a VFX scanning effect like an old television that distinguishes it from Salarians, so wait as much lower health.
Saboteur	Electromagnetic Drain	The Saboteur drains its target's energy, stealing shields and adding to its own via a beam.

HYDRA

Big buying Mega! (and quite hazardous) materials off the black market, the Outlaws have cobbled together large mechanoids.

COMBAT BEHAVIOR

The Hydra walks steadily toward its target, using its basic attack—a chain gun—to keep the target pinned while raining down rockets. Once in range, it engages its boosters to leap at its target and engage in melee, massive arms swinging in wide arcs.

Take advantage of the Hydra's slow speed to avoid and flank it. The Hydra has a weak point on its back, destroy it to stagger the Hydra.

SPECIAL BEHAVIORS

Mortar Volley: At medium range, the Hydra marks the target with a laser sight, then stops and lobs rockets. Keep moving or get behind a large piece of cover to dodge the rockets. If you're willing to take the risk, this is a great opportunity to attack the Hydra's weak point.

Leap Attack: A short-range rocket-assisted leap attack with an impact around it. This deals high damage but also features a short recovery period, allowing you a window to attack its weak points freely. If the leap attack connects within close proximity to you, it transforms into a Sync Attack.

Melee Attacks: The Hydra swings its arms in wide arcs, dealing heavy damage. Much like the leap attack, a small recovery window allows you to maneuver and deal damage to its weak points.

EXTRA INFO

Destroying the front weak point, the [targeting](#) lasers, disables the Hydra's ability to lock on and fire its rockets accurately. This doesn't stop it from using its rockets. The Hydra attempts to lock on to a target before falling and firing its rockets into the sky. This allows you ample time to attack its other weak point or evade to get into a better position.

FIGHTING TRICTICS

Both weak points of the Hydra can be attacked from the front. A high-powered sniper rifle can make short work of each weak point. The [targeting](#) system on hyaes's can only be hit from the front, while the rear weak point can be targeted from either side. The rear weak point offers a higher damage multiplier than the front until it is destroyed. Destroying this weak point will stagger the Hydra and deal a large amount of damage.

Use fire and abilities to apply damage over time while also keeping your distance from the Hydra. Although this only deals a small amount of damage, it will add up over time. When primed with ice, the Hydra will take bonus damage but will not completely freeze.

REPSERVICER

The kongan Berserker typically does not make use of cover. Instead it prefers to stand out in the thick of battle equipped with heavy [armor](#) and a flak cannon. Berserkers' main role in [combat](#) is to find targets in cover and flush them out with blasts from their flak cannons.

COMBAT BEHAVIOR

The Berserker tries a projectile in an arc toward its target that explodes overhead and rains down smaller projectiles. The smaller projectiles do less damage, which allows you to stay in cover and fight until the Berserker is in close range.

SPECIAL BEHAVIOR

Kongan Charge: If the player is within four to five meters and the Berserker has a clear path, it initiates a charge, dealing damage upon arrival.

Kongan Melee/Headbutt: Once within melee range, the Berserker attacks with its weapon. Alternatively, the Berserker may attack with a headbutt, dealing heavy damage.

Blood Rage: When the Berserker takes a set amount of damage or is hit with incendiary, cryo, or electric [powers](#), it becomes enraged. By charging up its rage, it gains a small amount of health and [radius](#), attempting to kill the player with melee attacks. Shots that hit anything other than its weak point (head) deal less damage, while shots to its weak point maintain their damage value.

FIGHTING TRICTICS

The Berserker's flak cannon allows them to engage you from a greater distance than their shotgun. The flak cannon can also cause a large amount of damage if you take a direct hit. After the initial shot from the cannon impacts a target, it explodes into smaller projectiles that fly in a cone toward the target. Use cover to avoid the shot and return fire, shotting down channeled/continuous attacks like the Flamethrower or Cryobeam.

Once the Berserker enters its blood rage state at low health, it will cease to use the flak cannon. This allows you to use close-range attacks in an attempt to kill them before they reach you.

Remnant

"The Remnant" is the umbrella term for the technological remains of an advanced species that abandoned the Heleus Cluster about 600 years ago. Remnant sentry bots—ranging from small Observers to gigantic Behemoths—keep vigil over devices capable of altering entire planets, maintaining and zealously defending their creators' work.

The Remnant are not sentient and never will be. Unlike the geth, they are automatons left running when their creators left. The reasons for their creators' departure, and whether they will return, remain a mystery.

All Remnant units take additional damage from electric attacks, and less damage from fire-based attacks. Cryo attacks slow Remnant and cause them to take additional damage from all sources.

ASSEMBLER

Gains its name from its ability to construct Breachers, which can swarm players. This makes the Assembler a priority target.

COMBAT BEHAVIOR

The Assembler prefers to fight from mid-range, briefly peeking up from cover to shoot and assemble Breachers. It fires its regular attack in small bursts before returning to cover. Quickly move in or use area-of-effect attacks to eliminate Assemblers behind their cover, preventing them from building a swarm of Breachers.

SPECIAL BEHAVIOR

Caltrops: At close range, the Assembler drops a cluster of small explosives at its feet and attempts to evade enemies. These explosives detonate after a short delay.

Breacher "Egg": The Assembler throws a grenade that, on impact, constructs a Breacher. Each Assembler can only spawn one Breacher at a time. Unlike with standard grenades, the Assembler doesn't attempt to land the egg on you. Instead, it aims to land the egg in front of you or on your flanks. This allows you to engage it before it invades your space.

FIGHTING TACTICS

The red "eye" in the center of the Assembler's head allows for one-shot kills by most heavy sniper rifles. It's best to kill an Assembler as fast as possible to disable the remnant ability to produce their only melee/rusher type unit. This will allow you to safely stay behind cover without little worry about units sneaking up on you.

BREACHER

Once assembled with the help of the Assembler, the Breacher is a relentless enemy with little regard for its own safety. It continues to advance even when heavily damaged—nothing can turn it from its objective of destroying the player.

COMBAT BEHAVIOR

The Breacher immediately rushes the closest player. Closing distance quickly, it seeks to flank. The Breacher can fly over cover, allowing it to rapidly close in from almost any angle. Once in range, the Breacher uses devastating melee attacks and is capable of a Sync Attack.

SPECIAL BEHAVIOR

Sync Attack: The Breacher uses its engine to burst forward, rushing at its target. While charging its engine for the attack, it can slowly turn, allowing it to make a last-second adjustment when aiming.

Self-Destruct: The Breacher can decide to self-destruct. A change in color signals this ability, followed by a charge at the nearest player. If the Breacher is killed during the charge, it unleashes an area-of-effect blast wherever it dies that deals damage to any player within that area. If it spends too much time in suicide mode, the Breacher detonates without any help from the player.

FIGHTING TACTICS

If Assemblers are kept in check, the Breacher is a unit you will rarely encounter. If you find yourself pinned down by multiple units, the Assembler will likely create a few Breachers to remove you from cover. Breachers can be created anywhere, allowing them to quickly flank you from seemingly out of nowhere. Listen for the sound of them being created. This sound will play for a short time while the Breacher is manufactured from the small "grenade" that is deployed by the Assembler. Since Breachers do not have a ranged attack, any weapon will generally give you an advantage. Use shotguns at close range to take the tactical advantage.

NULLIFIER

A large Remnant unit that can flush the player out of cover. It moves quickly but needs to stop to fire its weapon.

COMBAT BEHAVIOR

In combat, the Nullifier quickly approaches to mid-range, then plants itself like a turret.

Once planted, the Nullifier cannot move, but it can fire its energy mortar, which flies through any form of cover until it hits the player. This attack takes a short time to charge, during which the Nullifier's aiming lasers turn from blue to red. This gives you time to dodge the attack at the expense of leaving your cover for a moment.

When the Nullifier enters siege mode, it projects a large shield in front of itself. The shield protects all but a small portion of its weak point and leaves its head open for attack. Thanks to its slow attack rate, you can engage a Nullifier from a medium distance without much risk; the distance allows you ample time to dodge attacks. However, this tactic leaves you open to attacks from other enemies, so only use it when the Nullifier is without support.

The Nullifier is also capable of a melee, during which it attacks close-proximity enemies with its legs.

SPECIAL BEHAVIOR

Siege Mode: When in siege mode, the Nullifier projects an invulnerable barrier protecting all but its head. Movement is impossible when it's engaged in siege mode, allowing the player to evade and maneuver around the Nullifier with ease. The Nullifier can only use its ranged attack when in siege mode; it's vulnerable to ranged attacks when on the move.

OBSERVER

Remnant suppressor unit. Flies and prefers to stay at mid-to-long range, where it can most safely attack. Drives players into cover with its beam attack.

COMBAT BEHAVIOR

The Observer hangs back, preferring to stay at mid-to-long range. Observers are quick but don't move much once they get into position. They're fragile and can't take much punishment.

Observers commonly appear on your flank. They make themselves known with a few robotic noises before unleashing their laser attacks.

SPECIAL BEHAVIOR

Air Force Recovery: Observers can recover from disabling biotic effects in midair.

FIGHTING TACTICS

You will commonly find an Observer hovering over the battlefield, taking its time to select a target to pin down behind cover. The Observer may be fast, but it tends to stay behind other Remnant if the choice is given.

The Observer's beam deals continuous damage as it fires its laser out of its weak point. When the Observer's shield is down, you can temporarily ragdoll it with a concussive style or biotic attack. This allows you to quickly stop its beam while you finish it off before it has a chance to regenerate its shield.

DESTROYER

Largest Remnant unit. Command-and-control unit capable of heavily suppressing the player with its twin turrets as it advances. Serves as a centerpiece for the Remnant forces.

COMBAT BEHAVIOR

The Destroyer is a mobile weapons platform. It slowly advances on its target, only stopping to fire its many guns. At melee range it can unleash an energy field that hits targets even behind cover. This monster of a machine features three guns—its main gun and two turrets, each of which is capable of zeroing in on a separate target. The guns only fire when the main gun picks a viable target, and when it attacks, all three guns fire.

Its main gun is indestructible and fires heavy beams, much like rockets, that deal high area-of-effect damage. Using its main gun exposes its core, allowing for critical hits to its weak point.

SPECIAL BEHAVIOR

Turrets: The Destroyer has two turrets that attack independently with rapid-fire laser blasts, enabling it to keep more than one target pinned down. Unlike the main gun, these turrets can be destroyed. Destroying the turrets deals heavy damage, but also changes the behavior of the Destroyer. Destroying one turret decreases the time the Destroyer takes between attacks. Destroying both turrets doubles the Destroyer's movement speed, making it much harder to evade, and cover more difficult to maintain. It also allows the Destroyer more melee attacks.

Energy Dome: When in melee range, the Destroyer emits a burst of energy that hits targets all around, even through cover. This attack deals heavy damage, so keep your distance at all times when fighting this powerful foe.

FIGHTING TACTICS

Each Destroyer turret has independent health and shield values from the main body. Taking out a Destroyer's turrets deals a heavy amount of damage to the unit's main body, making these great targets to focus on before unleashing your attack on its body.

The Destroyer's shield sets this unit apart from the other heavy units. Once the shield is down, prime the Destroyer with some fire damage. Once primed, it will cause damage over time to the Destroyer. During this time, there's no need to worry about the shield regenerating, allowing you to seek alternate cover or reload your arsenal.

MASS EFFECT ANDROMEDA

Multiplayer Weapons

Overview

Before going into battle, you have the option of equipping up to two weapons from four different groups. Card packs unlock additional weapons. A duplicate weapon card grants a small stat boost. A weapon hits its maximum potential at Level 10.

Equipping weapons causes your encumbrance meter to grow. Once it passes the small line on the left side of the bar, you begin to take a debuff to your power cooldowns. Your cooldowns never decrease below 100%, but they can increase all the way to 300%, meaning your powers take triple the amount of time to reload. Bear in mind, encumbrance only affects powers with cooldowns. If you use a power that utilizes power cells, like the Frag Grenade, this doesn't affect you.

It is a good idea to keep a mix of weapons that allow you to attack at multiple distances effectively. For example, a sniper rifle may not work well at close range, so consider having a pistol or shotgun on hand for when things get up close and personal.

You may also want to choose weapons that complement your skills. For example, a biotic player has a variety of close-range powers, so match them with an assault rifle for medium-to-long-range encounters to effectively fight an enemy at any distance.

MASS EFFECT ANDROMEDA

Multiplayer Weapons

MP Assault Rifles

Assault rifles are great all-medium range. They're fairly accurate and best utilized when fired in bursts. Due to their lower fire rate, they're weaker at close range when rapid fire comes into play.

CYCLONE

DAMAGE
RATE OF FIRE
ACCURACY
MAX CLIP SIZE 5C
MAX EXTRA AMMO 250
WEIGHT 25

Rarity	Rare
Type	Assault Rifle
Firing Type	Automatic
Ballistic Type	Standard Bullet

The Cyclone's rapid rate of fire requires a short warm-up before use. The rifle's massive capacity balances its mediocre accuracy. As its manufacturer states, "With so many rounds to spare, what does it matter if a few don't land?" The Cyclone was removed from production years prior to the Andromeda Initiative's departure due to intense maintenance requirements, but some soldiers still swear by it.

M-31 FIRLCON

DAMAGE
RATE OF FIRE
ACCURACY
MAX CLIP SIZE 6
MAX EXTRA AMMO 34
WEIGHT 19

Rarity	Rare
Type	Grenade Launcher
Firing Type	Semi-Automatic
Ballistic Type	Grenade

Lighter and more accurate than most grenade launchers, the Andromeda Initiative's M-37 Falcon generates its ammunition from the Milky Way's radiation hit. The launcher and explosives contain sensors that allow the miniature grenades to bounce off walls and rooms, then detonate immediately on contact with an enemy target.

M-8 AVENGER

DAMAGE
RATE OF FIRE
ACCURACY
MAX CLIP SIZE 30
MAX EXTRA AMMO 317
WEIGHT 17

Rarity	Common
Type	Assault Rifle
Firing Type	Automatic
Ballistic Type	Standard Bullet

A common and versatile assault rifle, the M-8 Avenger's modular design and inexpensive components made it a favorite of military groups and mercenaries in the Milky Way. Many Avengers were acquired for Andromeda Initiative security forces. The sturdy rifle has a reputation for being reliable and easy to use.

M-96 MATTOCK

DAMAGE
RATE OF FIRE
ACCURACY
MAX CLIP SIZE 16
MAX EXTRA AMMO 112
WEIGHT 20

Rarity	Uncommon
Type	Marksman Rifle
Firing Type	Semi-Automatic
Ballistic Type	Standard Bullet

The M-96 Mattock's increased power is favored by marksmen looking to bring down hardened targets. Its lack of an automatic setting was originally advertised as a feature rather than a shortcoming, as it suits a user's tendency to spray inaccurate fire under stress.

M1 VIRLATYRE

DAMAGE
RATE OF FIRE
ACCURACY
MAX CLIP SIZE 16
MAX EXTRA AMMO 140
WEIGHT 18

Rarity	Ultra Rare
Type	Assault Rifle
Firing Type	Two-Shot Burst
Ballistic Type	Standard Bullet

A variant of the Avenger that fires two-shot bursts, the Valkyrie was once standard-issue for new recruits to the Milky Way's Alliance military. The exceptionally well-crafted rifle is also a hot black market item. How the Andromeda Initiative procured a crate intended for N7-trained Alliance fighters remains a mystery.

P.R.W.

DAMAGE
RATE OF FIRE
ACCURACY
MAX CLIP SIZE 53
MAX EXTRA AMMO —
WEIGHT 23

Rarity	Ultra Rare
Type	Beam Weapon
Firing Type	Continuous Beam
Ballistic Type	Particle Beam

The Particle Accelerator Weapon (P.A.W.) fires a continuous high-energy particle beam with incredible accuracy. For short-term operations, its power supply is effectively inexhaustible, and overheating is the only concern. The P.A.W. combines Remnant particle beam technology with Andromeda initiative targeting and stabilizers. Theoretically, it may be scalable to a ship-sized version.

REV'ENANT

DAMAGE
RATE OF FIRE
ACCURACY
MAX CLIP SIZE 60
MAX EXTRA AMMO 400
WEIGHT 23

Rarity	Rare
Type	Assault Rifle
Firing Type	Automatic
Ballistic Type	Standard Bullet

Rare and expensive in the Milky Way galaxy—the preference of warlords over soldiers—the high-capacity Revenant was studied and illegally duplicated by Andromeda Initiative engineers. Though inaccurate, the fully automatic rifle can obliterate foes with a sustained barrage.

BRASHTORM

DAMAGE
RATE OF FIRE
ACCURACY
MAX CLIP SIZE 12
MAX EXTRA AMMO 80
WEIGHT 15

Rarity	Rare
Type	Marksman Rifle
Firing Type	Semi-Automatic
Ballistic Type	Standard Bullet

A highly accurate rifle, the Sandstorm was developed by exiles from the Nexus after their arrival in Heleus. The design of the semi-automatic weapon has been streamlined and appears to adapt certain non-initiative technologies.

SONIC

DAMAGE
RATE OF FIRE
ACCURACY
MAX CLIP SIZE 120
MAX EXTRA AMMO 247
WEIGHT 37

Rarity	Ultra Rare
Type	Assault Rifle
Firing Type	(Charged) Automatic
Ballistic Type	Plasma Rounds

The massive turit Sonred, translated as "resistance," rapidly unleashes plasma-surrounded projectiles after a brief charging period. Much of the Sonred's size is devoted to insulating the user from its own power. A damaged Sonred could incinerate its wielder's hands while continuing to fire.

SWEEPER

DAMAGE
RATE OF FIRE
ACCURACY
MAX CLIP SIZE 22
MAX EXTRA AMMO —
WEIGHT 15

Rarity	Rare
Type	Assault Rifle
Firing Type	Three-Shot Burst
Ballistic Type	Particle Bursts

The Sweeper—a particle weapon that fires three-shot bursts—is largely a mystery to its own developers. The weapon is derived from Remnant technology repurposed for Andromeda initiative needs. It does not require reloading but is prone to overheating. Sweepers should be turned over for study between missions.

THOKIN

DAMAGE
RATE OF FIRE
ACCURACY
MAX CLIP SIZE 20
MAX EXTRA AMMO 178
WEIGHT 19

Rarity	Rare
Type	Assault Rifle
Firing Type	Automatic
Ballistic Type	Plasma Tracking Rounds

The turit Thokin, translated to "sudden death," fires tracking-enabled, plasma-surrounded rounds. The tracking effect—enabled by magnetic-field adjustors in the projectiles—is slight but useful, particularly given the Thokin's low ammunition capacity. With such a weapon, accuracy is everything.

ZYKLON

DAMAGE
RATE OF FIRE
ACCURACY
MAX CLIP SIZE 24
MAX EXTRA AMMO 192
WEIGHT 29

Rarity	Uncommon
Type	Assault Rifle
Firing Type	Semi-Automatic (Three-Shot Charge)
Ballistic Type	Plasma Rounds

The turit Zyklon rifle is a mainstay among turit forces. This semi-automatic weapon can be overcharged to release its standard plasma-surrounded projectiles in a three-round burst at increased power—a feature that earned the weapon its name, roughly translated as "three stars."

MASS EFFECT ANDROMEDA

Multiplayer Weapons
MP Pistols

Pistols are close-range weapons that mainly deal low damage. These weapons rely on fast, accurate fire from the user in close proximity to put enemies down. They can be effective at medium range in a pinch if you're able to hit an enemy's weak point.

CHIMAERA

DAMAGE	
RATE OF FIRE	
ACCURACY	
MAX CLIP SIZE	6
MAX EXTRA AMMO	36
WEIGHT	10

Rarity	Uncommon
Type	Heavy Pistol
Firing Type	Semi-Automatic
Ballistic Type	Standard Bullet

A heavy semi-automatic pistol, the powerful Carnifex was the preferred choice of Milky Way mercenaries. An expensive weapon, its marketing materials featured a charging kroger alongside the tagline "Don't you wish Carnifex was at your side?"

CHINOOK

DAMAGE	
RATE OF FIRE	
ACCURACY	
MAX CLIP SIZE	50
MAX EXTRA AMMO	411
WEIGHT	9

Rarity	Common
Type	Submachine Gun
Firing Type	Automatic
Ballistic Type	Standard Bullet

This sturdy submachine gun is standard-issue inside the Andromeda Initiative's security forces. The Initiative commissioned the automatic Chinook from the Darius Rock Combine Services. The company heavily customized one of their existing weapons to meet Initiative needs.

EQUALIZER

DAMAGE	
RATE OF FIRE	
ACCURACY	
MAX CLIP SIZE	42
MAX EXTRA AMMO	—
WEIGHT	11

Rarity	Rare
Type	Submachine Gun
Firing Type	Automatic
Ballistic Type	Particle Blasts

A simple but powerful merger of Remnant and Initiative technology, the Equalizer fires high-energy particle blasts that lose damage over distance, making it ineffective at close ranges. The more powerful blasts also don't require reloading, but will overheat from continuous use. Initiative researchers are eager to see more from her kind.

H-200 HORNET

DAMAGE	
RATE OF FIRE	
ACCURACY	
MAX CLIP SIZE	24
MAX EXTRA AMMO	213
WEIGHT	7

Rarity	Rare
Type	Heavy Submachine Gun
Firing Type	Three-Shot Burst
Ballistic Type	Standard Bullet

Originally created in the Milky Way by the pacemilitary group Cerberus, the M-29 Hornet is a heavy submachine gun that fires three-round bursts. The Andromeda Initiative's Hornet stockpile was seized from a Cerberus base by the Systems Alliance, then brought to the Initiative at a semi-legal auction.

M-3 PREDITOR

DAMAGE	
RATE OF FIRE	
ACCURACY	
MAX CLIP SIZE	15
MAX EXTRA AMMO	100
WEIGHT	4

Rarity	Common
Type	Pistol
Firing Type	Semi-Automatic
Ballistic Type	Standard Bullet

A reliable semi-automatic pistol originally manufactured by Darius Rock Control, the rapid-fire Predator is a dowdy and inexpensive weapon. Although Milky Way militaries generally avoided using the Predator, the Andromeda Initiative obtained and adjusted several hundred of them.

M-6 PHOLARIS

DAMAGE	
RATE OF FIRE	
ACCURACY	
MAX CLIP SIZE	12
MAX EXTRA AMMO	86
WEIGHT	9

Rarity	Uncommon
Type	Pistol
Firing Type	Semi-Automatic
Ballistic Type	Standard Bullet

In the Milky Way, the M-6 Phalanx was the product of the Alliance's Offensive Handgun Project. It's an accurate close-quarters weapon with minimal recoil and rapid-shooting power. The service purchased by the Andromeda Initiative were intended for civilian use, but are modified for more robust applications.

M1 EROLE

DAMAGE	
RATE OF FIRE	
ACCURACY	
MAX CLIP SIZE	18
MAX EXTRA AMMO	185
WEIGHT	4

Rarity	Ultra Rare
Type	Pistol
Firing Type	Semi-Automatic
Ballistic Type	Standard Bullet

An update of the M-5 Phalanx, the compact Eagle was named after the Desert Eagle pistol that gained a romantic reputation among collectors due to its popularity in classic Earth action movies. A sympathetic agent inside the Systems Alliance provided the Initiative with the R-07 military variant.

M7 LAWRENCINE

DAMAGE	
RATE OF FIRE	
ACCURACY	
MAX CLIP SIZE	40
MAX EXTRA AMMO	288
WEIGHT	14

Rarity	Ultra Rare
Type	Submachine Gun
Firing Type	Automatic
Ballistic Type	Standard

A disciplined marksman can hit targets with alarming speed using the submachine gun. In the Milky Way, the Hurricane was standard-issue in many Systems Alliance squads. Its proponents demanded that a small stock be acquired for the Andromeda Initiative's security forces.

MJOLNIRO

DAMAGE	
RATE OF FIRE	
ACCURACY	
MAX CLIP SIZE	70
MAX EXTRA AMMO	432
WEIGHT	4

Rarity	Ultra Rare
Type	Submachine Gun
Firing Type	Automatic
Ballistic Type	Plasma Rounds

A deadly heir submachine gun with plasma-surrounded projectiles, the Rozeena's firing rate increases with every shot. Although clearly designed for kett, the Rozeena's translated to 1000mbs No.1 appears to incorporate technology from another species—perhaps an ally or kett vassal.

SCORPION

DAMAGE	
RATE OF FIRE	
ACCURACY	
MAX CLIP SIZE	4
MAX EXTRA AMMO	27
WEIGHT	3

Rarity	Rare
Type	Sticky Grenade Launcher
Firing Type	Semi-Automatic
Ballistic Type	Sticky Grenades

The Scorpion is a mini-grenade launcher with adhesive explosives that stick to walls and detonate after a short countdown. In the Milky Way, the Scorpion was issued to the Salarian Special Tasks Group as small units could contain large enemy forces. The Initiative procured and modified a small number of the weapons.

SIDEWINDER

DAMAGE	
RATE OF FIRE	
ACCURACY	
MAX CLIP SIZE	6
MAX EXTRA AMMO	47
WEIGHT	3

Rarity	Rare
Type	Heavy Pistol
Firing Type	Semi-Automatic
Ballistic Type	Standard Bullet

The Sidewinder rapid-fire pistol is a newly developed weapon, crafted by Nexus exiles with materials and technologies unique to the Andromeda Initiative and the Helius Cluster. Versatile and reliable, the Sidewinder is perfect for a user with few resources to fall back on.

TALON

DAMAGE	
RATE OF FIRE	
ACCURACY	
MAX CLIP SIZE	4
MAX EXTRA AMMO	31
WEIGHT	7

Rarity	Rare
Type	Heavy Pistol
Firing Type	Semi-Automatic
Ballistic Type	Shotgun Shot

The slow-firing semi-automatic Talon scatters projectiles like a shotgun. Its seeds feed a excessive enough that it requires six separate ammunition blocks that rotate like a twentieth-century revolver to prevent premature melting of the shot.

LSH-M3R

DAMAGE	
RATE OF FIRE	
ACCURACY	
MAX CLIP SIZE	1
MAX EXTRA AMMO	19
WEIGHT	14

Rarity	Ultra Rare
Type	Heavy Pistol
Firing Type	Single Shot
Ballistic Type	Plasma Discharge

An engram pistol with an incredible punch, the Lichic, translated as "resonance," fires slowly and needs constant reloading, but has massive stopping power. Its plasma-energy discharge is likely derivative of kett technology.

MASS EFFECT ANDROMEDA

Multiplayer Weapons

MP Shotguns

Like fighting at close range? Then shotguns are for you. Shotguns are great for holding pieces of cover where enemies are forced to fight in close proximity. Their ability to deal heavy amounts of damage at a moment's notice comes in handy when moving through hallways.

Enemies at a distance pose a greater threat to a player armed with nothing but a shotgun. Because the shotgun's bullets spread once they leave the gun barrel, the full potential damage doesn't hit the target.

DHRN

Rarity	Ultra Rare
Type	Slug Shotgun
Firing Type	Semi-Automatic
Ballistic Type	Plasma Slug

The Dhan is a kett semi-automatic weapon that unleashes a single plasma-surrounded projectile capable of causing devastating damage. The Dhan's large and dense projectiles can knock down opponents and generate magnetic fields sufficient to sustain plasma spheres. "Dhan" appears to translate to "peace-bringer."

DISCIPLE

Rarity	Uncommon
Type	Shotgun
Firing Type	Semi-Automatic
Ballistic Type	Shotgun Shot

A relatively lightweight shotgun originally built in the Milky Way for asari justicars and commandos, the semi-automatic Disciple uses shells packed with microscale submunitions to inflict serious damage. The Initiative has only a small number of Disciples due to the asari's unwillingness to freely share their design.

HEBH

Rarity	Rare
Type	Slug Shotgun
Firing Type	Semi-Automatic
Ballistic Type	Plasma Shotgun Slug

The semi-automatic Hesh, translated to "order," is a kett weapon that fires clusters of plasma-surrounded projectiles. Fired rounds are powerful enough to stagger most foes and demand submission from the rest.

M-23 KRTPNR

Rarity	Common
Type	Shotgun
Firing Type	Semi-Automatic
Ballistic Type	Shotgun Shot

The M-23 Katana was a popular shotgun among Milky Way soldiers, criminals, and civilians. It was manufactured by Arrake Technologies, an Earth-based company eager to do business with the Andromeda Initiative.

N'Y CRUSRCER

Rarity	Ultra Rare
Type	Slug Shotgun
Firing Type	Semi-Automatic
Ballistic Type	Shotgun Slug

This semi-automatic weapon has greater accuracy than most shotguns because it fires an ultra-dense projectile instead of a typical pellet cluster. The Initiative's stock of N7 Crusaders is heavily modified compared to those used in the Milky Way's Systems Alliance.

N'Y PIRHNR

Rarity	Ultra Rare
Type	Automatic Shotgun
Firing Type	Automatic
Ballistic Type	Shotgun Shot

An assault shotgun capable of automatic fire, the Piranha is devastating at short range but loses accuracy with distance. In the Milky Way, the Piranha was a "proof of concept" prototype designed by the Bradford Engineering Group. The Initiative procured fewer Piranhas when the company's military clients deferred on a full production run.

REEGFIR CARBINE

Rarity	Rare
Type	Energy Shotgun
Firing Type	Continuous
Ballistic Type	Energy Beams

Designed by the Milky Way's quarians, the Reegar Carbine is effective against shields and radiates enough energy to harm enemies near the main target. An invisible laser ionizes the air and creates a path for high-amperage electric shock. It was named for the quarian Reegar in recognition of his service against the geth.

RUZRO

Rarity	Uncommon
Type	Shotgun
Firing Type	Semi-Automatic
Ballistic Type	Shotgun Shot

A massive, slow-firing krogan shotgun, the Ruzad delivers a forceful blow that staggers any enemy who survives. In krogan's language, "Ruzad" translates loosely as "judge." The krogan consider the name more obvious than humorous or ironic.

SCATTERSHOT

Rarity	Rare
Type	Shotgun
Firing Type	Semi-Automatic
Ballistic Type	Tracking Particle Blasts

The Scattershot fires particle blasts that can focus upon a target at range. This focusing effect is a result of advanced Initiative targeting systems and invisible "tracing" of paths for the Remnant-derived energy beams. The Scattershot does not require reloading, but will overheat from continuous use.

VENOM

Rarity	Rare
Type	Cluster Grenade Launcher
Firing Type	Semi-Automatic
Ballistic Type	Cluster Grenades

This powerful semi-automatic shotgun fires explosive rounds and—after a short charging period—unleashes clusters of micro-grenades that rebound off obstacles. The Salarian Special Tasks Group designed the Venom for missions into hostile territory and extraction operations.

MASS EFFECT ANDROMEDA

Multiplayer Weapons

MP Sniper Rifles

Sniper rifles are deadly long-range weapons that become even more destructive in the hands of a skilled player. While hitting an enemy with a sniper rifle deals heavy damage, landing hits on the weak points of an enemy makes short work of them.

Don't forget to use your scope when using a sniper rifle. Any shot fired from the hip will take a large damage default. This default and done rate of fire for sniper rifles mean they're incredibly weak at close range. Make sure you have a close-range power or weapon like a shotgun ready to go.

BLACK WIDOW

DAMAGE	
RATE OF FIRE	
ACCURACY	
MAX CLIP SIZE	3
MAX EXTRA AMMO	15
WEIGHT	42

Rarity	Ultra Rare
Type	Heavy Sniper Rifle
Firing Type	Single Action
Ballistic Type	Standard Bullet

A smaller, higher-capacity variation of the Widow sniper rifle, the Black Widow fires three powerful shots per thermal clip. Andromeda Initiative engineers have adjusted the scope for improved optical enhancement in a variety of atmospheres.

INCISOR

DAMAGE	
RATE OF FIRE	
ACCURACY	
MAX CLIP SIZE	55
MAX EXTRA AMMO	75
WEIGHT	40

Rarity	Uncommon
Type	Sniper Rifle
Firing Type	(Three Shot Charge) Semi-Automatic
Ballistic Type	Standard Bullet

Capable of three-shot bursts, the Incisor was part of a new wave of Milky Way sniper rifles designed to overload a foe's defenses. It was advertised as having negligible recoil, though the second and third rounds frequently "drift" in combat conditions, distributing damage along a vertical line.

KPSPSNC

DAMAGE	
RATE OF FIRE	
ACCURACY	
MAX CLIP SIZE	8
MAX EXTRA AMMO	—
WEIGHT	37

Rarity	Ultra Rare
Type	Sniper Rifle
Firing Type	Semi-Automatic
Ballistic Type	Particle Bursts

The Inferno began as a failed design for a Remnant particle beam shotgun, then was reconfigured into a semi-automatic sniper weapon. It fires short, high-energy particle bursts and requires no reloading. This allows a sniper to continue firing until the weapon overheats.

ISHWRRY

DAMAGE	
RATE OF FIRE	
ACCURACY	
MAX CLIP SIZE	1
MAX EXTRA AMMO	99
WEIGHT	35

Rarity	Rare
Type	Heavy Sniper Rifle
Firing Type	Single Shot
Ballistic Type	Standard Bullet

This heavy engraver sniper rifle uses an entire thermal clip with each shot. It's slow to reload but strikes with massive force. The Ishway's name translates as "good-bye," and the weapon has the nasty habit when it comes to foe power. The engrav take understandable pride in its effectiveness.

LAVAFY

DAMAGE	
RATE OF FIRE	
ACCURACY	
MAX CLIP SIZE	2
MAX EXTRA AMMO	10
WEIGHT	31

Rarity	Rare
Type	Heavy Sniper Rifle
Firing Type	Single Action
Ballistic Type	Plasma Rounds

The Ion Lance, translated to "watcher," is a slow-firing sniper rifle that uses plasma-surrounded projectiles. The user can change the semi-automatic Lavafy's magnetic field to modify the plasma containment—the longer the charge builds, the more powerful the shot. At full power, the Lance is among the deadliest weapons in any galaxy.

H-168 INGRN

DAMAGE	
RATE OF FIRE	
ACCURACY	
MAX CLIP SIZE	25
MAX EXTRA AMMO	195
WEIGHT	31

Rarity	Rare
Type	Sniper Rifle
Firing Type	Automatic
Ballistic Type	Standard Bullet

An acoustic sniper rifle with a rapid-fire rate and a large capacity to compensate for its limited scope, the Indra was still in an early stage of development when the Andromeda Initiative acquired its schematics. Initiative engineers completed the design and manufactured a number of functional prototypes.

VT-VRLBNT

DAMAGE	
RATE OF FIRE	
ACCURACY	
MAX CLIP SIZE	3
MAX EXTRA AMMO	22
WEIGHT	37

Rarity	Ultra Rare
Type	Sniper Rifle
Firing Type	Semi-Automatic
Ballistic Type	Standard Bullet

This semi-automatic sniper rifle has a sophisticated fire-control system that improves accuracy at the cost of reduced capacity. In the Milky Way, N7 soldiers generally found the Valiant's increased precision and quick reloads a worthy trade-off.

NRLPGRN

DAMAGE	
RATE OF FIRE	
ACCURACY	
MAX CLIP SIZE	4
MAX EXTRA AMMO	29
WEIGHT	42

Rarity	Ultra Rare
Type	Explosive Plasma Launcher
Firing Type	Single Action
Ballistic Type	Explosive Plasma Round

The Nidalien, translated to "talon," is a suped-like capable of firing plasma-surrounded projectiles that explode on impact and burn anyone in the immediate vicinity. The Nidalien mixes precision targeting with indiscriminate damage. What that says about cool military culture is a subject best left to expert xenosociologists.

IRRPTGR

DAMAGE	
RATE OF FIRE	
ACCURACY	
MAX CLIP SIZE	15
MAX EXTRA AMMO	75
WEIGHT	35

Rarity	Uncommon
Type	Sniper Rifle
Firing Type	Automatic
Ballistic Type	Standard Bullet

An automatic sniper rifle derived from a similar turian weapon, the Raptor isn't especially accurate but combines some of the best traits of a sniper weapon and an assault rifle. The Raptor was commissioned among Initiative security personnel, who argued the weapon had no place in the Initiative's mission of exploration. A small number were still stocked.

SHHOOW

DAMAGE	
RATE OF FIRE	
ACCURACY	
MAX CLIP SIZE	40
MAX EXTRA AMMO	—
WEIGHT	31

Rarity	Rare
Type	Beam Weapon
Firing Type	Continuous Beam
Ballistic Type	Particle Beam

Remnant particle technology is the cornerstone of the Shadow's design, though the Andromeda Initiative is responsible for the rest. The scoped rifle fires a continuous beam with pinpoint precision, only enjoying if it overheats. As with all reverse-engineered Remnant tech, the Shadow should be considered experimental.

VYNKLSHRVER

DAMAGE	
RATE OF FIRE	
ACCURACY	
MAX CLIP SIZE	2
MAX EXTRA AMMO	22
WEIGHT	35

Rarity	Rare
Type	Heavy Sniper Rifle
Firing Type	Single Action
Ballistic Type	Standard Bullet

The Vanquisher is a versatile sniper rifle that packs a solid punch. Built by Nexus exiles, it is highly modular and damage-resistant—its effectiveness is unimpeded by sandstorms, snow, and other weather conditions.

VXPER

DAMAGE	
RATE OF FIRE	
ACCURACY	
MAX CLIP SIZE	7
MAX EXTRA AMMO	25
WEIGHT	37

Rarity	Rare
Type	Sniper Rifle
Firing Type	Semi-Automatic
Ballistic Type	Standard Bullet

The Viper is a rapid-fire rifle popular with military snipers who appreciated a long-range gun that can wrap off multiple shots in a short period. Powerless Materials add a considerable number of layers to the Initiative at a discount in return for undisclosed favors from Initiative founder Jen Garson.

WSZOW

DAMAGE	
RATE OF FIRE	
ACCURACY	
MAX CLIP SIZE	14
MAX EXTRA AMMO	65
WEIGHT	50

Rarity	Uncommon
Type	Heavy Sniper Rifle
Firing Type	Single Shot
Ballistic Type	Standard Bullet

The Widow is a heavy and formidable single-shot sniper rifle originally designed for use against armored vehicles. The Widows acquired by the Andromeda Initiative have been modified for additional portability—the original model was nearly unusable by organic life-forms.

Multiplayer Skills and Powers

Overview

Unlike Single-Player, Mass Effect: Andromeda's Multiplayer mode features skill sets specific to each individual character. Each Multiplayer character features three powers and two skills.

Powers**:** Powers are manually activated and require either a recharge period or a power cell for each use.

Skills: Skills are passive, meaning they remain constantly active through an entire match, always granting their benefits.

One skill point is invested into each power for every character once they're unlocked. Passive skills don't come with any skill points invested, leaving you to choose whether you want to activate them. As you level up your character via experience, you gain skill points at a rate of three per level. You earn a small additional amount of skill points when you receive duplicate cards of the same character. Points are not traded between characters. In other words, if you invest in a skill or power that multiple characters share, the bonus only applies to the character in which you invest the points. To change or refund skill points spent, purchase a Character Re-Spec from the Item Store with mission funds. Using the Re-Spec completely refunds your skill points, allowing you to refocus your spending.

MASS EFFECT ANDROMEDA

Multiplayer Skills and Powers
Biotic

Biotic skills mainly focus on movement and close combat, using the environment to deal extra damage. Biotic-based skills gravely outrange normal time unless otherwise noted. No biotic skill requires power cells, eliminating the need to visit ammo crates!

POWERS

ANNIHILATION

Prime: Yes	No	Detonate: No	Characters: Asari Avitari, Kroger Gladiator

Weaves rapidly shifting mass effect fields to create a powerful vortex that pulls targets together and primes for combo detonations. Other powers, such as Lift Grenade, can be used to throw the reduced range spread.

RANK 1	RANK 2	RANK 3	RANK 4	RANK 5	RANK 6
Annihilation Radius (m): 6	**Recharge Speed**: +10% Recharge Speed	**Damage**: +10% Damage	**Survivor Radius**: Reduces radius of survivor annihilation pulse by 1m	**Biotic Mind Control**: Annihilation's movement speed increased by 30%	**Vortex Duration**: Annihilation's survivor pulse vortex duration is increased by 1 second

TIPS

- Annihilation remains active until you're knocked out or you choose to deactivate it. Only use this power when in close range of enemies. It allows you to prime them instantly.
- It also damages enemies' shields and explosives with your pull. It moves very slowly. This can allow you to carefully place an explosive in a room to use as a trap later.

BIOTIC FLASH

Prime: No	Detonate: No	Characters: Asari Sentinel, Asari Duellist

TIPS

- Hold the button assigned to this power to keep the shield active. Lifting up early immediately drops the shield.
- A well-timed initial activation interrupts melee attacks. This skill can be used while moving, allowing you to help cover a teammate who's being knocked, getting ammo, or activating an objective.
- Point your shield in the direction of the enemy; the shield only protects damage from that direction.

CHARGE

Prime: Yes	Detonate: No	Characters: Asari Duellist, Human Female Vanguard, Human Male Vanguard, Kroger Vanguard

Allows the biotic's mass, launching the user at an opponent. Receives a one-time shield strength at the end of charge. Charge detonates overkill primers on targets.

RANK 1	RANK 2	RANK 3	RANK 4	RANK 5	RANK 6
Charge Distance (m): 15	**Recharge Speed**: +10% Recharge Speed	**Damage and Force**: +10% Damage +10% Force	**Radius**: Reduces explosion radius at end of charge by 1m	**Power Synergy**: Reduces Charge cooldown by 10% each time you kill an enemy with Charge	**Ruinion**: Reduces Charge cooldown by 10% each time you kill an enemy with Charge

TIPS

- Exhibit caution when using this power against enemies, the Outlaw specialists, who use close-range weapons. If they're not killed by the charge, they can make short work of you.

LANCE

Prime: No	Detonate: Yes	Characters: Asari Avitari, Asari Duellist, Asari Huntress, Human Kinetikist

Devastates a small area with a swiftly thrown shaft of energy. Inflicts lethal damage and can instantly wave primes, such as Hadrix.

RANK 1	RANK 2	RANK 3	RANK 4	RANK 5	RANK 6
Lance Damage: 1,000 **Lance Force**: 1,000 **Time Of Flight**: 1.0	**Recharge Speed**: +10% Recharge Speed	**Damage and Force**: +10% Damage +10% Force	**Radius**: Increases explosion radius by 1m	**Anti-Shield**: +50% Damage to Shields	**Shield-Powered**: Gives you a small charge bar, but consumes 33% shields when used

TIPS

- Lance does not track any enemies and fires out of your hand much like a standard projectile, meaning you need to be cautious to not miss.
- To make the most of Lance, take your time aiming for the head or other weak points of an enemy. A successful hit grants bonus damage.
- Research the Shield-Powered Rank 6 upgrade to use Lance with no recharge at the cost of your shield. This completely changes the role of your biotic character as you'll need shield regenerations much more frequently. This side effect pushes you out of the close-range attack style and forces you to play a bit more passively, launching biotic lances from behind cover at greater distances.

NOVA

Prime: Requires Rank 6 Seismic Nova	Detonate: No	Characters: Human Female Vanguard, Human Male Vanguard, Kroger Gladiator, Kroger Vanguard

Recklessly boots energy to produce a pandimensional shockwave, inflicting high damage and sending nearby enemies airborne.

RANK 1	RANK 2	RANK 3	RANK 4	RANK 5	RANK 6
Radius: +20% Damage Radius	**Recharge Speed**: +10% Recharge Speed	**Damage and Force**: +10% Damage +10% Force	**Anti-Armor**: +50% Damage to Armor	**Anti-Shield**: Nova has no lockout time, but consumes 50% Biotic Power	**Seismic Nova**: Upgrades Nova to the ground and-pound version. Nova is now unusable. Only provides damage, no knockback to enemies, and affected enemies are affected. +50% Damage +25% Force

TIPS

- Nova can be used mid-jump, causing the player to produce the Nova open impact with the ground. Use this method to leap from tall buildings or cross and land a Nova on unsuspecting enemies.
- Upgrade to Rank 6 Seismic Nova to instantly prime unidentified and unarmored, normal-sized enemies. Follow up this area-of-effect prime with a couple of detonating attacks like Lance. With help from your team, you'll eliminate a group of enemies, dealing heavy damage to any not affected by initial prime.

PULL

Prime: Yes	Detonate: No	Characters: Human Female Adept, Human Male Adept, Human Kinetikist, Kroger Gladiator

Top Button: Lifts an unshielded, unarmored enemy helplessly into the air and primes the target for combo detonations. Hold down the button to pull the target closer to you. Can be used in combo with Nitro Throw (Level 5 or 6 Tech Burst).

RANK 1	RANK 2	RANK 3	RANK 4	RANK 5	RANK 6
Pull Force: 1,000 **Time Of Flight**: 1.0	**Recharge Speed**: +10% Recharge Speed	**Duration**: +10% Duration	**Radius**: Increases pull radius by 1m	**Expose**: Affecting enemies with Pull also causes them to be exposed	**Biotic Drain**: Pull now also drains some of the target's biotic power as well as shields. Restored per Second: 10

TIPS

- If your Throw ability is recharging or you just want to lose an enemy softly off the edge of the map, press the Melee button to throw your enemy in a short distance. This is great for moving explosives and quickly killing enemies while conserving your other powers.

SHOCKWAVE

Prime: Requires Rank 6 Lifting Shockwave	Detonate: Yes	Characters: Human Female Adept, Human Female Vanguard, Human Male Adept, Human Male Vanguard

Blasts enemies with a line of explosions that damage and knock through walls and other solid objects.

RANK 1	RANK 2	RANK 3	RANK 4	RANK 5	RANK 6
Shockwave Force: 1,000 **Time Of Flight**: 1.0	**Recharge Speed**: +10% Recharge Speed	**Damage and Force**: +10% Damage +10% Force	**Radius**: Increases explosion radius by 1m	**Seismic Shockwave**: Upgrades Shockwave to Seismic Shockwave. Shockwave is now unusable. Affected enemies are affected. +50% Damage +25% Force	**Lifting Shockwave**: Upgrades Shockwave to briefly suspend affected enemies and primed for combo detonations.

TIPS

- Shockwave's ability to pierce through objects is perfect for dealing with cover-takers like the Assembler.
- Have you primed an enemy, but they end up behind a wall or cover? No problem—the Shockwave rips right through cover, detonating any primed enemies it comes in contact with along the way.

SINGULARITY

Prime: Yes	Detonate: No	Characters: Asari Adept, Human Female Adept, Human Male Adept

Creates a gravity well that traps and disrupts unshielded and unarmored enemies caught in its field. Singularity also inflicts damage over time and can prime enemies for detonations.

RANK 1	RANK 2	RANK 3	RANK 4	RANK 5	RANK 6
Singularity Duration: 10s	**Recharge Speed**: +10% Recharge Speed	**Damage**: +10% DPS	**Radius**: +2m Radius	**Singularity Speed**: Singularity moves 50% faster	**Expanding Singularity**: Singularity's radius increases as the Singularity...

TIPS

- All targets within the vicinity of the Singularity are instantly biotic-primed.
- Shielded and armored enemies aren't disabled through biotic effects but still take damage over time and are slowed. The Singularity makes this skill useful against tough units—like those from Cerberus, Kett, and Remnant—that are otherwise immune to biotic effects.
- End the Singularity early by tapping the same Skill button.

THROW

Prime: No	Detonate: Yes	Characters: Asari Huntress, Asari Sentinel, Human Female Sentinel, Human Kinetikist, Human Male Sentinel

Blasts your target with a biotic projectile, inflicting heavy damage and detonating any primers.

RANK 1	RANK 2	RANK 3	RANK 4	RANK 5	RANK 6
Throw Damage: 1,000 **Throw Force**: 1,000 **Time Of Flight**: 0.5	**Recharge Speed**: +10% Recharge Speed	**Damage and Force**: +10% Damage +10% Force	**Radius**: Increases explosion radius by 1m	**Duration**: Enemies float longer in the air. +10% Duration	**Double Throw**: Throw now launches projectiles that seek enemies. +50% Damage Spread

TIPS

- When using Throw with targets currently affected by the Pull power, all hold targets fly forward, seeking any available soft targets.
- Thrown targets are temporarily unaffected by gravity, causing them to float for a short time. This allows them to be thrown farther.
- Enemies can be damaged by any thrown objects, including other enemies. Use this tactic to damage two units instead of one.

SKILLS

BARRIER

Prime: Debuffs: Yes	Detonate: No	Characters: Asari Adept, Asari Duellist, Asari Huntress, Human Female Adept, Human Female Vanguard, Human Kinetikist, Human Male Adept, Human Male Vanguard

The biotic creates a mass effect field that protects himself and allies.

RANK 1	RANK 2	RANK 3	RANK 4	RANK 5	RANK 6
Barrier Health: 500 **Regeneration Delay**: 5s **Regeneration Rate**: 10% Barrier Health Regen per Second	**Recharge Speed**: +10% Recharge Speed	**Barrier Power**: Barrier now provides 10% Damage Resistance and 10% Biotic Power Regen	**Barrier Duration**: Increases duration of barrier by 5 seconds. +50% Barrier Duration	**Barrier Health**: +50% Barrier Health. +50% Health. Total Threshold: 25%	**Barrier Burst**: Barrier is now ready to automatically activate when it's damaged and every 30s. Barrier Health Threshold: 10%

TIPS

- Rank 6 Saving Barrier allows you to be a little more aggressive in your play style. This upgrade instantly replenishes your shield when you reach low health, once every 10 seconds. This upgrade may provide the extra time you need to breathe, reload a teammate or disarm an objective.

BIOTIC PRECISION

Prime: No	Detonate: No	Characters: Human Kinetikist

Accumulate charges by killing enemies and then activate Ascension. While ascended, all powers consume no biotic energy or recharge times. Ascension ends when shields drop.

RANK 1	RANK 2	RANK 3	RANK 4	RANK 5	RANK 6
Ascension Required Charges: 10 **Ascension Duration**: 10s	**Biotic Power**: +10% Power Force	**Increased Electrical Charge**: Increased Charges to Activate	**Ascension Cooldown**: 45 Power Cooldown Reduction	**Cooldown Reduction**: +50% All Combo Radiate.	**Efficient Ascension**: Required Charges to Activate Ascension reduced by 2. Ascension Duration increased by 5s.

TIPS

- Hold the Melee button to consume all charges and activate Biotic Ascension.
- The Human Kinetikist is the only character with access to this skill.
- When Biotic Ascension is activated, step behind cover and use Throw and Lance to deal enhanced damage. Keep your eyes on your shield to avoid letting it drop completely.
- Once your shield drops, you must acquire new charges to activate this skill again.

OFFENSIVE BIOTICS

Prime: No	Detonate: No	Characters: Asari Adept, Asari Duellist, Asari Huntress, Asari Sentinel, Human Female Adept, Human Male Adept, Kroger Gladiator

Training to maximize biotic damage to enemy targets.

RANK 1	RANK 2	RANK 3	RANK 4	RANK 5	RANK 6
Power Information: +5% Power Damage	**Biotic Damage**: +10% Weapon Damage	**Power Information**: +5% Power Damage	**Power Efficiency**: +10% Power Recharge Speed	**Combo Detonation**: +50% All Combo Radiate.	**Biotic Warrior**: +10% Weapon and melee damage for 5s after using a combo ability. Stacks three times. Duration refreshed.

Power Enhancement

- +10% Power Damage
- +10% Power Force

Expose

Affecting enemies with biotics causes them to be exposed, increasing damage from all sources.

- +10% Damage From Biotic Explosions
- +10% Damage From Biotic Primers

Biotic Expert

- +10% Biotic Damage
- +10% Biotic Power Force

Biotic Warrior

- +10% weapon and melee damage for 5s after using a combo ability. Stacks three times. Duration refreshed.
- +10% Biotic Damage
- +10% Biotic Power Force

TIPS

- Upgrading to the Rank 3 skill Expose causes enemies affected by your biotics to take increased damage from all sources, including your teammates' weapons and abilities.

MASS EFFECT ANDROMEDA

Multiplayer Skills and Powers

Combat

Combat powers can be used to deal heavy area-of-effect damage and increase the effectiveness of your weapons, a few great defensive powers can help players using combat powers to maintain more of a tank role, pulling all nearby damage per-second with short bursts of damage from grenades and other abilities. Many combat powers require power cells for activation.

PICKUPS

BRAINCRACK

Prime: Requires Rank 6 Electric Defense | **Detonate:** No | **Characters:** Human Female Sentinel, Human Male Sentinel

Deploys a temporary energy turret that automatically activates and fires at nearby enemies. Turret has a limited duration and will self-destruct after detonating.

Rank 1	Rank 2	Rank 3	Rank 4	Rank 5
Duration: 15 Seconds Cooldown: 60 Seconds Capacity: 1	Power Cells: 1	Duration: 20 Seconds	Power Cells: 2	Duration: 25 Seconds

Weapon Feedback
Damage Dealt: 1% per 1% of Weapon Damage
Critical Damage: 1% per 10% of Weapon Critical Damage
Accuracy: 1% per 1% of Weapon Accuracy

Range: 30 Meters

Turret Duration
Duration: 15 Seconds
Cooldown: 60 Seconds

MASS EFFECT ANDROMEDA

Multiplayer Skills and Powers

Tech

Tech covers those powers aiming at using and altering technology. Having a good tech power at our main axe is the earliest increase your survivability. Tech tech powers require power cells for use, allowing you to continuously use your powers after recharge without visiting ammo crates.

POWERS

PERPETUAL FLYTRAP

Prime: Requires Rank 8 Eos Ammo or Flamethrower | **Detonate:** No | **Characters:** Angara Scourged, Human Female Engineer, Human Male Engineer, Kett Engineer

Deploys an automated turret that fires flame projectiles.

Duration: 30 seconds

Recharge Speed: Normal

Turret Gun Damage:

Cryo Ammo
Chance:
Duration:
Effect: Freezes enemies, allowing for Cryo Explosion and Cryo Blast combos.

Flamethrower
Chance:
Effect: Flamethrower ammo causes enemies to burn, dealing damage over time.

Rank 1	Rank 2	Rank 3

Ground Type	Damage Type	Damage	Recharge Speed	Duration
Default	Default	1	Default	30
Dirt	Dirt	1	Dirt	30
Grass	Grass	1	Grass	30
Metal	Metal	1	Metal	30
Mud	Mud	1	Mud	30
Rock	Rock	1	Rock	30
Sand	Sand	1	Sand	30
Snow	Snow	1	Snow	30
Water	Water	1	Water	30
Wood	Wood	1	Wood	30

TIPS

- Tip Button: Directs the turret to attack a specific target.
- Hold Button: Decelerates the turret, damaging nearby enemies. The turret also detonates upon death, dealing area of effect damage to enemies within a set area.
- The turret is not only good at guarding your back and dealing out light damage to enemies, it also activates the affection of enemies if left in an open area. This allows you to flank larger enemies or make a quick escape to a new defensive position.
- Upgrading the Flame Rank 8 upgrade permits the turret to prime targets. Cryo ammo doesn't deal any additional base damage, but slows, freezes, and inflicts a 100% critical hit chance against all frozen enemies, causing it to deal massive front of cut bonus. Flamethrower increases the base damage of the turret by adding a flamethrower attack that deals damage over time. Both of these upgrades are extremely powerful, and you should always have one of them equipped. Both upgrades can be equipped to increase your survivability against swarms.

AV ENHANCER STRIKER

Prime: Requires Rank 8 Disrupting Strike | **Detonate:** No | **Characters:** Asuyan Avenger

Dual tactical outfits specifically designed to enhance the combat capabilities of Asuyan Avengers.

Duration:

Recharge Speed:

Damage:

Disrupting Strike
Activation:
Effect: Disrupting Strike upgrade, causing Disrupting Strike to deal damage to enemies in a cone.

Enhancer Strike
Activation:
Effect: Enhancer Strike upgrade, causing Enhancer Strike to deal damage to enemies in a cone.

Rank 1	Rank 2	Rank 3	Rank 4	Rank 5	Rank 6

Ground Type	Damage Type	Damage	Recharge Speed	Duration
Default	Default	1	Default	30
Dirt	Dirt	1	Dirt	30
Grass	Grass	1	Grass	30
Metal	Metal	1	Metal	30
Mud	Mud	1	Mud	30
Rock	Rock	1	Rock	30
Sand	Sand	1	Sand	30
Snow	Snow	1	Snow	30
Water	Water	1	Water	30
Wood	Wood	1	Wood	30

TIPS

- Avenger Strike is only available to the Asuyna Avenger. The power can deal high damage to a single enemy however, it leaves you exposed to close range attacks if the enemy is still alive upon deactivation.
- Rank 5 Disrupting Strike increases the effectiveness of the power against superheated and shielded enemies. Disrupting Strike also slowly rapidly targets and primes them for combo detonations.

CRYO SHIELD

Prime: Yes | **Detonate:** No | **Characters:** Human Female Engineer, Human Male Engineer

Blinds a targeted Sentinel drone or Remnant machine, causing it to attack its allies.

Duration:

Recharge Speed:

Damage:

Frozen:

Knife Freeze
Activation:
Effect: Knife Freeze upgrade, causing Cryo Knife to deal damage to enemies.

Cryo Trap
Activation:
Effect: Cryo Trap upgrade, causing Cryo Knife to deal damage to enemies.

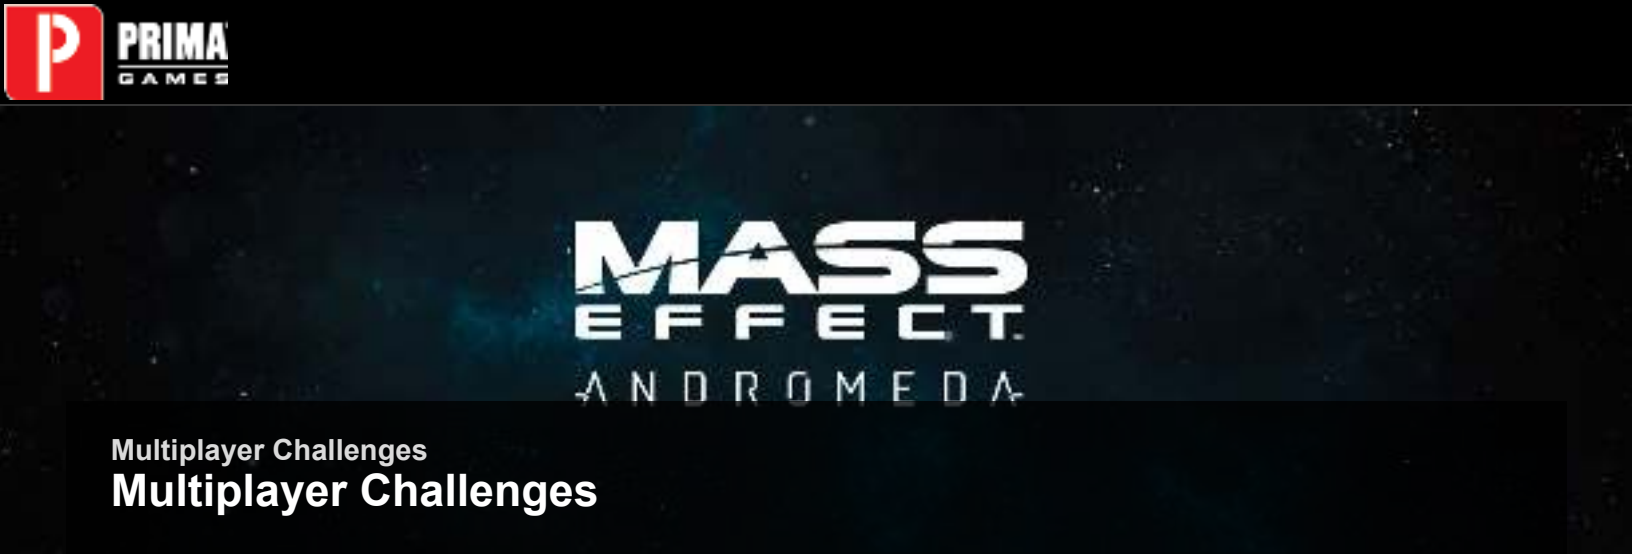
Rank 1	Rank 2	Rank 3	Rank 4	Rank 5	Rank 6

Ground Type	Damage Type	Damage	Recharge Speed	Duration
Default	Default	1	Default	30
Dirt	Dirt	1	Dirt	30
Grass	Grass	1	Grass	30
Metal	Metal	1	Metal	30
Mud	Mud	1	Mud	30
Rock	Rock	1	Rock	30
Sand	Sand	1	Sand	30
Snow	Snow	1	Snow	30
Water	Water	1	Water	30
Wood	Wood	1	Wood	30

TIPS

- Cryo Trap upgrade, causing Cryo Knife to deal damage to enemies.

- Cryo Knife



Multiplayer Challenges

Challenges reward you with Challenge Points that help increase your APEX rating. They may also award crates full of characters, weapons, boosters, and more. You can view progress on your challenges in the prestige menu, which is accessible from the main Multiplayer menu.

Strike Team & APEX Missions

OVERVIEW

To access the Strike Team Missions, you must speak to Kandros on the Nexus. Speak to him in the Operations area to learn how to send out Strike Teams on a mission. After doing so, you can manage your Strike Teams from the Tempest.

While in the Research and Development room, locate the various devices around the table. In particular, look for the one called "Strike Team Missions." At the outset, you only have one Strike Team, but it's possible to purchase more. To do so, you'll need Mission Funds, which are acquired by completing Strike Team missions.

The Missions List shows all the missions that are currently available. This list includes normal Strike Team Missions in addition to APEX Missions. To take part in an APEX Mission, you can send a Strike Team to complete it or complete it yourself.

It's important to note that the Strike Team missions and APEX missions are timed and each mission has a required completion time. Additionally, each mission has its own expiration timer; once it ends, the mission will no longer be available.

APEX MISSIONS: PROLOGUE

APEX PROLOGUE MISSION 01: DRACK'S MISSING SCOUTS

Completion Date: 3/27/2017

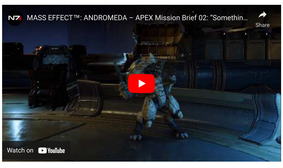
New Map: Firebase Paradox (Limited Time Only)

New Kit: Krogan Gladiator

New Weapon: Ruzad Shotgun

A number of krogan scout patrols have gone missing on a kett-held planet. Their last known position was near Firebase Paradox, a kett base built around Remnant artifacts they've been analyzing and exporting off-planet. We need to fan out and investigate.

APEX PROLOGUE MISSION 02: SOMETHING'S GONE BERSERK



Completion Date: 4/03/2017

Limited Time: Thermal Clip Storage, Juggernaut Shield

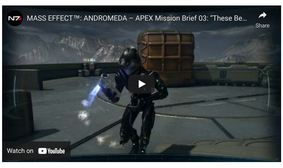
New Enemy: Exalted Krogan Behemoth

Map: Firebase Derelict

Once a Krogan scout who was captured by the kett, he was forced into the horrific "Exaltation" process… and now emerges as a frightening new creature ready to unleash its wrath!

APEX MISSIONS: THE REMNANT INVESTIGATION

APEX MISSION BRIEF 03: THESE BEAUTIFUL, KILLER BOTS



Completion Date: 4/10/2017

New Kit: Salarian Architect

New Weapon: Inferno Sniper Rifle

Limited Time: Adaptive War Amp, Juggernaut Shield

Map: Firebase Paradox

The kett's fascination with the Remnant means that the bases are near important Remnant sites. We need to find out why.

APEX MISSION BRIEF 04: THOSE ALIEN ARTIFACTS AREN'T FOR YOU

Completion Date: 4/17/2017

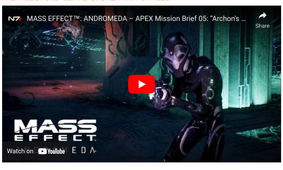
New Item: Combatives Upgrade

Limited Time: Adaptive War Amp

New Map: Firebase Sandstorm

Scavengers were stealing Remnant artifacts to sell on the black market. The more they took the more the kett came knocking. Not sure why the kett are so interested. We needed to get those back.

APEX MISSION BRIEF 05: ARCHON'S REMNANT FORTRESS



Completion Date: 4/24/2017

Limited Time: Combatives Upgrade, Engineering Kit

New Map: Remnant Ruins–A dark and dangerous cave network where the Archon keeps a collection of Remnant.

Retrieved artifacts gave us the location of a cave network where the Archon keeps a collection of Remnant. In order to gain vital intel, we went there to find out what the Archon was doing with that Remnant tech.

APEX MISSIONS: REMNANT DESCENT

APEX MISSION BRIEF 06: CHASING THE ARCHON'S OBSESSION

Completion Date: 5/15/2017

New Character: Turian Agent

New Weapon: X5 Ghost Assault Rifle

New Equipment: Enhanced Munitions

New Equipment: Guerilla Upgrade

Map: Firebase Paradox

Match Modifier: Weakened Assault Team: Your team's success is heavily dependent on your ability to work together as you fight through the challenge of reduced shields and health – using your combined power and shield boosters will come in handy as well.

Your objective is the kett facility where they're trying to activate a Remnant device with a unique energy source. You'll be dropped in while the weather conditions have their sensors confused to eliminate the kett presence there quickly and quietly.

APEX MISSION BRIEF 07: UNRAVELING THE REMNANT

Completion Date: 5/22/2017

New Item: Shock Trooper Upgrade

Map: Remnant Ruins

Match Modifier: Empty Resupply: Think carefully about how to work together and strategize your approach as a team to overcome the challenge of having all the ammo boxes empty and maximize the opportunity of a +800% increase to your Ammo and +8 Power Resources.

You must explore the Archon's dungeon lair to discover the dark secrets he is hiding and uncover why this area is so important to him.

APEX MISSION BRIEF 08: DEEPER INTO THE RUINS

Completion Date: 5/29/2017

New Item: Shield Enhancer

Item: Shock Trooper Upgrade

Map: Remnant Location

Match Modifier: Weakened Assault Team: Your team's success is heavily dependent on your ability to work together as you fight through the challenge of reduced shields and health – using your combined power and shield boosters will come in handy as well.

We needed to follow every lead to uncover the special Remnant tech the Archon believes he has.

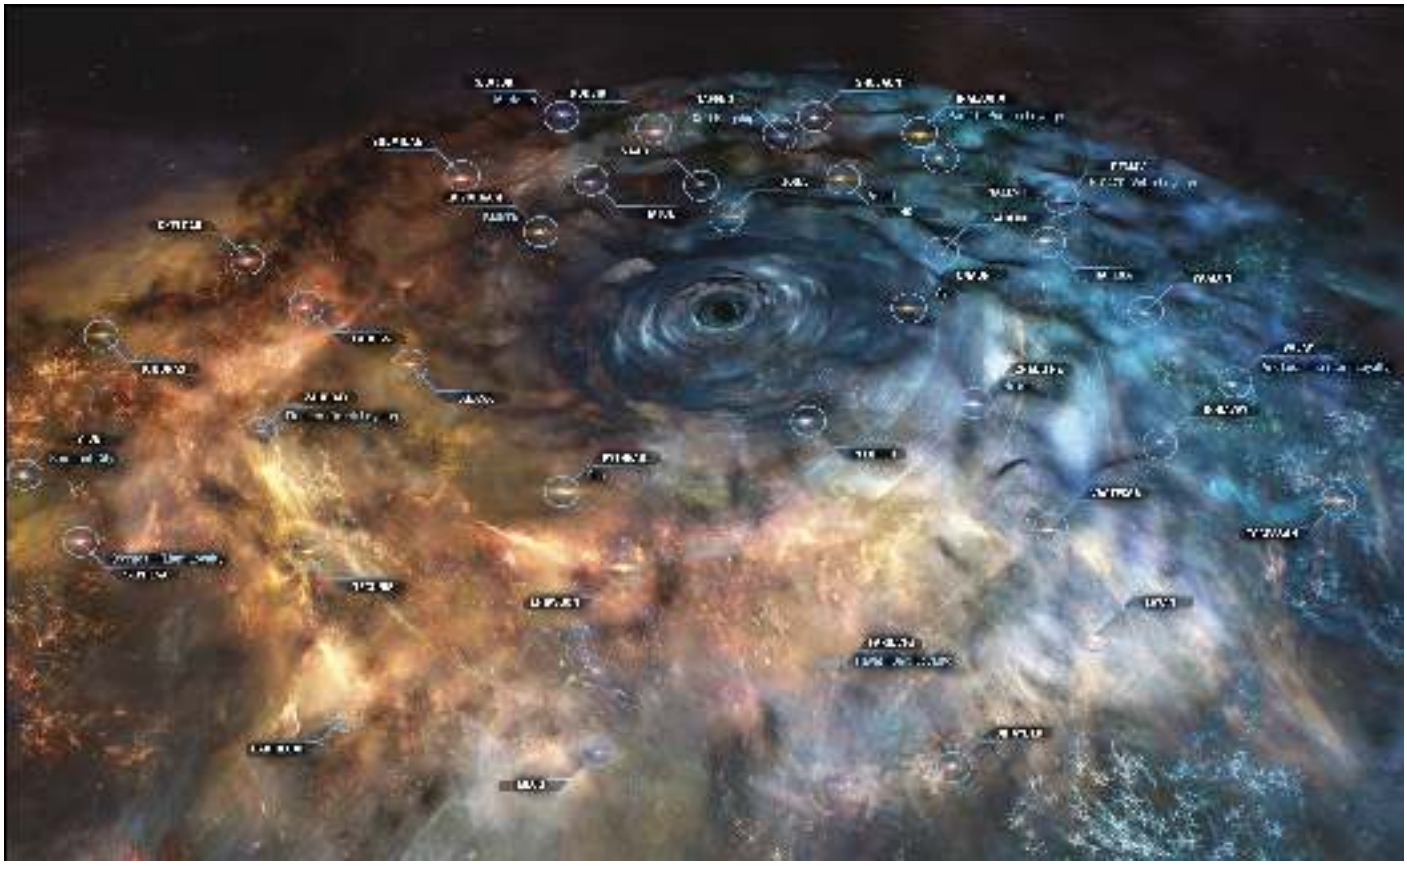
MASS EFFECT ANDROMEDA

Exploring the Heleus Cluster

The Heleus Cluster

The Heleus Cluster is a group of star systems and a subset of the Andromeda galaxy. It's where of the game's events take place. There are 35 star systems in the cluster to explore. Initially, most systems are undiscovered and are unlocked gradually at various points throughout the main storyline.

HELEUS CLUSTER STAR SYSTEMS



MASS Mayhem

The following Cruiser Navigators Fellows will start in today's MASS Mayhem Grand Prix Race starting after Week 12. The Race Director is **Jon Jones** (Jones, J.).

VIGNOLES, A. MITTON BRIGADIER

MASS EFFECT ANDROMEDA

UNC Maps

Eos

Eos was the earliest “golden world”, identified as Habitat 1. However, it’s plagued by radioactive storms, making it almost impossible for life to thrive. The Initiative has attempted to colonize Eos twice, both ending in failure.

MASS EFFECT ANDROMEDA

UNC Maps

Voeld

Voeld, also known as Habitat 6, was once a temperate garden world until its orbit was affected by the Scourge. This put the planet into an ice age where only the hardiest of wildlife can withstand the extreme cold. The angara once enjoyed a flourishing civilization here.

MASS EFFECT ANDROMEDA

UNC Maps

Kadara

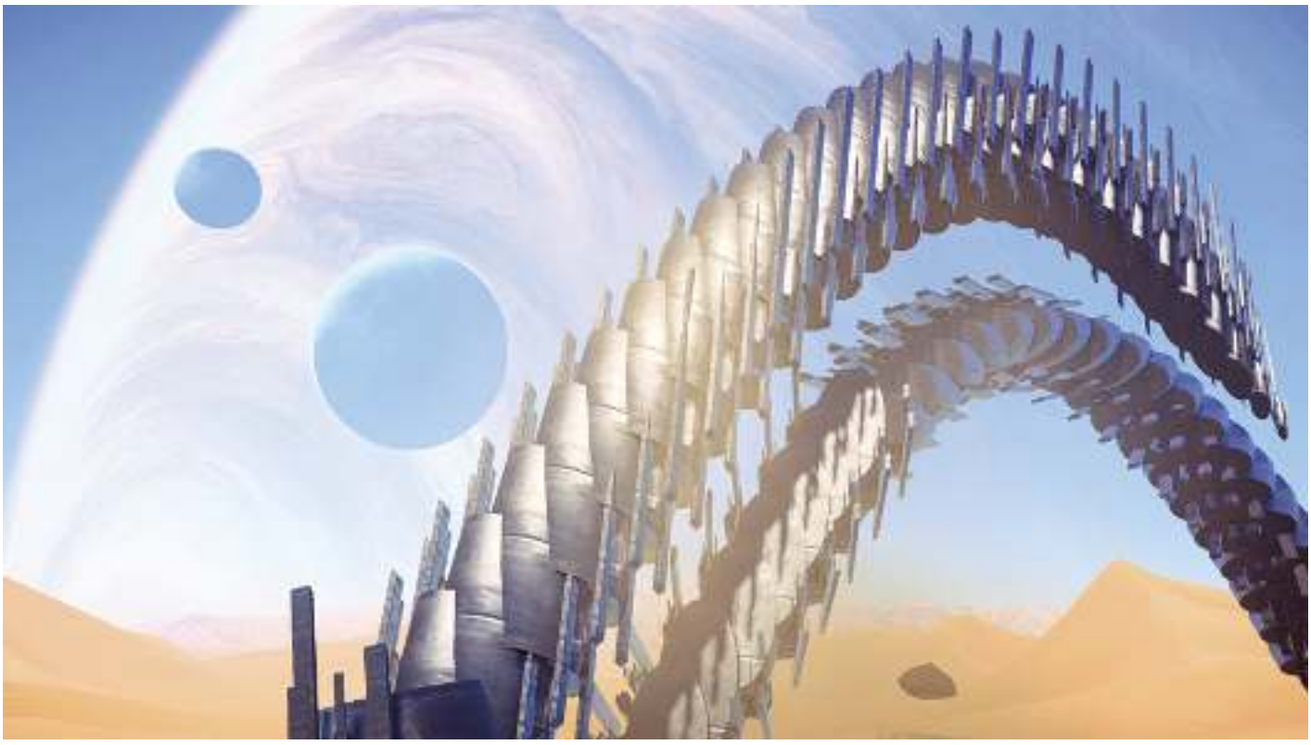
Kadara was designated Habitat 4. Although it's rich in water, much of it is highly toxic. Kadara is now home to pirates, outlaws, and exiles.

MASS EFFECT ANDROMEDA

UNC Maps

Elaaden

Elaaden, also known as Habitat 2, is a vast, desert hellscape, and home to a faction of krogan exiles. Settlement for most species is impossible due to extreme heat and non-existent water vapor.



Introduction

Welcome to Mass Effect

This guide aims to comprehensively cover every single aspect of the game, with emphasis on the game's key features—most notably, its incredible combat, character-progression system, and wealth of optional missions.

The first chapter is an introduction to the *Mass Effect* universe. For returning players, it's a refresher course on the lore, events, and origins of species from the original *Mass Effect* trilogy. For greener players, it serves as a solid foundation and understanding of the game's setting.

Chapter 2: Basics **and** Game Mechanics can be viewed as a highly detailed instruction manual. It can be used as an encyclopedia for the game's myriad components that make up the entire game. Note that there may be light spoilers in Game Mechanics Glossary and Combat **Concepts Expanded**.

The Priority Ops walkthrough is an outline of the main game, with key choices and results highlighted and marked for readers and players who want to see every outcome for the major choices in the game.

The meat of the guide is found in the Secondary Ops chapter, with every "side mission" thoroughly explained and major decisions and outcomes covered.

WHAT IS "MASS EFFECT"?

Using the mysterious substance element zero, "mass effect" technology manipulates the mass of objects, enabling everything from advanced weaponry to interstellar space travel. Humans first uncovered this technology on Mars, left behind by an ancient species called the Protheans, and its discovery changed the course of human history. The Prothean mass relays, capable of transporting starships hundreds of light years, eventually connected humanity to a galactic community of alien species, uncharted worlds, and challenging new frontiers.

WHAT IS ANDROMEDA?

The Andromeda Galaxy, 2.5 million light years from the Milky Way, is the setting for *Mass Effect: Andromeda*. Those who joined the Andromeda Initiative's expedition to settle in a new galaxy are largely unaware of the events surrounding Commander Shepard back in the Milky Way.

MASS EFFECT ANDROMEDA

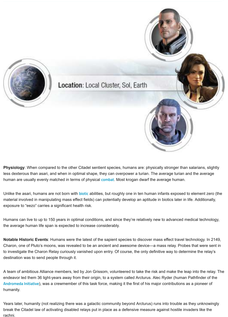
Introduction

Milky Way Species

In the *Mass Effect* universe, the Milky Way is home to numerous sapient and technologically advanced lifeforms. However, only a few of these species are represented in the Andromeda Initiative's ambitious voyage.

While *Mass Effect: Andromeda* takes place in an entirely new and unexplored galaxy, the story focuses on the journey of the following sentient Milky Way species. (Although other Milky Way species such as the quarians and hanar may be involved with the Initiative, they have yet to arrive at the Helios Cluster.)

HUMAN



Location: Local Cluster, Sol, Earth

Physiology: When compared to the other Citadel sentient species, humans are physically stronger than salarians, slightly less dexterous than asari, and when in optimal shape, they can overpower a turian. The average turian and the average human are usually evenly matched in terms of physical combat. Most krogan dwarf the average human.

Unlike the asari, humans are not born with biotic abilities, but roughly one in ten humans infants exposed to element zero (the material involved in manipulating mass effect fields) can potentially develop an aptitude in biotics later in life. Additionally, exposure to "eezo" carries a significant health risk.

Humans can live to up to 150 years in optimal conditions, and since they're relatively new to advanced medical technology, the average human life span is expected to increase considerably.

Notable Historic Events: Humans were the latest of the sapient species to discover mass effect travel technology. In 2148, Charon, one of Pluto's moons, was discovered to be an ancient and dormant Reaper—a mass relay. Probes that were sent to investigate the Charon Relay curiously vanished upon entry. Of course, the only definitive way to determine the relay's destination was to send people through it.

A team of ambitious Alliance members, led by Jon Grissom, volunteered to take the risk and make the leap into the relay. The endeavor led them 36 light-years away from their origin, to a system called Arcturus. Alec Ryder (human Pathfinder of the Andromeda Initiative), was a crewmember of this taste force, making it the first of his major contributions as a pioneer of humanity.

Years later, humanity (not realizing there was a galactic community beyond Arcturus) runs into trouble as they unknowingly break the Citadel law of activating dreadnought relays *just in place as a defensive measure* against hostile invaders like the rachni.

The turians, peacekeepers of Citadel space, detect the relay activation and respond aggressively. They view their act of aggression as justifiable punishment upon the humans. The human fleet retaliates, lashing out with a surprisingly effective counterattack, successfully destroying several turian ships. This escalates the conflict into a war with many battles taking place on the human colony, Shanxi.

Although Shanxi is occupied by turian forces, it's eventually liberated by the Second Fleet. To prevent further bloodshed and an intergalactic space war, the Citadel Council intervenes before the turians can launch another attack.

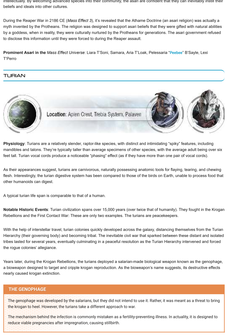
Impressed by the Alliance's decision-making capabilities and adaptations to their aggression, the Citadel Council mediates a truce. This marks a major milestone for humanity as they learn of an established intergalactic governing body. However, high tensions persist between the two species, with activist groups forming in both camps. Around this time, an eventually significant human named Jien Garson develops a particular hatred for humans.

CITADEL COUNCIL

The Citadel is a highly advanced space station located in the Milky Way. It houses the Citadel Council, the galaxy's governing body. The council was established in 500 BCE, long before humanity could even discover space travel. To put it in perspective, *Mass Effect* is in 2183. Commander Shepard's achievements as the first human Spectre paved the way for humans achieving a seat on the council. With humanity's major involvement, the Andromeda initiative launches in 2185. It features a coalition of many of the Milky Way species that are active members of the Citadel Council.

Prominent Humans in the *Mass Effect* Universe: Commander Shepard, Miranda Lawson, David Anderson, Alec Ryder, Scott and Sara Ryder, Liam Kosta, Cora Harper

ASARI



Location: Athena Nebula, Parnitha System, Thessia

Physiology: Out of all of the known sapient species, asari are the most comparable to humans. The two species share several commonalities, including five like-sized fingers on each hand. Their comparable physical dimensions allow them to share clothing and armor. While the asari are a mono-gender species, their voices and physical features strongly resemble those of a human female and they're usually referred to with feminine nouns.

Aside from physique, asari are wildly different from humans (and most other species) in terms of cellular regeneration and sexual reproduction. With a much lower cellular decay rate, asari can naturally live for over 1,000 years. However, the most fascinating aspect of asari biology is their reproduction process—a process referred to as "melding."

Even though they only have a single gender, asari still require a partner for the melding process (they're not asexual). Melding always produces an asari offspring, since no DNA from the partner is taken. Instead, the asari virtually synchronizes her nervous system with her partner's, proceeding to map and instill the partner's desirable traits onto her offspring.

All asari are born with biotic capabilities that can be unlocked and developed later in their lives.

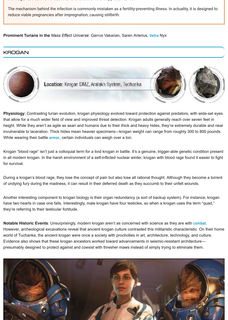
Notable Historic Events: The asari were one of the first Milky Way species to develop interstellar travel and, in 500 BCE, they became the first modern species to discover t he Citadel—humanity's first encounter with the council doesn't occur for another 2,700 years.

Thanks to their long life spans, the asari naturally have long-lasting and powerful influences over other species, culturally and intellectually. By welcoming advanced species into their community, the asari are confident that they can inevitably instill their beliefs and ideals into other cultures.

During the Reaper War in 2186 CE (*Mass Effect 3*), it's revealed that the Athame Doctrine (an asari religion) was actually a myth invented by the Protheans. The religion was designed to support asari beliefs that they were gifted with natural abilities by a goddess, when in reality, they were culturally nurtured by the Protheans for generations. The asari government refused to disclose this information until they were forced to during the Reaper assault.

Prominent Asari in the *Mass Effect* Universe: Liara T'Soni, Samara, Aria T'Loak, Peleseria "Peebee" B'Sayle, Lexi T'Perro

TURIAN



Location: Apien Crest, Tetica System, Palaven

Physiology: Turians are a relatively slender, raptor-like species, with distinct and intimidating "spiky" features, including mandibles and talons. They're typically taller than average humans and have a slightly greater mass. The average adult being over six feet tall. Turian vocal cords produce a noticeable "phasing" effect (as if they have more than one pair of vocal cords).

As their appearances suggest, turians are carnivorous, naturally possessing anatomic tools for flaying, tearing, and chewing flesh. Additionally, their digestive systems have been compared to those of the birds on Earth, unable to process food that other humanoids can digest.

A typical turian life span is comparable to that of a human.

Notable Historic Events: Turian civilization spans over 15,000 years (over twice that of humanity). They fought in the Krogan Rebellions and the First Contact War. These are only two examples. The turians are peacekeepers.

With the help of interstellar travel, turian colonies quickly developed across the galaxy, distancing themselves from the Turian Hierarchy (their governing body) and becoming tribal. The inevitable civil war that sparked between these distant and isolated tribes lasted for several years, eventually culminating in a peaceful resolution as the Turian Hierarchy intervened and forced the rogue colonies' allegiance.

Years later, during the Krogan Rebellions, the turians deployed a salarian-made biological weapon—the genophage, a bioweapon designed to target and cripple krogan reproduction. As the bioweapon's name suggests, its destructive effects nearly caused krogan extinction.

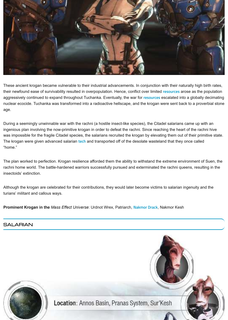
THE GENOPHAGE

The genophage was developed by the salarians, but they did not intend to use it. Rather, it was meant as a threat to bring the krogan to heel. However, the turians take a different approach to war.

The mechanism behind the infection is commonly mistaken as a fertility-preventing illness. In actuality, it is designed to reduce viable pregnancies after impregnation, causing stillbirth.

Prominent Turians in the *Mass Effect* Universe: Garrus Vakarian, Saren Arterius, Nyra

KROGAN



Location: Kongar (3A), Arcturus System, Tadtorka

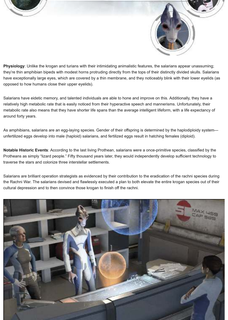
Physiology: Contrasting turian evolution, krogan physiology evolved toward protective against predators, with rare-but-eyes that allow for a much better field of view and improved threat detection. Krogan adults generally reach over seven feet in height. While they aren't as agile as asari and humans due to their thick and heavy hides, they're extremely durable and near invulnerable to laceration. Thick hides mean heavier specimens—krogan weight can range from roughly 300 to 800 pounds. While wearing their battle armor, certain individuals can weigh over a ton.

Krogan "blood rage" isn't just a colloquial term for a hot-tongue in battle. It's a genuine, trigger-able genetic condition present in all modern krogan. In the harsh environment of a self-inflicted nuclear winter, krogan with blood rage found it easier to fight for survival.

During a krogan's blood rage, they lose the concept of pain but also lose all rational thought. Although they become a torrent of undying fury during the madness, it can result in their dethroned deaths as they succumb to their unfelt wounds.

Another interesting component to krogan biology is their organ redundancy (a sort of backup system). For instance, krogan have two livers, two hearts, and two brains. Many male krogan have four testicles, so when a krogan uses the term "quad," they're referring to their testicular fortitude.

Notable Historic Events: Unsurprisingly, modern krogan aren't as concerned with science as they are with combat. However, archeological excavations reveal that ancient krogan cultures contrasted this militaristic characteristic. On their home world of Tuchanka, the ancient krogan were once a society with proclivities in art, architecture, technology, and culture. Evidence also shows that these krogan ancestors worked toward advancements in seismic-resistant architecture—presumably designed to protect against and coexist with thresher maws instead of simply trying to eliminate them.



These ancient krogan became vulnerable to their industrial advancements. In conjunction with their naturally high birth rates, their newfound access to advanced medicine created a population explosion. The conflict quickly escalated when the population aggressively continued to expand throughout Tuchanka. Eventually, the war for resources escalated into a globally decimating nuclear exchange. Tuchanka was transformed into a radioactive hellscape, and the krogan were sent back to a primordial stone age.

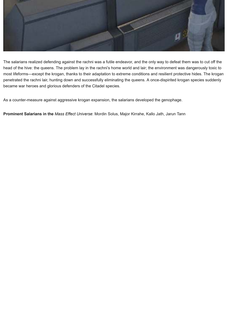
During a seemingly unwinnable war with the rachni (a hostile insect-like species), the Citadel salarians came up with an ingenious plan involving the now-primitive krogan in order to defeat the rachni. Since reaching the heart of the rachni hive was impossible for the fragile Citadel species, the salarians recruited the krogan by elevating them out of the primitive state. The krogan were given advanced salarian tech and transported off of the desolate wasteland that they once called "home."

The plan worked to perfection. Krogan resilience afforded them the ability to withstand the extreme environment of Suen, the rachni home world. The battle-hardened warriors successfully pursued and exterminated the rachni queens, resulting in the insectoids' extinction.

Although the krogan are celebrated for their contributions, they would later become victims to salarian ingenuity and the turians' mildest and callous ways.

Prominent Krogan in the *Mass Effect* Universe: Urdnot Wrex, Patriarch, Nakmor Drack, Nakmor Kesh

SALARIAN



Location: Annos Basin, Pranas System, Sur'Kesh

Physiology: Unlike the krogan and turians with their intimidating animalistic features, the salarians appear unassuming; they're thin amphibian lipkids with modest horns protruding directly from the tops of their distinctly domed skulls. Salarians have exceptionally large eyes, which are covered by a thin membrane, and they noticeably blink with their lower eyelids (as opposed to how humans close their upper eyelids).

Salarians have elderly memory, and talented individuals are able to hone and improve on this. Additionally, they have a relatively high metabolic rate that is easily noticed from the hyperactive speech and mannerisms. Unfortunately, their metabolic rate also means that they have shorter life spans than the average intelligent lifeform, with a life expectancy of around forty years.

As amphibians, salarians are an egg-laying species. Gender of their offspring is determined by the haplodiploidy system—unfertilized eggs develop into male (haploid) salarians, and fertilized eggs result in hatching females (diploid).

Notable Historic Events: According to the last living Prothean, salarians were a once-primitive species, classified by the Protheans as simply "lizard people." Fifty thousand years later, they would independently develop sufficient technology to traverse the stars and colonize three interstellar systems.

Salarians are brilliant operation strategists as evidenced by their contribution to the eradication of the rachni species during the Rachni War. The salarians devised and fearlessly executed a plan to both elevate the entire krogan species out of their cultural depression and to then convince those krogan to finish off the rachni.

The salarians realized defending against the rachni was a futile endeavor, and the only way to defeat them was to cut off the head of the hive: the queens. The problem lay in the rachni's home world and fact: the environment was dangerously toxic to most lifeforms—except the krogan, thanks to their adaptation to extreme conditions and resilient protective hides. The krogan penetrated the rachni lair, hunting down and successfully eliminating the queens. A once-dispirited krogan species suddenly became war heroes and glorious defenders of the Citadel species.

As a counter-measure against aggressive krogan expansion, the salarians developed the genophage.

Prominent Salarians in the *Mass Effect* Universe: Mordin Solus, Major Kirrahe, Kelly Jahl, Jarun Tann

Mass Effect Trilogy and Andromeda Timeline

MASS EFFECT: ANDROMEDA EVENTS

1600–2400

The Remnant are deployed to the Heleus Cluster, installing their vaults and initiating the process of terraforming otherwise uninhabitable planets into life-enabling worlds.

1600–2400

As the only native species to the Heleus Cluster, several separate angaran civilizations develop on disparate systems in the Cluster. The angara consider Havarl to be their homeworld.

2112

Jien Garson plans an ambitious endeavor to colonize the Andromeda galaxy. This venture, known as the Andromeda Initiative, is wholly financed by Garson without government involvement.

An Initiative research team was tasked with finding habitable planets within Andromeda.

2112–2119

Prototypes of massive vessels designed for traversing to and colonizing in the Andromeda galaxy are developed. These vessels include arks and the Nexus.

2119–2184

The testing phase for the arks and the Nexus concludes, and production of these vessels commences. Near the end of this time frame, the construction of these projects causes disquiet with galactic governments. They begin to question the ulterior motives of the Initiative's plans.

2184–2185

The Initiative enlists 100,000 colonists for the journey to the Heleus Cluster.

2185

The Nexus and the four arks—human, salarian, turian, and asari—depart for the Heleus Cluster in the first wave of colonists bound for Andromeda. A second wave is planned to follow, including quarians, drell, and other species.

2185–2819

With its passengers in cryostasis, the arks traverse to Heleus. However, the vessels become separated, creating a fourteen-month travel distance between each of them.

2450–2600

The Scourge is unleashed upon Heleus, devastating the angara and sending them back into a "dark age."

2500–2750

Heleus stabilizes, and the angara begin to recover from the setback caused by the Scourge. Five unique angaran worlds advance their technology sufficiently, enabling space travel—this leads them to discover each other.

2749

Kett reconnaissance of the Heleus Cluster reveals the existence of the angara and discovery of Remnant technology.

2819–2819

The Nexus and arks arrive in a staggered fashion, separated from one another.

MASS EFFECT TRILOGY EVENTS

2183: (MASS EFFECT)

One of humanity's first colonies, Eden Prime, is attacked by a species of artificially intelligent synthetics, known as the geth.

A cycle of extinction by an ancient organic-synthetic species called the Reapers is revealed. The Reaper Sovereign attacks the Citadel but is destroyed by the Normandy thanks to Commander Shepard's efforts.

2183: (MASS EFFECT 2)

A month after the defense of the Citadel, Commander Shepard is killed in action when the Normandy is attacked by a Collector Cruiser. Shepard's body is eventually obtained by an enigmatic organization called Cerberus.

2185: (MASS EFFECT 2)

Collectors begin attacking human colonies and abducting their inhabitants.

Cerberus successfully revives Commander Shepard. Shepard leads an investigation on the attacks of human colonies and eventually defeats the Collectors, saving humanity.

2186: (MASS EFFECT 3)

The Reapers launch an invasion of Earth.

Commander Shepard finds and delivers schematics of the Crucible, a superweapon designed to stop the Reapers. The Alliance eventually completes the enormous task of constructing the device.

With the Crucible activated, Shepard is given the responsibility of deciding the fate of the galaxy.

Ryder Family History

ALEC

In 2148, a young Alec, inspired by humanity's discovery of a Prothean ruin, eagerly signed up for Alliance military duty. He impressed in every relevant aspect: having exceptional leadership skills, superb physical condition, and an extraordinary technical proficiency. Only a year later, while enlisted in a task force led by Jon Grissom, he became one of the first humans to activate and travel through a mass relay device, making his first mark on human history.

Alec's outstanding performance led him back to Earth, where he began N7 specialist training (a designation reserved for only the highest echelon of elite soldiers in the Alliance military). Within this time period, Alec met and married a biotics research specialist named Ellen. As an N7 designate, Alec witnessed firsthand the resulting horrors and devastation of the First Contact War between humans and turians.

In the 2160s, he served the human embassy as a military attaché, collecting data—specifically, scientific breakthroughs and advancements made by the other Milky Way species. Combined with his emotionally hardening experiences from the First Contact War, Alec's work and exposure to aliens on the Citadel convinced him that humans were being left behind in the technology race—signaling the initial conception of his AI. Unfortunately for Alec, his ambitions of developing an advanced AI for human use were stifled by the Citadel's ban on AI research, due to the inherent danger witnessed in the quarians' geth experiments.

Alec's wife, Ellen, was diagnosed with an incurable disease, presumably a result of her exposure to element zero in her early years of working on biotics technology. When traditional medicine failed to cure Ellen, Alec redirected his focus back to AI research, hoping it would be the answer to a seemingly hopeless situation. As a solution to separating AI vitality from that of its creators, Alec based his AI model on a symbiotic relationship. Essentially, his version of AI would not only "need" its creators, but it would also learn and understand human emotions and grant humanity new abilities. Thus, the idea of SAM was born.

Alec's illegal research was eventually shut down by the Alliance. Disgraced from the military and without sufficient resources to continue his research, his hope of curing Ellen withered. That is, until the Andromeda Initiative breathed new life into the project. The Initiative found the idea of SAM to be worth investing in for their intergalactic expedition, so they continued funding the SAM project.

Alec's hopes were revived in the form of the Initiative's ambitions, hoping to have his efforts come to fruition as a Pathfinder.

ELLEN

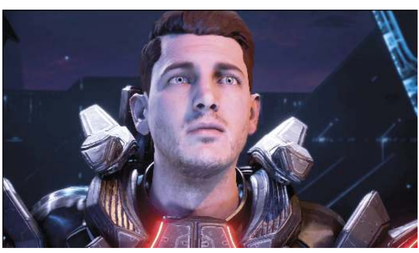
Due to her exposure to element zero in her early years researching biotics, Ellen developed an extremely rare and incurable disease. The family moved back to Earth, with Alec committing to his AI research as a means to cure Ellen of the illness. Although Alec became aloof, consumed by and obsessed with SAM's development, Ellen remained a caring and committed mother to her twins. She succumbed to the disease before the arks departed for the Heleus Cluster.

SCOTT AND SARA

Scott and Sara were born to Alec and Ellen, circa 2163. Growing up on the Citadel, the twin Ryder children experienced a variety of cultures, thanks to the melting pot of coexisting species.

SCOTT

In the early 2180s, Scott was assigned to an Alliance outpost near Arcturus Station that oversaw security for Mass Effect Relay 202. Although only a rookie, he was responsible for monitoring the relay and defending transient civilians from raiders and pirates. This line of work naturally doubled as basic combat and weapons training for him, despite not volunteering as a frontline soldier.



After his mother Ellen passed away, Scott and Sara agreed to join the Initiative with their father. Although not under an ideal circumstance, being given the opportunity to explore the cosmos was always an aspiration of his, considering his previous line of work as a station guard.

SARA

Like Scott, Sara was once a peacekeeping soldier serving in the Alliance. However, she was defending colonists in the Attican Traverse. She eventually found an opportunity to sign up with a Prothean artifacts research team to aid with support and defense. The thrill and nature of the work invigorated her sense of adventure, nudging her path closer along her father's footsteps.

Introduction

Andromeda Initiative

THE TRAILHEAD

The Trailhead is a survey ship designed for long-range, long-term exploration under a Pathfinder's command. Its lightweight and efficient design allows it to operate with a small crew and minimal resources.

Built by the Andromeda Initiative, the Trailhead makes use of several once-proprietary technologies, including an SCI stealth system originally developed by the Systems Alliance. Many of these systems were provided for the maritime Milky Way nations' ship systems in the Andromeda program.

The Trailhead's engines are a modification of the units 'ZOOT' drives that allow long-term operation by capturing a percentage of the matter bubble it maneuvers. The assisted electrical charge powers several of the Trailhead's onboard systems.

As a Pathfinder vessel, the Trailhead has Research and Development facilities, laboratories, and a well-appointed meeting space to accommodate negotiations. Living quarters are minimal but contain luxuries.

SCIENCE OFFICER: SUJI HAWAYE

Suji Hawaye is a member of the Nexus science team and holds advanced degrees in astrophysics and molecular biology. A in answering interview, she said that she was part of the Pharma Nexus team. Asari triumph more interested in the science. Her expertise has been in xenobiology, the environments set for Eezo for human gene and protein Pachira's ecosystem as a test plot.

Hawaye's work shows that when the Andromeda Initiative was building bases to develop their survey, scientific Pachira Aenaqueck seemed applied recruiting Kadis as fecundity that Jon Garson's interest was piqued. Kadis claims that the prospect of a new species to study was the reason she signed on with the Initiative, but she also has a personal connection to Pachira.

Kadis Jaffe was born on Eos Nexus and, quoting directly, 'into a life as boring even as Ari could it calculate it.' Pushed toward a career in the cult technology, she studied xenobiology and Pharma Aenaqueck. Kadis became more interested in the science. Her expertise has been in xenobiology, the environments set for Eezo for human gene and protein Pachira's ecosystem as a test plot.

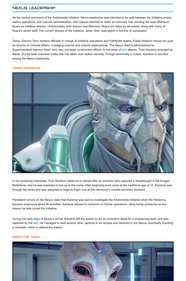
Hawaye's work shows that when the Andromeda Initiative was building bases to develop their survey, scientific Pachira Aenaqueck seemed applied recruiting Kadis as fecundity that Jon Garson's interest was piqued. Kadis claims that the prospect of a new species to study was the reason she signed on with the Initiative, but she also has a personal connection to Pachira.

PILOT: MIKLUS JATVA

Kadis Jaffe was born on Eos Nexus and, quoting directly, 'into a life as boring even as Ari could it calculate it.' Pushed toward a career in the cult technology, she studied xenobiology and Pharma Aenaqueck. Kadis became more interested in the science. Her expertise has been in xenobiology, the environments set for Eezo for human gene and protein Pachira's ecosystem as a test plot.

Hawaye's work shows that when the Andromeda Initiative was building bases to develop their survey, scientific Pachira Aenaqueck seemed applied recruiting Kadis as fecundity that Jon Garson's interest was piqued. Kadis claims that the prospect of a new species to study was the reason she signed on with the Initiative, but she also has a personal connection to Pachira.

TECHNICIAN, OFFICIAL SEL ANDERS



Technical Officer Sel Anders is chief engineer aboard the Tempest. After licensing to Andromeda aboard the Nexus, records with Lexington Nexus Pharma Aenaqueck. Kadis became more interested in the science. Her expertise has been in xenobiology, the environments set for Eezo for human gene and protein Pachira's ecosystem as a test plot.

Hawaye's work shows that when the Andromeda Initiative was building bases to develop their survey, scientific Pachira Aenaqueck seemed applied recruiting Kadis as fecundity that Jon Garson's interest was piqued. Kadis claims that the prospect of a new species to study was the reason she signed on with the Initiative, but she also has a personal connection to Pachira.

DOCTOR: LEX LYNDING

Although young by asari standards, Lex T'Perro is regarded as one of the most skilled doctors in the Andromeda Initiative. Born on the crime-ridden space station Omega, Lex began her medical career by stitching up her father, a low-level member of the Hierarchy organized crime syndicate. Lex's family was also employed as a dancer. In her screening interviews, Lex states her parents' dream was for her to 'get off the station and do something that matters.'

Following her parents' wishes, Lex left Omega to continue studying medicine as well as psychology on the Citadel, where she graduated with honors. Lex's thesis was published in the Journal of Xenobiology and Comparative Cognitive Science. Lex's published work examined the effects of the Krogan Rebellions on the Krogan psyche, and was widely praised by Krogan psychologists. It also attracted the attention of Avela Ryta, who was always on the lookout for new recruits. Avela claims she persuaded Lex to join the Andromeda Initiative. Lex, however, says that it was Avela's promise of a well-equipped lab that guaranteed Lex would sign on board. Ari remains an invaluable member of the Tempest crew.

ADEPT: NOVAKO

Meeting a suitable asari mate, the Andromeda Initiative's purchased a promising but rejected design from the Systems Alliance military. The naval quickly became apparent: on rough terrain, without the bracing of heavy armor, the chassis was prone to flex. The initial tests already developed lightweight but strong armor alloys that solved the problem.

Following the asarmic' torches, Lex left Omega to continue studying medicine as well as psychology on the Citadel, where she graduated with honors. Lex's thesis was published in the Journal of Xenobiology and Comparative Cognitive Science. Lex's published work examined the effects of the Krogan Rebellions on the Krogan psyche, and was widely praised by Krogan psychologists. THE NEXUS

STATISTICS

Length: 15.76km

Item Width (Widest Point): 4.9km

Anchorage Wheel Diameter: 3.3km

Gross Weight: 2.2 million metric tons

Max. Population (When Complete): 2.7 million

Intention as a safe anchorage, embassy, and financial center, the Nexus is a vast space station and vessel of the main art. Its design is based on the Citadel, with a central ring surrounding a massive tower. Unlike the Citadel, however, the Nexus is not within a dextroid star system. However, syncing with Nexus databases reveals that damage from the Scourge has set the timetable back significantly.

Also returning to the Nexus district of the central wheel. Unpopular than power grid, and of-load customers for orientation and temporary housing before deployment to outposts. The Nexus initiates and manages the resources that form the basis of the Andromeda Initiative's outposts. Each outpost is built around a core of Nexus personnel, and when the outpost is established, the Nexus will become the permanent seat of government for the Initiative.

NEXUS LEADERSHIP

As the central command of the Andromeda Initiative, Nexus leadership was intended to be split between the Initiative project managers and the Pathfinder. However, the Pathfinder's responsibilities have changed since the Scourge. Pathfinder Ryder and Andromeda Initiative project managers Jien Garson and Director Kallo Ketto are now the only members of the Nexus's ruling council. The current director of the Initiative, Jarun Tann, was eighth in the line of succession.

Jarun Tann's main responsibility is charge of diplomatic relations with Andromeda's Kett species. Kallo Ketto's duties for post as director of External Affairs, managing colonist and outpost deployments. The Nexus itself is administered by Administrator Jien Garson, who oversees operations and maintenance of the station. Garson's duties have increased in the aftermath of a dark-skinned militia that has taken over station security. Through functionally a civilian, Ramirez is counted among the Nexus leadership.

TANNI GRISHAM

At the leadership exchange, Tann Kallova claims he is trained after an assistant who Lexicon's underworld in the Nexus' Nightclub, and he was expected to rise up to the name. After beginning food camp at the traditional age of 15, Kandros rose through the ranks and was assigned to Nyguru Eight, one of the Hierarchy's largest farming terminals.

Ramadan rumors on the Nexus claim that Kandros was sent to investigate the Andromeda Initiative when the Hierarchy discovered the exploration planned its activities. Kandros refuses to comment on these rumors, saying only that his presence on the Nexus is 'purely diplomatic.'

During the early days of Nexus's arrival, Kandros left the station to act as protection detail for a prospecting team and was captured by Kett. He managed to lead several other captives to an escape and returned to the Nexus, eventually founding the Nyguru Eight colony.

ADMINISTRATOR: JIEN GARSON

Andromeda Initiative Director Jarun Tann is a replacement leader for those who died in the Scourge disaster. Personnel Director Jien Garson is the Nexus's Administrator. Garson's responsibilities include the day-to-day operation of the Nexus. Garson's duties are similar to the Nexus's Director, but she maintains encounter with the Scourge and its substantial role of the service. Garson's duties are similar to the Nexus's Director, but she maintains encounter with the Scourge and its substantial role of the service.

Born on Eos Nexus, Tann's qualification to the Initiative date his previous work experience as 'Shorter Consultant. Advanced Technologies Corporation' and 'Director, Advanced Technologies Corporation.' Tann's work for the Initiative has been in the area of logistics and social affairs for early arrivals to the Initiative, his answer was brief. However, careful data forensics reveals his original employer was Cerberus, and his position was Director, Tann Shop. Director Tann has official oversight of initiative operations and strategy and effective supervision of Nexus operations.

REGAN: ENGINEER KENDRA

Caretaker of the Nexus's critical design-and-construction phase is the Milky Way. Kendra Regan Keith is currently superintendent of Nexus's Engineering Department. Regan's responsibilities include the day-to-day operation of the Nexus. Regan's duties are similar to the Nexus's Director, but she maintains encounter with the Scourge and its substantial role of the service.

Nexuses from the Nexus as quickly when their players a key role in keeping the station operational during the crisis. Her strong leadership skills and her ability to work well with others have made her a valuable member of the Nexus community. Though critics of official meetings suggest she and Director Jarun Tann are often at odds, there's extensive evidence that the Ryngan still head a powerful role on the Nexus.

KALLEN SPENCER-KENDRA

When the Nexus first arrived in Andromeda and an uprising arose among the desperate crew. It was William Spencer who convinced two leader Nemmo Wanda to put down the mutineers. By all accounts, it did not go well.

In return for her help, Wanda claims that Spencer, in his authority as assistant director of Colonial Affairs, promised equal access to the Krogan to a new-new-new-beginning to keep Tann in the control. When the agreement came to light, Director Jarun Tann refused to honor it, and most struggle with the Nexus.

Privately, leadership is publicly credited for stopping the uprising. Spencer maintained his position a step away from Nexus senior leadership.

PORTER: NOVAKO

Previous to the initiative, Kader Sollman was the chief operations officer for a prominent capital. She started in her answering interrogation that she preferred her position because it was the highest-ranked non-elected municipal office. It carried responsibility without requiring a public face.

Porter was asked to head Colonial Affairs early during Vetalina training. She accepted after being assured that it was temporary position. Porter claims that Director Jarun Tann promised her that she would be able to return to her old job or to assist certain senior advisors to Jien Garson. Unfortunately, Garson died in the Nexus to Altair Scourge disaster and was replaced by Director Tann.

During the meeting, Colonial Director Addison had not colonial allies to direct. That limited the influence she wielded and increased the scrutiny demanded. She has expressed frustration at the open-ended nature of her position and the ongoing lack of clear guidance from the station on what is of advance. Though she remains eminently capable, it appears to be exactly as she also don't want.

MASS EFFECT ANDROMEDA

The Squad

Liam Kosta

Species: Human

Origin: Born: London, England, Earth. Split residence: Citadel, Earth

Height: 183cm

Weight: 88kg

Known Affiliations: HUS-T1, Earth's contribution to a multispecies civilian crisis-response effort.

Nicknames: None

Combat Roles/Strengths: Close-range fighter. Uses his jump-jet to move quickly, usually toward the threat.

Favorite Weapon: Overclocked dual omni-blades

Favorite Biotic/Tech/Other Ability: Havoc Strike. Liam leaps forward with his omni-blades to stun enemies and prime them for combo detonations.

Famous Quote(s): "I believed in a new beginning. Still do. I have to. We're in it."

Brief Biography: A crisis-response specialist with civilian tactical training, Liam learned of the Andromeda Initiative after meeting former Alliance personnel at a "post-hostility relief action." His multi-disciplinary skills set him apart, and Liam was handpicked to support the Pathfinder team. He's an idealist, willing to take risks for the good of the Initiative.

ROLE ON THE TEMPEST

Colonial Security

Liam provides risk-assessment and emergency assistance during a crisis. He is responsible for integrating new personnel weaponry and also liases with the Pathfinder and the Initiative's director of Colonial Affairs.

PERSONALITY TRAITS

- Upbeat and positive; "glass half full" type
- Outgoing and genuinely curious about technology and species
- Admirable conviction in his choices, especially regarding joining the Initiative

PERSONAL BACKGROUND

Liam isn't running from anything. In the Milky Way, he had a caring family and a good life, but he wasn't certain of his purpose. His passion for engineering served him well in school, but he lost focus when things got theoretical. He tried law enforcement because his parents were both lawyers and it seemed like a natural fit, but Liam was frustrated there too. He felt like there was more he could be doing, more he could do to help directly, and after two years of butting heads with superiors he saw an opportunity and took it.

Liam lobbied to join a multi-species Heavy Urban Search and Crisis Response group, the human (or "terran") branch known as HUS-T1 (colloquially HUSTL). He'd always kept a clear head in extreme circumstances, and he trained for deployment into natural disasters, war zones, and industrial accidents. His "lack of focus" developed into adaptability and he excelled.

But, consistently the real danger of these situations came from people taking advantage of other people. Liam was in a balancing act. He didn't want to be as jaded as the system seemed to demand. He wanted a blank slate. That's when he learned about the Andromeda Initiative—the blankest of slates and a chance to start everything over and let people do it right. Liam essentially threw himself a wake, said an extended goodbye to friends and family, and took the second star to the right and straight on 'til morning. Not the most intellectual leap, but it seemed far more likely to appease his ideals than trying to change the far more complicated present.

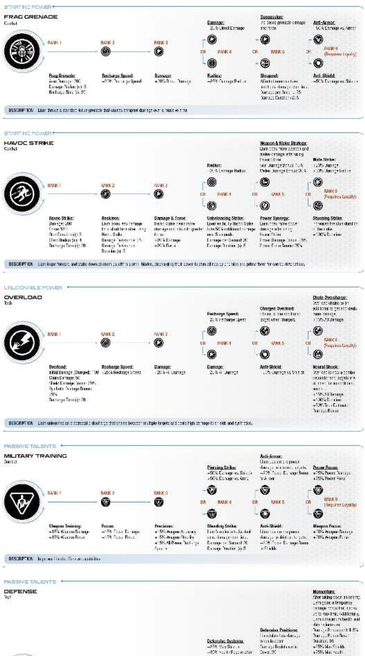
He's had it lucky, and an alternative has always presented itself. That won't happen in the Heleus Cluster.

RECRUITMENT DETAILS

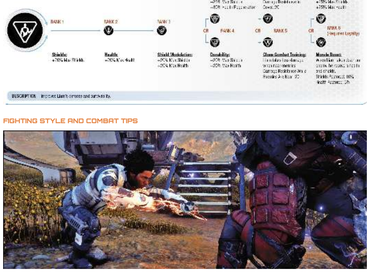
When: Prologue

Where: Hyperion Cryobay

Details: Ryder's first squadmate. Together, they search for the remainder of the Pathfinder team on a supposed "golden world," Habitat 7.



FIGHTING STYLE AND COMBAT TIPS



Summary: Liam is a crisis specialist and his combat style reflects that accurately. He has access to powers that are effective in most situations, especially when dealing with humanoid-type troops (such as kett infantry and Kadaran Outlaws), thanks to his enforcement training and experience. While most combatants prefer to use a single omni-blade for close-quarters combat, Liam can wield two at once—an ability he shows off when executing his signature Havoc Strike attack.

Synergies: Liam Kosta can adapt to most situations and synergizes with a majority of Ryder's profile types and powers. He doesn't excel in dishing out or soaking damage, but his utility-based powers are always handy. You rarely regret having Liam by your side. His all-purpose stunning power, Havoc Strike, his cover-flushing Frag Grenade, and his shield-destroying Overload powers make him one of the most balanced squadmates. Most of the notoriously frustrating encounters revolve around heavily shielded enemies (such as the kett's Anointed), so it's recommended that you invest a skill point into Liam's Overload skill as soon as you can.

Notable Power Spikes: Overload, Rank 1 (requires spending at least 18 skill points in Liam's other skills and powers): This is a no-brainer if you're going vault-spelunking. Overload deals extra damage to synthetic enemies like the Remnant, and several Remnant are equipped with shields. Even if you're fighting the kett, having Overload to sap an Anointed's shields can save you from a frustratingly difficult encounter.

Shock (Overload, Rank 6) turns Liam's powerful Overload into an incredible all-purpose incapacitating ability with the bonus of detonating primers. This grants Liam the ability to perform his own solo detonator combo (Havoc Strike into Overload).

Weaknesses: Liam doesn't have any glaring weaknesses. He's great at any range and can put all of his powers to use in most scenarios. However, he doesn't excel at any one aspect as the other squadmates do. Watch out for his propensity to dive into the back line of foes with Havoc Strike. If he gets caught out in a compromising position, he doesn't have exceptionally high survivability options like Drack, Vetra, and Cora.

MASS EFFECT ANDROMEDA

The Squad

Lieutenant Cora Harper

Species: Human

Origin: Spaceborn

Height: 172cm

Weight: 61kg

Known Affiliations: Systems Alliance, Talein's Daughters, Andromeda Initiative

Nicknames: None

Combat **Roles/Strengths:** Biotic commando, operations specialist

Favorite Weapon: Shotgun

Favorite *BioticTech***/Other Ability:** Biotic Charge

Famous Quote(s): "When your biotics are honed into huntress-grade weapons… people can be weird about it."

Brief Biography: Cora joined the Systems Alliance to train her powerful biotic talents, eventually transferring to an asari commando unit before joining the Andromeda Initiative as Alec Ryder's second-in-command. Professional and loyal, Cora knows the rules well enough to bend them if necessary, lending huntress tactics and her biotic strength to the Pathfinder's mission.

ROLE ON THE TEMPEST

Second-in-Command

Cora is responsible for day-to-day operations and ground mission organization. She also serves as a contact with the Initiative Director back on the Nexus.

PERSONALITY TRAITS

- Professional and disciplined, though always a ground soldier at heart
- Combines both human and asari tactics
- Fiercely loyal to the Pathfinder, the team, and their mission

PERSONAL BACKGROUND

Cora's powerful biotics manifested at a young age while she was growing up on her parents' cargo freighter. Unable to afford biotic tuition and struggling to control her talents, Cora quickly learned that personal discipline was the best way to keep people from getting hurt. She joined the Systems Alliance military at 18 to get the implants and training she needed. Soon after Cora enlisted, her parents' freighter disappeared, likely falling prey to the many dangers of the hardscrabble Attican Traverse.

Throwing herself into her military career, Cora's biotics made her a candidate for a Council initiative to train with alien soldiers—specifically for the Valkyrie Program to train with asari commandos. Cora went to Thessia and joined the commando unit "Talein's Daughters," fighting alongside centuries-old asari huntresses like her commanding officer, Nisira T'Kosh. Cora's years with the asari gave her a unique perspective, both on the battlefield and on her place in the world.

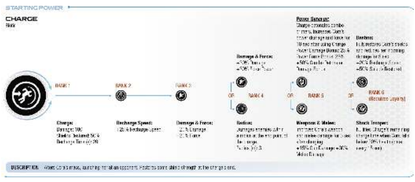
When Nisira encouraged her to join the Andromeda Initiative, Cora was initially skeptical but changed her mind after meeting Alec Ryder. His vision for Andromeda—a new civilization, and the next great leap for humanity—inspired her to make the Initiative's mission a success. Cora soon earned a place as Alec's trusted second-in-command, trained to handle ground operations and, if necessary, succeed Alec as Pathfinder.

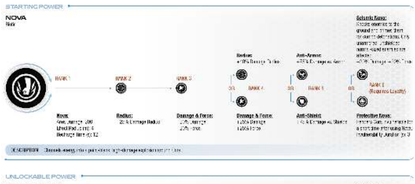
RECRUITMENT DETAILS

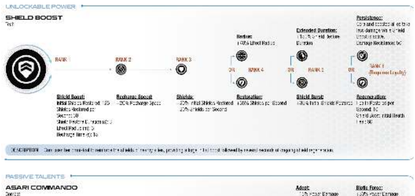
When: Mission 1: Planetside

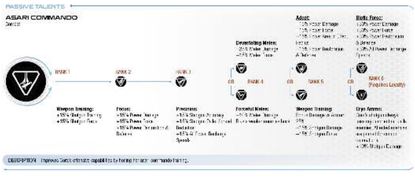
Where: Habitat 7

Details: Cora joins Ryder's active squadron after a successful defense of her shuttle and crew from kett dropships.

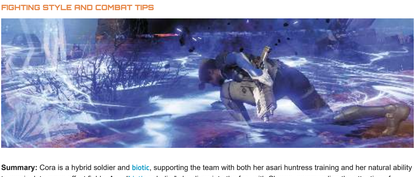








FIGHTING STYLE AND COMBAT TIPS



Summary: Cora is a hybrid soldier and biotic, supporting the team with both her asari huntress training and her natural ability to manipulate mass effect fields. As a "biotic paladin," she dives into the fray with Charge, commanding the attention of nearby foes on the battlefield and giving her allies room to fire freely on their enemies. She further protects her allies by regenerating their shields with the Shield Boost tech power, which is unlocked once she has at least 18 skill points invested in other powers and passives.

Synergies: When she gains access to Shield Boost, Cora pairs extremely well with other close-range combatants. Shield Boost grants her and teammates around her bonuses to shields and shield regeneration. If Ryder is built more as a sniper or a mid-range skirmisher, you can complement Cora's aggression by using debilitating powers like Concussive Shot and Cryo Beam on her targets, indirectly affording her extra survivability.

Notable Power Spikes: Cryo Ammo (Asari Commando, Rank 6) grants Cora a permanent passive buff that allows her to prime enemies with her basic shotgun attacks. Cora can then perform solo cryo combos if she has Power Synergy (Charge, Rank 5) unlocked.

When Bastion (Charge, Rank 6) is unlocked, Cora evolves into a nigh invincible charging bull, allowing her to aggressively dash from enemy to enemy while replenishing her shields as she absorbs attacks.

Weaknesses: Since Cora's primary attacks involve rushing enemies down with Charge and blasting them at close range with a shotgun, she can be a liability in encounters out in the open against a crowd of enemies (especially if you're playing on higher difficulty settings). If she's knocked unconscious away from the team, reviving her may prove difficult without putting yourself at risk, so consider micromanaging her by giving her explicit orders: Have her fall back to regroup with the team or order her to attack specific isolated enemies to prevent her from becoming overwhelmed.

MASS EFFECT ANDROMEDA

The Squad

Vetra Nyx

Species: Turian

Origin: Born: Palaven. Resided in: Too many places to count

Height: 198cm

Weight: 95kg

Known Affiliations: Andromeda Initiative

Nicknames: None

Combat **Roles/Strengths:** Wears heavily upgraded custom armor that provides additional shielding.

Favorite Weapon: Modified Cyclone assault rifle

Favorite BioticTech**/Other Ability:** Concussive Shot. Vetra fires a target-seeking, high-impact round from her gun.

Famous Quote(s): "Making deals to get the things you want, shooting at the things you don't. That's me."

Brief Biography: Surviving the rough world of smugglers and mercenaries requires street-smarts, adaptability, and cunning, qualities that serve Vetra well in Andromeda. Her experiences have taught her the importance of having someone to watch your back, and she'll do anything for the people she considers friends and family.

ROLE ON THE TEMPEST

Logistics, Informant

Vetra is extremely "street-smart," thanks to her experience as a mercenary and smuggler. She keeps her ear to the ground for the Pathfinder. By maintaining underworld contacts on Kadara Port, she ensures she remains looped into what is going on with the Nexus exiles and within the shadier underbelly of the Nexus itself.

PERSONALITY TRAITS

- Friendly, chatty, and openly honest
- Pragmatic and realistic
- Extremely protective, especially of her sister

PERSONAL BACKGROUND

Vetra spent most of her early life on Palaven. However, before she could enter boot camp her father, formerly a well-respected member of the Turian military, took her and her sister, Sid, on the run for reasons that were never fully explained. When Vetra was 16 and Sid was barely a toddler, their father disappeared. Vetra never saw him again, and she had to step up to raise Sid. The sisters hopped from cluster to cluster, with Vetra taking work where she could.

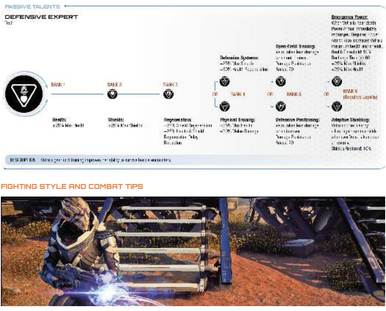
Andromeda represented a huge risk to Vetra, but it was also a chance at building a new, and perhaps normal, life for she and her sister. With the state of the Heleus Cluster, Vetra and Sid's dreams are in danger of falling apart and Vetra has vowed that she will draw on all her experience to keep that from happening.

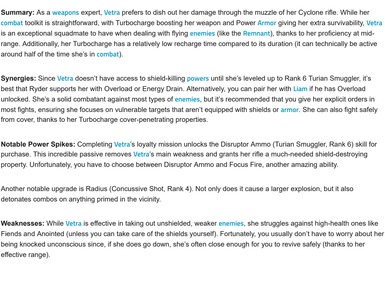
RECRUITMENT DETAILS

When: Mission 2: A Better Beginning

Where: The Nexus

Details: Vetra is instrumental in obtaining the Tempest for Ryder. In return, she insists on joining Ryder's squadron before they set off to Eos.





FIGHTING STYLE AND COMBAT TIPS

Summary: As a weapons expert, Vetra prefers to dish out her damage through the muzzle of her Cyclone rifle. While her combat toolkit is straightforward, with Turbocharge boosting her weapon and Power Armor giving her extra survivability, Vetra is an exceptional squadmate to have when dealing with flying enemies (like the Remnant), thanks to her proficiency at mid-range. Additionally, her Turbocharge has a relatively low recharge time compared to its duration (it can technically be active around half of the time she's in combat).

Synergies: Since Vetra doesn't have access to shield-killing powers until she's leveled up to Rank 6 Turian Smuggler, it's best that Ryder supports her with Overload or Energy Drain. Alternatively, you can pair her with Liam if he has Overload unlocked. She's a solid combatant against most types of enemies, but it's recommended that you give her explicit orders in most fights, ensuring she focuses on vulnerable targets that aren't equipped with shields or armor. She can also fight safely from cover, thanks to her Turbocharge cover-penetrating properties.

Notable Power Spikes: Completing Vetra's loyalty mission unlocks the Disruptor Ammo (Turian Smuggler, Rank 6) skill for purchase. This incredible passive removes Vetra's main weakness and grants her rifle a much-needed shield-destroying property. Unfortunately, you have to choose between Disruptor Ammo and Focus Fire, another amazing ability.

Another notable upgrade is Radius (Concussive Shot, Rank 4). Not only does it cause a larger explosion, but it also detonates combos on anything primed in the vicinity.

Weaknesses: While Vetra is effective in taking out unshielded, weaker enemies, she struggles against high-health ones like Fiends and Anointed (unless you can take care of the shields yourself). Fortunately, you usually don't have to worry about her being knocked unconscious since, if she does go down, she's often close enough for you to revive safely (thanks to her effective range).

MASS EFFECT ANDROMEDA

The Squad

Pelessaria B'Sayle (Peebee)

Species: Asari

Origin: Born: Port Lerama, Hyetiana

Height: 167cm

Weight: 52kg

Known Affiliations: None

Nicknames: Peebee

Combat **Roles/Strengths:** Gunslinger, biotic destabilizer

Favorite Weapon: Sidewinder Outlaw pistol

Favorite Biotic/Tech**/Other Ability:** Biotic Blast

Famous Quote(s): "The Milky Way was so... been-there-done-that. Even if I hadn't done it, someone had."

Brief Biography: Peebee walks to her own daredevil drumbeat and has an unrivalled thirst for adventure. She's pathologically independent but manages to maintain a loose, even friendly spirit. Bored with the Milky Way, she would have done anything to join the Initiative—flirt, provide favors, fudge credentials. But to her, she was just hitching a ride to the great unknown.

ROLE ON THE TEMPEST

Remnant **Expert**

Peebee is the "go-to" for all Remnant-related inquiries. While the Remnant remain a mystery by and large, Peebee likely has accumulated the most knowledge of them (out of everyone from the Milky Way at least). Peebee is credited for coining the term "Remnant," as well as for naming all of the Remnant constructs encountered so far.

PERSONALITY TRAITS

- Often wavering between overjoyed and comically annoyed
- Carefree and cocky, but charismatic

PERSONAL BACKGROUND

Little is known about Peebee and information from Initiative records are practically unverifiable.

Rejecting a slow and stodgy asari lifestyle, Peebee left home at a relatively young age and never looked back. Attempting to channel her energies into a more constructive forum, Peebee became pathologically obsessed with academia for a time, collecting a series of degrees (twelve, to be exact) in a variety of subjects ranging from Botany to Hanar Theology to Automotive Engineering. In practice however, Peebee derived no relevant work history from those studies ("You know how some people become obsessed with mint chocolate chip ice cream? That was me and diplomas for a while," she said). Instead, she drifted through an endless series of short-lived jobs, most notably—and incongruously—as a research technician at a biotech facility (she was fired after running unsanctioned evolutionary simulations based on proprietary data to win a bet with one of her superiors) and as an Eclipse mercenary (she walked off the job for reasons she never revealed, though it was here where she developed a deep fascination with firearms and marksmanship).

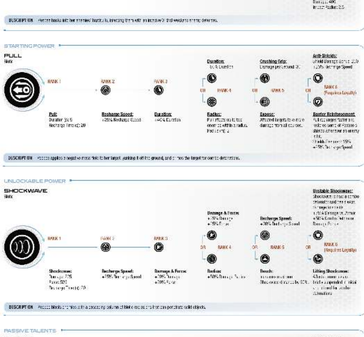
From the outside, Peebee seemed to be a cautionary tale of wasted potential—naturally brilliant but spoiled, unfocused and trivial. But in truth, Peebee was searching—desperately yearning not just for the thrill of adventure, but for a challenge. She sought a situation which would provide Peebee with the opportunity to truly exercise her mind on a canvas upon which no one had ever written. Her exposure to the Andromeda Initiative's proposed expedition was facilitated by her friend and associate, Kalinda, an asari first contact specialist. With Kalinda's help, Peebee schemed her way into joining the Initiative. Although further investigation on how she arrived on the Nexus and what her actual role is results in a variety of nebulous answers, and official inquiries do not find her listed in the station's registry.

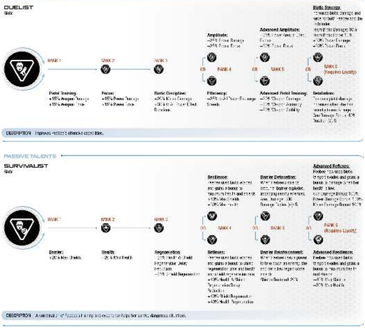
RECRUITMENT DETAILS

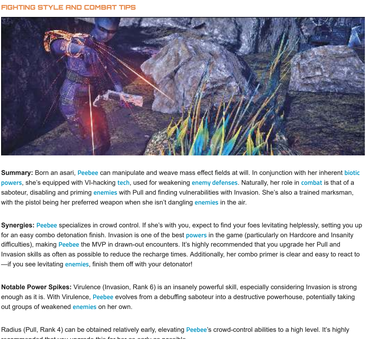
When: Mission 2: A Better Beginning

Where: Eos

Details: After Ryder successfully activates the Remnant vault on Eos, Peebee invites herself into the Pathfinder's squad.







FIGHTING STYLE AND COMBAT TIPS

Summary: Born an asari, Peebee can manipulate and weave mass effect fields at will. In conjunction with her inherent biotic powers, she's equipped with Vi-hacking tech, used for weakening enemy defenses. Naturally, her role in combat is that of a saboteur, disabling and priming enemies with Pull and finding vulnerabilities with Invasion. She's also a trained marksman, with the pistol being her preferred weapon when she isn't dangling enemies in the air.

Synergies: Peebee specializes in crowd control. If she's with you, expect to find your foes levitating helplessly, setting you up for an easy combo detonation finish. Invasion is one of the best powers in the game (particularly on Hardcore and Insanity difficulties), making Peebee the MVP in drawn-out encounters. It's highly recommended that you upgrade her Pull and Invasion skills as often as possible to reduce the recharge times. Additionally, her combo primer is clear and easy to react to—if you see levitating enemies, finish them off with your detonator!

Notable Power Spikes: Virulence (Invasion, Rank 6) is an insanely powerful skill, especially considering Invasion is strong enough as it is. With Virulence, Peebee evolves from a debuffing saboteur into a destructive powerhouse, potentially taking out groups of weakened enemies on her own.

Radius (Pull, Rank 4) can be obtained relatively early, elevating Peebee's crowd-control abilities to a high level. It's highly recommended that you upgrade this for her as early as possible.

Weaknesses: Peebee doesn't have much going for her in terms of defense, so frequently commanding her with explicit orders is advised. Consider her positioning and order her to regroup to you often, particularly if you're up against several enemies. Watch her back so she can watch yours! Fortunately, her abilities can all be used from a safe distance, so order her to either regroup with you or to fall back when necessary. Otherwise, you can consider using the Re-Spec Station to allocate her skill points into the Survivalist tree (after investing them into Pull and Invasion, of course).

MASS EFFECT ANDROMEDA

The Squad

Nakmor Drack

Species: Krogan

Origin: Tuchanka

Height: 196cm

Weight: 340kg (with prosthetics)

Known Affiliations: Clan Nakmor

Nicknames: Old Man, Drack the Nak

Combat **Roles/Strengths:** Veteran warrior, close combatant

Favorite Weapon: Ruzad shotgun

Favorite Biotic/Tech/**Other Ability:** Blood Rage

Famous Quote(s): "Do you have any idea how many humans I've watched die? You're meat. You spoil."

Brief Biography: There's old and then there's Drack. The elder krogan spent more than 1,400 years causing a ruckus in the Milky Way—wearing the title of soldier, merc, and at times even pirate. When the loyal but stubborn vet was given the chance to join his clan on a voyage to Andromeda, of course he signed up. It meant a whole new galaxy of stuff to shoot.

ROLE ON THE TEMPEST

Armory, Security

Drack is the Tempest's muscle, maintaining the ship's armory and ensuring the crew's safety on board and planetside. Though it's hard to call Drack "diplomatic," he's also Ryder's closest liaison to the krogan in Andromeda.

PERSONALITY TRAITS

- Confident in his abilities but not sure where he fits
- Says what he thinks when he thinks it

PERSONAL BACKGROUND

Drack is a living fossil, a relic of the Krogan Rebellions held together with prosthetics and ample gumption. The old timer was among the krogan woken up to put down the uprising on the Nexus when the station reached Andromeda. He'll likely never forgive the Initiative for what it did to his people, and the last thing he wants to do is help Tann do it to anyone else. The Pathfinder must prove they are different before Drack will join the Tempest.

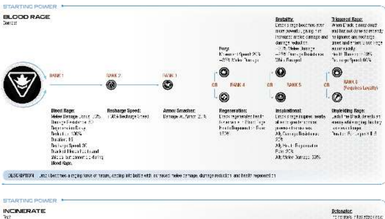
Drack came along with Clan Nakmor as they sought a new home in Andromeda, not really knowing his place in the clan anymore. When his fellow krogan left the Nexus and encountered the kett, Drack stepped into an old role, grabbing a gun. But what comes next in Heleus, finding a future for the krogan, is a task alien to him. He only knows how to tear things down, not build them up. At Ryder's side, he hopes to find a purpose beyond war—a reason for an old soldier with a million stories to instead live for the future.

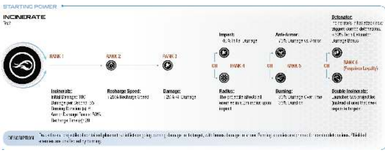
RECRUITMENT DETAILS

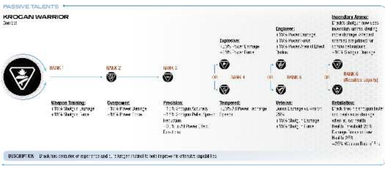
When: Mission 2: A Better Beginning

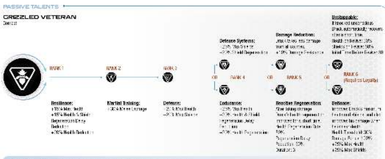
Where: Eos

Details: Drack is found slaughtering kett in a kett research facility next to a Remnant monolith.

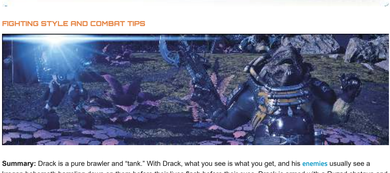








FIGHTING STYLE AND COMBAT TIPS



Summary: Drack is a pure brawler and "tank." With Drack, what you see is what you get, and his enemies usually see a krogan behemoth barreling down on them before their lives flash before their eyes. Drack is armed with a Ruzad shotgun and some sort of homemade industrial tool he uses as a melee weapon—so he's most comfortable fighting within hugging range. As with all krogan, he has access to the Blood Rage power. When Blood Rage is activated, his blood figuratively boils, transforming him into the embodiment of undying rage, so he becomes immune to death and deals bonus melee damage.

Synergies: Drack is a battle-hardened warrior who's fond of going deep and violating an enemy's personal space. Enable his bloodlust by either joining him in the fray to gang up on his victim or by supporting him from afar and incapacitating his targets while he does the dirty work. If Drack has the Incinerate tech power unlocked, you can take advantage and follow up its priming effect with your combo detonator powers. Additionally, Incinerate is well-suited for taking down armored monstrosities, such as Fiends and Destroyers.

Notable Power Spikes: Incendiary Ammo (Krogan Warrior, Rank 6) augments Drack's shotgun with the incinerate effect, allowing him to set up combo detonations without needing to use the Incinerate power. Once you've completed Drack's loyalty mission, consider using the Re-Spec Station to unlock this skill. You can then forgo spending his skill points on Incinerate and instead invest them in other powers or passives.

Inspirational (Blood Rage, Rank 5) emboldens nearby teammates with a significant damage-reduction buff and hefty melee-damage boost. This is particularly powerful if Ryder is optimized with the Vanguard profile (melee damage synergy).

Weaknesses: Drack's primary methods of attack revolve around his shotgun and unconventional melee weapon. Although Incinerate is a ranged power that's effective against armored units, he struggles against most Remnant foes due to their shields and flight capabilities. If you plan on exploring a vault with Drack, be sure to cover his weaknesses by pairing him with a member equipped with a shield-destroying power (for instance, Liam's Overload and Jaal's Energy Drain).

Jaal

RESISTANCE FIGHTER

VITALS

Species: Angara

Gender: Male

Age: Mid-twenties

Height: 193cm

Weight: 121kg

Occupation: Resistance Fighter, Scout

ROLE ON THE TEMPEST

Heleus Cluster Guide

As the only person on the Tempest who is native to the Heleus Cluster, Jaal serves as the guide to their new Andromeda home, its inhabitants, and its current political situation. He is also a natural-born tinkerer and self-taught engineer with a fascination for kett tech. Jaal acts as the conduit to the angara in general and the Resistance in particular.

PERSONALITY TRAITS

- Honorable and passionate
- Constitution strengthened by hardship
- As with most angara, wears his heart on his sleeve

PERSONAL BACKGROUND

Jaal comes from a powerful and influential family. His family is large—since the angara use "collective parenting," he has several siblings and mothers (in addition to his 'true mother'). They've been fighting the kett for decades, and for the most part, fighting a losing battle until the rise of the Resistance.

Although Jaal has only the basic education permitted by the kett occupational forces, he is unusually smart and very quick. He lives in the shadow of his more accomplished siblings and joined the Resistance because it was expected of him. He's yet to find his true calling and eagerly joins

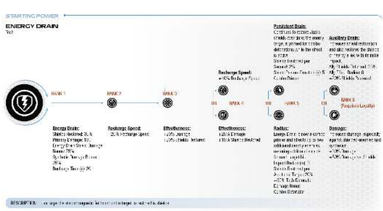
Through illegally obtained documents and experimentation, Jaal has taught himself a great deal. As a side interest, he has made it a personal mission to disseminate the angaran history, traditions, and culture through whatever means he can.

RECRUITMENT DETAILS

When: Mission 3: A Trail of Hope

Where: Aya

Details: Following the first contact between humanity and the angara, Jaalinsists on joining the Pathfinder team after Ryder's consultation with Evfra.



MASS EFFECT ANDROMEDA

Mass Effect Andromeda
Controls

This chapter is where the first-time controller of the game, Mahnoor Shirazi, explains the controls. You should read this chapter before playing the game, and then refer back to it as you learn the game. Mahnoor Shirazi's Mass Effect Andromeda controls are the default controls for the game.

CONTROLS

Controls can be changed through the Settings Menu. Read More > Game > Settings > Controls

Individual controls can be changed. To control "mouse look" sensitivity, you must increase or decrease the "Look Sensitivity" slider.

Xbox One Controller Setting (1)

ACTION	CONTROL	ADDITIONAL CONTROL	ALTERNATE
Look	Right Analog Stick	Mouse Movement	Mouse
Turn Left			A, Num 4
Turn Right			D, Num 6
Walk			Num 8
Walk Backward			S, Num 5
Strafe Left			A

MOVEMENT

Movement is the most important control in the game. You must learn how to move around in order to survive. Remember that you can control the camera by moving the mouse or the right analog stick on the controller. Moving the camera is the same as looking around.

The standard movement for forward is to move a finger/button on the forward analog stick. For a thorough list, see the Movement section above.

PLAYER ACTIVITIES

Player activities are the actions that the player can take. Examples: activate doors, interact with objects, activate scanner, etc. Player activities are mapped to the controller. Read More > Player Activities > Activities

ACTIVATE

Activate is used to open doors, interact with objects, activate scanner, etc.

JUMP

Jump is used to jump over obstacles, jump down from heights, and to jump to other areas.

CROUCH

Crouch is used to crouch, slide, and roll. Crouching is used to avoid enemy fire, and to sneak around enemies. Sliding is used to slide under obstacles. Rolling is used to roll over obstacles.

SPRINT

Sprint is used to run faster than normal. Sprinting is used to avoid enemy fire, and to get to objectives faster.

MELEE

Melee is used to perform a melee attack. Melee is used to attack enemies, and to destroy objects.

RELOAD

Reload is used to reload your weapon. Reloading is used to replenish your weapon's ammunition.

MAP

Map is used to open the map. The map shows your location, objectives, and other important information.

MENU

Menu is used to open the menu. The menu is used to access your inventory, skills, and other options.

MENU COMMANDER

Menu Commander is used to open the menu commander. The menu commander is used to access your inventory, skills, and other options.

SCANNER

Scanner is used to open the scanner. The scanner is used to scan objects and enemies.

MISSION MENU

Mission Menu is used to open the mission menu. The mission menu is used to access your missions.

LEFT ACTION MENU

Left Action Menu is used to open the left action menu. The left action menu is used to access your left action.

RIGHT ASSISTANT MENU

Right Assistant Menu is used to open the right assistant menu. The right assistant menu is used to access your right assistant.

PILOT ASSISTANT MENU

Pilot Assistant Menu is used to open the pilot assistant menu. The pilot assistant menu is used to access your pilot assistant.

COMBAT ACTIVITIES

Combat activities are the actions that the player can take in combat. Examples: shoot, reload, melee, etc. Combat activities are mapped to the controller. Read More > Combat Activities > Activities

SHOOT / FIRE

Shoot / Fire is used to shoot your weapon. Shooting is used to attack enemies, and to destroy objects.

ALT FIRE / AIM

Alt Fire / Aim is used to aim your weapon. Aiming is used to aim your weapon more accurately.

MELEE OR TAKEDOWN

Melee or Takedown is used to perform a melee attack or takedown. Melee is used to attack enemies, and to destroy objects. Takedown is used to perform a takedown on an enemy.

RELOAD

Reload is used to reload your weapon. Reloading is used to replenish your weapon's ammunition.

INTERACT / ACTIVATE

Interact / Activate is used to interact with objects, activate doors, and to activate other objects.

JUMP

Jump is used to jump over obstacles, jump down from heights, and to jump to other areas.

CROUCH / SLIDE / ROLL

Crouch / Slide / Roll is used to crouch, slide, and roll. Crouching is used to avoid enemy fire, and to sneak around enemies. Sliding is used to slide under obstacles. Rolling is used to roll over obstacles.

SPRINT

Sprint is used to run faster than normal. Sprinting is used to avoid enemy fire, and to get to objectives faster.

MISSION MENU

Mission Menu is used to open the mission menu. The mission menu is used to access your missions.

LEFT ACTION MENU

Left Action Menu is used to open the left action menu. The left action menu is used to access your left action.

RIGHT ASSISTANT MENU

Right Assistant Menu is used to open the right assistant menu. The right assistant menu is used to access your right assistant.

PILOT ASSISTANT MENU

Pilot Assistant Menu is used to open the pilot assistant menu. The pilot assistant menu is used to access your pilot assistant.

SCANNER

Scanner is used to open the scanner. The scanner is used to scan objects and enemies.

MAP

Map is used to open the map. The map shows your location, objectives, and other important information.

MENU

Menu is used to open the menu. The menu is used to access your inventory, skills, and other options.

MENU COMMANDER

Menu Commander is used to open the menu commander. The menu commander is used to access your inventory, skills, and other options.

CONFIGURATIONS

Configurations are the settings that the player can change. Examples: sensitivity, invert Y, etc. Configurations are mapped to the controller. Read More > Configurations > Settings

MOUSE SENSITIVITY

Mouse sensitivity is the speed at which the mouse moves the camera. The higher the sensitivity, the faster the camera moves. The lower the sensitivity, the slower the camera moves.

INVERT Y

Invert Y is the setting that inverts the Y axis. When Invert Y is enabled, moving the mouse up will move the camera down, and moving the mouse down will move the camera up.

AIM ASSIST

Aim Assist is the setting that helps you aim at enemies. When Aim Assist is enabled, the game will help you aim at enemies.

CHECKLIST ACTIVITIES

Checklist activities are the activities that the player can complete. Examples: complete a mission, collect an item, etc. Checklist activities are mapped to the controller. Read More > Checklist Activities > Activities

COMPLETE A MISSION

Complete a mission is the activity that the player can complete a mission. Completing a mission is the activity that the player can complete a mission.

COLLECT AN ITEM

Collect an item is the activity that the player can collect an item. Collecting an item is the activity that the player can collect an item.

ACTIVATE A SCANNER

Activate a scanner is the activity that the player can activate a scanner. Activating a scanner is the activity that the player can activate a scanner.

USE A SCANNER

Use a scanner is the activity that the player can use a scanner. Using a scanner is the activity that the player can use a scanner.

USE A MAP

Use a map is the activity that the player can use a map. Using a map is the activity that the player can use a map.

USE A MENU

Use a menu is the activity that the player can use a menu. Using a menu is the activity that the player can use a menu.

USE A MENU COMMANDER

Use a menu commander is the activity that the player can use a menu commander. Using a menu commander is the activity that the player can use a menu commander.

USE A LEFT ACTION MENU

Use a left action menu is the activity that the player can use a left action menu. Using a left action menu is the activity that the player can use a left action menu.

USE A RIGHT ASSISTANT MENU

Use a right assistant menu is the activity that the player can use a right assistant menu. Using a right assistant menu is the activity that the player can use a right assistant menu.

USE A PILOT ASSISTANT MENU

Use a pilot assistant menu is the activity that the player can use a pilot assistant menu. Using a pilot assistant menu is the activity that the player can use a pilot assistant menu

Game Mechanics Glossary

About the Glossary

This is a glossary of non-combat mechanics that aren't thoroughly discussed in the previous Basics section. Most topics covered here are introduced in the game after completing the prologue mission. Many of these topics are also included within the game's tutorials (accessed via the pause menu). This repository is provided alphabetically for convenient referencing.

MASS EFFECT ANDROMEDA

Game Mechanics Glossary

AVP (Andromeda Viability Points)

The Andromeda Initiative uses a proprietary metric, aptly called Andromeda Viability Points (AVP), to gauge its colonization efforts in the Heleus Cluster.

OVERALL VIABILITY AND PLANETARY VIABILITY

Note that there are two Viability types. One is AVP, the overall Andromeda Initiative Viability represented by an integer displayed in the pause menu.

The other type of Viability is a per-planet Viability rating, conveyed by a percentage value on the menu map of each planet. It can be accessed by pressing the assigned key displayed at the bottom of the pause menu.

The AVP value gives you a measure of your progress as a Pathfinder. The higher the score, the closer you are to satisfying the Andromeda Initiative's core mission. Your accrued AVP is displayed at the top-right corner of the pause menu. AVP can be seen as a type of experience points, except it's for raising the Nexus Level. (As the Nexus levels up, new Nexus areas become available.)

Additionally, planet Viability ratings are tracked individually, displayed in the HUD of the current planet map or in the Viability menu. (Eos, Voeld, Kadara, Havarl, and Elaaden each has its own Viability percentage rating.)

Raising the Viability rating's percentage on a UNC increases that planet's colonist activity, so expect to see more civilians populating the world as that planet's Viability increases.

The following is a list of methods and actions that raise per-planet Viability, along with an estimate of how much is raised:

- Exploring and unlocking a Remnant vault: +40%.
- Establishing an outpost: +20%. Requires a Viability of at least 40% (usually). Does NOT require completing the vault for that planet, but activating a vault is generally the simplest way to achieve this percentage.
- UNC main plot: ~+10%.
- Defeating the Architect: ~+10%.
- Destroying enemy base: ~+10%.
- B-sory completion: ~+10%.
- Priority Ops missions: Up to ~+10% for each planet related to the missions.
- Side quest: ~+2% to ~+5%.
- Establishing a forward station: ~2%.

A COMPLETELY VIABLE HELEUS

There's a special reward for obtaining 100% Viability on all planets. This can be obtained by completing most side quests and optional objectives related to the five major UNCs (you don't necessarily need to complete every single quest in the game). Once you have all planets at 100%, a special ceremony celebrating your pathfinding ability is unlocked.

MASS EFFECT ANDROMEDA

Game Mechanics Glossary

APEX & Strike Teams

APEX & Strike Teams is a peripheral activity that's completely optional and, for the most part, unrelated to Priority Ops, although it ties into Multiplayer aspects. For Single-Player purposes, it's largely a "set it and forget it" resource, providing bonus rewards like credits and minerals.

You can have several strike teams. The more you have available, the more missions you can undertake at once. Recruit strike teams by spending mission funds through the teams menu and equipping them.

Strike teams can earn positive and negative traits, depending on whether they succeed or fail on their deployed missions.

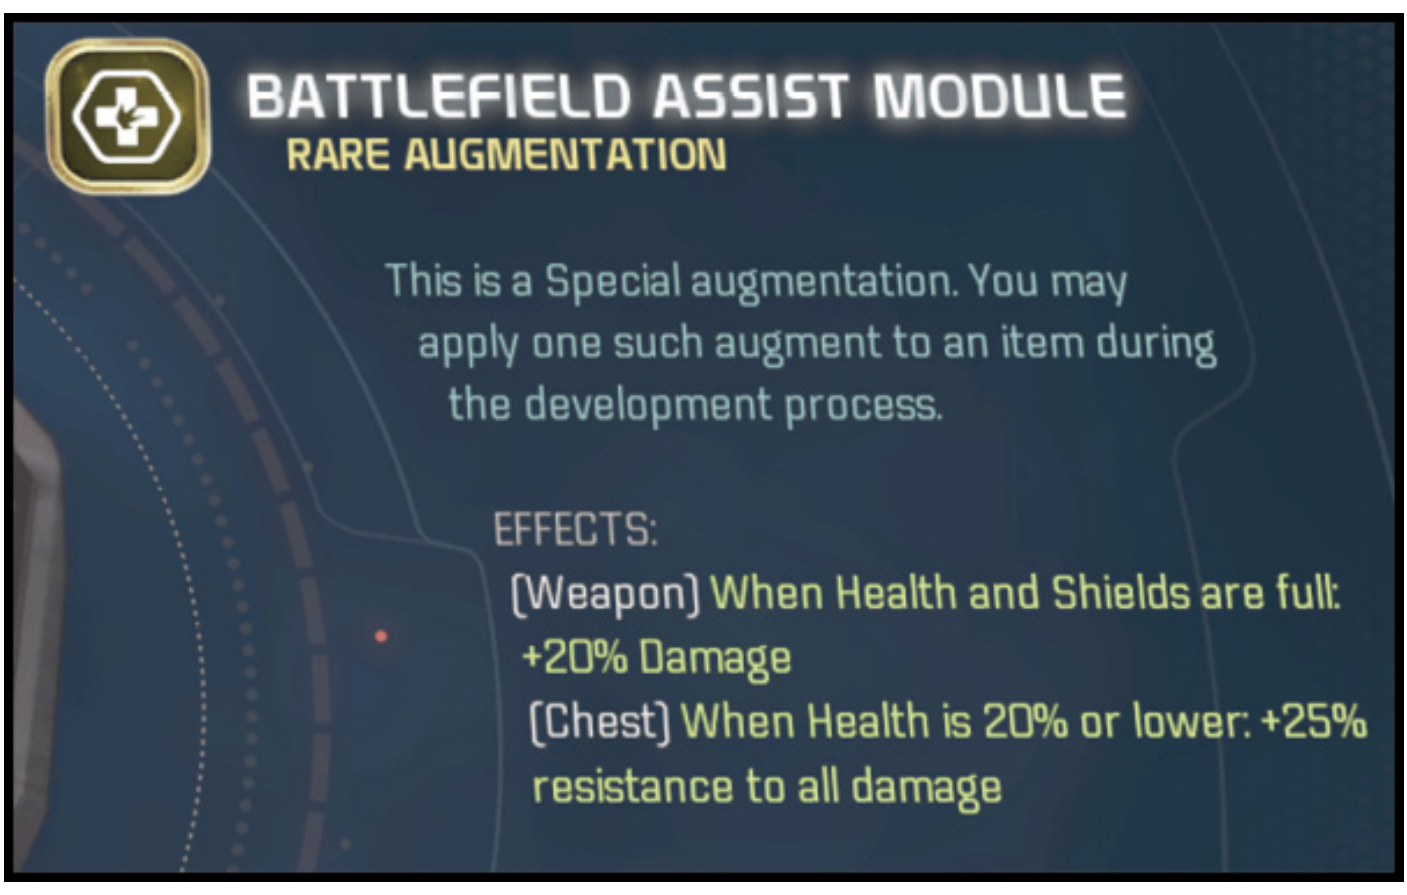
MASS EFFECT ANDROMEDA

Game Mechanics Glossary

Augmentations

Augmentations are research schematics that upgrade a piece of equipment (not to be confused with hot-swappable mods). Augmentations can only be applied to crafted items and only during the actual development of the piece of equipment being augmented. Augmentation slot counts can vary between items. Additionally, the Innovation Cryo Pod Perk automatically adds an additional augmentation slot on all developed items. Also note augmentation type limits in the augmentation's description—unique designations such as "Gun Projectile," "Special," and "Mods" have a one-augmentation limit of that type, while generic augmentations can be stacked.

An augmentation's effect can vary drastically depending on what piece of equipment is being augmented. For example, a Battlefield Assist Module augmentation provides a +20% damage bonus if it's installed into a weapon. If installed into a chest piece, it gives the wearer +25% damage resistance when their health drops below 20%.



BATTLEFIELD ASSIST MODULE
RARE AUGMENTATION
This is a Special augmentation. You may apply one such augment to an item during the development process.
EFFECTS:
(Weapon) When Health and Shields are full: +20% Damage
(Chest) When Health is 20% or lower: +25% resistance to all damage

Augmentations **are refunded when the item is deconstructed.** This is especially important for augmentations purchased via Research Data, since you can only ever buy these augmentations once. If you want to keep these augmentations, do **not** sell the augmented piece of gear—instead, deconstruct it so you can reuse the unique augmentation.

AUGMENTATIONS OBTAINED VIA RESEARCH

MILKY WAY TECH AUGMENTATIONS

AUGMENTATION	DESCRIPTION
Aerial Lubricant	(Weapon) When hovering: +35% Rate of Fire (Arms) When hovering: +35% Tech Damage
Aerial Performance Optimizer	(Weapon) When hovering: +35% Weapon Damage (Arms) When hovering: +35% Combat Damage
Aerial Stabilizer	(Weapon) When hovering: +35% Weapon Accuracy (Arms) When hovering: +35% Biotic Damage
Electrical Conduits	(Gun) Streams of electricity (Chest) Stuns melee attackers with electrical damage
Equilibrium Regulator	5% Damage bonus when moving slowly with a drawn weapon, +10% when moving faster
Grenade Launcher	(Non-shotgun weapons) Each projectile fired is now a grenade (Shotguns) Each pellet fired is now a grenade, but with reduced damage
Sticky Grenade Launcher	(Non-shotgun weapons) Each projectile is now a sticky grenade (Shotgun) Each pellet is now a sticky grenade, with lower damage per pellet

HELEUS TECHNOLOGY AUGMENTATIONS

AUGMENTATION	DESCRIPTION
Rebalanced Field Coils	(Gun) For the last 20% of the clip's ammo, gain +10% extra damage (Chest) Increases weapon accuracy by 10% when standing still
Vintage Heat Sink	Ammo refills automatically after a delay; no longer uses traditional ammo clips
Ricochet System	Each projectile can bounce off flat surfaces
Coolant System	Increases clip size by 20% when special ammo is active
Bio-Converter	When the current ammo clip is empty, drains 5% of health and refills the clip
Plasma Charge System	(Non-shotgun weapon) Fires direct-line explosive plasma bolts. Charge weapon to fire a devastating blast (Shotgun) Fires direct-line explosive plasma bolts (each less damage than normal rounds). Charge weapon for a more devastating blast
Concentration Module	+10% Weapon Accuracy when shields are 20% or lower
Seeking Plasma System	Changes weapon projectiles to seeking plasma bolts
Battlefield Assist Module	(Weapon) When health and shields are full: +20% Damage (Chest) When health is 20% or lower: +25% resistance to all damage

REMNANT TECHNOLOGY AUGMENTATIONS

AUGMENTATION	DESCRIPTION
Beam Emitter	Changes the weapon-fire type to an energy beam
Cryo Condenser	(Weapon) Cryo ammo freeze duration: +100% (Legs) On jump melee: Cryo Blast—+50% Cold Damage
Shield Disruptor	(Weapon) Disruptor Ammo: +25% Shield Damage (Legs) On jump melee: Shock Blast—extra 50% Electrical Damage
Heat Inducer	(Weapon) Incendiary Ammo: +25% Damage (Legs) On jump melee: Inferno Blast—+50% Heat Damage
Shield Oscillator	(Weapon) When clip empties: restore 25% shields (Chest) On enemy killed: restore 25% shields
Shield Sensors	(Weapon) 25% chance to gain 50% clip ammo when shields are broken (Chest) 25% chance to recover 10% of health when shields are broken
Power Booster	(Weapon) When current clip is full: +20% Power Damage (Chest) When health is 30% or less: +25% Power Status Effect Duration

Game Mechanics Glossary

Codex

The Codex is an information repository, managed and authored by SAM, and serves as a log of Ryder's exploits throughout the game. SAM adds a new entry whenever a notable person, place, or object is discovered (or examined with your scanner).

Many entries are dynamically updated when new information is available regarding that particular Codex subject. Updates to the Codex are displayed in an activity log to the left of your HUD during normal gameplay.

For convenience, the Codex is organized by context, with entries placed into relevant folders:

- **The Journey So Far…:** Events and breakdowns of major decisions you've made as well as your relationships with squadmates and support crew.
- **Finding a Home:** Major events revolving around the Initiative's primary mission (Priority Ops) can be found here.
- **Agent of Change/Exploring Heleus:** Both contain entries that go over decisions and results of optional side quests, detailing your decisions and their consequences.
- **A Crew Like No Other:** These are updated entries regarding the relationship between you and your crew.

MASS EFFECT ANDROMEDA

Game Mechanics Glossary

Containers

Containers (“treasure chests” or “loot”) can be found around the Heleus Cluster, providing all types of items, including minerals, salvage, equipment, and consumables.

Containers are divided into three categories: salvage, minerals, and normal. (For details on mineral containers, see Mining.)

DYNAMIC LOOT GENERATION

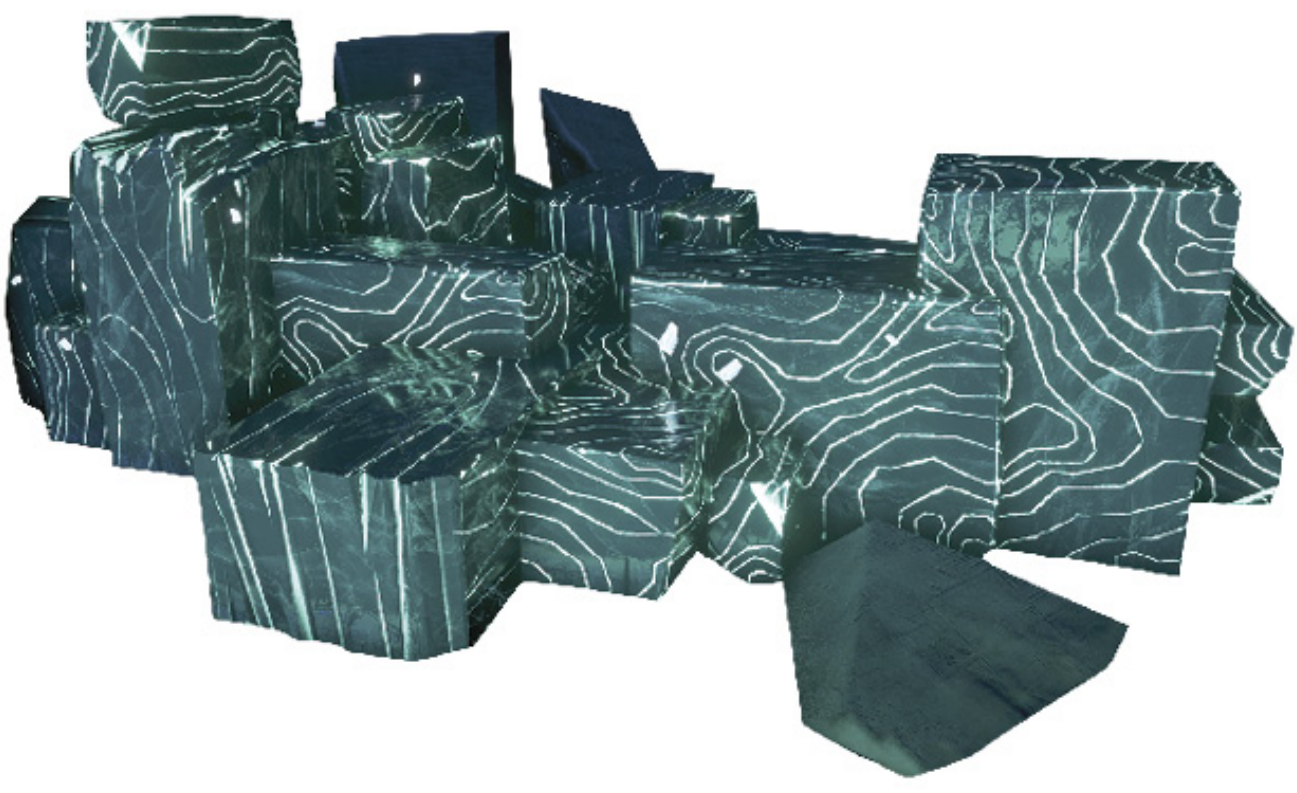
Non-quest and non-unique containers have their contents generated from behind-the-scenes “loot tables.” This means items found in containers are randomized; a specific chest containing items you find in one playthrough may contain differeing loot on another playthrough. The amount of ”pulls“ per table is also random within a certain range. A rare-type container may generate four items or eight in an alternate playthrough.

Loot generation occurs only once, and only when you get within a close proximity. This means you can save your game several meters away from a dynamic container, check its contents, then reload to have the container’s loot “re-rolled.”

Loot tables are grouped by rarity, item type, faction, and so forth. For instance, a rare kett container potentially draws four to eight items from a loot table that includes rare kett armory, kett research materials, salvage, and also a chance of consumables. The inner workings are complicated and beyond the scope of this guide, but the main gist is that bigger containers mean potentially bigger rewards.

SALVAGE CONTAINERS

A salvage container can be identified visually. These are usually represented as used or broken equipment set up in the field, and they’re distinguishable by their origin technology. Remnant salvage containers, for example, look like broken-down tiles reminiscent of their structures and vaults.



Salvage can be considered ”non-liquidated credits.” They don’t take up inventory space and have no use outside of trading to vendors for usable credits. Keep an eye out for unwanted salvage to rack up your credit count quickly!

NORMAL CONTAINERS

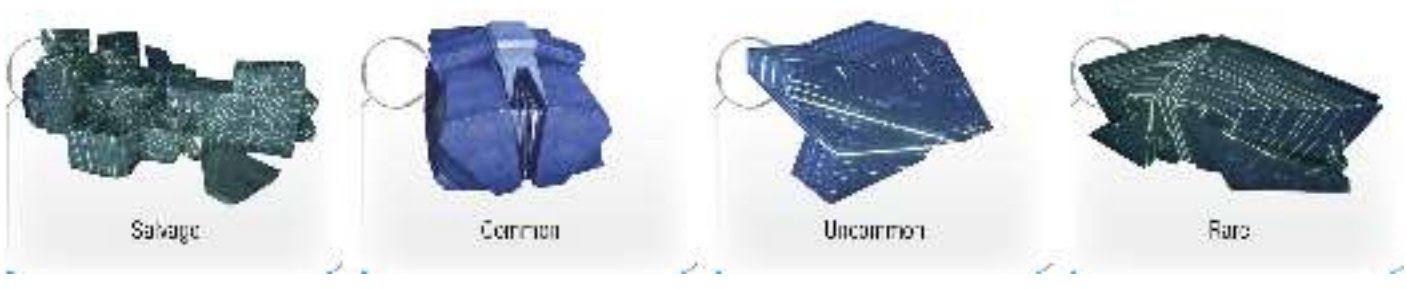
A ”normal“ container can be identified and distinguished visually. They can consist of a variety of items and are supplied by the personnel and species inhabiting the area. For instance, if you’re raiding a kett base, you’re likely to find kett containers holding supplies and equipment Kett would arm themselves with.

Normal containers can drop almost anything (excluding minerals). Normal containers can be further categorized into subgroups by rarity: **common**, **uncommon**, **rare**, and **unique**.

Furthermore, the contents in these loot boxes reflect the technology of whoever left them there (as with salvage containers). On an angara-populated planet, you may find a rare angaran chest containing a Zephyr Pistol (an angara-made gun) or angara-related materials for crafting one.

MILKY WAY

REMNANT



KETT

ANGARA

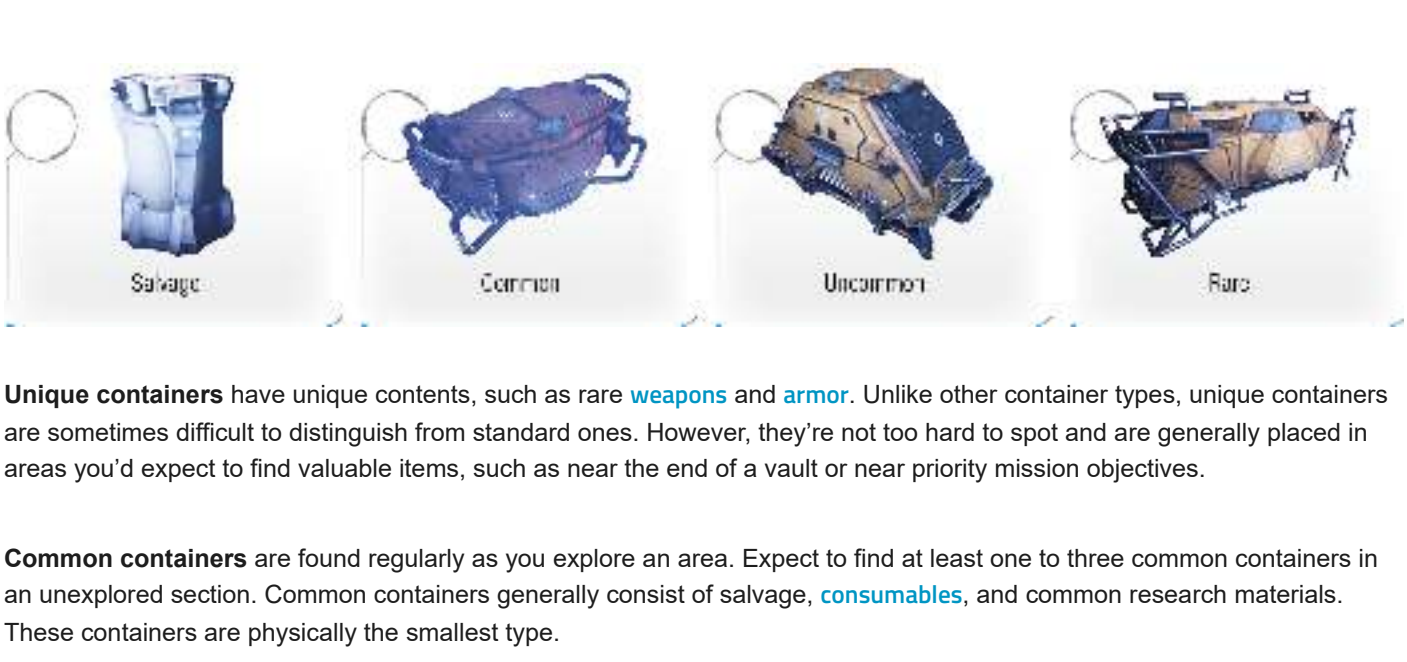
Unique containers have unique contents, such as rare weapons and armor. Unlike other container types, unique containers are sometimes difficult to distinguish from standard ones. However, they’re not too hard to spot and are generally placed in areas you’d expect to find valuable items, such as near the end of a vault or near priority mission objectives.

Common containers are found regularly as you explore an area. Expect to find at least one to three common containers in an unexplored section. Common containers generally consist of salvage, consumables, and common research materials. These containers are physically the smallest type.

Uncommon containers are found infrequently and contain similar types of items as common containers, but of a higher quality and greater rarity (e.g., moderate-to-high value salvage instead of low-value salvage). Uncommon containers are slightly larger than common containers.

Rare containers are physically large and easily distinguishable from common and uncommon containers. They have a higher likelihood of containing rare and ultra-rare equipment and high-quality salvage. As you’d expect, you won’t find many of these, and you’ll know when you see one.

Hidden cache containers, which draw multiple items from rare loot tables, are hidden around various UNCs. These are special containers, marked on the map if the Reconnaissance Cryo Pod Perk is unlocked. However, you do not need to have this perk to find and loot these (as long as you know where they are).



Game Mechanics Glossary

Credits

Credits are the currency standard used in trade between species from the Milky Way. They're primarily earned through selling salvage found in the Heleus Cluster. Note that natives of the galaxy may not accept credits until certain conditions are met.

Game Mechanics Glossary

Crew Info Board

The Crew Info Board can be found in the Tempest's crew quarters. It's a bulletin board where your squadmates can post casual banter. It's there entirely as flavor, so don't worry about potentially missing missions or important objectives from it.

MASS EFFECT ANDROMEDA

Game Mechanics Glossary

Cryo Pod Perks (AVP Status Control)

Cryo Pod Perks represent the support and aid given to Ryder and his/her crew by colonists in the Heleus Cluster. Perks are passive bonuses and rewards, categorized over three concept specializations: science, military, and commerce.

You're rewarded your first Cryo Pod Perk point after establishing an outpost on Eos. Additional points can be earned by gaining more AVP and gaining Nexus Levels (which are earned by generally being an effective Pathfinder).

Perks costs one perk point and, unlike skill points, they are **non-refundable** once spent.

Note that some give immediate bonuses while some give bonuses over time that can be collected from the Tempest. Once a timed reward has been generated, no additional rewards from that particular perk are generated until the player picks up the current one.

SCIENCE POD PERKS

PERK NAME	REQUIREMENTS	REWARD
Lab Technicians	—	Earn research points at regular intervals.
Mining **Operations**	—	Receive a selection of minerals at regular intervals.
Improved Development	Lab Technicians	Increases Research Data gain from all sources by 10%.
Expanded Field Analysis	Mining Operations	Additional common mining nodes are made available.
Expanded Field Analysis	Viability of 90% required on Elaaden	Additional rare mining nodes will be made available.
Accelerated Research	—	Reduces the amount of time it takes to earn research points.
Accelerated Mining	Mining Operations, Viability of 70% required on Elaaden	Reduces the amount of time required to gather minerals.
Improved Development II	—	Further increases Research Data gain from all sources by an additional 10%.
Innovation	—	Increases augmentation slots by one on all research projects.

MILITARY POD PERKS

PERK NAME	REQUIREMENT	REWARD
Munitions	—	Receive a drop of consumable supplies at regular intervals.
Hunting Parties	—	Receive organic materials at regular intervals.
Special Forces	—	Receive tech materials at regular intervals.
Reconnaissance	—	Reveals hidden caches around established forward stations.
Advanced Training	One of the following perks unlocked: Munitions, Hunting Parties, Special Forces, OR Reconnaissance	Gain a bonus of +10% gained for completing encounters.
Always Prepared	Munitions, Viability of 70% required on Eos	Unlocks one extra consumables slot.
Versatility	Always Prepared, Viability of 90% required on Eos	Unlocks one additional consumables slot.
APEX Tactics	—	Earn 15% more credits for APEX missions.
APEX Tactics II	APEX Tactics	Earn an additional 15% credits for each completed APEX research.
Ears to the Ground	—	Grants a 20% chance to receive weapons or armor when an APEX mission is completed.

COMMERCE POD PERKS

PERK NAME	REQUIREMENT	REWARD
Financial Infrastructure	—	Earn credits from investments at regular intervals.
Financial Infrastructure II	Financial Infrastructure	Earn a large amount of credits from investments at regular intervals.
Grey Market Connections	—	Improves prices when buying and selling items.
Grey Market Connections II	Grey Market Connections, Viability of 70% required on Kadara	Further improves prices when buying and selling items.
Market Dominance	—	Gain access to special inventories from merchants.
Supply Lines	Unlock one of: Financial Infrastructure II OR Grey Market Connections II, Viability of 90% required on Kadara	Increases the amount of raw materials and consumables that can be purchased from traders.
Trade Capacity	—	Increases inventory capacity.
Trade Capacity II	Trade Capacity, Viability of 70% required on Kadara	Further increases inventory capacity.
Fusion Mod Support	Market Dominance, Viability of 90% required on Kadara	Cuts the penalty of all Fusion Mods in half.

Game Mechanics Glossary

Deconstruction

Deconstruction is the process of breaking down or destroying an item in your inventory. For freeing up inventory space, it's an excellent alternative to selling your unused weapons and armor, especially if you're not in need of credits (and if you're diligently pillaging salvage containers, you mostly aren't).

To deconstruct an item, select it in the inventory menu and press the designated Deconstruct button displayed at the bottom of the HUD. A dialogue confirmation box appears with a list of materials recovered if you choose to complete the process. All weapons and armor grant materials when deconstructed. Other items are simply destroyed (equivalent to throwing them away or dropping them).

Game Mechanics Glossary

Emails

Two email stations are installed on the Tempest. One is located in the Pathfinder quarters; and the other is on the bridge, behind Suvi. Received emails generally consist of responses from people you've interacted with. You may also receive requests from others asking for help; these side missions can be activated by pressing the Confirm button while highlighting the email. Mission request emails are marked with a distinct icon next to them.

Check your inbox frequently—your team can email you for a myriad of reasons, ranging from an invitation to a friendly outing to a plea for help in an urgent task.

Game Mechanics Glossary

Forward Stations

Forward stations are deployed from the Tempest to give you a foothold in key areas on a planet. Thanks to Suvi, your map is automatically marked with potential forward station plots whenever you land on a new planet. Forward stations provide several features and luxuries, and there is no cost to calling one down.

Calling Down a Station: To call down a forward station, simply get within range of the holographic overlay provided by SAM.

Fast Travel: You can fast travel to any established forward station via your world map. Select the forward station and press the Confirm button. Note that forward stations aren't the only points you can fast travel to. Any map marker with an added fast-forward symbol next to it can be used as a fast travel point (such as the Tempest).

Resupply: You can fully restore your shields, health, power cells, and life support by visiting a forward station (on foot or while driving the Nomad). The Nomad is also repaired in this manner.

Change Loadout: Each forward station includes a loadout station. Use it to open the Loadout interface if you'd like to swap out squadmates or manage your equipment.

Call Nomad: The Nomad function deploys the Nomad to your position. On planets where the Nomad is unavailable, this panel on the forward station is instead used to call in an extraction to the Tempest.

Find Minerals: Establishing a forward station reveals all mining zones in the vicinity. Use the Nomad's mining interface to call down a probe to collect and add minerals to your inventory.

Sensor Logs: Sensor logs are available at most forward stations to provide information on nearby events.

MASS EFFECT ANDROMEDA

Game Mechanics Glossary

Fusion Mods

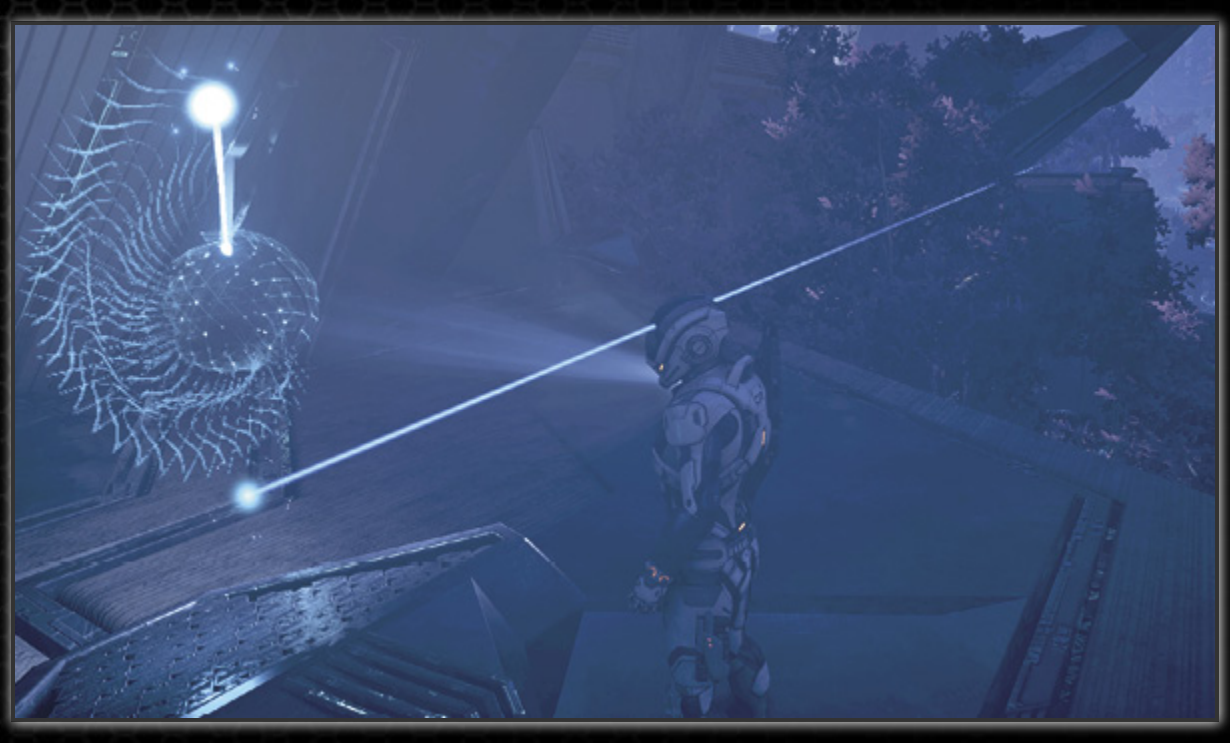
Fusion Mods are unique mods, specifically fitted for Ryder's chest gear. These are obtained as rewards for defeating powerful Remnant Architects or for activating dormant Remnant vaults. Fusion Mods provide significant bonuses tailored for specific play styles, designed with both positive and negative effects. Fusion Mods, like weapon mods, can be equipped and unequipped in the Loadout interface.

FUSION MOD NAME	POSITIVE EFFECT	NEGATIVE EFFECT / NEGATIVE EFFECT WITH FUSION MOD SUPPORT PERK IN PARENTHESES	OBTAINED FROM
Fusion Mod of Shielding	+50% Max Shields	-50% Max Health (-25%)	Eos Vault Activation
Fusion Mod of Robotics	+25% Tech Construct Health, +25% Tech Construct Damage	-50% Max Shields (-25%)	Havarl Vault Activation
Fusion Mod of Adrenaline	On Kill: Recharge All Active Powers	-50% All Power Recharge Speeds (-25%)	Havarl Secret Container*
Fusion Mod of Resistance	+20 Damage Resistance	On Evade: -50 Health (-25)	Voeld Vault Activation
Fusion Mod of Rapid Deployment	+50% All Power Recharge Speeds	-30% Weapon Damage (-15%)	Kadara Vault Activation
Fusion Mod of Rupture	+25% Weapon Headshot/Weak Point Bonus	-70% Weapon Clip Size (-35%)	Elaaden Vault Activation
Fusion Mod of Biotic Mastery	+30% Biotic Power Damage	-20% Melee/Weapon/Tech Power/Combat Power Damage (-10%)	Eos Architect Neutralization
Fusion Mod of Hovering	+100% Hover Duration	-30% Weapon Damage (-15%)	Voeld Architect Neutralization
Fusion Mod of Tech Mastery	+30% Tech Power Damage	-20% Melee/Weapon/Biotic Power/Combat Power Damage (-10%)	Elaaden Architect Neutralization
Fusion Mod of Battering	+30% Melee Damage	-20% Weapon/Tech/Biotic Power/Combat Power Damage (-10%)	Kadara Architect Neutralization
Fusion Mod of Health	+100% Max Health	-50% Max Shields (-25)	Defeat the Archon's Sword (The Journey to Meridian)

Havarl's Secret—Fusion Mod of Adrenaline

The Fusion Mod of Adrenaline is unique, as it's found in a secret compartment on Havarl instead of being a reward for activating a vault or defeating an Architect. To access it, you must have completed the mission, "A Dying Planet," along with reading Addison's follow-up email. Next, find the Remnant console located on the map at the following location.

Activate the console, then, with your scanner, follow the highlighted connection west, leading to a climbable outcropping (using the Remnant blast shields as climbing platforms). Another Remnant console is at the top of the climb. Its link points to a gravity well off in the distance on another pillar. Activate the console, then follow the link to ascend that pillar.



After scaling the pillar, use the gravity well to transport north through Havarl to one more console. Interface with the console to bring up a Remnant Decryption Puzzle. Complete the puzzle (the solution can be found under Remnant Decryption Puzzles in this glossary) to activate another gravity well. Use the gravity well to levitate to a small room, housing your reward.

Galaxy Map

See the **Galaxy Map** section for a complete listing and unlock conditions of systems found in Andromeda.

MASS EFFECT ANDROMEDA

Game Mechanics Glossary

Hazards (Global)

While these ”golden worlds“ show promise of human colonization, most are still environmentally hazardous, with the potential to kill the reckless. There are several types of global hazards, each having varying levels of severity, displayed at the bottom left of your HUD. The higher the severity of the environment you’re in, the faster your life support gauge drains.

Life support can be restored through various means, depending on hazard type. For instance, if you’re suffering from extreme cold on Voeld, you can find an installed heater to warm up.

Level 1 hazards are generally manageable for long periods of time. You can usually explore and complete objectives under Level 1 severity.

Level 3 and 4 hazards drain your life support extremely quickly. This usually means the area is off-limits until the severity declines (either through activating vaults or progressing through the main story).

GLOBAL HAZARD TYPES AND LOCATIONS

Radiation: Eos, H-047C

Electrical: Habitat 7, Eos

Cold: Voeld

Heat: Elaaden

Game Mechanics Glossary

Hazards (Local)

Local hazards are danger zones that rapidly inflict damage to you while you're in contact with them. Most are obvious, such as lava and visibly coursing electricity. Other hazards to watch out for include ice geysers, scourge clouds, Remnant fluids, and poisonous gas. They're usually avoidable, so don't stand in the fire!

Game Mechanics Glossary

Heleus News Service

This news terminal can be accessed in the Nexus docking bay (near the door to the Tempest). It's available for use after establishing the Initiative's first outpost on Eos. Its newsfeed is updated with summaries of major events surrounding the Andromeda Initiative, of which you're usually the center.

Game Mechanics Glossary

Journal

For mission details, refer to the Priority Ops and Secondary Ops chapters of this book.

Game Mechanics Glossary

Level (Player Level)

A character's level represents their overall skill and experience. Levels are gained upon accumulating sufficient experience points (through combat, exploration, completing quests, etc.).

Ryder gains:

- Three skill points per level for Levels 2 and 3.
- Four skill points per level for Levels 4 through 10.
- Five skill points per level for Levels 11 through 25.
- Six skill points per level for Levels 26 through 70.

Squadmates gain two skill points per level, but also gain 36 max health and shields (Ryder never gains health or shields for leveling up).

MASS EFFECT ANDROMEDA

Game Mechanics Glossary

Mining

Minerals can be mined on foot using Ryder's omni-tool, or by calling down mining drones from the Nomad while in a mining zone (displayed on your map, near forward stations). While exploring the Heleus Cluster in the galaxy map, you may also find anomalies containing large mineral deposits, collected with a probe.

Mineral nodes are plentiful in outdoor areas, particularly at the bottom of hills and rocky terrain, so keep a lookout.

Game Mechanics Glossary

New Game+

This feature opens up after completing the Priority Ops (main quest) mission chain. When a completed game save is detected, a “New Game+” option appears in the main menu upon selecting “New Game.” Starting a new game with this option allows you to start a brand-new game, except with most of your previous stats carried over, starting from the Character Creation interface. Before you begin, you can alter various customizations, such as which Ryder twin to play, as well as his or her training history.

Replaying the game with New Game+ makes for a good opportunity to complete the game on higher difficulty settings, since you have access to all of your gear, skills, and profiles.

Kept Data:

- Levels (skill points)
- Powers
- All non-mission items (excluding special quest items)
- Research Data
- Credits

Reset Data:

- Special mission items
- Mission progression
- Narrative choices
- Cryo Pod Perks
- Codex entries

Game Mechanics Glossary

Nexus Level

As you gain AVP, the Initiative's primary objective progresses and the Nexus gains levels. Gaining Nexus Levels rewards you with Cryo Pod Perks (comparable to your personal skill points). The Nexus Level caps at 20. At the level cap, you can purchase and unlock all available Cryo Pod Pperks (provided you've accumulated enough per-planet Viability for certain perks).

Unrelated to Nexus Level, parts of the Nexus expand upon reaching certain points in the main story (such as the tech lab and the Vortex Bar opening up after Ryder activates the vault on Eos).

MASS EFFECT ANDROMEDA

Game Mechanics Glossary

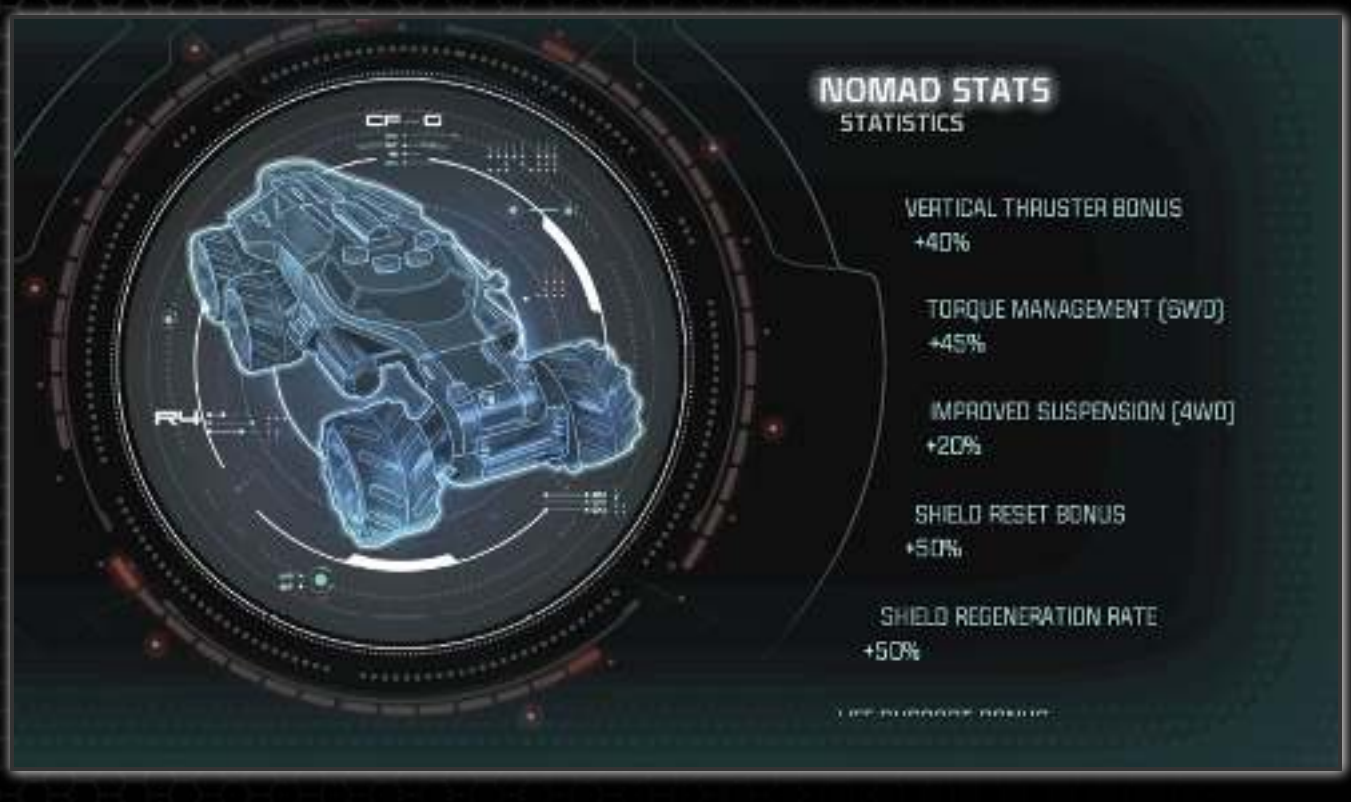
Nomad

The Nomad is an agile all-terrain vehicle unlocked shortly after the prologue mission. It's your primary mode of transportation for exploring large, open areas. The Nomad is loaded with features, including a four-wheel-drive all-terrain mode, allowing for easy traversal up and over steep hills (and even mountains!). Fully developed upgrades for the Nomad can be purchased from shops, such as the Vehicle Vendor on the Nexus. Furthermore, Nomad blueprints are rewarded to the player as they level up, which can then be developed at a research center. The Nomad's stats can be viewed through the statistics menu, accessed via the skills menu. Use the designated key displayed at the bottom of the HUD, labeled, "View Statistics."

The Need for Speed—Nomad Upgrades

Upgrading the Nomad may seem trivial and non-essential at first, but the difference between an upgraded Nomad and a non-upgraded one is night and day. While it may not help you in several combat scenarios, the Nomad provides an added layer of defenses in open areas, as it acts as another source of cover.

Additionally, the Nomad's thrusters, suspension, and torque can all be upgraded for a much-improved driving experience. Upgrading the Nomad cannot be recommended enough, so be sure to do some mining! Nomad upgrades all depend on minerals for development.



MASS EFFECT ANDROMEDA

Game Mechanics Glossary

Outposts

Outposts are potential colonial settlements established on golden worlds, expanding the Initiative's efforts and progressing overall Viability. Most importantly, they create valuable living space, allowing for the revival of hibernating colonists still in cryostasis. These freed colonists reward you with Cryo Pod Perks (see **Cryo Pods**).

Establishing an outpost on a planet requires raising its tracked Viability to a minimum percentage (see **AVP**). Finding and completing the Remnant vault on a planet raises its Viability considerably and, on its own, is usually enough to establish an outpost there. However, it's also possible to raise the Viability rating through other activities on the planet without completing the planet's vault (although that's extremely difficult!).

Game Mechanics Glossary

Peripheral Information (Datapads, Information Walls, Terminals)

As you explore, you may come across a variety of objects like datapads, Information Walls, and log terminals. Occasionally, these contain objectives for missions, or they may contain a trigger to start one of these activities. For the most part, these items provide peripheral background information, adding to the setting, and immersing you into the game's lore.

MASS EFFECT ANDROMEDA

Game Mechanics Glossary

Remnant Decryption Puzzles (“Remdoku”)

Certain Remnant consoles are locked via mini-game decryption puzzles. Like Sudoku, these puzzles test a player’s logic and deductive skills. The object of the game is to fill in the entire grid so that each row, column, and region (sub-grids marked with a distinct outline) contains all Remnant glyphs for that console; if there are four rows, then there are four glyphs for that console. Since each row/column/region needs to contain all glyphs, this means there can be no duplicates within those subsets.

Usually, a couple of glyphs are missing from the puzzle (indicated with a “?” on the grid), and the puzzle can’t be decrypted unless all glyphs are revealed. To reveal them, use the scanner to survey the surrounding area; connective wiring exposed with the scanner provides clues to where the glyph panels are located. Find and scan glyph panels to add them to the puzzle. SAM notifies you once all glyphs are found so you can activate the console and begin playing the Remnant Decryption Puzzle.

Remnant Decryption Keys can be used to bypass these puzzles; however, there are a select few that cannot be bypassed this way.

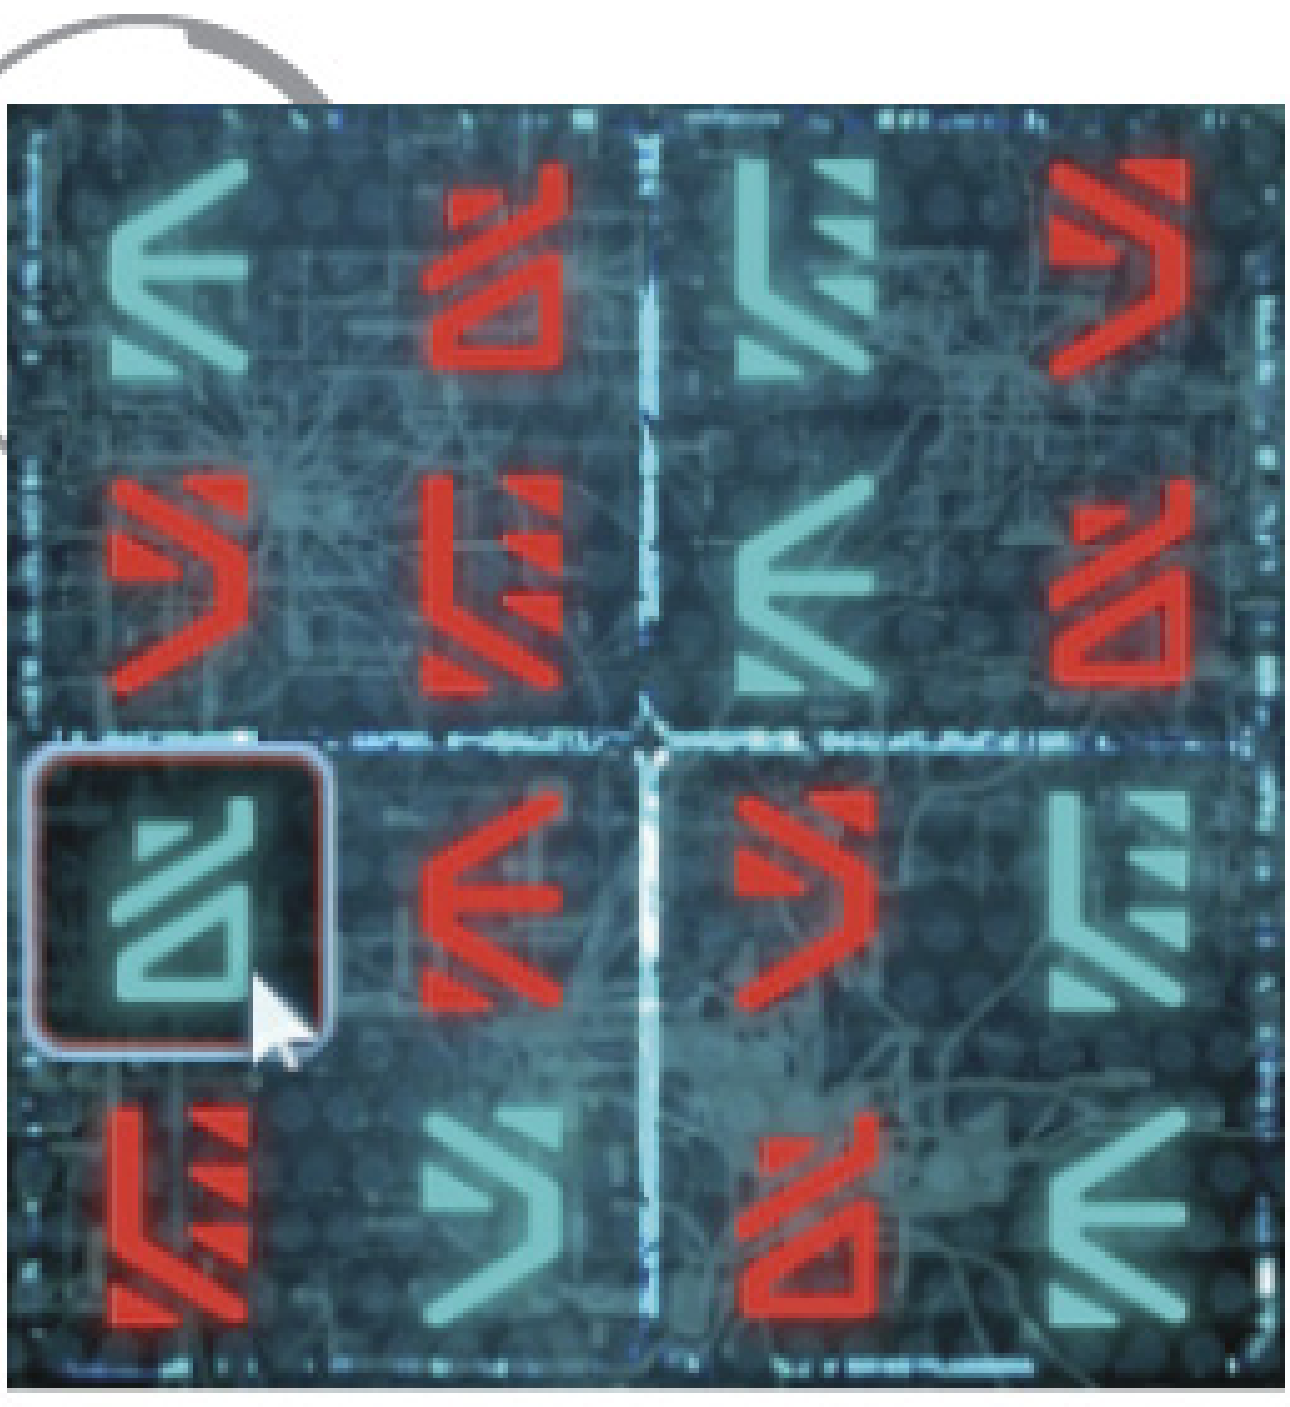
REMNANT DECRYPTION PUZZLE TIPS

If you know three glyphs for a group (assuming four per group), then the remaining glyph must go into the remaining slot.

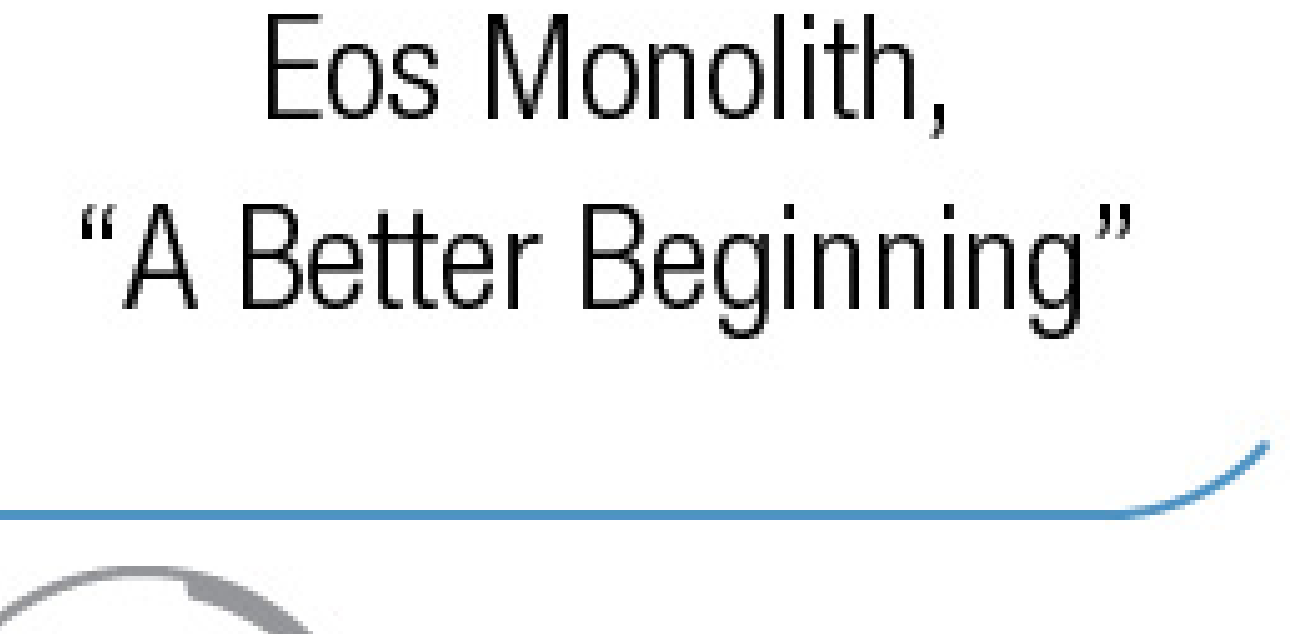
Work on solving slots that complete the most groups, making sure there are no duplicates in the row/column/region.

If there are multiple candidates possible to solve a specific slot, you can logically eliminate them by trial and error, checking validity in other slots and groups.

SOLUTIONS



Eos Monolith,
“A Better Beginning”



Eos Remnant Vault,

MASS EFFECT ANDROMEDA

Game Mechanics Glossary

Research and Development System

The Research and Development system, accessible through the research center, is a crafting mechanic that allows the player to create unique equipment, including weapons, armor, mods, and augmentations. You can also perform upgrades to the Nomad with this crafting mechanic. Equipment technology is based on one of the three types of **Research Data** (displayed in the scanner HUD).

This system rewards a player for going the extra mile as a Pathfinder who actively participates in extracurricular activities like scanning, space exploration, collecting, and mining.

You can start your research gathering near the beginning of the game, as several scannable objects are found in the prologue mission on Habitat 7. By the end of the mission, you can leave with a sizable amount of Research Data to spend at a later date.

R&D GAME FLOW

1. Gather Research Data points through scanning various objects.
2. Use the Research Center interface (found on the Tempest or in colonial science labs) to spend Research Data points on blueprints of a particular technology.
3. Gather the required minerals and materials to develop the blueprint item (some can be purchased from vendors).
4. Craft the item using the Development tab of the Research Center interface.

ADVANCED DEVELOPMENTS

Ranks VI through X of a craftable line of equipment is unlocked once the first five ranks of that particular blueprint are purchased. These are added to the purchasable blueprints with an "Advanced" prefix, such as "Advanced Remnant Heritage Arms" beneath "Remnant Heritage Arms."

Game Mechanics Glossary

Re-Spec Station

The Re-Spec Station is installed on the Tempest's medbay and can be used once Ryder receives the ship. Using the station refunds skill points, allowing you to reallocate accrued points of any member of your away team. Any time a character undergoes a re-spec, the first re-spec cost is 20. Subsequent re-specs each costs an additional 500.

Use the Re-Spec Station if there's a particular style of play you'd like to try out, or if you come across a difficult encounter in which a certain power loadout would be more effective than your current one.

Game Mechanics Glossary

Scanner

A proprietary technology developed by the Andromeda Initiative. Research for it was derived using technology salvaged from the geth along with software developed by the Salarian Special Tasks Group. In conjunction with a supercomputer (like a SAM implant), this omni-tool mounted scanner can accurately complete detailed surveys of an area. Extremely useful for forensics-based investigations.

Using the Scanner: Open the scanner by pressing the assigned button. Controls for scanning are displayed on your HUD beneath the scanning field. Objects and lifeforms highlighted orange within scanning range can be examined by SAM, who provides additional information to the right of the HUD.

Research Data: When scanning new lifeforms and tech, you may earn Research Data (RD). Data can be spent at a research center to unlock blueprints and augmentations for crafting. The amount of data you've accrued is displayed at the bottom of your scanner.

There are three types of Research Data:

- **Milky Way:** Data related to the colonists and their equipment.
- **Alien:** Data related to the various species discovered in Andromeda.
- Remnant**:** Data related to mysterious abandoned technology.

Game Mechanics Glossary

Tempest Trophies

Tempest Trophies are collectible items that are found or purchased throughout the game. Once obtained, they're placed on display inside the Pathfinder's quarters.

TEMPEST TROPHIES

MODEL	HUB	LOCATION	UNLOCK CONDITION	COLLECTION METHOD
Alliance Dreadnaught	Kadara Outskirts (UNC)	Kadara Slums (UNC, above clinic)	Visit Kadara	Pickup
Angaran Shuttle	Aya	Docking Bay (in alcove)	Complete "A Trail of Hope"	Pickup
Athabasca Class Freighter	Aya	Inside Governor's office	Establish embassy on Aya	Pickup
Citadel	Nexus	General Merchant	Complete "The Journey to Meridian"	Purchase
Destiny Ascension	New Tuchanka (Elaaden Outpost)	By the bar in New Tuchanka	Visit Elaaden	Pickup
Hyperion	Nexus	Eos Outpost (Inside small building)	Establish settlement on Eos	Pickup
Kett **Fighter**	Kadara	Outcast Headquarters	Visit Kadara Port	Pickup
Archon's Flagship	Nexus	General Merchant	Complete "The Journey to Meridian"	Purchase
Kett **Shuttle**	Kadara	General Merchant (UNC, Wind Farm)	Visit Kadara	Purchase
Initiative Shuttle	Diteaon (Kadara Outpost)	Inside main outpost	Establish settlement on Kadara	Pickup
Initiative Fighter	Nexus	Spender's Apartment	During "Krogan Betrayal"	Pickup
SSV Normandy SR 2	Hyperion	Alec Ryder's room above bed	—	Pickup
Nexus	Nexus	General Merchant	—	Purchase
Nomad	Nexus	General Merchant	Establish settlement on Eos	Purchase

Tempest	Tempest	—	Complete "Movie Night" quest chain	—
Turian Frigate	Taeve Uni (Voeld Outpost)	Inside settlement building	Establish settlement on Voeld	Pickup

Game Mechanics Glossary

Uncharted World (UNC)

UNC is short for UNCharted world. As most of Andromeda is uncharted, most explorable areas you visit in the game are occasionally referred to as UNCs. For comprehensive maps of these explorable areas, see the **Exploration** chapter.

MAJOR UNCS

Gameplay-wise, ”major“ UNCs are vast open-world areas with myriad locations, activities, and missions. While there are currently four major UNCs, expect to spend numerous hours or days exploring each one.

MINOR UNCS

Minor UNCs are much more compact, generally compromising of a handful of missions (although each has an extensive mission chain, giving you a tour of most of the area).

Game Mechanics Glossary

Vendors

Trade vendors are found on the Nexus and other trade centers, offering useful supplies purchased with the Milky Way's standard currency. Vendors also liquidate your Heleus salvage, giving you usable credits in exchange for alien equipment collected throughout Andromeda. The most convenient vendor for selling salvage is located in the research room of the Tempest, called the **Buy/Sell Kiosk** next to the Research Center interface. This kiosk also offers valuable consumables, such as cryo ammo.

Vendors also sell valuable mining and research materials for crafting to alleviate some of the time-consuming mining and material gathering required to develop equipment. The General Merchant on the Nexus and the Materials Merchant on Aya (when accessible) both offer a vast supply of materials, including rare ones like element zero.

Weapons, armor, and mods sold by vendors scale with level, with the prices adjusting accordingly. The higher your level, the better the gear you can purchase. For instance, at level 70, vendors sell "X"-rank items—the highest tier of equipment rank.

Game Mechanics Glossary

Viability

Combat Concepts

About Combat

This section is designed as a repository for combat concepts that aren't covered in Basics, either to include miscellaneous details of a concept or to expand on concepts with in-depth discussion. While most of the mechanics listed here focus on their application in Single-Player, several tips can also be applied to Multiplayer mode.

MASS EFFECT ANDROMEDA

Combat Concepts

Armor

Sara Ryder sporting various pieces of equipment, each created with a different technology.

Not to be confused with an enemy's "armor health," armor comprises pieces of equipment Ryder can wear to enhance his/her combat effectiveness. They provide stat boosts depending on the equipment set. Note that only some armor increases damage resistance (explicitly stating so in its properties).

Armor is categorized by the following sets, which are associated with specific stat boosts:

- **Angara:** Tech Power Damage, Tech Effect Duration, Max Shields, Tech Construct Damage
- **Heleus:** Power and Weapon Damage, Damage Resistance
- **Hyperguardian:** Max Health and Shields, Melee Damage
- **Initiative:** XP Encounter Gain, Shields
- Kett**:** Combat Power Damage, Weapon Damage, Combat Power Cell Capacity
- **Maverick:** Weapon Damage, Accuracy, Critical Hits
- **N7:** Biotic Power Damage and Recharge, Weapon Damage During Power Recharge
- **Pathfinder:** Weapon Accuracy, Power Restoration and Defense
- Remnant**:** Damage Resistance, Health and Shield Regeneration and Regeneration Delay Reduction, Power Recharge Speed

Note that Heleus Defender "chest" armor is a full-body suit and, when equipped, counts as chest, arms, and legs, which slightly limits customization (and sacrifices augmentation slots). For a comprehensive list of bonuses and other details, see the Armor section in the Inventory chapter.

MASS EFFECT ANDROMEDA

Combat Concepts
Consumables

While expensive, the Cobra RPG consumable absolutely destroys enemies.

Consumables are extra, usable resources that are highly impactful to your combat effectiveness. There are a variety of consumables each with specific uses ranging from shield restoration to damage amplification. The main drawback of frequently using consumables is the expense required early on in the game (when you don't have access to surplus credits). Fortunately, there's a convenient Buy/Sell Kiosk in the research center of the Tempest you can use to purchase consumables. Additionally, consumables are often found in containers if you're vigilant in exploring and looting buildings.

DISRUPTOR, CRYO, INCENDIARY AMMO

These "elemental" ammo consumables add a varying amount of enhanced projectiles, depending on the weapon they're applied to. Naturally, weapons with high rates of fire receive more enhanced ammo than weapons with low rates of fire.

ELEMENTAL AMMO TRICKS

Applying elemental ammo **reloads your gun without an accompanying reload animation** or downtime. The exact amount of enhanced ammo these consumables add is three times the max clip size of your current weapon. So if your pistol has a **magazine size of six**, you have **18 total shots of elemental ammo** even if you reload before your active clip has been exhausted.

For a full list of consumables, see Consumables in the Inventory chapter.

MASS EFFECT ANDROMEDA

Combat Concepts

Difficulty (Single-Player Setting)

The difficulty setting only affects combat and primarily tunes enemy properties such as health and damage output. For instance, when an enemy deals damage to you, its damage is multiplied by a greater factor on Insanity than on Normal. Enemy behavior is enhanced on Hardcore and Insanity with an increase in power use and evasive maneuvers.

Playing on Hardcore and Insanity isn't for the faint of heart. On Insanity, even the most skilled players should expect to die frequently.

Insanity—General Tips

Overcoming the Insanity difficulty requires mastery of all combat-related mechanics. The following is a checklist to keep in mind if you're up for the challenge:

Optimize effective combat stats through **Research and Development**. By diligently scanning for Research Data, accruing credits, and gathering blueprint materials, you can craft pieces of equipment to help you get through the most difficult encounters.

Be in cover at almost all times. High enemy damage and accuracy force an extremely safe and methodical play style.

Manage resources carefully. Ammo is sparse since supply crates don't automatically replenish. Add that to the fact that enemies have much more health, and Insanity becomes extremely taxing in that regard. Consider your weapon and power loadout carefully.

Power combos are essential and should be kept in mind as you upgrade your skills. Tech and heat combos are exceptionally strong.

Give **squadmates** meticulous orders, particularly to prevent them from being killed off in an encounter early on. While squadmates don't deal as much damage as you do, keeping them alive is vital because they can take enemy fire for you or disable enemies with their powers (for this reason, Peebee is recommended).

Use consumables liberally. Although constantly restocking consumables can be inconvenient, they can make or break your success in certain encounters. Keeping a stock of disruptor and incendiary ammo is recommended—the Buy/Sell Kiosk on the Tempest should be one of your favorite spots.

Unlock **Overload or Energy Drain**. This is especially important near the beginning of the game because of the Anointed and other deadly, shielded foes you're forced to face.

Learn enemy **weak points** to score critical hits and take out threats quickly. Increase weak point damage using Infiltrator profiles; this is particularly effective against bosses with "persistent" weak points, such as the Ascendant and Architect.

Use the Re-Spec Station. If you run into an exceptionally difficult encounter, you can refund your skill points and reallocate them into powers that directly help with the encounter you're having trouble with.

The Overload tech power is highly recommended for Hardcore and Insanity difficulties, particularly early on!

MASS EFFECT ANDROMEDA

Combat Concepts

Enemy Defenses

Enemies have varied health systems compared to player characters—most notably, an additional health type called "armor," indicated by a yellow health bar instead of the normal red health bar.

SHIELD HEALTH

Enemy shields behave similarly to yours—they regenerate after a certain period of time since last taking damage and block most power effects. Shields are represented by a blue bar above the enemy's health bar. Along with Overload and Energy Drain, beam-based "lightning" weapons deal bonus damage to shields.

ARMOR HEALTH

Enemy armor reduces your damage output by a **flat amount per hit** (as opposed to a percentage reduction). This means low-damage attacks from weapons like SMGs and assault rifles usually deal pitiful damage to armored enemies. Anti-armor powers or high-damage single-shot weapons are highly recommended against armored enemies. Although shotguns fire several low-damage pellets, shotgun pellets receive a compensatory bonus damage to armored enemies. Like an enemy with shields, enemies with armored health are immune to biotic effects.

BARRIER-GENERATING ENEMIES

Certain enemies like the Nullifier can generate an impenetrable fortress. However, these enemies are generally immobilized, so attack their flanks or find a way to disable their defenses.

WEAK POINTS

Shooting an enemy weak point multiplies your damage dealt. Enemy weak-point multipliers vary; some enemy weak points reward a higher multiplier than others. Weak points cause a distinct orange hit marker on the reticle.

Humanoids are usually vulnerable to shots to the head, while Remnant weak points aren't entirely obvious. Remnant weak points tend to include exposed wiring or lights (or "eyes"). See the Enemies section for specifics.

Combat Concepts

Formulas and Calculations

For the hardcore number crunchers, the following are formulas used by the game to determine the end values of certain properties.

DAMAGE TAKEN

IncomingDamage * (1 / (1 + SumOfDamageResistance / 100))

This formula does not take into account an extra difficulty-setting multiplier. *When TotalDamageResistance is 100, damage is halved. Additional damage resistance beyond 100 has diminishing returns.*

STAT REDUCTION

Formula used for stats involving “Reduction” percentages. Example for “regeneration delay reduction”:

DelayTime * (1 / (1 + ReductionPercentage))

Example: If default shield-regeneration delay time is 8 seconds, a “shield-regeneration delay reduction +15%” turns it into ~6.95 seconds. 8 * (1 / (1 + 15%)) = ~6.95

BONUSES

Regarding multiple bonuses to a stat, all bonuses are added together before being multiplied by the stat’s base value. For instance, the formula for damage bonuses is:

BaseDamage * (1 + SumOfDamageBonuses)

Combat Concepts

Health and Shields

Ryder’s health automatically regenerates up to 30% of maximum health after a certain period of time since last damaged (time is based on the health-regeneration delay stat). Damage resistance reduces damage done to a character’s red health.

Shields follow similar rules, but can regenerate fully. Also worth noting is that damage resistance is not factored into damage done to shields, although certain attacks can deal extra damage to them.

MASS EFFECT ANDROMEDA

Combat Concepts

Miscellaneous Combat Tips

Audio Cues: Audio cues such as footsteps, ammo fire, and enemy or squadmate chatter can all be used to help you make better decisions in combat. This extends to Multiplayer modes as well, especially since teamwork and synchronization are essential. Using a set of headphones can improve your ability to hear where enemies and attacks derive from.

Creative Hover-Fire Usage: Hover fire is a unique mechanic allowing for creative aerial assaults. Not only can you hover in place while airborne, but you can also combine hover fire with certain powers. **Tactical Cloak and hover fire**, for example, let you ambush an enemy in stealth with a huge damage multiplier, all while having the advantage of high ground. You're also free to use most offensive powers in the air, including biotic attacks like Charge and Nova.

Wall Hacks: Infiltrator profile plus a sniper rifle with a penetration mod is a very powerful combo. Infiltrator profiles allow you to see through cover, while the penetration stat lets you deal damage to enemies behind cover. Even if you deal less damage, you can score easy critical hits because most enemies hiding behind cover are stationary.

Power Use While Scoped: It's worth noting that powers can be used while you're zoomed in, even with a scoped weapon like a sniper rifle. Although you won't see Ryder's animation, the power still activates and behaves normally. For instance, scoping in on an enemy and using Overload behaves as you'd expect. The Overload goes off while you're still zoomed in, ready to finish off the stunned enemy.

Profile Switching: Switching profiles is extremely effective in certain scenarios, especially late in the game when you have a large amount of skill points invested into separate skill groups. Since there are no penalties for switching profiles mid-combat, you can go from having a huge damage reduction bonus (Sentinel), instantly into enhancing your weak point, sniper rifle damage (Infiltrator). This tactic is exceptionally strong against the Architect and Ascendant.

Reloading: Reloading is debilitating, and if you run out of ammo at an inopportune moment, it may be tempting to execute other actions during your reload. However, doing so may be detrimental, as a proper reload carries the strict requirement of fully completing the reload animation. This means once your character begins reloading, you cannot perform any action that cancels it, or else you have to start the reload process over eventually. Applying elemental ammo to your gun **reloads the gun without a reload animation**. Optimize your damage output by emptying your clip before using disruptor/cryo/incendiary ammo for an instantaneous reload, effectively "double-dipping" from a single clip.

ACTIONS THAT CANCEL (HINDER) RELOADS

- Shooting
- Evading
- Melee
- Power Use
- Toggling Sprint
- Switching Weapons
- Vault/Mantle

Vintage Heat Clip "Reloading": This throwback to the original *Mass Effect* is arguably the best augmentation in the game for weapon and power combination usage, and surprisingly, not for its benefit of providing infinite ammo (which is rather nice). What makes this augmentation incredible is that it removes "reloading" altogether. Since it uses a recharge speed timer, you can perform other actions while you "automatically reload," including using powers and attacking with your melee weapon. Normally, reloading requires an animation commitment, leaving you vulnerable. This makes the Vintage Heat Clip ideal for high-damage weapons with low-capacity clips, since their main weaknesses are reload times. As long as your play style includes weaving in powers and abilities, you can make the most of the Vintage Heat Clip augmentation. Additionally, make sure your clip size after applying a Vintage Heat Clip is at least two, since a one-shot clip forces a much longer "overheat" reload every shot, which you should avoid. This Milky Way-based augmentation is highly recommended for Shotgun Vanguard and Black Widow infiltrator builds.

Skill Swapping: By using the skills menu (even in the heat of combat), you can swap out power abilities for other ones. Take advantage of this when you run out of power cells for another power to maximize your combat effectiveness. However, there's an important limitation to keep in mind. **When swapping out a power, all projectiles, objects, and effects originating from the swapped-out power are nullified and removed from the field.** This is to prevent exploits with hot-swapping persistent powers. So if you throw out your last Omni Grenade, make sure it explodes and deals its damage before you swap it!

MASS EFFECT ANDROMEDA

Combat Concepts

Weapon Mods

Mods are hot-swappable enhancement items that can be added to weapons to fine-tune and tweak various properties. There are eight adjustable properties to a weapon, each with a contextual icon to match:

WEAPON PROPERTIES

POSITIVE EFFECTS	TYPES	ICON
Accuracy	Scope	
Clip Size	Magazine	
Damage	Barrel	
Melee Damage	Melee Optimizer	
Penetration/Penetration Distance	Receiver	
Spare Ammo	Spare Clip	
Stability	Stock	
Weight (Reduce)	Ultra-Light Materials	

Like weapons and armor, mods dropped from enemies and sold by vendors are level-scaled. The higher your player level, the higher the rank of the mods you find, with increasing bonuses. Additionally, some mods (within the same rank) boost stats even more than usual, but with a sacrifice to another stat. These mods have distinct names—names with a modifying adjective to the component, such as “Heavy Magazine” (large clip-size bonus, but weight penalty) and “Long Barrel” (much greater damage, but less accuracy).

Most standard weapons can have two mods installed, while crafted weapons can potentially have four.

MASS EFFECT ANDROMEDA

Combat Concepts

Powers

Using Powers: Press the buttons indicated on the power icons at the bottom right of your HUD to use those powers. Powers such as the biotic Lance require careful aim, but most automatically seek your current target (the enemy with a health bar displayed, also known as your “soft target”).

Assigning Powers: Powers can be assigned to different buttons on the Skills screen. The Skills screen also indicates which powers have a secondary functionality when the button is held down. For example, Pull can either levitate an enemy in place (button tap), or it can be used to bring the enemy toward you (button hold).

Recharge: Most powers require some recharge time after use. The remaining recharge time is marked on the power icons at the bottom right of your HUD and on the circular blue meters that surround your aiming reticle. Recharge speed is reduced when carrying heavy weapons (you can view a weapon’s weight in the inventory menu). Carrying multiple weapons can also drastically reduce your recharge speed. You can mitigate the weapon-encumbrance effect by investing in the Combat Fitness skill, along with skills that specifically reduce weapon encumbrance.

Power Cells: Powers such as Omni Grenade have no recharge time, but require the consumption of a disposable power cell (indicated by a number and icon at the bottom right of your HUD). Additionally, powers that consume a power cell on use generally have more impact in battle than those that don’t, with the drawback of being limited. Power cells can be recharged at ammo crates and forward stations.

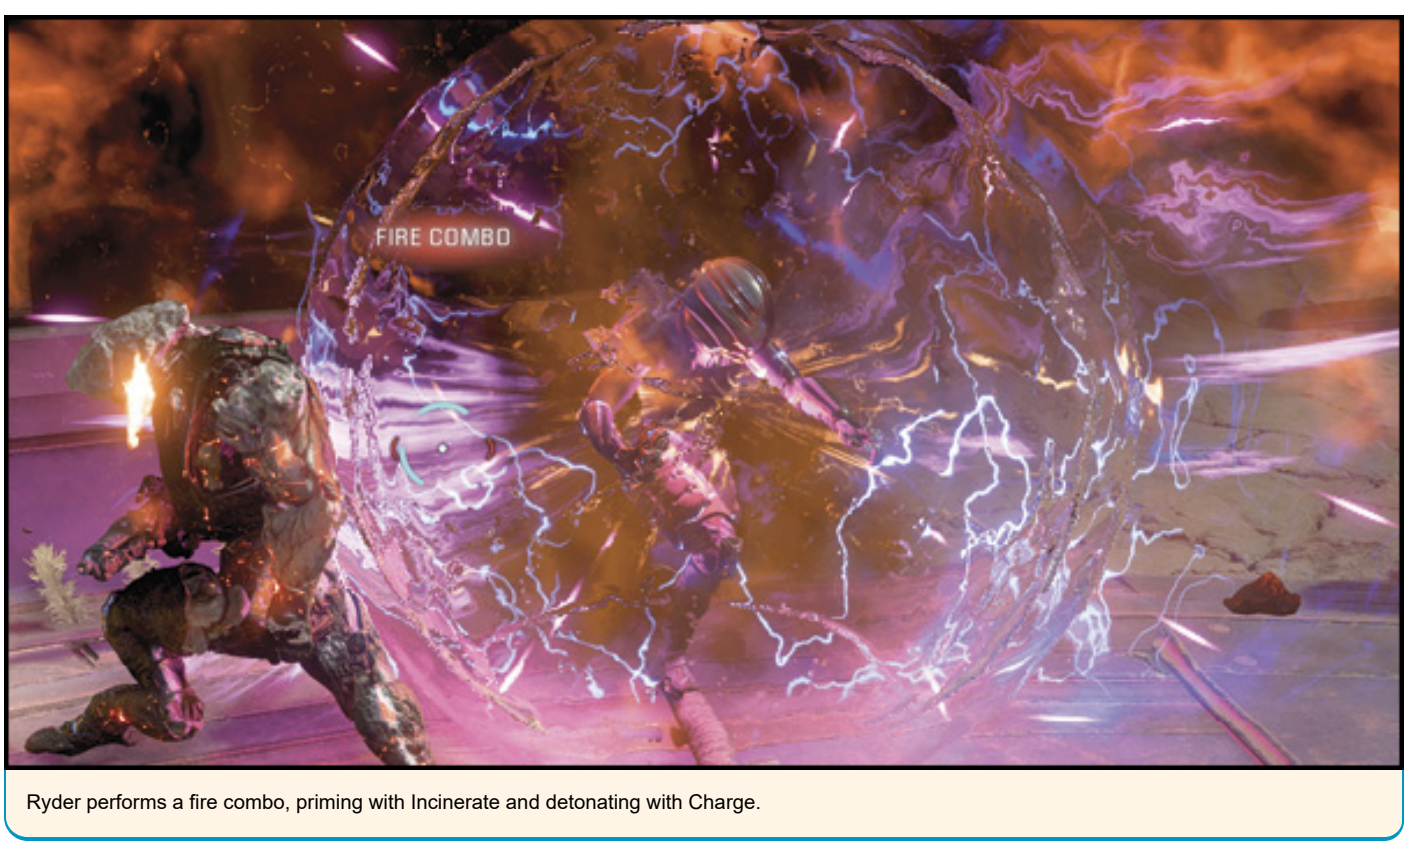
POWER COMBOS

The Power Combos mechanic from *Mass Effect 3* returns in *Mass Effect: Andromeda* and functions similarly, using a priming and detonating system.

There are four types of combos: heat, cold, tech (electric), and biotic. Primed enemies are usually identifiable; enemies on fire, levitating in a mass effect field, or frozen are generally primed for detonation. Powers and power upgrades in the skills menu are marked with primer and detonator icons.

When a primed effect is detonated, the **resulting combo** type is **determined by the primer type**, and not the detonator. In Single-Player, combo use isn’t a necessity for the Normal difficulty setting, but its use is highly recommended (and practically necessary) for the two higher difficulties.

Note that power combos act as a “bonus” attack (a separate, extra source of damage, immediately following the detonator). They include unique effects, squeezing out more value from your precious power recharge times. All combo detonations are considered area-of-effect explosions.



Ryder performs a fire combo, priming with Incinerate and detonating with Charge.

HEAT

Heat combos deal considerable incendiary damage, followed by a 10-second damage-over-time burning effect to all susceptible targets. The combined ignition and burn effect make heat combos the most damaging of all power combos.

Primers: Incendiary Ammo, Incinerate, Flamethrower, Assault Turret (Flamethrower)

COLD

Cold combo detonations inflict moderate damage, slowing all enemy movement in their blast radiuses. Additionally, armor-based enemies become brittle and take bonus damage while chilled.

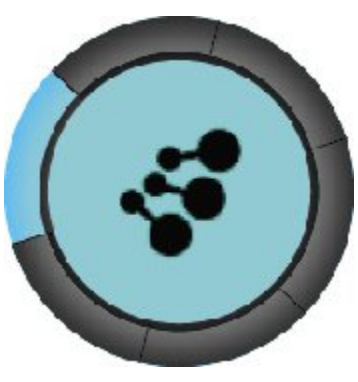
Primers: Cryo Ammo, Cryo Beam, Assault Turret (Cryo Ammo)

TECH (ELECTRIC)

Tech combos are electrical in nature. The initial shock deals heavy damage to shielded enemies, but only minor damage to normal and armor health. They also leave a disruptive electrical cage in the area, dealing additional damage over time while stunning enemies in range.

Primers: Disruptor Ammo, Barricade (Electric Defense), Trip Mine (EMP), Tactical Cloak (Disrupting Strike), Energy Drain (Extended Drain), Remnant VI (Electric Beam)

BIOTIC



Biotic combos are straightforward, causing no lingering effects. These combos simply deal a one-time burst of damage (albeit the highest of all initial damage). However, the Containment passive skill can be upgraded to add a knockdown effect, and the Adept profile enhances biotic combos with extra area-of-effect explosions on each target hit by the initial biotic combo.

Primers: Annihilation, Pull, Throw (Duration), Shockwave (Lifting Shockwave), Singularity, Nova (Seismic Nova)

DETONATORS

Energy Drain, Remnant VI (Detonating Missiles), Concussive Shot, Trip Mine (Detonator), Charge, Lance, Shockwave, Throw, Overload, Incinerate (Detonator)

MASS EFFECT ANDROMEDA

Combat Concepts

Profiles

The SAM implant enhances Ryder's mind and body, fine-tuning it and providing unique bonuses to his combat effectiveness. These ability-optimizing augmentations are called profiles. Only one profile can be active (or "equipped"), but can be swapped out at any time (through the pause menu or through the favorites wheel). Profiles are unlocked by spending skill points into the three power specializations.

There are seven profiles each leveling up in rank as more skill points are spent into its requisite power group (up to a sixth rank). As profiles are unlocked based on how you invest your skill points, their bonuses tend to synergize with your play style. In addition to enhancing existing stats, profiles add unique effects further differentiating them.

There's one profile per power group, unlocked by heavily focusing in one group. These make up the three "pure" profiles. Then there are three "hybrid" profiles derived from combining two of the three power groups. These are unlocked by dividing your points evenly into the two specialties required. Finally, the Explorer profile is unlocked by evenly distributing your points into all three power groups.

SKILL POINTS REQUIREMENTS

PROFILE	RANK 1	RANK 2	RANK 3	RANK 4	RANK 5	RANK 6
Pure (Soldier, Engineer, Adept)	6	24	54	99	156	232
Hybrid (Sentinel, Vanguard, Infiltrator)	3	12	27	50	78	116
Explorer	2	8	18	33	52	78

SOLDIER

Power Specialty Focus: Combat

Unique Effect:

- **Marksman's Focus:** Grants a temporary, stacking damage bonus for every target killed.
- **Summary:** Soldier profiles enhance firearm proficiency, fine-tuning Ryder's ability in focusing down high-priority threats. All bonuses are specifically geared toward weapon use.

ENHANCED STAT	RANK 1	RANK 2	RANK 3	RANK 4	RANK 5	RANK 6
Weapon Damage	10%	12%	14%	16%	18%	20%
Weapon Accuracy	10%	15%	20%	25%	30%	35%
Damage Resistance	2	4	6	8	10	12
Weapon Clip Size	10%	15%	20%	25%	30%	35%

ENGINEER

Power Specialty Focus: Tech

Unique Effect:

- Combat **Drone:** A drone that enhances tech power recharge speeds and defends the Engineer with a self-destructing EMP blast if an enemy is detected within its proximity. The enhanced recharge-rate bonus is lost while the drone itself is recharging after self-destruction.
- **Summary:** Tech profiles maximize Ryder's power combos and all aspects of tech constructs. Activating the Engineer profile is highly recommended if you're fond of the powerful Remnant VI tech construct, especially since you can set up combos between the Remnant VI and yourself.

ENHANCED STAT	RANK 1	RANK 2	RANK 3	RANK 4	RANK 5	RANK 6
All Combo Damage	20%	25%	30%	35%	40%	45%
Tech **Construct Health**	20%	25%	30%	35%	40%	45%
Tech **Construct Health Regeneration**	20%	25%	30%	35%	40%	45%
Tech **Construct Damage**	20%	25%	30%	35%	40%	45%
Tech **Restoration and Defense**	20%	25%	30%	35%	40%	45%

ADEPT

Power Specialty Focus: Biotic

Unique Effect:

Biotic **Echoes:** Biotic combos set off additional explosions on enemies hit by the initial combo.

Biotic **Jump and Evades:** Instead of using jump-jets, Ryder uses biotic power to perform these maneuvers, enhancing evade-dash distance.

- **Summary:** Adept profiles greatly enhance all biotic power aspects. Biotic powers are already proficient for disabling groups of enemies—larger effect radiuses combined with biotic echoes lets you set off biotic nukes on clumps of foes.

ENHANCED STAT	RANK 1	RANK 2	RANK 3	RANK 4	RANK 5	RANK 6
Biotic **Force**	15%	20%	25%	30%	35%	40%
Biotic **Area-of-Effect Damage**	15%	20%	25%	30%	35%	40%
Biotic **Area-of-Effect Radius**	15%	20%	25%	30%	35%	40%
Biotic **Effect Duration**	20%	25%	30%	35%	40%	45%
Biotic **Combo Radius**	20%	25%	30%	35%	40%	45%

SENTINEL

Power Specialty Focus: Biotic, Tech

Unique Effect:

- Tech Armor: Improves survivability once shields are down, granting +30 damage resistance to red health.
- **Summary:** Sentinel profiles offer a unique blend of enhancements to a niche set of powers. "Shield-Powered" upgrades for Lance and Nova (powers cost shields instead of having a recharge time) are improved by consuming less shields. Additionally, powers that restore shields (like Charge) or provide barriers are also enhanced.

ENHANCED STAT	RANK 1	RANK 2	RANK 3	RANK 4	RANK 5	RANK 6
All Combo Damage	15%	20%	25%	30%	35%	40%
Tech **Recharge Speed**	10%	15%	20%	25%	30%	35%
Power Shield Cost Reduction	20%	25%	30%	35%	40%	45%
Power Restoration and Defense	20%	25%	30%	35%	40%	45%

VANGUARD

Power Specialty Focus: Biotic, Combat

Unique Effect:

- **Siphoning Strike:** Melee attacks siphon shields, restoring 20% of max shields per successful hit. (Thus, faster and more frequent attacks benefit more from this than slower ones). Biotic **Jump and Evades:** Instead of using jump-jets, Ryder uses biotic power to perform these maneuvers, enhancing evade-dash distance.
- **Summary:** Vanguard profiles enhance a "tank" play style, naturally augmenting the tried-and-true Charge and Nova loadout. They also synergize well with strong melee weapons. Not only do your melee attacks deal more damage, but you regain lost shields from successful strikes, giving you a krogan-like resilience.

ENHANCED STAT	RANK 1	RANK 2	RANK 3	RANK 4	RANK 5	RANK 6
Melee Damage	20%	25%	30%	35%	40%	45%
Melee Force	50%	60%	70%	80%	90%	100%
Biotic **Recharge Speed**	10%	15%	20%	25%	30%	35%
Power Shield Cost Reduction	20%	25%	30%	35%	40%	45%
Max Shields	10%	15%	20%	25%	30%	35%

INFILTRATOR

Power Specialty Focus: Tech, Combat

Unique Effect:

- **Battlefield Awareness:** Reveals enemies behind walls while viewing through a scope.
- **Cloak Evades:** Evades grant a brief cloaking effect so enemies can't target you.
- **Summary:** Infiltrator profiles make for the quintessential sniper. Faster recharge times on Tactical Cloak and Energy Drain, in addition to an incredibly high weak-point damage bonus, allows for easy assassinations. Go for headshots, then fade into the shadows to reposition yourself to another sniping cover point.

ENHANCED STAT	RANK 1	RANK 2	RANK 3	RANK 4	RANK 5	RANK 6
Weapon Accuracy	20%	25%	30%	35%	40%	45%
Weapon Stability	20%	25%	30%	35%	40%	45%
Tech **Recharge Speed**	20%	25%	30%	35%	40%	45%
Weapon Headshot/Weak Point Bonus	50%	60%	70%	80%	90%	100%

EXPLORER

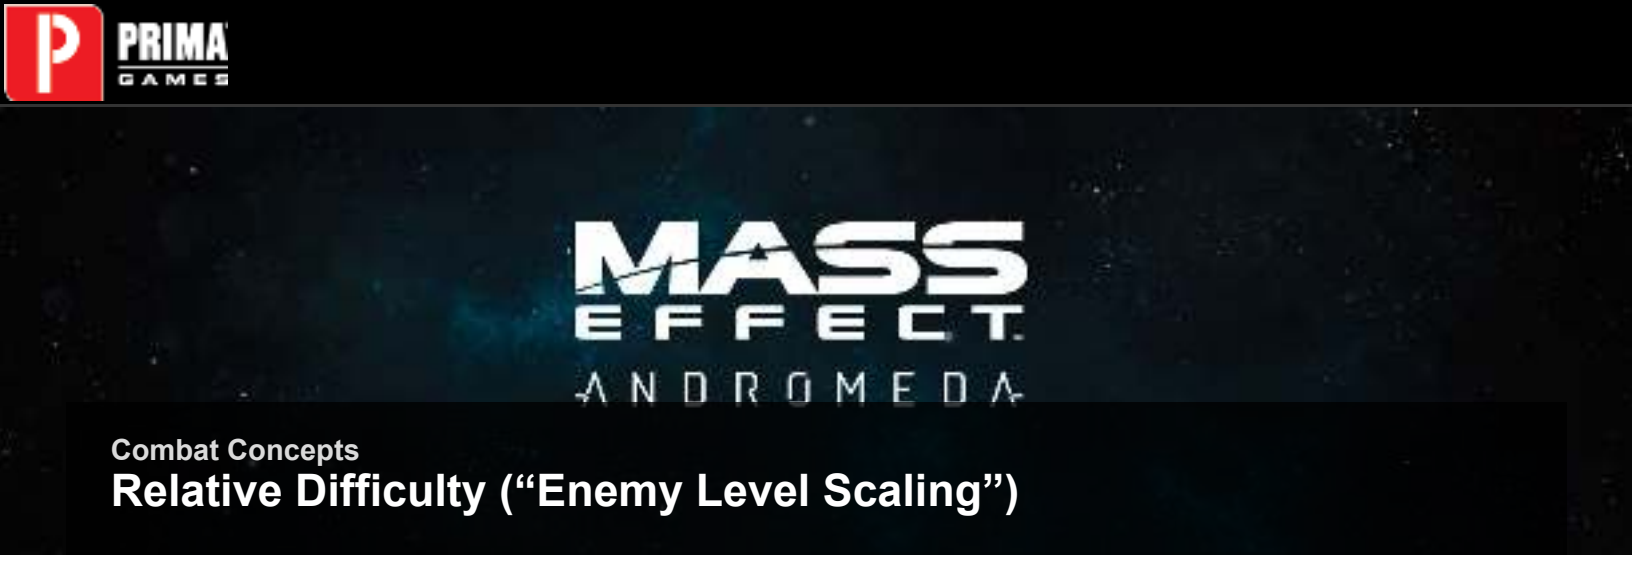
Power Specialty Focus: Combat, Biotic, Tech

Unique Effect:

- Biotic **Blink:** Evade dash is replaced with a teleporting effect that travels farther than normal dashes. Also allows you to bypass barriers.

- **Summary:** A jack-of-all-trades profile, increasing all important aspects of each specialty. While spreading your skill points thin may not seem like an attractive option at first, Explorer profiles compensate for this lack of specialization handsomely with the unique biotic Blink ability. Biotic Blink replaces your standard evade and allows you to teleport great distances (even flashing past certain physical barriers!).

ENHANCED STAT	RANK 1	RANK 2	RANK 3	RANK 4	RANK 5	RANK 6
Weapon Damage	5%	7%	9%	11%	13%	15%
Damage Resistance	5	7	9	11	13	15
Tech **Recharge Speed**	15%	20%	25%	30%	35%	40%
Biotic **Power Damage**	15%	20%	25%	30%	35%	40%
Power Restoration and Defense	15%	20%	25%	30%	35%	40%



Combat Concepts

Relative Difficulty (“Enemy Level Scaling”)

The Single-Player campaign uses a scaling system to determine enemy levels, providing a constant challenge in **combat** as you level. However, with access to more abilities, equipment, and **profiles**—and in conjunction with you simply becoming a more experienced player—it can feel “easier,” even on Hardcore and Insanity difficulty settings.

Mass Effect

This article is about the video game. For the franchise, see Mass Effect (franchise). For other uses, see Mass Effect (disambiguation).

This article is about the original game. For the sequel, see Mass Effect 2. For the third game, see Mass Effect 3. For the fourth game, see Mass Effect: Andromeda.

Mass Effect is a role-playing third-person shooter video game developed by BioWare and published by Microsoft Game Studios for the Xbox 360 in November 2007. It is the first game in the Mass Effect franchise. The game was released for Microsoft Windows in November 2008 and for PlayStation 3 in May 2012. It was released digitally for Xbox One and PlayStation 4 in March 2014 as part of the Mass Effect: Trilogy compilation.

The player controls Commander Shepard, a human male or female soldier who is tasked with investigating the mysterious disappearance of a human colony. Shepard's actions and dialogue choices affect the story and the relationships with other characters, including the ability to romance them. The game's combat system allows the player to use weapons and biotic powers, which can be customized and upgraded. The player explores the galaxy in the Normandy SR-1 starship, visiting planets and space stations.

Mass Effect received critical acclaim, with praise for its story, characters, and gameplay. It won numerous awards and sold over 2.7 million copies by the end of 2008. The game's success led to the development of two sequels, Mass Effect 2 and Mass Effect 3, and a prequel, Mass Effect: Andromeda.

Gameplay

Mass Effect is a role-playing third-person shooter video game. The player controls Commander Shepard, a human male or female soldier who is tasked with investigating the mysterious disappearance of a human colony. Shepard's actions and dialogue choices affect the story and the relationships with other characters, including the ability to romance them. The game's combat system allows the player to use weapons and biotic powers, which can be customized and upgraded. The player explores the galaxy in the Normandy SR-1 starship, visiting planets and space stations.

Combat

Combat is a mix of third-person shooting and role-playing elements. The player can use weapons and biotic powers, which can be customized and upgraded. The player can also use the environment to their advantage, such as taking cover behind objects or using explosive barrels to damage enemies.

- **Weapons**: The player can use a variety of weapons, including assault rifles, shotguns, sniper rifles, pistols, and heavy weapons. Weapons can be customized with different barrels, clips, and scopes.
- **Biotic powers**: The player can use biotic powers, which are psychic abilities that can be used to manipulate the environment and enemies. Biotic powers include throwing objects, creating barriers, and lifting enemies into the air.
- **Tech powers**: The player can use tech powers, which are technological abilities that can be used to hack enemies, create drones, and heal allies.
- **Squad commands**: The player can command their squad members to attack, defend, or use their special abilities.

Exploration

The player explores the galaxy in the Normandy SR-1 starship, visiting planets and space stations. The player can scan planets for resources and artifacts, and can land on planets to explore them in more detail.

- **Planet scanning**: The player can scan planets for resources and artifacts. Scanning is done by flying the Normandy SR-1 over the planet and using the ship's sensors.
- **Planet exploration**: The player can land on planets to explore them in more detail. Planet exploration is done in the Mako, a six-wheeled armored vehicle.
- **Space stations**: The player can visit space stations to buy and sell equipment, upgrade their weapons and armor, and talk to other characters.

Dialogue

The player can choose what Shepard says in conversations with other characters. The player's choices affect the story and the relationships with other characters.

- **Paragon**: The player can choose to be a paragon, which means they are kind, helpful, and diplomatic.
- **Renegade**: The player can choose to be a renegade, which means they are aggressive, intimidating, and willing to do whatever it takes to get the job done.
- **Neutral**: The player can choose to be neutral, which means they are somewhere in between paragon and renegade.

Romance

The player can romance several characters in the game. The player's choices affect the relationships with other characters, including the ability to romance them.

- **Ashley Williams**: Ashley is a human soldier who is a member of the Normandy SR-1's crew. She is a paragon character.
- **Kaidan Alenko**: Kaidan is a human biotic who is a member of the Normandy SR-1's crew. He is a paragon character.
- **Liara T'Soni**: Liara is an asari scientist who is a member of the Normandy SR-1's crew. She is a neutral character.
- **Garrus Vakarian**: Garrus is a turian soldier who is a member of the Normandy SR-1's crew. He is a renegade character.
- **Tali'Zorah nar Rayya**: Tali is a quarian engineer who is a member of the Normandy SR-1's crew. She is a neutral character.

Leveling

The player can level up their character by gaining experience points. Experience points are gained by completing missions, killing enemies, and exploring the galaxy. When the player levels up, they can choose to improve their character's abilities.

- **Health**: The player can increase their character's health.
- **Biotic power**: The player can increase their character's biotic power.
- **Tech power**: The player can increase their character's tech power.
- **Weapon skills**: The player can increase their character's skills with different weapons.

Inventory

The player can carry a limited amount of equipment. The player can buy and sell equipment at space stations, and can also find equipment in the game world.

- **Weapons**: The player can carry a variety of weapons, including assault rifles, shotguns, sniper rifles, pistols, and heavy weapons.
- **Armor**: The player can wear different armor, which provides different levels of protection.
- **Ammunition**: The player can carry different types of ammunition for their weapons.
- **Medi-gel**: The player can use medi-gel to heal themselves.
- **Grenades**: The player can carry different types of grenades.

Vehicles

The player can drive the Mako, a six-wheeled armored vehicle, on planets. The Mako is used to explore planets and to fight enemies.

- **Mako**: The Mako is a six-wheeled armored vehicle that can be driven on planets. It is used to explore planets and to fight enemies.

Multiplayer

Mass Effect does not have a multiplayer mode.

Plot

Mass Effect is set in the year 2183, 26 years after the events of the First Contact War between humanity and the Turian Hierarchy. Humanity has since become a major power in the galaxy, thanks to the discovery of the Mass Relay network, which allows for faster-than-light travel. The player controls Commander Shepard, a human male or female soldier who is tasked with investigating the mysterious disappearance of a human colony.

Act 1

Shepard is assigned to the Normandy SR-1, a prototype stealth ship, and is sent to the Eden Prime colony to investigate the disappearance of the colonists. Upon arriving, Shepard discovers that the colonists have been killed by a group of Geth, a synthetic race that has been at war with the Quarians for centuries. Shepard also discovers a Prothean beacon, which contains a message from the Protheans, an ancient race that disappeared 50,000 years ago.

- **Eden Prime**: Shepard arrives at Eden Prime and discovers that the colonists have been killed by the Geth.
- **Prothean beacon**: Shepard discovers a Prothean beacon, which contains a message from the Protheans.
- **Normandy SR-1**: Shepard returns to the Normandy SR-1 and reports the findings to Admiral Hackett.

Act 2

Shepard is ordered to investigate the Citadel, the political center of the galaxy, and to find out why the Council, the governing body of the galaxy, has been silent about the Geth attack. Shepard also discovers that Saren Arterius, a Spectre, an elite agent who is above the law, is working with the Geth.

- **Citadel**: Shepard arrives at the Citadel and meets with the Council.
- **Saren Arterius**: Shepard discovers that Saren is working with the Geth.
- **Virmire**: Shepard travels to Virmire to investigate a Prothean artifact.

Act 3

Shepard discovers that Saren is working with the Geth to build a Reaper, a massive synthetic ship that is capable of destroying entire civilizations. Shepard must stop Saren and the Geth before they can complete the Reaper.

- **Saren Arterius**: Shepard confronts Saren and the Geth.
- **Reaper**: Shepard discovers that the Reaper is being built on the Citadel.
- **Sovereign**: Shepard destroys the Reaper and Saren is killed.

Act 4

Shepard returns to the Citadel and is hailed as a hero. However, Shepard is then framed for the murder of a Council member and is forced to go on the run. Shepard must clear their name and find the real killer.

- **Citadel**: Shepard returns to the Citadel and is framed for murder.
- **Council**: Shepard is forced to go on the run.
- **Real killer**: Shepard finds the real killer and clears their name.

Act 5

Shepard discovers that the Reapers are planning to invade the galaxy and that they are using the Mass Relay network to do so. Shepard must find a way to stop the Reapers before they can destroy the galaxy.

- **Reapers**: Shepard discovers that the Reapers are planning to invade the galaxy.
- **Mass Relay network**: Shepard discovers that the Reapers are using the Mass Relay network to invade the galaxy.
- **Stop the Reapers**: Shepard must find a way to stop the Reapers before they can destroy the galaxy.

Act 6

Shepard travels to the Citadel and confronts the Reapers. Shepard must choose whether to destroy the Reapers, control the Reapers, or synthesize the Reapers with organic life.

- **Citadel**: Shepard travels to the Citadel and confronts the Reapers.
- **Destroy the Reapers**: Shepard destroys the Reapers.
- **Control the Reapers**: Shepard controls the Reapers.
- **Synthesize the Reapers**: Shepard synthesizes the Reapers with organic life.

Act 7

Shepard returns to the Normandy SR-1 and is hailed as a hero. Shepard is then given the choice to continue fighting the Reapers or to retire.

- **Normandy SR-1**: Shepard returns to the Normandy SR-1 and is hailed as a hero.
- **Continue fighting the Reapers**: Shepard continues fighting the Reapers.
- **Retire**: Shepard retires.

Development

Mass Effect was developed by BioWare and published by Microsoft Game Studios for the Xbox 360 in November 2007. It is the first game in the Mass Effect franchise. The game was released for Microsoft Windows in November 2008 and for PlayStation 3 in May 2012. It was released digitally for Xbox One and PlayStation 4 in March 2014 as part of the Mass Effect: Trilogy compilation.

Concept

The concept for Mass Effect was created by BioWare's Casey Hudson, who was the game's director. Hudson wanted to create a game that was a mix of role-playing and third-person shooter elements. He also wanted to create a game that was set in a large, open galaxy.

- **Casey Hudson**: Hudson was the game's director.
- **Role-playing elements**: Hudson wanted to create a game that had role-playing elements, such as character customization and dialogue choices.
- **Third-person shooter elements**: Hudson wanted to create a game that had third-person shooter elements, such as gunplay and cover mechanics.
- **Large, open galaxy**: Hudson wanted to create a game that was set in a large, open galaxy.

Design

The design of Mass Effect was led by BioWare's Drew Karpyshyn, who was the game's lead designer. Karpyshyn wanted to create a game that was both accessible to new players and challenging for experienced players. He also wanted to create a game that had a strong story and memorable characters.

- **Drew Karpyshyn**: Karpyshyn was the game's lead designer.
- **Accessible to new players**: Karpyshyn wanted to create a game that was accessible to new players.
- **Challenging for experienced players**: Karpyshyn wanted to create a game that was challenging for experienced players.
- **Strong story**: Karpyshyn wanted to create a game that had a strong story.
- **Memorable characters**: Karpyshyn wanted to create a game that had memorable characters.

Art

The art for Mass Effect was created by BioWare's Derek Watts, who was the game's art director. Watts wanted to create a game that had a realistic and immersive art style. He also wanted to create a game that had a unique and memorable art style.

- **Derek Watts**: Watts was the game's art director.
- **Realistic and immersive art style**: Watts wanted to create a game that had a realistic and immersive art style.
- **Unique and memorable art style**: Watts wanted to create a game that had a unique and memorable art style.

Music

The music for Mass Effect was composed by BioWare's Sam Hulick, who was the game's composer. Hulick wanted to create a game that had a score that was both epic and emotional. He also wanted to create a game that had a score that was memorable.

- **Sam Hulick**: Hulick was the game's composer.
- **Epic and emotional score**: Hulick wanted to create a game that had a score that was both epic and emotional.
- **Memorable score**: Hulick wanted to create a game that had a score that was memorable.

Release

Mass Effect was released for the Xbox 360 in November 2007. It was released for Microsoft Windows in November 2008 and for PlayStation 3 in May 2012. It was released digitally for Xbox One and PlayStation 4 in March 2014 as part of the Mass Effect: Trilogy compilation.

- **Xbox 360**: Mass Effect was released for the Xbox 360 in November 2007.
- **Microsoft Windows**: Mass Effect was released for Microsoft Windows in November 2008.
- **PlayStation 3**: Mass Effect was released for PlayStation 3 in May 2012.
- **Xbox One and PlayStation 4**: Mass Effect was released digitally for Xbox One and PlayStation 4 in March 2014 as part of the Mass Effect: Trilogy compilation.

Reception

Mass Effect received critical acclaim, with praise for its story, characters, and gameplay. It won numerous awards and sold over 2.7 million copies by the end of 2008. The game's success led to the development of two sequels, Mass Effect 2 and Mass Effect 3, and a prequel, Mass Effect: Andromeda.

- **Critical acclaim**: Mass Effect received critical acclaim, with praise for its story, characters, and gameplay.
- **Awards**: Mass Effect won numerous awards.
- **Sales**: Mass Effect sold over 2.7 million copies by the end of 2008.
- **Sequels**: Mass Effect led to the development of two sequels, Mass Effect 2 and Mass Effect 3.
- **Prequel**: Mass Effect led to the development of a prequel, Mass Effect: Andromeda.

Legacy

Mass Effect is considered to be one of the most influential video games of all time. It helped to popularize the role-playing third-person shooter genre and it created a memorable and immersive universe. The game's success led to the development of two sequels, Mass Effect 2 and Mass Effect 3, and a prequel, Mass Effect: Andromeda.

- **Influential**: Mass Effect is considered to be one of the most influential video games of all time.
- **Popularized the genre**: Mass Effect helped to popularize the role-playing third-person shooter genre.
- **Memorable universe**: Mass Effect created a memorable and immersive universe.
- **Sequels**: Mass Effect led to the development of two sequels, Mass Effect 2 and Mass Effect 3.
- **Prequel**: Mass Effect led to the development of a prequel, Mass Effect: Andromeda.

Combat Concepts

Squadmate Orders

For the most part, your squadmates fight using their own judgment. Their powers and specific weapon attacks cannot be directly managed; however, you can give them orders for positioning and target focusing.

Focus Fire: Highlight an enemy with your soft-aim target (indicated by the large rectangular brackets around the enemy), and press the Left/Right Squadmate Orders command to have your squadmate direct their attention to your target. This is useful for prioritizing and eliminating high-threat targets on the battlefield.

Take Cover: Aim your reticle at a cover-giving object (e.g., blast shields and wall corners) to have your squadmate safely establish a defensive posture. Using this tactic meticulously is vital on higher difficulty settings against enemies like the Anointed.

Regroup/Defend Ryder: Holding the Left/Right Squadmate Orders (or Both Squadmate Orders) command calls one or both of your squadmates back to your position to fight with you. This is particularly useful if they're caught out of position and in danger of being knocked unconscious, in case you need to revive them. Get accustomed to this command for difficult encounters.

MASS EFFECT ANDROMEDA

Combat Concepts

Stats (Clarification of Terms)

The following is a compilation of attributes that can be modified by equipment and skills, in which their effects aren't entirely obvious or aren't thoroughly explained in the game's tutorials.

Accuracy: Increased accuracy reduces the "spread range" of a firearm, making it more precise.

Damage Over Time: The value here is the **damage applied per second** while the effect is active. "Damage Over Time: 20" over "Duration: 5" means 100 total damage.

Damage Resistance: Damage resistance affects how much damage a character takes. Effective damage resistance is scaled and begins to diminish after a character builds over 100 DR. Additionally, damage resistance does not apply to shields. See Formulas and Calculations for details.

Force: This is the amount of physical displacement, "kick," or "knockback" an attack or power inflicts.

Health and Shield Delay Reduction: Reduces the time it takes for health and shields to regenerate since you've taken damage.

Health Threshold: This is the amount of health the character must drop below before an effect is triggered.

Penetration Damage: Attacks with penetration damage can pierce cover, usually at a reduction of their normal damage.

Power Cost Shield Reduction: Reduces the cost of shields consumed for certain powers (such as Shield-Powered Lance, a Rank 6 upgrade)

Power Restoration and Defense: Affects the value of all sources of healing and buffs, as well as the effectiveness of protective powers like Backlash.

Radius: The amount of area an ability affects, in terms of meters. See the following screenshots for a visual representation of distance.

Recharge Speed: The speed at which powers recharge before becoming available for use again. Recharge speed is decreased when weapon encumbrance is increased.

Shotgun Pellet Spread Reduction: An increase in this stat causes shotgun fire to be focused in a smaller area, dealing more damage from farther distances.

Stability: A weapon's resistance to recoil effects. Increased weapon stability means more accuracy while firing.

Combat Concepts

Supply Crates (Ammo, Powers, Health)

Supply crates carry four “bars’” worth of supply, with each bar representing 25% of your total ammo or health. When you touch a crate, all of your missing resources are restored, provided there’s enough in the crate. If there are supplies left, you can return later to resupply again.

Crates do not automatically refill over time in Single-Player as they do in Multiplayer modes.

Combat Concepts

Targeting

There exist two types of targeting systems in terms of combat: One is called “hard aim” and the other, “soft aim.”

Hard aim is the use of your reticle to determine precisely where your gunshots fire. Although attacks that use this aim type require accuracy on the user’s end, they come with the bonus of enabling critical hits (hitting enemy weak points). All guns use hard-aim targeting. The biotic power Lance is unique to other powers since it uses hard-aim targeting. As such, it can inflict critical damage.

Soft aim is a lock-on mechanism used by most enemy-targeting powers. Your soft-aim target is represented by a surrounding bracketed rectangular reticle. Powers using this aim type do not require as much accuracy, as the power seeks outs its target. However, soft aim does not make the power guaranteed, as obstacles between you and your target can still block certain projectile powers.

MASS EFFECT ANDROMEDA

Combat Concepts
Weapons

MELEE

Melee attacks are powerful close-range offensive options that deal extraordinary amounts of damage. They're particularly handy when your gun clip is empty and you need to quickly deal some damage to an enemy within range (instead of waiting for the reload to complete).

GROUNDED VS. AIRBORNE

There are two types of melee attacks: One is performed while grounded, using your equipped melee weapon, and the other is an omni-tool-based attack executed while airborne, landing with a ground-pound effect. This airborne melee attack does not factor in your equipped melee weapon when it comes to damage or force, although it does scale with melee damage bonuses from other sources like the Vanguard profile.

OMNI-BLADES, AMPLIFIERS, GAUNTLETS

Hand-based melee attacks vary in speed and utility depending on the technology behind them: Remnant **cryo gauntlets** are heavy and slow, but cause a cryo priming effect. **Omni-blades** and biotic **amplifiers** are lighter and faster than gauntlets, although biotic amplifiers are more forceful.

DAGGERS

Angaran daggers have quick startup speeds. The **electric firaan** stuns enemies with a jolting current, making for an excellent tech combo primer.

HAMMERS

Krogan hammer attacks are slow, but deal an extraordinary amount of damage and have much more force behind them.

SWORDS

Kett and asari sword swipes are deadly, but much slower than hand-based attacks. Asari sword attacks are preceded by a biotic blink forward.

WEAPON ENCUMBRANCE, RECHARGE PENALTY

All guns are assigned a weight value, which is used to determine a resulting recharge penalty to applicable powers. This may affect your weapon choice, especially if you plan to use your rechargeable powers frequently. At the loadout menu, your weight threshold is displayed as a blue bar. Equipping heavy weapons or too many of them may break this threshold, penalizing all power recharge speeds. Weapon-encumbrance penalties can be mitigated by investing points into specific weapon skills that reduce weapon weight or provide extra weight capacity.

GUNS

Guns come in four distinct categories—pistols, assault rifles, shotguns, and sniper rifles—each with a general set of strengths and weaknesses. However, guns within a category may have considerably different properties based on their technology, so some of these strengths and weaknesses may not apply.

PISTOLS

The pistols category contains all handguns and SMGs. Handguns deal moderate damage and have a limited clip capacity, but are accurate and provide more stability than other guns. Handguns are strong at mid-range and, with proper aim, can deal impressive damage to weak points.

SMGs offer an extremely high rate of fire with decent accuracy, but deal very low damage per shot. They're similar to assault rifles, but aren't as effective at mid-to-long range. SMGs are exceptional for finishing off weakened enemies and for consistent damage output, thanks to large magazine capacities.

Pistols are the lightest weapons, making them the preferred weapon for power-reliant combatants.

ASSAULT RIFLES

This category contains conventional assault rifles as well as certain beam weapons and grenade launchers.

Assault rifles usually have a high rate of fire and deal light-to-moderate damage per shot, but are inaccurate without tight aim. They provide the best consistent damage and excel in mid-range combat.

Assault rifles, on average, are significantly heavier than pistols, but lighter than shotguns and sniper rifles. Assault rifles are flexible and can fit into most play styles.

> **DISTANCE—ACCURACY AND DAMAGE**
>
> Although distance does not affect damage (i.e., no damage falloff), weapon accuracy is effectively hampered at long range, indirectly causing a lower damage output. Keep this in mind, particularly with high-rate-of-fire guns like SMGs and assault rifles!

SHOTGUNS

Shotguns are high-impact heavy guns excelling at decimating enemies within range, but are ineffective at dealing with far-off threats. As such, using a shotgun carries an inherent risk because of its limited effective range.

Shotguns fire several low-damage pellets. The shotgun damage value displayed in its properties is the sum of all pellets fired, so optimizing shotgun damage can only be done at close range. Additionally, a hidden damage bonus is applied to shotgun pellets against armor-based enemies in order to compensate for the flat damage reduction provided by enemy armor.

"Tank"-type characters can usually make the most out of shotguns, as they're built to withstand damage. Shotguns are the second heaviest class of weapons, making them less than ideal for certain biotic and tech specialists.

SNIPER RIFLES

Sniper rifles are all equipped with a high-zoom scope and are specifically designed with a clear purpose: to take out threats safely from long range, excelling at targeting enemy weak points.

Clip size can vary, but the most powerful sniper rifles are single shot, requiring a reload between each. While sniper rifles are arguably the most difficult guns to use effectively, they highly reward players with precise aim.

With the addition of hover fire, sniper rifles can be paired with Tactical Cloak for an effective aerial-ambush play style. Additionally, using a scoped rifle (or any **scoped firearm** for that matter), allows for increased "soft aim" target locks. For instance, If you can't target an enemy in the distance with your Overload, try zooming in with your scope and then firing your power.

Sniper rifles are the heaviest weapon type, encouraging intelligent power-use management. Alternatively, sniper rifle users can opt to use cell-consuming powers (without recharge times) like Trip Mine to mitigate this effect.

Enemies

Enemy Categories

There are four main enemy categories in *Mass Effect: Andromeda*—Kett, Remnant, Outlaws, and Wildlife.

The kett are the primary antagonists in the game, so expect to face off with these hostiles frequently as you progress through the main mission (Priority Ops). Like structured military units from the Milky Way, these aliens are armed with firearms and explosives.

The Remnant are VI (virtual intelligence)—unlike the geth who are AI (artificial intelligence), they are not self-aware and are simply programmed to defend themselves and their vaults.

"Outlaws" is an all-encompassing category of factions who've gone rogue. This group consists of several species, including angaran extremists known as the Roekaar, various pirate outfits, and two warring factions on Kadara, the Collective and the Outcasts. Most Outlaw-type enemies are found in optional mission areas like Elaaden and H-047C, as well as in Loyalty Missions.

While most wildlife enemies are minor annoyances, a few found on Havarl and Voeld are deadly.

MASS EFFECT
ASARI

Species
Asari

PHYSICAL FEATURES

Asari are tall and human like humans and are bipedal too. They have double eyes and no discernible nose ears, yet their hearing is very acute. Asari have a humanoid appearance, with blue skin and a ridge of head tentacles, or "head crests". They have 4 fingers and 4 toes, but unlike the others of Mankind is unopposed to the average human.

ANATOMY

Clearly, the Asari are an aggressive, expansionist power that conquers by cultural and genetic assimilation. "Conquered" species are absorbed into Asari culture and their genetic material is added to the Asari gene pool.

The world for these Crucible race-ed surviving three separating their power. Although the members of each race are free to choose their own path in life, they are all expected to contribute to the greater good of the Asari. The Asari are a matriarchal society, with females being the dominant gender. The Asari system government has been running an military group or system of economic power for over 1,000 years, and has been very successful.

THE CYCLOPEAN

STYLE

Cliff's Analysis The cyclopean The only primary frontier issues, who carries a plasma artwork rifle for deadly precision.

Role Close Team Foot Line

Base Form Asari

Health & Resistance Normal health, no immunities

Mobility Detailed Quick and stable, mostly hurtle over barriers

Preferred Range Distance

Weapon Affinities Cliffs Assault Rifle, Grenades, Attack Launchers,

CURRENT MEDIA EDIT

As Fortuna grows, the Citadel Job department upgrade, dedicated by the Rocket of the attacks and heavy gravity. Cliffs Assault Rifle, Grenades, Attack Launchers, Sniper Rifle, Shotguns, Pistols, Heavy Weapons, Melee, Tech, Biotic, Support, Tank. Some group powers used by Asari have surprising effects, and are not found with Mankind or any species in galaxy.

BIOTICISM

Biotic is the ability of Asari to create objects on the surface of the planets. They're not difficult to take of they're to the way to the to the battlefield, but unfortunately the are surprising for the rest of Asia Asari in the Asari flashing, while of their allegic "Lasting Fleeting Asari are immune to biotic.

Asari are also known for their ability to control and use mass effects on their own bodies and for their ability to manipulate the mass effects of other objects. Asari are also known for their ability to create and use biotic fields, which can be used for a variety of purposes, including defense, offense, and manipulation of the environment.

CURRENT MEDIA EDIT

STYLE

Cliff's Analysis A tall asari biotic! Not normal to see biotic powers on their own, but it's more than surprising asari to see them in battle. Asari are known for their ability to create and use biotic fields, which can be used for a variety of purposes, including defense, offense, and manipulation of the environment. Asari are also known for their ability to control and manipulate the mass effects of other objects.

Role Close Combat

Base Form Asari

Health & Resistance Normal, protected from most shooting effects while biotics are up

Mobility Detailed Quick and agile when they can, not quick, well

Preferred Range Medium

Weapon Affinities Assault Rifles, Shotguns, Pistols, Heavy Weapons, Melee, Tech, Biotic, Support, Tank.

CURRENT MEDIA EDIT

MASS EFFECT ANDROMEDA

Expertise
Retronaut

BLASSAUVT

The Blassaut is the primary assault rifle for the Archangel. It shares an advanced upgrade tree dedicated to the Tempest Assault Rifle, which is unlocked after completing the Archangel's loyalty mission. Blassaut upgrades can be found in Supply Caches, purchased from Vendors, or looted from Enemies.

LEVEL 1

Skills Available: The Blassaut is the first weapon unlocked with a Rifle and pistol in clip out of its long range allows it can't match a Rifle's configuration. It lacks the Overcharge and Incendiary abilities, but has the Impulse Accelerator, Impulse Amplifier, and Concussive Shot. Impulse Accelerator increases the Blassaut's rate of fire by 10 percent per level, while Impulse Amplifier increases damage by 10 percent per level. Concussive Shot has a chance to stagger enemies, and it increases the chance by 10 percent per level.

Weak Point: Center "eye"

Vulnerable To: Electric, protected from most disabling effects while shields are up

Resistant To: Cryo

Health & Resistance: Normal, protected from most disabling effects while shields are up

Mobility Options: Agile, highly mobile thanks to Hyperion Legs, can recover from knockdowns

Preferred Range: Medium to Long

Found In/Vendor: Training Bayou

CHARIOT ARCHTURR

The Chariot Archturret is a mechanical ground enemy, and its first Chariot, piloting your own Archangel Cruiser. They can self-construct when close when a close range threat provokes itself. Assemblers can also join it to "summon" (Assemblers + Chariot Archturret).

STATTACKING

Assemblers should be identified as high priority targets, and the Chariot Archturret should be avoided. Chariot Archturrets are slow, but self-construct when close when a close range threat provokes itself. Assemblers can also join it to "summon" (Assemblers + Chariot Archturret).

LEVEL 1

Skills Available: The Archturret's ability to shoot at a distance and to cover. It can still pose and deploy Assemblers to the battlefield, but it can't use its Overcharge ability.

Weak Point: Center "eye"

Vulnerable To: Electric

Resistant To: Cryo

Health & Resistance: Normal, no immunities

Mobility Options: Agile, highly mobile thanks to Hyperion Legs, can recover from knockdowns

Preferred Range: Medium to Long

Found In/Vendor: Training Bayou

HEXALUS ARC

The Hexalus is a mechanical ground enemy, and its first Chariot, piloting your own Archangel Cruiser. They can self-construct when close when a close range threat provokes itself. Assemblers can also join it to "summon" (Assemblers + Chariot Archturret).

STATTACKING

Assemblers should be identified as high priority targets, and the Chariot Archturret should be avoided. Chariot Archturrets are slow, but self-construct when close when a close range threat provokes itself. Assemblers can also join it to "summon" (Assemblers + Chariot Archturret).

LEVEL 1

Skills Available: The Archturret's ability to shoot at a distance and to cover. It can still pose and deploy Assemblers to the battlefield, but it can't use its Overcharge ability.

Weak Point: Center "eye"

Vulnerable To: Electric

Resistant To: Cryo

LEVEL 1

Skills Available: The Archturret's ability to shoot at a distance and to cover. It can still pose and deploy Assemblers to the battlefield, but it can't use its Overcharge ability.

Enemies

Outlaws

Outlaws include a wide array of hostiles. The following is data for notable enemy types within this group of bandits. These enemies are common in Secondary Ops missions (optional side quests such as Loyalty Missions), as well as in Multiplayer mode.

ADHI

VITALS

SAM's Analysis: An oversized dog-like creature trained and used by Outlaws to rush at enemies.

Role: Cover Flusher

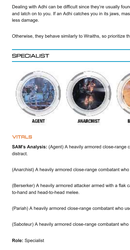
Weak Point: Head

Health & Resilience: Normal, no immunities

Mobility Options: Quick run speed

Preferred Range: Close

Weapons/Attacks: Melee, Grab and Bite (treatable by mashing designated button) (1)



Bio Material: Rendersable Plates

COMBAT BEHAVIOR

Similar to the kett's attack dogs, Adhi are used by the Outlaws to flush enemies out of cover. While they don't have camouflage, these vicious war beasts can sink their teeth into their targets, holding their prey in place.

STRATEGIES

Dealing with Adhi can be difficult since they're usually found in tight rooms and corridors where they sneak up around corners and latch on to you. If an Adhi catches you in its jaws, mash the designated button shown on the screen to break free, taking less damage.

Otherwise, they behave similarly to Wraiths, so prioritize them accordingly. See strategies for **Wraiths**.

SPECIALIST

VITALS

SAM's Analysis: (Agent) A heavily armored close-range combatant who deploys holographic doubles to deceive and distract.

(Anarchist) A heavily armored close-range combatant who fancies Inferno Grenades.

(Berserker) A heavily armored attacker armed with a flak cannon at medium-to-short range. When enraged, it revels in hand-to-hand and head-to-head melee.

(Pariah) A heavily armored close-range combatant who uses biotics to create a shield and attempt to flank.

(Saboteur) A heavily armored close-range combatant who can siphon shields.

Role: Specialist

Weak Point: Head

Health & Resilience: Armored; immune to biotic effects, but weak to burning and freezing effects

Mobility Options: Standard

Preferred Range: Close

Weapons/Attacks: Various Shotguns

COMBAT BEHAVIOR

These "specialist" type enemies are exiles and outlaws from various species. Although they're all considered close-range combatants, each has unique powers. Salarian Agents can create body doubles, turian Anarchists throw grenades, krogan Berserkers rain shrapnel with flak cannons, asari Pariahs have access to Backlash, and angaran Saboteurs can cast Energy Drain.

STRATEGIES

These enemies are usually the toughest in a bunch. They're heavily armored, so they take less damage from submachine guns and assault rifles, and they also resist biotic effects. Most of these specialists use shotguns, so staying outside of medium range is preferable. They're also all humanoid, so they take extra damage from headshots. Having access to Incinerate, incendiary ammo, and Flamethrower is recommended if you plan on completing Loyalty Missions, as many of these enemies make appearances in those operations. Be particularly wary of the Pariahs (commonly found on H-047C), as they can reflect your attacks with Backlash.

HYDRA

VITALS

SAM's Analysis: A lumbering combatant in a makeshift mecha suit that unloads using a variety of devastating weapons as it advances. Boosters can be used to engage at close range.

Role: Suppressor, Siege Unit

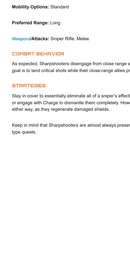
Weak Point: Back, Head

Health & Resilience: Armor, very high health; immune to biotic effects, weak to fire and ice damage

Mobility Options: Slow walk speed; slower-than-normal turn speed

Preferred Range: Close to Medium

Weapons/Attacks: Grab and Slam Attack, Homing Missiles, Hand Cannon, Melee Swing (1)



COMBAT BEHAVIOR

Hydras move slowly, hunting down their target with a wide arsenal selection. At medium range, they can either fire their hand cannon for consistent, high damage, or lock on to their target before launching a barrage of homing missiles.

STRATEGIES

Like most suppressor units, Hydras are dangerous to fight out in the open. Their homing missiles are particularly dangerous, although avoidable if you're near cover. The lock-on targeting is telegraphed with distinct visual and sounds; once you're alerted, find cover quickly. Fighting up close isn't necessarily a good idea, as Hydras employ devastating grapple-and-slam attacks, potentially killing you in one shot. If you're going to charge in, evade out to bait out the grapple, then punish the whiff with your own attacks. Attacking the fuel cell on its back deals extra damage—more than attacking its head. If you have Tactical Cloak, you can sneak behind a Hydra to deliver a huge shotgun blast. Otherwise, using burn effects is ideal against these mecha warriors. Alternatively—because of its slower turn speed—you can jump over its melee swing, perform a 180, and shoot at its back to land critical hits.

As with most high-health suppressor enemies, deal with lower-health enemies before turning your attention to a Hydra. Make sure to do so behind cover, though. Taking a barrage of homing missiles could mean an instant game over.

RAIDER

VITALS

SAM's Analysis: A basic assailant, outfitted with mid- to long-range weaponry.

Role: Cover Taker

Weak Point: Head

Health & Resilience: Normal, no immunities

Mobility Options: Standard, similar to the Chosen

Preferred Range: Medium to Long

Weapons/Attacks: Assault Rifle, Cover-Flushing Grenades

COMBAT BEHAVIOR

Standard cover taker, preferring medium- to long-range skirmishes.

STRATEGIES

This standard low-ranking soldier can be treated as such; take it out with biotic effects or sniping headshots. Raiders are usually paired with a commanding officer, such as an Agent, Anarchist, or Pariah, so stay perceptive and assess each battle accordingly.

See strategies for **the Chosen**.

SHARPSHOOTER

VITALS

SAM's Analysis: A fleet-of-foot-and-jet-pack long-range assassin, armed with a long-range weapon.

Role: Sniper, Suppressor

Weak Point: Head

Health & Resilience: Shielded, protected from most disabling effects while shields are up

Mobility Options: Standard

Preferred Range: Long

Weapons/Attacks: Sniper Rifle, Melee

COMBAT BEHAVIOR

As expected, Sharpshooters disengage from close range any chance they get (usually after a melee attack). Their primary goal is to land critical shots while their close-range allies provide a distraction.

STRATEGIES

Stay in cover to essentially eliminate all of a sniper's effectiveness. Peek out to snipe them with your own long-range attacks, or engage with Charge to dismantle them completely. However, because they're shielded, you have to make a commitment either way, as they regenerate damaged shields.

Keep in mind that Sharpshooters are almost always present in missions relating to Eisden, Kadara, and other Secondary Ops-type quests.

Chapter 6
Wildlife

Wildlife come in a few distinct flavors: there are insect-like crustaceans that aren't too threatening, even in numbers, and there are much bigger threats, comparable to dinosaurs from Earth.

Generally, wildlife on their own aren't particularly dangerous as you come across them out in the open. You can drive away from them in your Nomad, and they usually don't protect vital objectives (although there are unique cases of this). In specific groupings and environments, some wildlife can cause headaches, especially on the lush planet of Havarl.

No special notes are required for handling these so-called "enemies." Wildlife can be thought of as resources to hunt for your bio material collection.

ARKND (SPITBUG)

Summary: The most trivial of critters. Spitbugs can simply be run over with the Nomad (there's even a mission with this specific objective).

Bio Material: Soft Chitin

CREEPER

SAW's Analysis: Creepers seem to maintain and support Remnant hardware and systems. They make rounds, likely assessing system functionality.

Creepers are technically Remnant, but look like arachnids. They're a minor nuisance at worst.

DRALL

SAW's Analysis: An oversized crab-like insect with an enormous, protruding headdress used for defense.

Summary: Drall can be found in swarms on Havarl. They're more resilient than other critters and may actually penetrate your defenses if you're overwhelmed.

Bio Material: Shell Filaments

KAERKYN

Summary: Small arthropods commonly found on Eos. Although easily handled by Ryder and company, Kaerykn can nerd and tear apart carcasses—such as those victim to war.

Bio Material: Shell Filaments

SHEMRYS

SAW's Analysis: An oversized beetle-like insect with multiple feelers and a hard carapace. It spits an irritating digestive enzyme.

Bio Material: Soft Chitin

CHALLYRION

SAW's Analysis: A savage quadruped predator that camouflages itself to sneak up to its prey.

Summary: Similar to the kett's attack Wraith, a Challyrion can cloak itself before pouncing on its target. However, they're usually found alone, not posing much of a threat to those well-equipped.

Bio Material: Scale Fibers

EROCH

SAW's Analysis: An aggressive, hard-charging carnivore with tough plates and protruding scales. They tend to be solitary hunters, or "loners," but may be encountered in small packs.

Summary: These are "*cracked*" Eriochs, as their behavior is identical to the kett's giant pets, although usually found alone in the wilds of Voeld, Havarl, and Kadara. See **Friend**.

ANCIENT EROCH

SAW's Analysis: Larger and more dangerous than its mundane version, the Ancient Eroch is a fearsome and frenzied carnivorous predator.

Ancient Eriochs are colored a claylot red and have much more health than normal Eriochs. However, they're extremely rare, only found in specific quests. They behave similarly to normal Eriochs, except with amplified strength and smaller weak-point areas. Incinerate, Invasion, and Flamethrower are effective still.

Bio Material: Eroch Fluid Sac, Renderable Plates

GALORN

SAW's Analysis: Immense hoofed creatures with plates that appear lit, and odd, colorful glands that span their face and jaw. Related to the Taurg, Galorn charge and headbutt when provoked.

Bio Material: Renderable Plates

RYLKOR

SAW's Analysis: A lanky, fish-tongued monotreme that lurches on its two hind legs. When provoked, it strikes from a distance with an astringent spit attack, at close range, it swipes adversaries with its agile tail.

Summary: Rylkors are commonly found on Kadara, Voeld, and Havarl. Their tail swipes deal a large amount of damage, but for the most part, they're easily avoidable with evades and distance. They have no known weak points.

Bio Material: Scale Fibers

TAURG

SAW's Analysis: A mammoth hoofed beast that barks its warning and, when attacked, rushes forward to stomp and headbutt.
